Commentary and Analysis

Wheat

Platts European Wheat Daily Commentary

- Black Sea wheat market stalls on weak demand
- French wheat prices drop as harvest nears

The Black Sea wheat market moved sideways on the day as traders assessed demand for new crop wheat amid minimal demand from Egypt, a ban on imports to Morocco till the end of July, and potential import restrictions from Turkey.

Russian 12.5% bids were at $243/metric ton, compared to $247/mt offers. CIF Egypt 12.5% was heard traded at $263/mt with buyers and offers at a $3/mt spread. “The FOB replacement cost is still in the mid $250s/mt,” one Russian seller said of the breakeven price to FOB, as traders assessed high domestic costs amid a strong ruble against a low export price. In May, Russian exports went mainly to Egypt (448,200 mt), Saudi Arabia (444,000 mt), Turkey (378,700 mt), Kenya (233,000 mt) and Libya (164,600 mt), according to the Russian Grain Union.

In Turkey, the harvest had begun in several regions, but it is delayed amid local rains. The state board TMO said it updated the purchase price for soft wheat from local producers to TL 16,500/mt ($359/mt) on June 2. It will also start selling wheat at TL 18,500 ($403/mt) from Oct. 1.

The Ukrainian wheat market was unchanged amid offers at $237/mt against $235/mt bids. Meanwhile, the French wheat declined by Eur 2/mt on the day, mirroring the falls in the futures market.

A France-based broker said that with wheat harvest nearing and crop data coming in, the physical supply is now outweighing the news cycle. “Price discovery will now be based on actual ground realities rather than geopolitical events,” he said.

Platts Asia Wheat Daily Commentary

- Australian wheat prices fall on rain, stronger currency
- South Korea buys US wheat at $253.72-$310.94/mt CFR

Platts assessed Australian Premium White wheat down $2/metric ton day over day at $282/mt on June 2, while Australian Standard White wheat with no protein guarantee also fell $2/mt to $274/mt, tracking lower value offers and a stronger Australian dollar against the US dollar.

Wheat traders saw a decline in Australian wheat prices, with one Singapore-based trader observing a $5/mt week-over-week drop amid rains in Australia.

“Prices have been softening, rain is a big factor due to farmers selling and currency has been a big factor too,” a second Singapore-based trader said.

The Australian dollar appreciated against the US dollar, with the Australian dollar trading at 71.83 US cents at 1630 SGT (0830 GMT) June 2, up 0.35% since the June 1 close.

A Vietnam-based feed wheat buyer said they had purchased a cargo of Black Sea feed wheat for the last half of June shipment on May 29 at $269/mt CFR, although other wheat market participants said the price was not available to the rest of the market.

“That level couldn’t work, I bid for feed wheat that had already sprouted at the level [but there was no deal],” a second Vietnamese buyer said.

In South Korea, a flour milling group purchased US-origin Soft White Wheat at $253.72/mt CFR, Hard Red Winter wheat at $288.16/mt and Northern Spring wheat at $310.94/mt through an import tender on May 29.

Platts is part of S&P Global Energy.

Platts Canada Wheat Daily Commentary

- Basis stable as traders look to forward shipments
- Farmers limit sales amid declining prices

Platts assessed Canada Western Red Spring Wheat 13.5% FOB Vancouver 30-45 days forward at $261.25/metric ton June 2, down $5.51/mt, as futures prices continued to decline.

The July (N) MIAX Hard Red Spring wheat futures contract fell 15 cents/bushel to $6.37/bu, and the September (U) contract fell 14 cents/bu to $6.615/bu.

Nearby export sales activity for CWRS remained limited for nearby shipment periods, with falling prices limiting farmer interest in committing to sales.

"Futures are oversold in my opinion, and farmers don't care that prices are much lower," an exporter said. "There's a big carry on the board and also lots of freight risk selling too far out. In general, it seems everyone is hand-to-mouth these days."

With falling cash prices, the basis for nearby shipments was anticipated to hold mostly stable until planting is completed and more is known about the new crop.

"Planting is keeping farmers busy, and things have been a bit late across the prairies due to recent rains," the exporter said.

Platts is part of S&P Global Energy.

Corn

Platts Asia Corn Daily Commentary

- South Korea buys corn at $264.29/mt CFR
- US PNW basis rises amid falling CBOT futures

Asian corn prices tumbled June 2 after a highly competitive South Korean corn import tender that saw offers lowered by about $5/metric ton week over week.

Platts assessed feed quality corn CFR Northeast Asia down $5.75/mt at $274.25/mt for cargoes arriving Aug. 31 to Sept. 30.

A South Korean feed miller concluded a tender June 2 for one Panamax cargo of import corn at $264.29/mt CFR Incheon for Oct. 20 arrival, world-wide origin optionality corn.

Market participants expect the tender deal to be executed with US Pacific Northwest corn as replacement levels were the most competitive June 2.

"Some [US PNW] export elevators are preparing the soybean exports to China, they have some room to export corn for now [to make space for soybeans]," said a South Korean local agent.

Meanwhile, a Singapore trader estimated that the seller who made the deal at the tender was "definitely selling short," due to expectations of "FOB prices going down later."

US Pacific Northwest corn basis offer indications for August shipment were reported higher day over day by 5 cents/bu at 135 cents/bu over September (U) Chicago Board of Trade futures contract.

However, CBOT corn futures fell day over day, with the September (U) contract down 3 cents/bu at 452.75 cents/bu June 2.

S&P Global CERA in its Weekly Corn and Minor Grains report May 29 noted that corn futures moved lower amid sharply lower energy markets and US planting progress.

Platts Latin America Corn Daily Commentary

- Premiums rise in Argentina
- Winter corn harvest reaches 0.6% in Brazil

Platts, part of S&P Global Energy, assessed Latin American FOB corn prices mixed on June 2, with FOB Santos prices falling and FOB Up River prices rising.

Argentine FOB Up River premiums for July loading increased during the day.

The Brazilian FOB Santos premiums for August loading were steady amid lower bids.

The US dollar to Brazilian real exchange rate stood at Real 5.0208/$1 as of 5:30 pm Brasilia time, down 0.33% day over day.

In Brazil's domestic market, prices remained steady in the Sorriso and Maringá regions, while they rose in the Rio Verde region.

On the spot market, a trade was heard in Primavera do Leste, with payment in July 2026. Another trade was reported in Guarapuava at Real 64.00/60 kg with payment in 32 days.

On the future market, trades were reported in the states of Goiás and Mato Grosso do Sul, with loading in July and August, and payment in September 2026.

The winter corn harvest began in the states of Mato Grosso and Tocantins, reaching 0.6% of the expected area, according to Conab data released June 1.

CBOT corn (Jul)	¢/bu	CBAAF00	440.50	-3.50
CBOT corn (Sep)	¢/bu	CBAAF02	448.00	-4.75

The summer corn harvest for the 2025-26 season reached 84.6% of the expected area as of May 29, down from 89.6% a year earlier.

In Mato Grosso, the harvest is progressing gradually across the state, including in dry areas. In Parana, damage caused by frosts over the past few weeks is now being accounted for. In Goias, persistent drought is shortening the cycle.

Platts US Corn Daily Commentary

- US corn prices fall on strong crop progress
- USDA reports 67% good-excellent corn condition
- Growers seek an end to fertilizer tariffs

US corn Platts outright prices were mixed on June 2, tracking a decline in Chicago Board of Trade futures amid pressure from strong crop progress.

On June 2, the CBOT July (N) future contracts decreased 3.50 cents during the business day, settling at $4.4050/bushel. While September (U) went down 4.75 cents in the same period, closing at $4.4800/bu.

After the market closed on June 1, the US Department of Agriculture released the Crop Progress data, which showed the first corn condition rating of the season at 67%, with the crop rated in good-to-excellent condition, slightly below last year's 69%. Corn emergence was reported at 76%, slightly ahead of the 74% average.

The data showed that the states with the highest share of corn in good and excellent condition are Iowa at 82%, followed by Wisconsin at 79%, Minnesota at 76%, Pennsylvania at 74%, and Kentucky at 70%.

"We still might get some weather bounces coming up, but it's very nice-looking corn planted in Iowa with excellent growing conditions," an Iowa-based broker said.

USDA also reported that corn planting was at 93%, slightly above the 92% five-year average.

At the end of the planting season, the National Corn Growers Association called for an end to countervailing duties on phosphate fertilizers.

"Net farm income has fallen roughly 31 percent from its 2022 peak, fertilizer prices are up more than 150 percent since 2020, and Chapter 12 farm bankruptcies have surged to their highest levels in several years," the NCGA said in a statement June 1.

The NCGA noted that farmers are in their fourth consecutive year of losses, and that countervailing duties only exacerbate their financial outlook and could mean the difference between sustaining family farms for generations to come and seeing legacies come to an end.

Platts, part of S&P Global Energy, assessed on June 2 the outright price for June shipments to New Orleans in the incoterm CIF at $204.55/metric ton and for July shipments at $208.45/mt.

The outright price for FOB Gulf for August was assessed at $212.01/mt.

Platts European Corn Daily Commentary

- Black Sea corn prices at $238.50/mt
- June CVB offers in the $244-$245/mt range

The Black Sea corn market was unchanged June 2 amid limited trading activity and similar bids and offers heard over the day.

Platts assessed Ukrainian corn unchanged at $238.50/mt FOB POC, unchanged from the previous day's assessment.

In the POC market, July offers were in the low-$240s/mt, while bids were at $235/mt. A trader said: "[We are] not hearing or seeing much activity this week, everything seems very quiet."

Market participants continued to monitor demand from Turkey after the recent holidays. In Ukraine, domestic CPT port prices also remained closely watched amid logistics and farmer selling, while European buyers reportedly expect further Ukrainian corn price declines to remain competitive.

In the CVB market, old-crop liquidity is expected to be limited to June loadings due to tight supply. Two sellers were heard offering June FOB CVB corn at $245/mt on a Handysize basis, with another indicative offer heard at $244/mt outside of the assessment window. No ongoing negotiations were reported on the day.

Platts is part of S&P Global Energy.

Oilseeds

Platts Asia Soybean Daily Commentary

- Nearby shipment traded
- Higher CFR China premiums on weaker CBOT

CFR China soybean month-one July shipment was down $5.05/metric ton day over day at $495.95/mt June 2, while basis was up 5 cents/bu at 170 cents/bu over July (N) Chicago Board of Trade (CBOT) futures.

Overnight, Chinese soybean trade sources noted that some trades were concluded for nearby August and September shipments.

August shipments were heard traded at 191-192 cents/bu over July (N) CBOT, basis CFR China.

The indicative value for July shipments is around 170 cents/bu over July (N) CBOT.

Soybean trade sources noted that Brazilian basis premiums firmed yesterday, amid lower CBOT futures.

CBOT July (N) futures fell for the day, dropping 18.75 cents day over day to 1179.75 cents/bu at the 0830 GMT Asian close June 2.

CBOT soybean futures declined following the latest US Department of Agriculture report, with a Chinese soybean trade source citing that "it was mainly due to soybean crush coming in below expectations".

In April, crushed soybeans were 6.55 million mt, down from 6.95 million mt month over month, USDA data showed June 1.

The weekly domestic crushing volume in China is approximately 2.1 million mt, according to a Chinese soybean trader.

Platts is part of S&P Global Energy.

Platts Brazil Soybean Daily Commentary

- Nearby shipments trade in Paranaguá
- CBOT soybeans hit two-week low

Platts assessed the SOYBEX FOB Santos soybean contract for July loading at $452.43/metric ton on June 2, $2.02/mt lower than the previous assessment.

Chicago Board of Trade soybean futures fell to a two-week low on the day due to rapid US planting progress and strong initial crop condition ratings, in combination with weak export demand for US soybeans and a softer crude oil market, according to market analysts.

Brazilian agricultural agency Conab released its latest Agrologistics Yearbook highlighting soybeans as the backbone of Brazil's agricultural logistics system, with exports exceeding 108 million tons in 2025 and largely concentrated in a few highly efficient corridors.

Conab said Brazil remains the world's leading soybean supplier, driven by strong external demand, particularly from China, which accounts for roughly 79% of shipments, while continued production growth is placing increasing strain on logistics capacity.

A key development is the ongoing structural shift in export routes, with the expansion of the Northern Arc — ports in the North and Northeast — now responsible for about 36% of soybean exports.

This shift reduces distances from the Center-West, Brazil's main producing region, and helps lower transportation costs, supported by improved integration across road, rail and waterway networks, even as traditional ports like Santos continue to play a major role, Conab said.

Trading activity was limited to nearby loadings in the FOB Paranaguá paper market, with trades heard for July and August contracts on the day.

FOB premiums in both Santos and Parangué ports finished the day higher, addressing the strong drop in CBOT futures and firm interest on nearby shipments, market participants said.

The US dollar versus the Brazilian real settled at Real 5.0119/$1 at 4:30 pm Brasilia time. Domestic soybean prices were lower in the main producing regions.

Platts is part of S&P Global Energy.

Platts US Soybeans Daily Commentary

- Outright soybean prices fall on day
- USDA reports 87% of soybeans planted

The US soybean market saw outright prices fall on June 2, pressured by the futures market.

Traders now focus on US weather and fundamentals, sources said, amid no updates on US-China trade, the war in the Middle East, and positive crop progress.

Platts, part of S&P Global Energy, assessed SOYBEX FOB New Orleans for July shipment at $464.90/mt, down $5.69/metric ton from June 1. Despite this, the Platts assessed basis for FOB Gulf

for July shipment remained steady day over day at 100 cents/bushel over the July (N) soybeans futures contract.

Platts assessed the outright price for CIF New Orleans for June shipment at $460.12/mt, down $5.70/mt from the previous business day. Platts assessed basis for CIF NOLA for June shipment remained unchanged day over day at 87 cents/bu over the July (N) soybeans futures contract.

Chicago Board of Trade July (N) futures fell 15.50 cents June 2 to 1165.25 cents/bu, while August (Q) futures fell 16 cents to 1169 cents/bu.

"I think we've finally started to trade US weather and fundamentals instead of tethering to energy and headlines," a trader in the CIF New Orleans market said. "Entities that are long on commodities have started rolling their long from July to new crop this week too, so there's a lot of negative order flow from that."

Sources in the export market said that exchange rates, the war in the Middle East, the lack of updates on the US-China soybean trade, and technical trading were also contributing to the decrease in prices on June 2.

"There's a macro sell-off (the dollar is up)," a trader in the FOB Gulf market said. "Plus the war, [no news on] China, and we broke through a large technical level."

The US Department of Agriculture published its Crop Progress weekly report on June 1, showing that up until May 31, 87% of soybeans had been planted in the 18 largest producing states. This is 8% more than the percentage reported the previous week and 4% more than the progress reported on May 31, 2025.

Louisiana reported 97% of progress, Minnesota reported 96%, and Arkansas, Iowa, Mississippi and Nebraska reported 95%. Missouri and Kansas were on the lower end of percentage progress with 74% and 75%, respectively.

About 65% of soybeans planted had emerged by May 31, compared to 49% reported the previous week, and 61% reported on May 31, 2025.

Around 57% of soybeans planted were reported in good condition, 29% in fair condition, 9% in excellent condition, 4% in poor condition, and 1% in very poor condition.

Animal Feed

Platts Latin America Soybean Meal Daily Commentary

- FOB prices decrease on lower futures, weaker basis
- Argentina's April meal export fall below expectations

South American soybean meal FOB prices fell on June 2 amid slightly lower Chicago Board of Trade futures and weaker port differentials.

According to sources, quiet export demand continued to pressure Argentina's FOB Up River cash basis levels, with one source noting, "there is no buying interest on the dip." No trades were heard.

In the meantime, Argentine soybean meal exports totaled 2.50 million metric tons in April, according to the Ministry of Economy, falling short of S&P Global Energy CERA's forecast of 2.80 million mt.

"Delayed harvests limited soybean supplies, while strong corn export demand may have constrained soybean product exports," CERA analysts said in the Global Soybean Complex Short-Term Outlook report released May 29.

In Brazil, the FOB Paranaguá weakened slightly for July differentials, while parcels were negotiated for August shipments.

The CBOT July (N) contract settled at $326.20/short ton, down 30 cents/st.

Platts European Animal Feed Daily Commentary

- Dutch feed market remains stable, quiet
- Spanish corn offers at Eur226/mt June-Dec
- Spanish soymeal trades lower on ample supply

Northern Europe

The Dutch feed market was quiet with prices remaining stable throughout the day.

"Demand is stable with limited market activity," said a Dutch trader.

A corn broker in the Netherlands noted that "corn is the most expensive grain compared to barley and wheat, and most buyers prefer the cheaper options."

He also mentioned that, despite ongoing volatility in oil prices, freight rates have seen only minor fluctuations.

Southern Europe

The Spanish corn market was quiet, with lower offers and no active buying interest, according to market participants.

Corn offers are around Eur226/mt for June to December, with no buyer interest. Barley and feed wheat are offered at Eur208/mt and Eur228/mt for June to August, respectively.

The Spanish soybean meal market was bearish today, with cheaper trades reported, traders said.

A competitive trade was reported at Eur365/mt for June and Eur355/mt for July. Another trader added that ample supply and a rally in CBOT are driving soybean meal prices lower.

Platts US Distiller Grains DDGS Daily Commentary

- Pressure on DDGS prices increases day over day
- DDGS also weaker overseas: sources

The US DDGS market saw further pressure on June 2, with the CIF New Orleans price steady the day after falling, and the truck and rail prices decreasing day over day.

Platts assessed CIF New Orleans dried distillers grains with solubles barges for the June shipment period at $223/short ton on June 2, unchanged from the previous business day. The Chicago DDGS truck market for the same delivery period was assessed at $196/st, $1/st down from the previous business day, and the South California rail market for the June delivery period was assessed at $237/st, $5/st down from June 1.

Sources said that the pressure on all markets stems from the end of the plant maintenance season, which is rising production levels, and an incoming period of low demand during the summer months.

"It's feeling heavy all over right now," a trader said. "Export guys are telling me it's weaker overseas too."

"[End of plant maintenance and summer season] are certainly part of the story," a second trader said.

The US soybean meal market remains strong, sources said, putting pressure on DDGS.

"Strong livestock margins in most areas of the world are supporting soybean meal demand," Aaron Gerdts, crop principal analyst at S&P Global Energy, said. "China is a notable exception."

The Asian palm oil market strengthened on June 2, with palm futures on the Dalian Commodity Exchange remaining relatively stable. Meanwhile, an Indonesian local CPO tender traded after being withdrawn for six consecutive days.

A Singapore-based trader said the Indonesian local CPO tender traded price increased by around $25/mt from the previous highest bid.

Palm futures on the Bursa Malaysia commodity exchange were closed on June 2 amid a holiday.

The Indian spot market remained slow, with no trade heard on the day amid sufficient supply in the domestic market.

"There were around 1.3 million mt of vegetable oil cargoes, including palm oil, soybean oil, and sunflower oil, that arrived in India in May. This volume is more than sufficient to meet domestic consumption until June," an India-based importer said.

"We are waiting for palm oil prices to decline for July to September consumption, as current prices are less competitive compared to soybean oil. Demand is expected to increase during this period due to upcoming festivals in India," the India-based importer added.

Platts assessed the price of June-loading CPO CFR WC India at $1,255/mt on June 2, up $15/mt from May 29, while July shipments were $10/mt higher than June.

Platts assessed the price of June-loading CPO FOB Indonesia at $1,210/mt on June 2, up $15/mt from May 29, while July shipments were $10/mt higher than June.

Platts assessed the price of June-loading RBDPS FOB Indonesia at $1,110/mt on June 2, up $10/mt from May 29, while July shipments were $10/mt higher than June.

Platts assessed the price of June-loading PFAD FOB Indonesia at $1,015/mt on June 2, up $10/mt from May 29, while July shipments were $10/mt higher than June.

Platts is part of S&P Global Energy.

Platts Latin America Soybean Oil Daily Commentary

- South American soy oil markets show mixed trends
- CBOT futures fall 0.86% from multiyear highs
- Basis levels recover from record discounts

Brazilian and Argentine soybean oil FOB markets were mixed June 2, as Chicago Board of Trade soybean oil futures retreated from recent multiyear highs while South American basis levels recovered modestly from historically weak discounts amid continued abundant regional supply availability.

CBOT July soybean oil futures fell 0.86% day over day to settle at 78.41 cents/pound following the recent sharp rally across energy-linked commodity markets. Market participants said soybean oil futures remained supported by strong renewable diesel demand expectations and elevated energy prices, although some profit-taking emerged after futures climbed to the highest levels since 2022.

Participants also monitored the latest US Weekly Crop Progress report, which showed 87% of the US soybean crop planted by June 1, 7 percentage points ahead of the five-year average. Soybean emergence reached 65%, 8 percentage points above normal.

Initial US soybean crop condition ratings showed 66% of the crop in good-to-excellent condition, down 1 percentage point from the same period last year and below market expectations of 68%. Market participants noted the rating translated to a 369 score on the Brugler500 index, the fourth-lowest initial soybean rating in the past 13 years and the lowest in three years.

Despite weaker futures, South American FOB soybean oil basis levels strengthened modestly as physical export premiums recovered slightly from record discounts.

In Argentina, Platts assessed the soybean oil FOB Up River price for July loading at $1,184.10/metric ton June 2, up $2.64/mt from June 1. The basis for July loading in the Up River paper market was assessed 80 points higher at minus 2,470 points to the July (N) futures at the Chicago Board of Trade.

In Brazil, Platts assessed the soybean oil FOB Paranaguá price for July loading at $1,184.10/mt June 2, down $1.77/mt from June 1. The basis for July loading in the Paranaguá paper market was assessed 60 points higher at minus 2,470 points to the July (N) futures at the Chicago Board of Trade.

Platts also assessed the soybean oil FOB Paranaguá price for August loading at $1,182.34/mt June 2, down $2.20/mt from June 1. The basis for August loading in the Paranaguá paper market was assessed 60 points higher at minus 2,320 points to the August (Q) futures at the Chicago Board of Trade.

Market participants said the modest recovery in basis levels reflected weaker CBOT soybean oil futures rather than a major improvement in underlying export demand conditions.

Participants continued monitoring record South American soybean supply and crush projections after Brazil's Conab maintained its 2025-26 soybean production estimate at 180.13 million mt and ABIOVE projected Brazilian soybean processing at a record 62.5 million mt in 2026.

At the same time, market participants said Brazil's B15 biodiesel mandate continued supporting domestic soybean oil consumption, helping absorb part of the expanding soybean oil supply despite continued pressure on export premiums.

Demand into Asia remained broadly steady but continued lagging the pace of South American supply growth. Market participants said elevated freight costs and competitively priced palm oil continued to constrain delivered arbitrage opportunities for soybean oil exports into Asian destinations.

Platts is part of S&P Global Energy.

Platts Europe Vegetable Oil Daily Commentary

- Improving crop outlook balances tight nearby supply
- Sunseed shortages continue supporting Black Sea values
- Indian demand remains key market support factor

European vegetable oil markets remained stable, with sunflower oil and rapeseed oil prices holding unchanged despite a steady flow of supportive supply-side developments from Ukraine. FOB Black Sea sunflower oil remained at $1,379/mt, while RSO FOB Dutch Mills front-month held at Eur1,149/mt and second position at Eur1,150/mt. The lack of price movement suggests that market participants continue to balance supportive nearby fundamentals against expectations of improved crop availability later in the season.

Crop development in Ukraine continued to progress favorably, reducing some of the concerns that dominated the market earlier in the planting campaign. As of June 1, Ukrainian farmers had planted 97% of forecast spring grain and pulse acreage, while soybean sowing reached 96% of the planned area. This points to a largely successful planting season despite earlier concerns regarding weather delays. In European vegetable oil markets, improved crop establishment supports expectations of adequate oilseed availability later in the year, particularly across the soybean and sunflower complexes.

However, nearby sunflower seed fundamentals remain supportive. A trader based in Ukraine said that "farmers have finally seen the higher price levels they had been anticipating," adding that "limited supply and the need to fulfil existing contracts forced processors to raise their sunflower seed purchase prices." The source further said that "the imbalance between demand and supply persists," suggesting that feedstock availability remains constrained despite stable sunflower oil prices. This is helping maintain support for the sunflower complex and limiting the potential for significant downside in nearby values.

Global demand considerations continue to provide an additional layer of support. A trader based in India highlighted that “India remains one of the most influential players in the global vegetable oil market and a key driver of world demand,” while noting that large inventories and discussions around higher import duties could temporarily weigh on purchasing activity. Nevertheless, India is expected to remain heavily dependent on imports of palm, soybean and sunflower oils due to growing domestic consumption. For Europe, this reinforces the view that while crop prospects are improving, global demand remains sufficiently robust to prevent a sharp weakening in vegetable oil markets.

Platts is part of S&P Global Energy.

News

South American soybean oil basis falls to record lows as CBOT futures surge

- CBOT soybean oil futures surge 65% in 2026
- US renewable diesel demand drives market split

South American soybean oil FOB basis levels have fallen to the weakest discounts recorded since Platts, part of S&P Global Energy, launched its Argentina FOB Up River assessment on Sept. 3, 2019 and its Brazil FOB Paranaguá assessment on March 16, 2020, even as CBOT soybean oil futures jumped to their highest levels since 2022 and the July-December soybean oil spread widened to 5-6 cents/lb, highlighting growing tightness in the nearby US market.

The divergence has created an unusual soybean oil market structure in which US soybean oil futures are increasingly driven by domestic renewable diesel demand and policy, while physical export markets in Brazil and Argentina remain structurally well-supplied and heavily discounted.

CBOT soybean oil futures at multiyear highs

CBOT Soybean oil front month futures contract

Source: S&P Global Energy

The rally in CBOT soybean oil futures has been one of the strongest moves across the agricultural commodity complex during 2026.

CBOT front-month soybean oil futures rose around 65%, rising from about 48 cents/lb at the start of the year to nearly 80 cents/lb by early June, approaching levels last seen during the 2021-22 global vegetable oil rally following the Russia-Ukraine war and disruptions to Black Sea sunflower oil exports.

The rally accelerated after the US Environmental Protection Agency finalized significantly higher biomass-based diesel blending mandates for 2026 and 2027, reinforcing expectations for sharply higher domestic soybean oil demand.

Participants also pointed to evolving 45Z clean fuel tax credit rules favoring North American feedstocks and reducing the competitiveness of imported biofuel feedstocks.

Additional support came from elevated diesel and crude oil prices, which strengthened renewable diesel margins and increased demand for nearby feedstocks.

“The market shifted from viewing soybean oil as abundant and oversupplied to viewing it as a strategically important domestic biofuel feedstock,” one Brazil-based soybean oil trader said.

Participants said the rally has been driven far more by demand and policy expectations than by any major deterioration in US soybean production.

Nearby futures spreads signal acute old-crop tightness

CBOT Soybean Oil Futures July/Dec spread

Source: CQG

The tightening market structure became even more visible in nearby soybean oil futures spreads.

The CBOT July-December soybean oil spread widened sharply during the first half of 2026, reaching nearly 5-6 cents/lb by late May, among the strongest inverse structures seen in recent years.

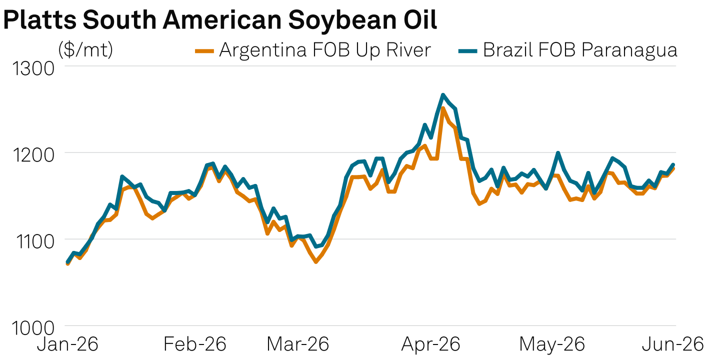
Traders said the widening inverse reflected acute nearby tightness in old-crop US soybean oil supplies relative to expectations for larger new-crop availability following the 2026 US soybean harvest.

The July contract reflects remaining old-crop soybean oil inventories from the 2025-26 US marketing year, while the December contract reflects expectations for newly harvested 2026-27 supplies and expanding US crush capacity.

Renewable diesel demand expectations increased far faster than domestic soybean oil supplies could respond, creating acute nearby tightness in old-crop inventories and discouraging storage as elevated diesel margins incentivized immediate movement into the renewable diesel market.

Despite expectations for expanding US crush capacity and larger soybean production later in 2026, traders said the front-end market remained structurally tight because policy-driven demand growth accelerated faster than new supply availability.

South American FOB soybean oil prices relatively stable



Source: S&P Global Energy

Physical soybean oil export markets in South America behaved differently from CBOT futures.

Brazil FOB Paranaguá and Argentina FOB Up River soybean oil prices remained relatively rangebound during the first half of 2026, generally trading between roughly $1,100/metric ton and $1,200/mt despite extreme volatility in US soybean oil futures, Platts data showed.

Market participants said South American FOB soybean oil values remained tied primarily to global vegetable oil fundamentals, including palm oil competition, Asian import demand, freight economics and crude oil movements.

The market briefly rallied toward $1,250-$1,270/mt in April as crude oil and broader vegetable oil markets strengthened following heightened geopolitical tensions in the Middle East.

Participants said South American soybean oil did not directly benefit from expanding US renewable diesel demand because exports from the region continued facing challenges accessing premium US and European biofuel markets under evolving EPA and ISCC certification requirements.

Traders said Brazil's fragmented soybean supply chain made traceability more difficult, while Argentina's more consolidated export structure was better positioned to meet certification requirements despite heavier export dependence.

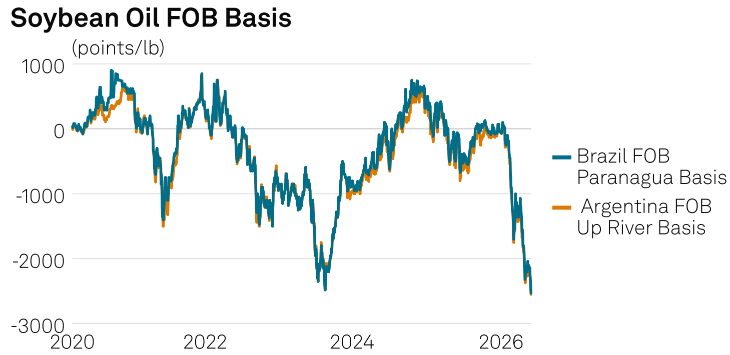
Instead, South American soybean oil continued to compete primarily with palm oil and other vegetable oils in Asian markets.

At the same time, record soybean production and crushing activity in Brazil and Argentina continued pressuring export markets.

Brazil's Conab maintained its 2025-26 soybean production estimate at a record 180.13 million mt, while the Brazilian Association of Vegetable Oil Industries projected Brazilian soybean processing at a record 62.5 million mt in 2026.

Market participants said the combination of abundant exportable soybean oil supplies and only moderate growth in global import demand capped FOB price increases even as CBOT soybean oil futures rallied sharply higher.

South American basis levels fall to historic lows



Source: S&P Global Energy

The divergence between surging CBOT soybean oil futures and relatively stable South American FOB prices ultimately expressed itself through a historic drop in FOB basis levels.

Brazil FOB Paranaguá and Argentina FOB Up River soybean oil basis values weakened to minus 2,530 points and minus 2,550 points, respectively, against CBOT July futures June 1, marking the weakest basis levels recorded since Platts launched the assessments.

Participants said the drop reflected the growing separation between the US domestic soybean oil market and the global export market.

While US soybean oil futures increasingly reflected domestic renewable diesel demand and policy-driven tightness, South American soybean oil markets remained tied to global vegetable oil trade flows and export competition.

At the same time, Brazil and Argentina entered peak harvest and crushing season with abundant soybean oil availability, forcing exporters to compete aggressively in Asian markets against competitively priced palm oil.

Market participants said FOB basis levels effectively became a shock absorber, balancing two increasingly disconnected soybean oil markets: the US market driven by renewable diesel mandates and domestic feedstock demand; and the South American export market governed primarily by global vegetable oil trade flows and export competition.

The broader market structure now reflects what many participants describe as a bifurcated global soybean oil market.

Market participants said basis levels could remain structurally weak as long as the US renewable diesel policy continues to favor domestic feedstocks and South American soybean production remains elevated.

At the same time, some market participants noted that deeply discounted South American soybean oil could eventually stimulate additional Asian import demand and improve competitiveness against palm oil, potentially helping basis levels recover later in the year.

Until then, FOB soybean oil basis levels in Brazil and Argentina remain under pressure from one of the most extreme divergences seen in recent years between US soybean oil futures and global physical soybean oil markets.

Brazil's winter corn harvest advances in Mato Grosso, Tocantins: Conab

- Summer corn harvest reaches 89.6%
- Brazil's 2026 paddy harvest 99.4% complete
- Weak real pressures rice export prices

Corn

The winter corn harvest began in the states of Mato Grosso and Tocantins, reaching 0.6% of the expected area, according to Conab data released June 1.

The summer corn harvest for the 2025-26 season reached 84.6% of the expected area as of May 29, down from 89.6% a year earlier.

In Mato Grosso, the harvest is progressing gradually across the state, including in dry areas. In Parana, damage caused by frosts over the past few weeks is now being accounted for. In Goias, persistent drought is shortening the cycle.

The harvest is still in the early stages; however, producers who need to free up space to store the winter crop and pay bills in July are more willing to negotiate corn in the spot market.

Conversely, buyers with short to medium-term supply needs are preferring to wait and negotiate when the harvest is more advanced, expecting lower prices.

Platts, part of S&P Global Energy, assessed the corn FOB Santos price for August shipment at $219.57/metric ton June 1.

Rice

Brazil's 2026 paddy harvest is effectively complete, with 99.4% of the planted area harvested as of May 29, according to Conab data, signaling the near end of the production cycle.

Harvesting is now concentrated in Maranhão, the only state yet to finalize operations. The state has harvested 87.8% of its planted area, outpacing last year's 85% and the five-year average of 75.4%. Key producing states, including Tocantins, Mato Grosso, Goiás, Santa Catarina and Rio Grande do Sul, have already completed harvesting.

Despite the near-completion of supply, domestic market activity remains subdued. At current price levels, producers continue to sell only the minimum required volumes, limiting liquidity in the spot market.

Market participants also point to currency pressure as a headwind to export competitiveness, which, in turn, is constraining trade flows and dampening internal price discovery.

The Brazilian real weakened 0.32% day over day to Real 5.0376/$1 as of June 1, 17:30 Brasília time, offering limited support to export parity.

Platts assessed Brazilian long-grain white rice, 5% broken, FOB Rio Grande, at $525/mt, unchanged on the day, reflecting muted trading activity and a balanced short-term outlook.

EU poultry prices climb on strong demand despite export pressures

- EU broiler prices rise 3% to Eur299.11/100kg
- Production expands 2.8% led by Eastern Europe
- Exports fall 12.3% while imports climb 0.6%

EU poultry producers are benefiting from strengthening market conditions as broiler prices reached Eur299.11/100 kg ($348.34/100 kg) carcass weight in week 21 of 2026, marking a 3% rise from the previous month, according to the European Commission's latest poultry dashboard release.

The increase in prices is driven by robust domestic demand and higher production costs, which continue to support values above those of key global competitors.

The price support builds on steady weekly increases, with values up 1.3% from the previous week and 1.4% higher than the same period last year. EU broiler prices now trade at a significant premium to major exporters, with US prices at Eur236.52/100 kg and Brazilian prices at Eur130.09/100 kg, highlighting the competitive challenges facing European producers in global markets.

Production expansion

EU poultry meat production expanded 2.8% in the first two months of 2026 compared with the same period in 2025, led by strong gains in Eastern European member states. Hungary recorded the largest increase at 27%, followed by Bulgaria at 13% and Romania at 12.5%, according to Eurostat data. The production growth comes despite declines in Malta of 10.6%, Sweden of 6.6% and France of 5.2%.

Poland maintained its position as the bloc's largest poultry producer, with 2.89 million mt in 2025, accounting for 21% of total EU output. Spain, France, Germany, Italy and the Netherlands round out the top six producers, collectively accounting for 72% of the EU's total poultry production of 14.322 million mt in 2025. Broiler meat continues to dominate the sector at 87.1% of total production, followed by turkey at 9% and duck at 2%.

Broiler chick placements in early 2026 remained comparable to 2025 levels, suggesting stable production intentions for the coming months despite the challenging export environment.

Trade

Trade dynamics showed mixed results in January 2026, with EU poultry exports falling 12.3% by volume to 160,025 mt compared with January 2025, while import volumes rose 0.6% to 89,679 mt. Brazil strengthened its position as the leading supplier to the EU market with a 16.2% increase in volume, while imports from Thailand rose 6.6%. Conversely, imports from the UK fell 41.9%.

The strengthening euro against both the US dollar and the Brazilian real has provided some support for domestic producers by making imports more expensive, with the euro trading at about $1.15-$1.20 and the Real at 6-6.50 in early 2026.

Assessment Rationale

Grains

Platts Ags EMEA Wheat Daily Rationale

Platts assessed the Milling Wheat Marker at $242.25/metric ton June 2, unchanged from the previous assessment. Ukraine 11.5% handysize wheat, assessed at $236/mt, was normalized to the nearest 25 cents of $242.15/mt when adding May's quality normalization of $6.15/mt, to account for its lower protein content, was the most competitive wheat out of the three components of the Milling Wheat Marker, which also includes CVB 12.5%, assessed at $245/mt, and Russian 12.5% wheat assessed at $244.50/mt on the day. The structure between the second half of June and the first half of July was assessed flat. This reflects the Platts assessment window from June 30-July 14.

Platts assessed Black Sea wheat (Russian deepsea, 12.5% protein) down 50 cents at $244.50/mt on June 2 amid low demand, below an offer at $247/mt and above a bid at $243/mt. The structure between the second half of June and the first half of July was assessed flat. This reflects the Platts assessment window from June 30-July 14.

Platts assessed Black Sea wheat (Ukraine deepsea, 11.5% protein) unchanged at $236/mt June 2, below an offer at $237/mt and above a bid at $235/mt. The structure between the second half of June and the first half of July was assessed flat. This reflects the Platts assessment window from June 30-July 14.

Exclusions: No market data was excluded from the June 2 Black Sea wheat assessments.

Platts Asia Wheat Daily Assessment Rationale

Platts assessed Australian Premium White wheat down $2/metric ton at $282/mt FOB Kwinana on June 2 for cargoes loading between Aug. 1 and Aug. 31, under a lower offer at $285/mt.

Platts assessed Australian Standard White wheat with no protein guarantee down $2/mt at $274/mt for cargoes loading over the same period, under a lower offer at $275/mt and tracking a lower indicative value in the mid $270s/mt. This maintains the spread between APW wheat and ASW wheat with no protein guarantee at $8/mt.

Platts is part of S&P Global Energy.

This rationale applies to the symbol <WAUSA00>.

Platts Canada Wheat Daily Rationale

Platts assessed Canada Western Red Spring Wheat 13.5% FOB Vancouver 30-45 days forward at $261.25/metric ton on June 2, down $5.51/mt from June 1.

CWRS Wheat 13.5% FOB Vancouver basis 30-45 days forward, spanning July 2-17, was assessed unchanged at MIAX Hard Red Spring Wheat July (N) futures plus 74 cents/bushel.

CWRS Wheat 13.5% FOB Vancouver basis 45-60 days forward, spanning July 17-Aug. 1, was assessed unchanged at N plus 74 cents/bu.

CWRS Wheat 13.5% FOB Vancouver basis 60-75 days forward, spanning Aug. 1-16, was assessed unchanged at MIAX HRS Wheat September (U) futures contract plus 59 cents/bu.

No firm prices were heard to disprove the previous assessment levels.

Exclusions: No data was excluded in the assessments.

Platts Argentina Corn FOB Up River Daily Rationale

Platts assessed corn FOB Up River for loading in July at $201.77/metric ton on June 2, $1.38/mt higher than the previous assessment.

The assessment considered the FOB premium for Up River July-loading cargoes 7 cents/bushel higher at plus 72 cents/bu to Chicago Board of Trade July (N) corn futures, based on an indicative value heard at that level, bids heard at N plus 70 cents/bu and offers heard at N plus 75 cents/bu at the market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <ARGCA00> and <ARGCB00>.

Platts Brazil Corn Daily Rationale

Platts assessed the Brazilian corn FOB Santos price for August loading at $217.70/metric ton on June 2, $1.87/mt lower than the previous assessment.

The assessment considered the FOB Santos basis for August loading cargoes unchanged at plus 105 cents/bu to the Chicago Board of Trade September (U) contract, based on an indicative value heard at that level, steady offers for August H1 loading at U plus 105 cents/bu, lower offers for August H2 loading at U plus 108 cents/bu and lower bids for full August loading at U plus 99 cents/bu at the market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <ABCSA00> <ABCSB00>

Platts US Corn Daily Assessment Rationale

Platts assessed US Yellow Corn No. 2 CIF New Orleans barge basis for June shipment at 79 cents/bushel over the CBOT July (N) corn futures contract on June 2, unchanged from the previous business day. This was based on no disproving information.

Platts assessed US Yellow Corn No. 2 CIF New Orleans barge basis for July shipment at 89 cents/bu over the Chicago Board of Trade July (N) corn futures contract on June 2, up 5 cents from the previous assessment. This was based on a trade heard at 89 cents/bu after close on June 1. During the business day an offer was heard at 90 cents/bu, and a bid heard at 87 cents/bu.

Platts assessed US Yellow Corn No. 2 FOB Gulf basis for August shipments at 98 cents/bu over the CBOT September (U) corn futures contracts on June 2. Offers were heard at 99 cents/bu for the first half of August and 100 cents/bu for the second half.

No information was excluded.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <WCNOE00> <WCNOU00>

Platts FOB Black Sea Corn Daily Assessment Rationale

Platts assessed Ukrainian corn unchanged at $238.50/mt on June 2, below a June offer at $240/mt and above a July bid at $235/mt. The structure between the second half of June and the first half of July was assessed flat. This reflects the Platts assessment window from June 30 to July 14.

Exclusions: No market data was excluded from the June 2 Black Sea corn assessment.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <CUBSU00>

Oilseeds.

Platts Asia Soybeans Daily Rationale

Platts assessed CFR China first-month soybeans down $5.05/metric ton day over day at $495.95/mt, while the basis was up 5 cents/bu at 170 cents/bu over July (N) CBOT June 2, tracking indicative value at 170 cents/bu and below the sharpest offer at 174 cents/bu over July (N), for Brazil July shipment.

Platts assessed CFR China second-month soybeans down $2.85/mt day over day at $504.03/mt, while the basis was up 11 cents/bu at 192 cents/bu over July (N) CBOT, considering an overnight trade at 192 cents/bu and below the sharpest offer at 195 cents/bu over July (N), for Brazil August shipment.

Platts is part of S&P Global Energy.

Platts Brazil Soybean Daily Assessment Rationale & Exclusions

Platts assessed the SOYBEX FOB Santos soybean contract for July loading at $452.43/metric ton on June 2, $2.02/mt lower than the previous assessment.

The FOB Santos basis for July loading was assessed 10 cents/bushel higher at plus 66 cents/bu to the CBOT July (N) contract, based on a spread to the Paranagua paper market last heard at plus 5 cents/bu. No bids or offers were heard for the full July loading of FOB Santos cargo.

An offer for FOB Santos second-half July 2026 loading was heard at N plus 70 cents/bu earlier on the day, with bids at N plus 64 cents/bu.

The FOB Paranagua basis for July loading was assessed 10 cents/bu higher at plus 61 cents/bu to the CBOT July (N) contract, based on an indicative value heard at that level, higher bids at N plus 60 cents/bu and higher offers at N plus 64 cents/bu at the market close.

Exclusions: No data was excluded.

Platts is part of S&P Global Energy.

Animal Feed and Protein

Platts Argentina Soybean Meal Daily Rationale

Platts assessed the Argentine soybean meal FOB Up River price for July loading at $349.65/metric ton on June 2, down $1.98/mt from the previous assessment.

The basis for July loading in the Up River cargo market was assessed $1.50/short ton lower at minus $9/st to the July (N) futures at the Chicago Board of Trade. The assessment considered an indicative value heard at that level, lower bids at minus $10/st and offers at minus $7/st to the CBOT N contract at the market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYMAA00> <SYMAB00>.

Platts Brazil Soybean Meal Daily Rationale

Platts assessed the Brazilian soybean meal FOB Paranagua price for July loading at $350.20/metric ton on June 2, 88 cents/mt lower than the previous assessment.

The basis for July loading in the Paranagua paper market was assessed 50 cents/short ton lower at minus $8.50/st to the July (N) futures at the Chicago Board of Trade. The assessment considered lower offers at minus $8/st and bids at minus $9/st to the CBOT N contract at the market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYMBA00> and <SYMBB00>.

Platts US Dried Distiller Grains DDGS Daily Assessment Rationale

Platts assessed CIF New Orleans dried distillers grains with solubles barges for the June shipment period at $223/st on June 2, unchanged from the previous session based on a bid heard at $218/st and an offer heard at $224/st.

The Chicago DDGS truck market for the June delivery period was assessed at $196/st, $1/st down from the previous session, based on a bid heard at $191/st and an offer heard at $197/st.

The South California rail market for the June delivery period was assessed at $237/st, $5/st down from the previous session based on a bid heard at $233/st, and offers heard at $238/st.

No information was excluded.

Vegetable Oils.

Platts Asia Palm Oil Daily Rationale

Platts assessed the price of June-loading crude palm oil CFR West Coast India at $1,255/mt on June 2, up $15/mt from May 29, below an offer and above a bid.

A CPO offer was heard at $1,260/mt and a bid at $1,250/mt on a CFR WC India basis, for cargoes shipping in June.

July shipments of CPO CFR WC India were at $1,265/mt on June 2, up $2.5/mt from May 29, considering a $10/mt carry between June and July.

Platts assessed the price of June-loading CPO FOB Indonesia at $1,210/mt on June 2, up $15/mt from May 29, below an offer and above a bid.

A CPO offer was heard at $1,220/mt and an indicative bid at $1,205/mt on an FOB Dumai basis, for cargoes shipping in June.

July shipments of CPO FOB Dumai were at $1,220/mt on June 2, up $15/mt from May 29, considering a $10/mt carry between June and July.

Platts assessed the price of June-loading RBDPS FOB Indonesia at $1,110/mt on June 2, up $10/mt from May 29, below an offer and above a bid.

An RBDPS offer was heard at $1,130/mt, and an indicative bid was at $1,100/mt on an FOB Dumai basis, for cargoes shipping in June.

July shipments of RBDPS FOB Dumai were at $1,120/mt on June 2, up $10/mt from May 29, considering a $10/mt carry between June and July.

Platts assessed the price of June-loading PFAD FOB Indonesia at $1,015/mt on June 2, up $10/mt from May 29, below an offer and above a bid.

A PFAD offer was heard at $1,030/mt and an indicative bid at $1,000/mt on an FOB Dumai basis, for cargoes shipping in June.

July shipments of PFAD FOB Dumai were at $1,025/mt on June 2, up $10/mt from May 29, considering a $10/mt carry between June and July.

Platts is part of S&P Global Energy.

Platts Argentina Soybean Oil Daily Rationale

Platts assessed the Argentine soybean oil FOB Up River price for July loading at $1,184.10/mt June 2, up $2.64/mt from June 1. The basis for July loading in the Up River paper market was assessed 80 points higher at minus 2,470 points to the July (N) futures at the Chicago Board of Trade. The assessment considered an indicative value last heard at that level, offers at minus 2,430 points and bids at minus 2,650 points to the CBOT N contract at the market close. No trades were confirmed before the market close for July loading in the FOB Up River paper market June 2.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYOAA00> <SYOAB00>

Platts Brazil Soybean Oil Daily Rationale

Platts assessed the Brazilian soybean oil FOB Paranaguá price for July loading at $1,184.10/mt June 2, down $1.77/mt from June 1. The basis for July loading in the Paranaguá paper market was assessed 60 points higher at minus 2,470 points to the July (N) futures at the Chicago Board of Trade. The assessment considered an indicative value last heard at that level, bids at minus 2,550 points and offers at minus 2,400 points to the CBOT N contract at the market close. No trades were confirmed before the market close for July loading in the FOB Paranaguá paper market June 2.

Platts assessed the Brazilian soybean oil FOB Paranaguá price for August loading at $1,182.34/mt June 2, down $2.20/mt from June 1. The basis for August loading in the Paranaguá paper market was assessed 60 points higher at minus 2,320 points to the August (Q) futures at the Chicago Board of Trade. The assessment considered an indicative value last heard at that level. No bids, offers or trades were confirmed before the market close for August loading in the FOB Paranaguá paper market June 2.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYOBB00> and <SYOBA00>.

Platts Europe Sunflower Oil Daily Rationale

Platts assessed sunflower oil FOB Black Sea Ukraine for July-loading unchanged on June 2 at $1,379/mt, within a bid-offer range heard at $1,370/mt-$1,380/mt.

This rationale applies to symbol(s) <SFWBL00>
