Commentary and Analysis

Wheat

Platts European Wheat Daily Commentary

- Black Sea wheat harvest delays one-two weeks
- French FOB market sees almost no demand

The Black Sea market moved sideways on the day as it monitored the harvest progress at a one-two week delay amid rainy weather and fuel shortages.

Russian wheat offers were at $228/mt, while bids were at a $1/mt discount. About 100,000 hectares have been harvested so far (0.4% of the total wheat area), versus around 580,000 hectares at the same point last year, traders estimated.

The CVB traders monitored the quality of the harvest, which was 15% complete and about two weeks behind amid some rains. The bids were at $232/mt, while offers were at a $5/mt premium. Sellers expect the 12.5% supply from Constanta will be largely absent for one-two months, as farmers sell feed wheat first and hold better-quality wheat.

The Ukrainian market was at $225-$226/mt offers, compared to $223/mt bids. The coasters market declined amid offers at $225/mt and trades heard at $222/mt. Buyers were at $220/mt.

The French market dropped on the day amid low demand. Traders from France said that the FOB market is almost dead, with no demand from destinations.

“The port market is dead right now; there are no opportunities,” a broker from the market said. The broker also added that the demand for even high-protein wheat was also low from West Africa. On the harvest, the pace is progressing fast, local agency Franceagremer said. By June 29, French farmers had threshed 26% of the winter soft wheat area (5% on average over the past five years on the same date).

Platts Asia Wheat Daily Commentary

- Australian wheat stable
- Light frosts in East Australia , no major concerns

Australian Premium White wheat and Australian Standard White with no protein guarantee were both stable day over day July 3.

As temperatures begin to drop as winter approaches, parts of Australia’s wheat belt experienced sub-zero temperatures in the last week of June, according to data from Australia’s Bureau of Meteorology.

An Asian trade source said that some frost events also occurred in the East, though there is no cause for concern at the moment.

Regional milling wheat demand has remained hand-to-mouth, with buying expected to remain slow as buyers remain on the sidelines, awaiting harvest pressure from the Black Sea to push prices lower, said a Singapore-based grains trader.

Corn

Platts Asia Corn Daily Commentary

- Asian corn prices remain stable at $259.75/mt
- Wide offer-bid gap keeps buyers on sidelines
- South Korea sees no corn deals during week

Asian corn prices were stable on July 3 as market participants continued to hug the sidelines as the offer-bid gap remained wide.

Platts assessed feed quality corn CFR Northeast Asia down 25 cents/mt at $259.75/mt for cargoes arriving over Oct. 1-31.

Indicative offers to South Korea remained above $260/mt CFR for November arrival cargoes, while buyers’ targets were in the mid- to high-$250s/mt CFR, according to several South Korean traders and local trade agents.

No corn deals were heard to have been concluded to South Korea in the week ending July 3, although a soybean meal cargo was transacted at $391.45/m CFR for three port discharge at Pyeongtaek, Kunsan, and Ulsan with a $1.5/mt premium for each additional port.

Panamax freight rates from US Pacific Northwest and South America to South Korea remained stable week over week, with several grains traders giving estimates for the former at $34-$36/mt for September-October shipments, and for Brazil at $48-$49/mt, and Argentina at $54-$56/mt for August-September shipments, unchanged week over week.

Meanwhile, South American origin corn was offered at $257/mt CFR Vietnam for August-September shipment partial cargos, unchanged on the day.

A Brazilian broker source noted that there were fewer offers out of Santos compared to other regions, as “Santarem has at least 3 players offering August/September shipment, Santos/Tubarao/Paranagua is almost the same player offering all these positions and for Santos/Tubarao/Itaqui there is only one player.”

In the Philippines, feed milling groups were reported to have completed most of September arrival corn cargo procurement while “some milling groups had already booked till October… anticipating the effect of El Nino on our crops,” according to a Philippines feed miller source.

Pakistan-origin export containerized corn was heard quoted at $250/mt FOB, down $20/mt month over month, according to a Pakistani trader. “It has to go down a lot more for it to be workable [for export],” the trader stated.

Platts Latin America Corn Daily Commentary

- Argentine premiums for August loading drop
- Brazilian FOB Santos premiums unchanged

The FOB premium markets in South America were quiet on July 3, during the US Independence Day holiday, as the Chicago Board of Trade was closed.

Argentine FOB Up River premiums for August loading decreased.

On July 2, a trade was reported in FOB-Up River for August loading at U plus 88 cents/bushel.

The Buenos Aires Grain Exchange reported on July 2 that the 2025-26 corn harvest in Argentina reached 52.9% as of July 1, up 1.70% from the previous week but lower than the previous season at the same time.

BAGE reported that harvest operations are maintaining a tight pace due to high moisture levels in both grain and fields, a situation that continues to delay the collection of the remaining plots, mainly in central and southern Buenos Aires.

The Brazilian FOB Santos premiums for August loading were unchanged amid an absence of clear bids and offers.

The US dollar to Brazilian real exchange rate stood at Real 5.1860/$1 as of 5:30 pm Brasilia time, down 0.70% day over day.

Platts European Corn Daily Commentary

- Black Sea corn demand remains subdued
- European summer slows feed industry demand

The Black Sea corn market was stable on July 3 amid limited buying interest, with sellers saying that demand from major destinations remained subdued.

"Demand is quiet at destinations," a trader from the UAE said. "There is good old coverage for now, it seems."

Buying ideas for coasters remained predominant from destinations including Turkey.

Meanwhile, heatwaves and their potential impact on new-crop yield are driving new-crop prices in the market.

Elsewhere, in Egypt, importers said that despite the drop in Ukrainian corn prices, South American-origin corn remains competitive. Moreover, demand for corn remains slow amid oversupply. An importer from Egypt said, "Corn prices are going down in the local market, and all importers are looking for cheaper prices everywhere."

Another importer from Egypt said that corn imports have slowed down month over month, and that only if this slower pace of imports continues for two or three more months would a positive margin be seen in the domestic corn market.

In Europe, in Italy, importers said that demand for corn is slow, as the feed industry tends to decelerate during the summer months.

An importer from Italy said, "Ukrainians look to be a bit more suitable to sell, but they maintain a level that Italians don't need. They will wait for new crops, maybe cheaper (not today)," the importer said. "The market remains dull, and we don't see a bull scenario from here to next month."

Oilseeds

Platts Asia Soybean Daily Commentary

- Brazil cargoes trade at 208-225 cents/bu over CBOT
- China crush rates rise on large July arrivals

CFR China soybean month-one August shipment was assessed down $1.75/mt day over day at $498.52/mt July 3, while the basis was unchanged at 223 cents/bu over August (Q) Chicago Board of Trade (CBOT) futures.

Overnight, CFR China saw some trading activity in old-crop Brazilian soybeans, according to Chinese soybean traders.

One cargo of August shipment was heard traded at 208 cents/bu over November (X) CBOT, basis CFR China. One cargo of September shipment was also heard traded at 225 cents/bu over Nov (X) CBOT, basis CFR China.

"Following the decline in CBOT soybean futures, farmer selling activity has slowed last night," said a Chinese soybean trader.

In the week to July 3, buying interest for Brazilian soybeans remained firm across both old- and new-crop positions, with about 15-20 cargoes traded for CFR China across the week, according to multiple Asian soybean traders.

Domestic crushing rates in China have increased this week. With large soybean arrivals scheduled throughout July, crush volumes are expected to remain elevated, extending the current ample supply situation, said a second Chinese soybean trader.

Platts Brazil Soybean Daily Commentary

- CBOT closed due to US holiday
- Soybean harvest in Argentina nears completion

Platts assessed the SOYBEX FOB Santos first-month July shipment price unchanged at $457.94/metric ton July 3, with the Chicago Board of Trade closed for the US Independence Day holiday.

The Argentine 2025-26 soybean harvest has reached 99.1% of the expected area as of June 31, up 1.1 percentage points from the previous week, according to the Buenos Aires Grain Exchange.

Some areas in the southern part of the country remain unharvested, where excess soil moisture continues to hinder the entry of harvesting machinery.

The national average yield is estimated at 3.14 mt per hectare, while the production forecast remains unchanged at 50.1 million mt, broadly in line with the 2024-25 season, when Argentina harvested 50.0 million mt of soybeans, the exchange said.

Trading activity was muted in the Paranaguá and Santos soybean markets, with no offers or bids heard on the day.

The US dollar versus the Brazilian real settled at Real 5.1682/$1 at 4:30 pm Brasilia time.

Platts is part of S&P Global Energy.

Animal Feed

Platts Latin America Soybean Meal Daily Commentary

- FOB prices post mixed movements
- FOB Up River August basis weakens

South American soybean meal FOB prices were mixed, even amid no future references from the Chicago Board of Trade, as US markets were closed on July 3.

In Argentina, offers for FOB Up River August-loading cargoes weakened to as low as $4/short ton under the CBOT references. According to a source, farmer sales have improved over the past few days following the wage agreement that ended a threatened strike by oilseed workers.

In the week through June 24, while the strike threats were in place, Argentine farmers negotiated 677,100 metric tons of soybeans for the 2025-26 marketing year (April-March), sharply down from more than 1 million mt in the previous week, according to data from the Ministry of Economy.

So far, the Argentine farmer selling for MY 2025-26 totals 20.39 million mt, below 23.83 million mt by this time last year regarding MY 2024-25, the official data showed.

In Brazil, the FOB Paranaguá paper market saw wider offer-bid gaps for nearby shipments during the session, with no trades heard.

Platts European Animal Feed Daily Commentary

- Spanish soybean meal offers climb to Eur355-356/mt
- Traders cite inverse market, adequate port supply

Northern Europe

The Dutch soybean meal market was slightly firmer July 3, with higher offers and market values, followed by rising Chicago Board of Trade futures.

A trader said the offers were at Eur355/metric ton, with the market value at Eur352/mt July 3.

The major reason for no offers in August is that the market is inverse, another Dutch trader said, adding that traders are not ready to book from the origin now. Since there is enough cargo available at the Netherlands port, extra volumes into the market are not needed.

Southern Europe

The Spanish soybean meal and corn markets were unchanged July 3, with steady offers and values.

Offers are increasing to Eur355-356/mt, but the market is still below Eur350/mt now for the July-August loading period, a soybean meal trader said.

In Spain, rapeseed meal and soybean meal always compete, but demand shifts to rapeseed meal only when it is 70% cheaper than soybean meal, another trader said.

The corn market was quiet July 3, as buyers are awaiting the barley harvest, a corn broker said.

Platts Asia Palm Oil Daily Commentary

- Malaysian palm oil futures slide on weaker Chinese soy oil prices
- Indonesian market quiet as demand slows

The Asian palm oil market declined July 3, as palm oil futures on Bursa Malaysia fell following a decline in Chinese soybean oil, while losses were capped as the Malaysian ringgit continued to strengthen against the US dollar.

The World Meteorological Organization (WMO) released a report stating that El Niño has emerged in the tropical Pacific Ocean and is expected to strengthen over the coming months, between July and September 2026.

Meanwhile, the Malaysian Palm Oil Board (MPOB)'s monthly report is scheduled to be released on July 10. The report will cover Malaysia's export and production data, which will provide the market with some fresh directions in the near term.

The benchmark palm oil contract for September delivery on the Bursa Malaysia commodity exchange fell MR24/mt to MR4,483/mt on July 3.

The Indian market was slow on July 3, with one trade heard, totaling 2,000-3,000 mt at $1,217 for August.

Platts assessed the CPO CFR WC India price at $1,213.50/mt on July 3 for July loading, down $2.50/mt from July 2, while the August shipment was $3.50/mt higher than July.

The Indonesian market remained quiet as demand slowed.

"Demand has slowed down as there has been no new catalyst to move the market," an Indonesia-based trader said.

Platts assessed CPO FOB Indonesia at $1,175/mt July 3 for July loading, down $5/mt from July 2, while the August shipment was $10/mt higher than July.

Platts assessed RBDPS FOB Indonesia at $1,040/mt July 3 for July loading, down $5/mt from July 2, while the August shipment was $10/mt higher than July.

Platts assessed PFAD FOB Indonesia at $990/mt July 3 for July loading, down $5/mt from July 2, while the August shipment was $10/mt higher than July.

Platts is part of S&P Global Energy.

Platts Latin America Soybean Oil Daily Commentary

- South American soybean oil stays resilient
- Argentine labor dispute gets resolved
- FOB basis offsets CBOT futures weakness

South American soybean oil markets remained comparatively resilient during the week ended July 3, despite another volatile period for Chicago Board of Trade soybean oil futures.

Strengthening FOB basis levels continued to offset weakness in futures while the resolution of Argentina's oilseed labor dispute removed a key source of uncertainty for regional export markets.

CBOT August soybean oil futures declined from 69.82 cents/lb on June 26 to 66.77 cents/lb on July 2, pressured by favorable US crop conditions, expectations for abundant global soybean supplies and bearish US Department of Agriculture acreage and quarterly stocks data released June 30.

The USDA estimated 2026 US soybean planted area at 85.4 million acres, broadly in line with trade expectations, while June 1 soybean stocks of 2.10 billion bushels significantly exceeded the average analyst estimate of 1.046 billion bushels, reinforcing expectations for comfortable soybean supplies.

Crop Progress data also showed 65% of the US soybean crop rated good-to-excellent, while Brazil's record soybean harvest and crush outlook continued to reinforce expectations for abundant global soybean oil availability.

Despite the weakness in CBOT soybean oil futures, South American physical soybean oil markets remained relatively stable. Argentine FOB Up River August soybean oil prices fluctuated within a narrow range, ending the week at $1,154.56/mt, while Brazilian FOB Paranaguá August values finished at $1,172.20/mt.

Traders said the divergence between financial and physical markets remained the dominant theme throughout the week, with FOB basis continuing to absorb much of the volatility in futures.

Basis levels strengthened sharply during the period before easing modestly during the final session. Argentine August basis improved from minus 1,710 points on June 26 to minus 1,400 points by July 1, before softening slightly to minus 1,440 points on July 2. Brazil followed a similar pattern, with August basis strengthening from minus 1,660 points to minus 1,330 points, before easing to minus 1,360 points.

Market participants said the recovery represented a substantial improvement from the historically weak discounts observed earlier in June and reflected resilient export demand rather than tightening soybean oil supplies.

Participants continued to highlight the growing disconnect between paper and physical markets. While CBOT soybean oil futures remained heavily influenced by speculative positioning, improving US crop prospects and broader oilseed supply expectations, South American FOB markets continued to respond primarily to export demand, freight economics and commercial buying interest.

Buyers in Asia, the Middle East and other destination markets were reported to remain active throughout the week, helping support FOB values despite continued weakness in futures.

Attention also remained focused on Argentina's labor negotiations before uncertainty eased significantly on June 29. Oilseed unions and grain exporters reached a wage agreement covering the remainder of 2026, based on Argentina's INDEC consumer price index and the REM inflation expectations survey, with a cumulative wage adjustment of 29.5%.

According to CIARA-CEC, the agreement ensures social peace for the remainder of the year and removes the immediate risk of labor disruptions affecting soybean crushing, soybean meal exports and soybean oil shipments through the Rosario Up River export corridor.

The agreement followed several weeks of negotiations, mandatory conciliation and concerns over potential strike action that had prompted some export terminals to temporarily restrict truck delivery quotas.

Market participants said the resolution should allow normal truck arrivals and terminal operations to resume, removing one of the principal short-term risks facing Argentina's soybean export sector.

Trading activity slowed considerably on July 3 as the CBOT remained closed ahead of the US Independence Day holiday. With no US futures market to provide pricing direction, liquidity in both the Argentine FOB Up River and Brazilian FOB Paranaguá paper markets was virtually absent.

Platts assessments were left unchanged from July 2, with no confirmed bids, offers or trades reported in the nearby August markets before the close.

Looking ahead, traders expect soybean oil markets to remain sensitive to US weather, crop development and speculative positioning following the recent USDA reports.

However, market participants said the continued resilience of South American FOB basis levels suggests physical export demand remains considerably stronger than futures market performance alone would imply.

With Argentina's labor dispute resolved and Brazil continuing to harvest a record soybean crop, the interaction between abundant regional supplies and steady international demand is expected to remain the primary driver of South American soybean oil export values during the weeks ahead.

Platts Europe Vegetable Oil Daily Commentary

- Sunflower oil prices hold firm at $1,379/mt
- Rapeseed oil falls across all runs
- SFO prices to increase in H2 July: trader

European sunflower oil prices ended the week on firm yet steady sentiment July 3, as market participants pointed to low liquidity and sellers unwilling to lower offer levels, contributing to subdued trading activity.

"Liquidity is very narrow," a Black Sea-based trader said, adding that plants have either stopped crushing sunflower seeds or switched to rapeseed processing. Further, the offer side remains limited in domestic markets, with CPT offers having "dried up," the trader said.

In terms of destination demand, a broker source observed quiet activity in Indian markets compared to the start of the week. "They still have some short to cover from the old crop."

Meanwhile, the same trader notes that Turkish and Indian market demand can be filled by Russian-origin or Argentine-origin sunflower oil. Conversely, EU demand is unlikely to be met by Argentine sunflower oil due to quality or pesticide issues, the trader said.

Looking ahead, traders are optimistic for demand recovery in the second half of July and August. "Europe is lagging in taking in sunflower oil compared to last season, but last season, sunflower oil was cheaper than rapeseed oil," the Black Sea-based trader said.

A second Black Sea-based trader observed unchanged pricing activity day over day. "Sellers are stubborn and not willing to do down."

Platts assessed FOB Black Sea sunflower oil at $1,379/metric ton, unchanged day over day and flat for the second consecutive week.

Rapeseed oil markets saw a downward trajectory across all four runs.

Platts assessed the FOB Dutch Mill rapeseed oil front run at Eur1,143/mt, down Eur3, tracking losses in the Euronext front-month rapeseed futures contract, which settled at Eur505/mt, down 25 euro cents day over day. The second run fell Eur2 to close at Eur1142/mt. The third run showed the biggest decrease across the curve, down Eur8 day over day at Eur1126/mt. At the end of the curve, the fourth run was assessed at Eur1125/mt, down Eur6 on the day.

Platts is part of S&P Global Energy.

GLOBAL ANIMAL FEED WEEKLY: South American meal prices fall after Argentina strike ends

- Argentine May soybean crush hits 4.2 mil mt
- US DDGS export demand remains limited

South American soybean meal

South American soybean meal FOB prices fell over the past week as market activity tracked Chicago Board of Trade futures amid the release of the US Department of Agriculture's Acreage report. The resolution of Argentine oilseed sector wage negotiations removed the threat of a national strike.

On July 3, Platts assessed the Argentine soybean meal FOB Up River outright price for August dates at $331.24/metric ton, down 0.9% week over week. The Brazilian FOB Paranaguá value for the same loading decreased by 0.6% to $336.75/mt in the same period.

Trading activity in South American soybean meal markets was subdued during most of the week, as sentiment was shaped by geopolitical concerns and the resolution of labor negotiations in Argentina. On June 29, the parties reached a wage agreement covering all of 2026, ending a prolonged negotiation process and averting the threat of strike action in the global top exporter of soybean meal and oil.

Still regarding Argentina, the local soybean crush totaled 4.20 million mt in May, according to government data, surpassing the S&P Global Energy CERA forecast of 4.10 million mt.

"Industry activity recovered after a slow start to the season, partly due to harvest delays," CERA analysts said in the Global Soybean Complex Short-Term Outlook report published June 26. "Near-term demand supports a strong pace for June, backed by consistent truck inflows to ports, comfortable soybean oilseed industry stocks, and steady import arrivals."

Brazil saw robust export activity, with June soybean meal shipments estimated at 2.44 million mt, up 46.2% year over year, according to the country's grain exporters' association, Anec. The strong export pace came amid an upward revision to the country's soybean crush forecast for 2025-26, now projected at a record 63.50 million mt by CERA analysts.

Brazilian domestic demand for soybean oil remained firm, and crush margins were supported by steady shipment schedules and consistent processing activity. Basis levels in the FOB Paranaguá market softened slightly, but export flows and local demand continued to underpin fundamentals.

European soybean meal

The European soybean meal market was active, with prices marginally lower in the Netherlands amid weaker demand and firming in Spain, driven by the CBOT rally, traders said.

On July 3, Platts assessed FOB Netherlands at Eur348/mt, down 25 cents/mt week over week, whereas EXW Spain increased by Eur2/mt week over week to Eur347/mt.

A local trader said demand for soybean meal in the Netherlands has decreased slightly, as the rapeseed harvest will be completed by the end of July or in August.

Another Dutch trader confirmed it, saying that a shift in demand is a reason, and that delayed shipments from the origin are another reason. A smaller lineup is expected for August from the South American region.

He further added that, since some of the crushing plants will be processing large volumes of soybean meal that will be in the market in July and August, this will be enough to meet the demand.

In Spain, a trade was reported in the Tarragona port at Eur347/mt. A broker said the price has firmed marginally this week, amid the CBOT rally, and firmed origin.

He also mentioned that there isn't a significant demand in the market; it remains quite subdued.

A Spain-based trader said rapeseed meal and soybean meal always compete with each other in the market, but rapeseed meal should be priced at least 70% below soybean meal.

US DDGS

The US dried distillers grains with solubles market showed signs of stabilization during the week of June 29-July 2, with participants reporting firmer nearby bids and a slower pace of declines, although trading activity remained limited ahead of the US Independence Day holiday.

Platts assessed CIF New Orleans dried distillers grains with solubles barges for July shipment period at $182/short ton July 2. The Chicago DDGS truck market for July delivery was assessed at $166/st, and the South California rail market for July delivery was assessed at $210/st.

"Very quiet start to this Monday," one broker said June 29, saying that lower corn futures and seasonal demand continued to weigh on sentiment. The broker added that sellers remained active, with nearby offers available as plants looked to keep product moving.

While CIF activity remained scarce early in the week, some participants said the sharp declines seen throughout June may be nearing an end.

"I think it's probably a sign of a bottom, but wouldn't call it bullish," one trader said June 30, noting that "nothing is trading CIF."

Another trader said recent international sales appeared to be helping stabilize export values.

"The market is weak now," the trader said, adding that "recent international sales have helped put a floor under the market."

The source also added that CIF values appeared more stable after the steep declines seen in recent weeks.

"Soybean meal FOB prices fell about $30/mt in June," the first trader said, adding that the move provided another reason for DDGS prices to decline.

By July 1, nearby values had begun to firm modestly.

"We oversold the bottom," a second broker said, attributing the improvement to processors supporting DDGS alongside stronger corn futures.

A third broker agreed, saying processor buying was helping support the market.

Truck markets also strengthened slightly.

"Firmer today, trucks," the third broker said July 1, adding that some participants believed "maybe we found a bottom."

The modest improvement continued July 2, although holiday-related absences kept activity subdued.

"The market seems to be recovering after last week," the first trader said. "There aren't many people in the office this week… holiday mode."

A buyer said that after a sharp decline in Central/Northeast truck values over recent weeks, the market had become more mixed, with firmer corn prices providing some support.

"Hearing maybe exports are back," the buyer said, pointing to healthy ethanol margins, which are expected to continue encouraging strong production and suggesting supplies should remain ample.

The buyer also said they expected values to go down after the holiday weekend.

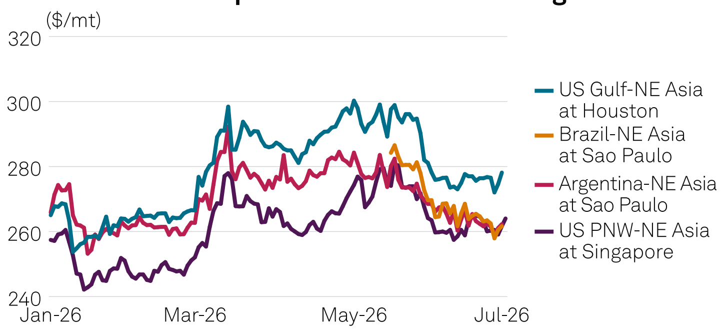
Platts is part of S&P Global Energy.

Asia market to turn to South American corn over US Pacific Northwest origin in H2 2026

- South American corn gets more competitive
- US focuses on soybean exports to China

Argentine and Brazilian-origin corn to Asia is expected to become more competitive over US Pacific Northwest corn in the second half of 2026 due to ample supply and steady harvest progress, while the latter is seeing a shift toward soybean exports, market participants said.

Platts SAM corn replacement values challenge US PNW



Source: S&P Global Energy

According to the Platts Corn Arbitrage Price Matrix, CFR Northeast Asia replacement levels for US Northwest corn fell to $264.02/metric ton July 2, while Argentine and Brazilian-origin corn were more competitive at $262.28/mt and $261.67/mt, respectively. Platts is part of S&P Global Energy.

"PNW corn is becoming less competitive with the incoming soybeans [export] program, so it is expected that CFR destination prices will be priced based on South American origin," said a Japan-based trader July 2.

The first half of 2026 was mainly US Northwest corn exports to Asia, a Singapore-based grains trader said June 26, expecting that "the second half will see South American origin dominate."

"South America suppliers will continue to be the drivers of global corn prices into the rest of 2026, as the US turns toward selling soybeans to China instead of corn," the trader added.

Brazil's second-season corn, commonly referred to as safrinha, is planted between January and March and typically harvested in June and August following the end of the wet season. It accounted for 79% of the total corn produced during the 2025-26 harvest, according to the US Department of Agriculture.

The USDA's World Agricultural Supply and Demand Estimates report for June forecast a 2025-26 crop size of 138 million metric tons for Brazil and 61 million mt for Argentina, up 2 million mt and 12 million mt, respectively, on a year-over-year basis.

Philippine traders seek more corn imports after quota hike proposal

- Higher quota could reduce feed costs, weather risks
- ASEAN corn remains key supplier

Philippine traders are looking to import additional corn as the country's Department of Agriculture considers raising its minimum access volume quota to address higher feed costs and mitigate supply risks associated with weather disruptions and elevated farm input expenses.

On June 14, the Philippine agriculture department announced a proposal to increase its minimum access volume quota for corn to 500,000 metric tons from 216,940 mt.

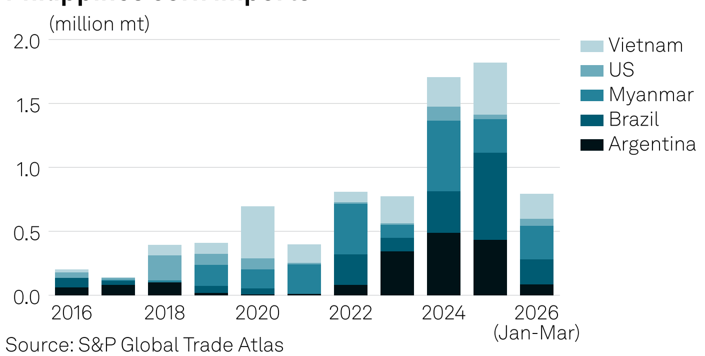
Imports within the quota are levied a preferential tariff of 5%, while shipments beyond the allocation continue to face a 15% duty, according to the agriculture department.

"It will be more beneficial for the feed milling and food industries to buy cheap corn; we don't have to compete with each other for our [locally produced] corn," said a feed miller source in the Philippines.

Some feed milling groups "have already booked cargoes until October [delivery] and are anticipating the effect of El Niño on our crops," the feed miller source said.

The US Department of Agriculture's Foreign Agricultural Service estimates the Philippines' corn production for the marketing year 2026-27 (July-June) at 8.3 million mt, compared with the previous marketing year's crop of 8.15 million mt.

Philippines corn imports



Source: S&P Global Trade Atlas

ASEAN corn

ASEAN countries form a significant source of supply for the Philippines, with Myanmar- and Vietnam-origin corn accounting for 36.6% of total imports in 2025 and 57.9% of total inflows over January-March 2026, according to S&P Global Market Intelligence's Global Trade Atlas.

The USDA forecasts Myanmar's corn production to decline by about 10% year over year, "due to high production costs and reduced cultivation area," to 2.45 million mt, down from 2.7 million mt the previous year.

Platts, part of S&P Global Energy, assessed feed-quality corn CFR Northeast Asia at $260/mt on July 2, up $1.5/mt, for cargoes arriving over Sept. 30-Oct. 30.

BRAZIL DATA: June corn exports jump 74% on month and 18% on year

- Egypt, Saudi Arabia top buyers for June
- Brazil's corn exports rise 22.1% on year in H1 2026
- MY 2025-26 corn exports forecast at 39 mil mt: CERA

Brazil's corn exports surged 74% month over month and 18% year over year to 435,498 metric tons in June, according to data from the Secretariat of Foreign Trade released July 3.

Egypt was Brazil's top corn buyer in June, with 208,149 mt, followed by Saudi Arabia with 79,750 mt and Algeria with 64,969 mt, the data showed.

Brazilian corn exports typically accelerate from July with the safrinha harvest and higher exportable supplies, said Geraldo Isoldi, agricultural markets analyst at Terra Investimentos.

"Demand has picked up earlier than usual in 2026," Isoldi added.

Brazil's corn exports totaled 7.9 million mt in the first half of 2026, up 22.1% year over year, according to the data.

Over January-June, Brazil exported 2.01 million mt of corn to Egypt, 1.62 million mt to Vietnam and 1.47 million mt to Iran, the data showed.

"Egypt has never bought this much Brazilian corn this early in the season," Isoldi said, adding that some global demand is being brought forward ahead of Brazil's typical export season.

However, tight export margins and weaker forward prices are discouraging additional corn sales by farmers in Brazil, S&P Global Energy CERA said in a July 2 report.

Brazil is expected to produce 140 million mt of corn in the marketing year 2025-26 (March-February), down 0.7% year over year. Exports are forecast at 39 million mt, down 7.4% from the previous year, according to S&P Global Energy CERA data.

Platts, part of S&P Global Energy, assessed Brazilian corn FOB Santos at $213.77/mt on July 2, up 10 cents day over day.

GLOBAL SOYBEAN WEEKLY: US soybeans remain uncompetitive for Chinese commercial buyers

- Argentine soybean trades emerged for CFR China
- Bearish demand in US pressures CIF New Orleans basis; futures rise
- Brazil FOB market sees limited trading activity

In the week ending July 3, the CFR China market saw limited trading activity, with demand scattered across Brazilian old and new crop 2027 shipments, as well as Argentine September shipments.

About 15-20 cargoes were heard traded this week, according to multiple Chinese soybean trade sources.

Argentine soybeans for September shipment were heard traded at 188 cents/bu over Nov (X) CBOT, on a CFR China basis, according to a Chinese soybean trader.

Meanwhile, despite reports that China and the US are targeting tariff reductions, the existing 10% tariff remains a key obstacle to Chinese buyers' commercial purchases of US soybeans, according to a second Chinese soybean trader.

"If the goal is to encourage Chinese commercial buyers to participate in US soybean purchases, then that 10% tariff will need to be removed," the trader added.

Domestic crushing rates in China have increased this week, despite weak margins. With large soybean arrivals scheduled throughout July, crush volumes are expected to remain elevated, extending the current ample supply situation, said a third Chinese soybean trader.

As of June 30, 99% of the total open demand, at 9.5 million mt of the July shipment, has been covered, the second trader shared.

Meanwhile, 83% of the total open demand for the August shipment, at 8 million mt, has been covered.

For the September shipment, open demand decreased to about 4.9 million mt, while open demand for the October shipment stands at 8.2 million mt.

Platts, part of S&P Global Energy, assessed the soybean CFR China M1 basis at 223 cents/bushel, over the Chicago Board of Trade August (Q) contract on July 3. The soybean CFR China M1 flat price was assessed at $498.52/mt on July 3, up $1.10/mt week over week.

US acreage forecasts within market expectations

After starting the week of June 29 with outright price declines, the US soybean market saw increases from June 30-July 2, driven by a rising futures market amid the publication of the US Department of Agriculture's Acreage report on June 30, with the CIF New Orleans basis pressured by bearish demand.

Soybean planted acreage for 2026 was estimated at 85.363 million acres, in line with market expectations and S&P Global Energy CERA forecast. This compares with USDA and CERA estimates of 81.2 million acres for the 2025-26 crop year.

"[There are] two main reasons [for that increase]," principal crop analyst at S&P Global Energy CERA Aaron Gerdts said. "Prices and crop rotations."

About 96% of soybeans planted in the US were blooming as of June 28, the USDA's weekly Crop Progress report published on June 29 showed.

Demand was reportedly bearish in the CIF New Orleans market, as the USDA reported bearish weekly export sales on July 2: 41,800 mt were sold June 19-25, a marketing year low.

"[There are] more sellers than buyers," a trader said. "Old crop soybean export demand has been very limited, farmers are spotting out beans daily here and there, and exporters don't really need them. More soybeans should start flowing to processors."

"The only thing higher right now is soybean oil," a second trader in the CIF NOLA market said. "Which is finally finding some support with RINs moving a little higher."

The July 4 holiday in the US is observed on July 3.

Platts assessed SOYBEX FOB New Orleans for August shipment at $454.24/metric ton, while the outright price for CIF NOLA for July shipment was at $447.81/mt.

Liquidity falls in the Brazilian FOB market

The Brazilian soybean FOB market experienced another slow week, with limited buying interest, few offer indications, and only a handful of trades reported.

Market participants cited current depressed Chinese crush margins as a key factor behind the slower buying interest, despite Brazilian soybeans continuing to hold a competitive pricing advantage over US origin.

While immediate buying interest weakened, market participants emphasized that China still requires substantial soybean purchases for August-September delivery, estimated at about 7 million mt, which could support market activity in the coming weeks.

Brazilian grain exporters' association Anec cut its June soybean export forecast by 1.20 million metric tons from the previous week's estimate, now expected at 14.05 million mt. Despite the downward revision, exports are still on track to reach the highest volume ever recorded for the month, the group said.

Brazil's soybean exports through the first six months of 2026 are projected at 72.79 million mt, up 7.0% over the same period in 2025, according to Anec.

Platts assessed the SOYBEX FOB Santos price for August delivery at $457.94/mt on July 3, up 0.4% week over week.

Assessment Rationale

Grains

Platts Ags EMEA Wheat Daily Rationale

Platts assessed the Milling Wheat Marker at $227.50/metric ton on July 3, unchanged from the previous assessment. Russian 12.5% Handysize wheat was assessed at $227.50/mt, and was the most competitive of the three components of the Milling Wheat Marker, which also includes Ukraine 11.5% at $233.13/mt when adding June's quality normalization of $6.63/mt, to account for its lower protein content, and CVB 12.5% wheat assessed at $235/mt on the day. The structure between the second half of July and the first half of Aug was assessed flat. This reflects the Platts assessment window from July 31-Aug. 14.

Platts assessed Black Sea wheat (Russian deepsea, 12.5% protein) unchanged at $227.50/mt on July 3, below an offer at $228/mt and above a bid at $227/mt. The structure between the second half of July and the first half of Aug was assessed flat. This reflects the Platts assessment window from July 31-Aug. 14.

Platts assessed Black Sea wheat (Ukraine deepsea, 11.5% protein) unchanged at $224/mt on July 3, below an offer at $226/mt, and above a bid last heard at $223/mt. The structure between the second half of July and the first half of Aug was assessed flat. This reflects the Platts assessment window from July 31-Aug. 14.

Exclusions: No market data was excluded from the July 3 Black Sea wheat assessments.

Platts is part of S&P Global Energy.

This rationale applies to symbol (s) <BSMWM00> , <WRBSD00>, <WUBSA00>.

Platts Asia Wheat Daily Assessment Rationale

Platts assessed Australian Premium White wheat unchanged at $271/metric ton FOB Kwinana July 3 for cargoes loading between Sept. 1 and Oct. 1, tracking indicative value at $271/mt and under an indicative offer at $277/mt.

Platts assessed Australian Standard White wheat with no protein guarantee unchanged at $266/mt for cargoes loading over the same period, tracking indicative value at $266/mt.

This maintains the spread between Australian Premium White and Australian Standard White with no protein guarantee at $5/mt.

Platts is part of S&P Global Energy.

Asia wheat assessments can be found on <PAA2440>

Market commentary can be found on <PAA2699>

This rationale applies to symbol(s) <WAUSA00>

Platts Asia Corn Daily Rationale

Platts assessed corn CFR Northeast Asia down $0.25/mt day over day at $259.75/mt CFR on July 3 for feed-quality corn arriving over Oct. 1-31 into Pyeongtaek, above an indicative bid at $257/mt CFR, below a normalized offer at $264.74/mt CFR, and tracking tradable value below $260/mt CFR.

Platts is part of S&P Global Energy.

Asia corn assessments can be found on <PAA2440>

Market commentary can be found on <PAA2688>

This rationale applies to symbol(s) <WCINV00>

Platts Argentina Corn FOB Up River Daily Rationale

Platts assessed corn FOB Up River for loading in August at $201.18/metric ton on July 3, $1.97/mt lower from the previous assessment.

The assessment considered the FOB premium for Up River August-loading cargoes, 5 cents/bushel lower at plus 88 cents/bu to Chicago Board of Trade September (U) corn futures, based on an indicative value heard at that level, as neither offers nor bids were heard during the day.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <ARGCA00> and <ARGCB00>.

Platts Brazil Corn Daily Rationale

Platts assessed the Brazilian corn FOB Santos price for August loading at $213.77/metric ton on July 3, unchanged from the previous assessment.

The assessment considered the FOB Santos basis for August loading cargoes unchanged at plus 120 cents/bushel to the Chicago Board of Trade September (U) contract, as neither offers nor bids were heard during the day.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <ABCSA00> and <ABCSB00>.

Platts FOB Black Sea Corn Daily Assessment Rationale

Platts assessed Ukrainian corn unchanged at $222/metric ton on July 3, below the offer at $225/mt for July and August loading. The structure between the second half of July and the first half of August was assessed flat. This reflects the Platts assessment window from July 31-Aug. 14.

Platts is part of S&P Global Energy.

Exclusions: No market data was excluded from the July 3 Black Sea corn assessment.

This rationale applies to the symbol <CUBSU00>.

Oilseeds.

Platts Asia Soybeans Daily Rationale

Platts assessed CFR China first-month soybeans down $1.75/mt day over day at $498.52/mt, while the basis was unchanged at 223 cents/bu over August (Q) CBOT July 3, considering a normalized overnight trade at 223 cents/bu and below a normalized offer at 235 cents/bu over Aug (Q), for Brazil August shipment.

Platts assessed CFR China second-month soybeans down $2.12/mt day over day at $506.05/mt, while the basis was unchanged at 229 cents/bu over Nov (X) CBOT, partially tracking an indicative value at 230 cents/bu and below an offer at 232 cents/bu over November (X), for Brazil September shipment.

Platts is part of S&P Global Energy.

Platts Brazil Soybean Daily Assessment Rationale & Exclusions

Platts assessed the SOYBEX FOB Santos soybean contract for August loading at $457.94/metric ton July 3, unchanged from July 2.

The FOB Santos basis for August loading was unchanged at plus 110 cents/bushel to the Chicago Board of Trade August (Q) contract, based on a spread to the Paranaguá paper market last heard at plus 7 cents/bu. No bids or offers were heard for the full August loading of FOB Santos cargo on the day.

The FOB Paranaguá basis for August loading was unchanged at plus 103 cents/bu to the CBOT (Q) contract, as no offers or bids were heard on the day.

Platts assessed the SOYBEX FOB Santos soybean contract for March loading at $428.18/mt on July 3, unchanged from July 2.

The FOB Santos basis for March loading was unchanged at minus 3 cents/bu to the CBOT March (H) contract, based on a spread to the Paranaguá paper market last heard at plus 5 cents/bu. No bids or offers were heard for the full March loading of FOB Santos cargo on the day.

The new crop FOB Paranaguá basis for March loading was unchanged at minus 8 cents/bu to the CBOT March (H) contract, as no offers or bids were heard on the day.

Exclusions: No data was excluded.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYBBC00> <SYBBF00> <SYBBD00> <SYBBH00> <SYBBA00> <SYBBE00> <SYBBB00> <SYBBG00>.

Animal Feed and Protein

Platts Argentina Soybean Meal Daily Rationale

Platts assessed the Argentine soybean meal FOB Up River price for August loading on July 3 at $331.24/metric ton, $1.10/mt lower than the previous assessment.

The basis for August loading in the Up River cargo market was assessed $1/short ton lower at minus $5/st to the August (Q) futures at the Chicago Board of Trade. The assessment considered an indicative value heard at minus $4/st earlier on the day, followed by offers at minus $4/st and lower bids at minus $7/st to the CBOT Q contract at market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYMAA00> and <SYMAB00>.

Platts Brazil Soybean Meal Daily Rationale

Platts assessed the Brazilian soybean meal FOB Paranaguá price for August loading on July 3 at $336.75/metric ton, steady from the previous assessment.

The basis for August loading in the Paranaguá paper market was unchanged at par to the August (Q) futures at the Chicago Board of Trade. The assessment considered offers at plus $1/st and lower bids at minus $2/st to the CBOT Q contract at market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYMBA00> and <SYMBB00>.

Vegetable Oils.

Platts Asia Palm Oil Daily Rationale

Platts assessed CPO CFR WC India price at $1,213.50/mt July 3 for July loading, down $2.50/mt from July 2, below an offer and above a bid.

CPO offer was heard at $1,215/mt and a bid at $1,212.50/mt on a CFR WC India basis, shipping in July.

August shipment of CPO CFR WC India was at $1,217/mt July 3, down $4/mt from July 2, below an offer. CPO offer was heard at $1,220/mt on a CFR WC India basis, shipping in August.

Platts assessed CPO FOB Indonesia price at $1,175/mt July 3 for July loading, down $5/mt from July 2, below an offer and above a bid.

CPO offer was heard at $1,182.50/mt and an indicative bid at $1,167.50/mt on a FOB Dumai basis, shipping in July.

August shipment of CPO FOB Dumai was at $1,185/mt July 3, down $5/mt from July 2, considering a $10/mt carry between July and August.

Platts assessed the RBDPS FOB Indonesia price at $1,040/mt July 3 for July loading, down $5/mt from July 2, below an offer and above a bid.

RBDPS offer was heard at $1,055/mt and an indicative bid at $1,025/mt on a FOB Dumai basis, shipping in July.

August shipment of RBDPS FOB Dumai was at $1,050/mt July 3, down $5/mt from July 2, considering a $10/mt carry between July and August.

Platts assessed the PFAD FOB Indonesia price at $990/mt July 3 for July loading, down $5/mt from July 2, below an offer and above a bid.

PFAD offer was heard at $1,015/mt and an indicative bid at $985/mt on a FOB Dumai basis, shipping in July.

August shipment of PFAD FOB Dumai was at $1,000/mt July 3, down $5/mt from July 2, considering a $10/mt carry between July and August.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <ACPOA00> <ACPOB00> <APFAD00> <ARBSA00>

Platts Argentina Soybean Oil Daily Rationale

Platts assessed the Argentine soybean oil FOB Up River price for August loading at $1,154.56/metric ton July 3, unchanged from July 2. The basis for August loading in the Up River paper market was unchanged at minus 1,440 points to August (Q) futures at the Chicago Board of Trade. The assessment considered an indicative value last heard at that level. No bids, offers or trades were confirmed before the market close for August loading in the FOB Up River paper market July 3.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYOAA00> <SYOAB00>.

Platts Brazil Soybean Oil Daily Rationale

Platts assessed the Brazilian soybean oil FOB Paranagua price for August loading at $1,172.20/metric ton July 3, unchanged from July 2. The basis for August loading in the Paranagua paper market was unchanged at minus 1,360 points to the August (Q) futures at the Chicago Board of Trade. The assessment considered an indicative value last heard at that level. No bids, offers or trades were confirmed before the market close for August loading in the FOB Paranaguá paper market July 3.

Platts assessed the Brazilian soybean oil FOB Paranagua price for September loading at $1,149.49/mt July 3, unchanged from July 2. The basis for September loading in the Paranagua paper market was unchanged at minus 1,420 points to the September (U) futures at the Chicago Board of Trade. The assessment considered an indicative value last heard at that level and offers at minus 1,400 points to the CBOT U contract at the market close. No bids or trades were confirmed before the market close for September loading in the FOB Paranaguá paper market July 3.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYOBB00> and <SYOBA00>.

Platts Europe Sunflower Oil Daily Rationale

Platts assessed sunflower oil FOB Black Sea Ukraine for August-loading unchanged on July 3 at $1,379/mt, above a bid heard at $1,365/mt and below an offer heard at $1,385/mt

This rationale applies to symbol(s) <SFWBL00>
