Commentary and Analysis

Wheat

Platts European Wheat Daily Commentary

- Black Sea wheat price fell to $237.50/mt
- Russia exports 1.1 mil mt of wheat in June
- Ukraine harvest starts at end of this week: traders

The Black Sea wheat market fell slightly as sellers lowered their offers to meet minimal FOB demand and the approaching new crop harvest. There was a rumored trade on June 10 at $238/mt for Russian wheat 12.5%, while the most competitive July-August offer was at $238/mt. “I haven’t heard any FOB bids,” one Russian seller said. Platts wheat benchmark, the Millind Wheat Marker, was at $237.5/mt on the day.

CIF Egypt buyers bid at $255/mt, with the freight from Russia at $18-$19/mt for July. Russia is forecast to export 2 million mt in June, according to the Russian analytical center Rusagrotrans. So far, exports have totaled 1.1 million mt, slightly lower than 2025 exports of 1.36 million mt.

Sellers for Ukrainian wheat also lowered their offer to $235/mt for the second half of July, with the market valued at $234/mt. The wheat harvest is forecast to commence at the end of this week, while the barley first cuts have already begun. Traders expected a similar production to last year’s amid good yields.

The CVB market watched the Algerian wheat tender taking place on June 17.

Platts Asia Wheat Daily Commentary

- Australian wheat strengthens
- Limited new crop Black Sea trades

Platts assessed both Australian Premium White wheat and Australian Standard White with no protein guarantee up $1/metric ton day over day at $276/mt and $271/mt, respectively, on June 17, tracking higher value indications.

However, Australian wheat prices remained under pressure due to slow regional demand, with several trade participants reporting largely stable offer indications through the week.

Several Southeast Asia-based trade participants said new crop Black Sea wheat trades to the region remain limited, as buying ideas have moved lower, anticipating harvest pressure from the new crop as well as weaker freight rates due to the peace deal announcement between the US and Iran.

“Indonesia has bought quite a bit of Black Sea wheat, mostly for spot shipment. There are very few new-crop trades happening,” said a Singapore-based grains trader.

Meanwhile, consumer demand in Indonesia remained pressured despite the Indonesian rupiah clawing back some of its losses in recent weeks, as the country continues to face political unrest amid demonstrations around a sudden increase in gasoline prices, said an Indonesia-based flour miller.

Platts Canada Wheat Daily Commentary

- Futures strengthen CWRS flat prices
- Basis premiums hold steady amid subdued trading

Platts assessed Canada Western Red Spring Wheat 13.5% FOB Vancouver 30-45 days forward at $273.47/metric tons on June 17, $4.87/mt higher on the day as wheat futures rallied.

After seeing steady declines throughout previous trade days, wheat futures saw strong gains on June 17, with the September (U) MIAX Hard Red Spring Wheat futures contract settling 13.25 cents/bushel higher day over day at 648 cents/bu. The broader grains market saw some support on rumored Chinese demand for US grain.

Despite the futures strengthening, basis premiums remained stable on the day at U plus 96 cents/bu for all Platts-assessed periods. August bids were indicated at U plus 90 cents/bu with offers at U plus 105 cents/bu, unchanged from June 16.

“Not much change,” a trader said.

Overall market activity was subdued, with one Bangladeshi buyer noting low buying activity in the region. August offers were heard ranging between $318-$323.50/mt, rangebound from the previous week.

Freight prices remained stable, according to a Latin American buyer, despite the recent US-Iran deal, keeping CFR prices firm. “Freight values have not been coming down strongly yet. Remains firm so far,” he said.

Platts is part of S&P Global Energy.

Corn

Platts Asia Corn Daily Commentary

- Asian corn prices rise $2/mt on day to $259/mt
- Taiwan concludes tender at 220.44 cents/bu (Z) CBOT
- Vietnam, South Korea buyers in wait-and-see mode

Asian corn prices rose June 17 following a concluded tender deal to Taiwan, although other Asian buyers continued to maintain a wait-and-see stance.

Platts assessed feed quality corn CFR Northeast Asia up $2/metric ton day over day at $259/mt for cargoes arriving over Sept. 15-Oct. 15.

A Taiwanese feed milling group opened and concluded a tender for imported corn June 17 by accepting a deal with a trader for Brazilian origin for Aug. 14-Sept. 2 shipment at 220.44 cents/bu premium over December (Z) Chicago Board of Trade futures. The futures basis deal equated to about $260.19/mt CFR Taiwan on a flat price basis.

Several traders said the Taiwanese deal level was lower than expected, with the trader selling the cargo at a level 12.76 cents/bu lower than the next most competitive offer.

Meanwhile, a Singapore-based trader observed a $2/mt decline in freight rates since June 12 and said market sentiment was soft.

Vietnamese and South Korean feed millers maintained a wait-and-see stance, with the former bidding in the low $250s/mt CFR Vietnam compared to offers at $256/mt CFR and above for August and September shipment corn, market participants said.

US Pacific Northwest corn basis offer indications for September shipment were reported at 142 cents/bu over September (U) CBOT futures contract, while October shipment indications were reported at 142 cents/bu over December (Z) CBOT.

In Indonesia, domestic corn prices were said to be stable at Rupiah 6,750-6,850/kg ($380-$390/mt) on a delivered to mill basis in the East Java region, according to a local feed miller source.

The source said Jakarta was seeing a good amount of supply from the Lampung region.

From December 16 to May 15 the prompt Brazil loading month value is not published.

Argentine FOB Up River premiums for August loading remained steady day over day.

The Brazilian FOB Santos premiums for August loading decreased amid a trade heard at 118 cents/bu.

The US dollar to Brazilian real exchange rate stood at Real 5.1298/$1 as of 5:30 pm Brasilia time, up 0.50% day over day.

In Brazil's domestic market, prices remained steady in the Sorriso region, while they decreased in the Rio Verde and Maringá regions.

A broker based in the Maringá region said that spot market deals took place today after several days of inactivity. However, the source said that despite the resumption of trading activity, prices were lower than previously observed levels.

Expectations of rising supply in the coming weeks are pressuring Brazilian corn prices despite limited early harvest progress, the Brazil Center for Advanced Studies on Applied Economics said. Buyers are stepping back, awaiting lower prices, while sellers soften offers and terms to advance sales at the start of the harvest.

Platts US Corn Daily Commentary

- US corn prices rise on China demand rumor
- High water restricts Mississippi barge moves

US corn outright prices increased on June 17, tracking Chicago Board of Trade futures amid rumors that China was asking for US corn.

Platts global FOB corn prices

Key corn futures contracts

June 17	Unit	Symbol	Value	Change
Asia Pacific				
DCE corn (Jul)	Yuan/mt	XLCG001	2332.00	-2.00
DCE corn (Sep)	Yuan/mt	XLCG002	2323.00	-2.00
DCE corn (Nov)	Yuan/mt	XLCG003	2285.00	+2.00
Americas				
CBOT corn (Jul)	¢/bu	CBAAF00	421.00	+7.25
CBOT corn (Sep)	¢/bu	CBAAF02	429.50	+7.00

"We are hearing that China is inquiring corn, and some people are saying they are price checking beans from New Orleans," a trader said.

"By now, just a rumor," a second trader said.

On June 17, the CBOT corn futures of July (N) settled at $4.2100/bushel, jumping 7.25 cents during the business day; while September (U) rose 7 cents in the same period, closing at $4.2950/bu.

In the domestic market, June barge freight rates on the Mississippi River system to New Orleans reported mixed week-over-week prices. For barges loaded in Mississippi, rates were down 2.6% to 8,341 cents/bu, while in Illinois, rates increased 1.8% to 7,275 cents/bu. St. Louis and Ohio remained unchanged at 4,636 cents/bu and 4,357 cents/bu, respectively, according to data from Platts and American Commercial Barge Line.

"We saw more new crop interest and trading yesterday, while nearby demand stayed quiet," a logistics source said.

Market sources said that high water remained a problem in the river system, restricting barge movement, particularly in Illinois, where more rain is forecast over the coming days.

Platts, part of S&P Global Energy, assessed the outright price for June shipments to New Orleans in the incoterm CIF at $196.85/mt on June 17, and for July shipments at $201.20/mt. FOB Gulf for August was assessed at $207.68/mt.

Platts European Corn Daily Commentary

- Ukraine corn loses ground to US in Spain market
- Saudi Arabia shifts corn routes back to Dammam

The Black Sea corn market remained stable on June 17. In the FOB market, the competitive offer for July loading remained at $230/metric ton. In the CIF market, offers for CIF Marmara remained unchanged, with limited buying interest.

In the destination market, importers said Ukraine remains uncompetitive. “Now Ukraine corn doesn’t work in Spain; it’s expensive,” a Spain-based importer said. “We are looking for USA corn because it is more competitive.”

In Saudi Arabia, following the peace deal with Iran, importers expect corn shipments to resume at Dammam after the route was shifted to Jeddah during the conflict. “When Hormuz starts opening, we will take everything to Dammam,” a Saudi Arabia-based importer said.

Importers in Saudi Arabia also said that any significant impact on trade flows is likely to become visible within three to four months of the peace deal’s finalization. However, traders were anticipating some price relief as the situation normalizes. Argentine corn remained the most competitive origin for corn in Saudi Arabia.

Meanwhile, in Ukraine, sellers said lower fuel prices could prompt farmers to increase crop sales. “I believe if Ukrainian farmers see lower prices at gas stations, they might consider selling their crop at lower prices, but we’re not there yet,” a Ukraine-based seller said.

Iran remains sanctioned, preventing Ukraine from selling corn directly to the country, traders said. However, market participants said Iran continued to purchase Ukrainian corn through Turkish documentation, a flow expected to increase after the conflict ends.

Oilseeds

Platts Asia Soybean Daily Commentary

- US and Brazil soybeans traded: traders
- Chinese buyers were in the market for US soybeans

CFR China soybean month-one August shipment rose $5.98/metric ton day over day to $499.26/mt June 17, while basis fell 8 cents/bu to 220 cents/bu over July (N) Chicago Board of Trade (CBOT) futures.

Overnight, the CBOT futures rebounded and closed higher during the US trading session June 16, supported by expectations of improved export demand.

A Chinese state-owned buyer was in the market inquiring about US soybeans, according to Chinese soybean trade sources, leading to the volatile trading session.

One cargo of the October shipment was heard to have traded, basis FOB US Pacific Northwest, according to at least two Chinese soybean trade sources.

“The FOB trade provided some support to the CBOT futures, although the impact was not very direct,” said a Chinese soybean trader.

Meanwhile, Brazilian soybeans were also heard traded for July-August straddle shipments at 202 cents/bu over July (N) CBOT, basis CFR China, according to a Chinese oilseed analyst.

Additionally, trades were also heard for Brazil’s August shipment at around 225 cents/bu over July (N) CBOT.

Chinese soybean trade sources also noted traded for new crop 2027 April shipments, basis CFR China, with one Chinese soybean trader adding that the tradable value is believed to be around mid-high 100 cents/bu over May (K) CBOT.

Platts is part of S&P Global Energy.

Platts Brazil Soybean Daily Commentary

- Thin trading activity in Paranaguá
- China demand hopes lift soybean futures

Platts assessed the SOYBEX FOB Santos soybean contract for August loading at $453.17/metric ton June 17, down $1.75 from the previous assessment.

CBOT soybean futures were higher, supported by trade chatter pointing to renewed Chinese interest in US cargoes, while favorable Midwest weather and ample global supplies continue to cap further upside, analysts said.

According to Brazilian agricultural agency Conab, the 2025-26 soybean crop is officially completed nationwide. On its weekly report, the agency reported that 100% of the planted area has been harvested, marking another important milestone for Brazilian agribusiness as attention now shifts to the development of winter crops.

There was thin trading activity in the Paranaguá FOB premiums market, with no trades reported on the day.

Market sources said US new-crop 2026-27 soybean prices have fallen below Brazilian levels, ending a long period of price advantage for South America, driven by large US crop prospects and firm FOB premiums in Brazil.

The US dollar versus the Brazilian real settled at Real 5.1131/$1 at 4:30 pm Brasilia time. Domestic soybean prices were higher in the main producing regions.

Platts is part of S&P Global Energy.

Platts US Soybeans Daily Commentary

- Outright export price increases on day
- Market watches potential Chinese purchases

The US soybean market saw the outright export price increase on June 17, following bullish sentiment sparked on June 16 by unconfirmed reports of China buying US soybeans.

Platts assessed SOYBEX FOB New Orleans for August shipment $1.56/metric ton up from June 16 at $455.16/mt. Platts assessed basis for FOB Gulf for August shipment up 2 cents day over day to 102 cents/bushel over the August (Q) soybeans futures contract.

Platts assessed the outright price for CIF New Orleans for June shipment 73 cents higher on the day at $443.86/mt. Platts assessed basis for CIF NOLA for June shipment unchanged at 76 cents/bu over the July (N) soybeans futures contract.

Exporters raised their offers on June 16-17 amid unconfirmed reports that China-based entities were buying a few cargoes of new-crop soybeans on June 16.

"I haven't heard any follow-through today," a trader in the FOB Gulf market said. "But I believe that yesterday's purchase rumors were accurate."

Those trades could be part of the 25 million mt purchase commitment made in October 2025, sources say, with some expecting purchases to resume in the next week.

"They made some purchases, and the market is responding today," the same trader added. "So, they are waiting for it to cool down a bit before stepping back in."

However, other sources said tariffs were still in place, making it difficult for China to fulfill its commitment.

"While tariffs are in place, the economic situation for private Chinese processors continues to be very different from that of state-owned companies," a second trader in the FOB Gulf market said. "Reaching volumes close to 25 million mt only with state participation seems unlikely."

If purchases remain below the 25 million mt market, carryout would increase, the trader added.

"Stocks and use would soften, and the market would lose strength rapidly," the second trader said.

The US Department of Agriculture on June 17 reported sales for 264,000 mt of soybeans for delivery to unknown destinations during the 2026-2027 marketing year.

Activity in the CIF New Orleans market has been focused on shipments starting in October, with little trading seen for nearby months.

Animal Feed

Platts Latin America Soybean Meal Daily Commentary

- Premiums rise in Brazil on day
- Argentina market remains stable

Latin American FOB soybean meal prices were mixed on June 17, with FOB Paranaguá prices rising and FOB Up River prices falling, tracking Chicago Board of Trade futures.

Platts assessed the FOB Up River soybean meal price for delivery in August at $336.20/metric ton on June 17, down 22 cents/mt day over day, while the premium remained steady at $0/short ton.

In the Brazilian market, Platts assessed the FOB Paranaguá soybean meal price for delivery in August at $337.85/mt on June 17, up $1.43/mt day over day. The premium rose to $1.50/st.

A trade was reported at FOB Paranaguá premiums for August loading at plus $1.50/st.

The Chicago Board of Trade August (Q) soybean meal contract settled at $305/st, down 20 cents/st.

S&P Global Energy CERA analysts on June 12 projected carryout at 10 million metric tons in Brazil for the 2025-2026 crop, a record high.

Meanwhile, the stock-to-use ratio remains relatively modest, as domestic use has been increasing steadily, and the market needs to hold larger working stocks to support this growing demand, CERA analysts said.

Platts is part of S&P Global Energy.

Platts European Animal Feed Daily Commentary

- Dutch soybean meal market subdued
- Spanish feed prices unchanged

Northern Europe

The Dutch animal feed market remained unchanged on the day, according to market participants.

A broker indication seen on the day shows the offer level for locally crushed soybean meal at Eur351.72/mt for the August period and November-December periods were seen at Eur343.23/mt.

A trader said there have been no trades in the last few days, and few inquiries.

Southern Europe

The Spanish animal feed market remained unchanged.

Platts US Distiller Grains DDGS Daily Commentary

- Weak demand continues to pressure market
- Lower values seek demand

The US dried distillers' grains with solubles market remained under pressure June 17, with weak demand and limited trading activity continuing to weigh on sentiment despite growing interest from China in broader agricultural markets.

Platts, part of S&P Global Energy, assessed CIF New Orleans dried distillers' grains with solubles barges at $194/short ton for the June shipment period June 17. The Chicago DDGS truck market for the June delivery period was assessed at $169/st, while the Southern California rail market for the June delivery period was assessed at $220/st.

One trader said lower values and weak demand are consistent with current market conditions. "I think there's no demand at these levels really," the trader said, adding that some producers have been selling aggressively below prevailing export indications to move product.

The trader also added that Chinese interest in corn and soybeans has so far been limited to inquiries. "They are inquiring, but it's just price checking at the moment. I have seen no bids and no trades."

The trader also suggested that freight markets could weaken if geopolitical tensions ease. "FSCs are definitely going to fall if we have the war over," the source said.

A broker reported mixed trends among feed ingredients. "Soybean meal basis firmer. DDGS weaker," the broker said, while adding that there's increased attention on Chinese demand for US agricultural commodities. "Inquiries coming in. Need to see some sales soon."

The broker added that lower DDGS values could eventually stimulate buying interest. "Export demand typically improves with lower values," the source said. "We just got too high. It had to come down."

"Many are waiting to see when China buys something," the broker said. "DDGS will bottom soon."

Weekly ethanol production for the week ending June 12 was reported at 1.102 million barrels/day, 0.54% lower than the previous week, according to the Energy Information Administration.

Vegetable Oils

Platts Latin America Soybean Oil Daily Commentary

- CBOT soy oil futures fall 1.89% to 71.54 cents/lb
- Argentine FOB Up River rises 44 cents to $1,167.13/mt
- Basis levels strengthen amid subdued trading

Brazilian and Argentine soybean oil FOB markets were mixed June 17, as Chicago Board of Trade soybean oil futures extended recent losses while physical export markets in South America remained characterized by limited liquidity and cautious trading activity.

CBOT July soybean oil futures fell 1.89% day over day to settle at 71.54 cents/lb. Market participants said soybean oil futures continued to face pressure from favorable US crop conditions, ample global soybean supply expectations and continued liquidation across agricultural commodity markets.

Trading activity in both Argentina and Brazil remained notably subdued. Market participants said liquidity was still recovering following Argentina's June 16 holiday in observance of the Paso a la Inmortalidad del General Martín Miguel de Güemes, while domestic soybean oil activity in Brazil was also reported as slow.

Participants added that uncertainty surrounding a possible labor strike by oilseed workers in Argentina continued to encourage a cautious approach among buyers and sellers, contributing to limited activity in both the FOB Up River and FOB Paranaguá markets.

In Argentina, Platts assessed the soybean oil FOB Up River price for July loading at $1,167.13/mt June 17, up 44 cents/mt from June 16. The basis for July loading in the Up River paper market was assessed 140 points higher at minus 1,860 points to the July (N) futures at the Chicago Board of Trade.

In Brazil, Platts assessed the soybean oil FOB Paranaguá price for July loading at $1,191.38/mt June 17, up $2.65/mt from June 16. The basis for July loading in the Paranaguá paper market was assessed 150 points higher at minus 1,750 points to the July (N) futures at the Chicago Board of Trade.

Platts also assessed the soybean oil FOB Paranaguá price for August loading at $1,166.91/mt June 17, at minus 1,860 points, relative, up $1.10/mt from June 16. The basis for August loading in the Paranaguá paper market was assessed 120 points higher at minus 1,720 points to the August (Q) futures at the Chicago Board of Trade.

Market participants said FOB basis levels in South America continued strengthening as weaker CBOT soybean oil futures allowed export premiums to recover further from the historically discounted levels seen in late May and early June. Traders said that basis values in both Argentina and Brazil have now recovered substantially from the record discounts observed earlier this month.

Despite the recovery in basis levels, participants said underlying physical market conditions remained relatively unchanged. Record soybean production and crush forecasts in Brazil, combined with ample soybean oil availability across South America, continued to weigh on the broader export outlook.

At the same time, traders continued monitoring developments surrounding labor negotiations in Argentina. While no major disruptions to export flows had been reported, market participants said uncertainty surrounding potential strike action in the Rosario export corridor remained a source of caution.

Platts is part of S&P Global Energy.

Platts Europe Vegetable Oil Daily Commentary

- Favorable weather supports strong rapeseed crop outlook
- Farmers delaying forward sales despite price correction
- Processors and exporters expected to compete aggressively

European vegetable oil markets remained stable June 17, with both sunflower oil and rapeseed oil holding unchanged as participants balanced favorable crop conditions against ongoing uncertainty surrounding farmer selling behavior and processing demand. FOB Black Sea sunflower oil remained at $1,381/metric ton, while rapeseed oil FOB Dutch Mill front-month, second, third and fourth positions were unchanged at Eur1,157/mt, Eur1,154/mt, Eur1,143/mt and Eur 1,139/mt. The lack of price movement reflects a market awaiting stronger fundamental signals ahead of the new crop season.

Crop conditions across key producing regions remain supportive. “Weather conditions in Ukraine and the EU remain favorable for the development of rapeseed crops,” a trader based in Ukraine said. “Moderate temperatures and regular precipitation support a high potential for the future harvest.” These conditions continue to reinforce expectations for a solid European and Ukrainian rapeseed crop, reducing immediate concerns over production risks and helping stabilize forward market sentiment.

Despite the favorable crop outlook, producer selling remains restrained. The trader based in Ukraine said that “despite the price correction, Ukrainian farmers are not yet in a hurry to actively sell rapeseed under forward contracts.” This reluctance to commit volumes is limiting liquidity in the forward market and preventing a more pronounced decline in rapeseed prices. Market participants appear willing to wait for additional pricing opportunities rather than locking in sales at current levels.

The source attributed this behavior to expectations of stronger competition for available seed. According to the trader, “producers expect active competition between exporters and domestic processors, who continue to increase the volume of crop processing.” For Europe, this suggests that while harvest prospects are improving, the availability of exportable rapeseed may remain constrained if domestic crushing demand continues to grow. As a result, favorable weather conditions are being offset by expectations of tighter competition for supplies, helping maintain support across the rapeseed oil complex despite the absence of immediate bullish catalysts.

News

Global corn prices fluctuate on uncertainty ahead of US-Iran peace talks

- Asian, EMEA buyers await freight clarity
- US market skeptical of peace deal odds
- Brazil eyes 5-8 mil mt Iran demand post deal

Global corn prices fluctuated June 17 ahead of an expected signing of a peace deal between the US and Iran June 19, as market participants maintained a wait-and-see approach amid uncertainty over details of the deal.

Asian buyers on sidelines

Asia corn prices were firmer across the week, with the Platts CFR Northeast Asia assessment rising $3/metric ton from June 12 to $259/mt June 17. Platts is part of S&P Global Energy.

In Vietnam, feed millers remained on the sidelines ahead of June 19, as they “expect a drop in ocean freight ... and set a new low target; expecting low $250s/mt CFR for August and September shipment while the traded prices in the previous week was mid-to-high-$250s/mt.”

“We saw many times how the deal fell through, so now market participants don’t believe [information on a peace deal] easily,” said a Singapore-based trader.

“Given the current stance, unless another missile flies over to Iran, freight is more or less stable until the Friday signing, that is what I hear from freight owners,” said a second Singapore-based trader.

Rates from South America and the US to Asian destinations saw a “gradual drop” of “about $2/mt since last Friday,” according to a grains trader that offered corn to Vietnam.

EMEA buyers await clarity

Corn buyers in Middle Eastern countries are taking a wait-and-see approach, with traders saying the impact of recent developments will become clear only after the deal is signed.

In Saudi Arabia, importers expect corn shipments to return to Dammam after the route was shifted to Jeddah following the conflict.

“When Hormuz starts opening, we will take everything to Dammam,” a Saudi importer said.

“The impacts are not yet seen. We still need to know if vessels will go in or not. We are awaiting the signing on Friday,” a UAE-based trader said. The trader added that, with the UAE serving as a major transshipment hub for corn to other Middle Eastern countries, trade flows will depend heavily on the reopening of routes.

In Egypt, traders said the main impact would be on the exchange rate of the Egyptian pound, which could influence the local market.

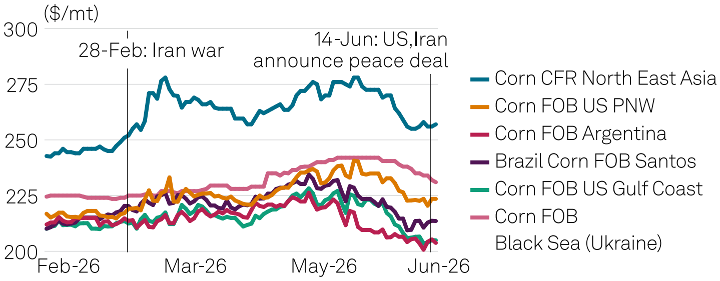
“The market in Egypt is now under very high-pressure as the Egyptian pound is recovering after the war ends,” an Egyptian trader said. "That is not a very good scenario for selling corn, as local prices keep going down."

In the Black Sea market, corn prices were falling amid weak demand. Sellers said lower fuel prices could encourage farmers to increase crop sales.

"If Ukrainian farmers see lower prices at gas stations, they might consider selling their crop at lower prices, but we're not there yet," a Ukrainian seller said.

Platts assessed Ukraine corn FOB POC at $229/mt June 17, up $7/mt from Feb. 27.

Platts corn prices hold firm ahead of possible US-Iran peace deal



Source: S&P Global Energy

US prices ease

US corn prices have been closely tied to the energy market, and sources said the potential peace deal has eased some pressure, but volatility remains high.

"With the potential for the war to be over, anyone who was buying corn because of energy would be exiting that position, because of the risk of higher inflation," said a trader source.

The Chicago Board of Trade corn futures for July (N) and September(U) contracts decreased, which moves Platts outright prices.

Platts assessed the outright price for FOB Gulf corn at $204.92/mt June 16, below $8.66/mt from Feb. 28. The highest price since the beginning of the conflict was $226.08/mt May 1.

"US corn is starting to lose demand to South American supply coming onto the market, which is normal for this time of year," a trader source said.

Latin America market split

A potential peace deal led some market participants in Latin America to expect a rebound in international demand, while others said it would not change the dynamics of Brazil's corn market.

According to a broker, during the conflict, the expectation was that Iran would import a relatively small volume of Brazilian corn. Now, discussions point to 5 million-8 million metric tons if the deal is reached, which could lift prices in the last quarter of the year as domestic market availability in Brazil tightens.

On the other hand, a trader said they do not believe a deal would benefit Brazil, as internal incentives would likely be introduced to close the gap between international and domestic prices and support liquidity in Brazil's domestic market.

Argentina market participants expected no significant impact, since the country exports a low volume of corn to Iran, the broker said.

Platts assessed FOB Santos corn for August shipment at $213.57/mt June 16, down 10 cents/mt day over day. Platts assessed FOB Up River corn for August shipment at $199.80/mt June 16.

Wheat markets shrug off US-Iran deal as freight, harvests take focus

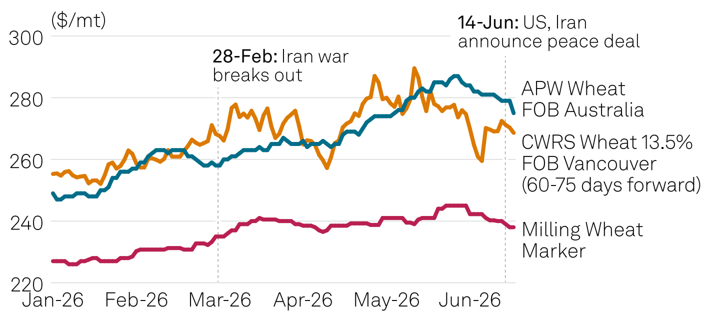
- Harvest, weather drives Black Sea, Australia focus
- Freight costs expected to decline

Global wheat markets showed only limited weakness after the announcement of a tentative US-Iran peace deal and its potential to reopen the Strait of Hormuz. Traders said they expect the biggest impact to be lower freight costs rather than a sharp drop in wheat origin prices.

Market participants across the Black Sea, Australia and North America said wheat prices remain mainly driven by harvest, weather, currency and demand. The peace deal comes after geopolitical risk had briefly lifted freight and origin prices, on concerns about disrupted fertilizer and fuel supplies.

Markets are now watching whether easing war-risk premiums and weaker crude oil translate into cheaper ocean freight, which could further pressure delivered wheat values.

Platts global wheat assessments



Source: S&P Global Energy

Black Sea wheat focus on new harvest: traders

In the Black Sea, traders said the peace deal is unlikely to significantly impact wheat prices in the near term. The market's attention has shifted to the upcoming new-crop harvest, which is expected to begin next month.

Russian traders are monitoring heavy rains in southern Russia, which could delay the new harvest. One Russian seller said there was an "80% chance of delays in July," which could push prices higher if loading schedules tighten.

Sellers have already been lowering offers amid positive new-crop expectations, large carryover stocks and weak demand from key importers. The Platts wheat benchmark, Milling Wheat

Marker, has eased since early June, falling from $242.25/metric tons to $238/mt as of June 16.

Demand from major destinations such as Egypt, Morocco and Turkey has also been limited. Turkey is expected to have a large domestic crop, while Morocco and Egypt are holding comfortable stocks. That has reduced buying urgency and weighed on CIF values. Platts CIF East Mediterranean 12.5% wheat was assessed at $256/mt, down from $261/mt at the start of June.

On freight, traders said Black Sea-to-Egypt freight briefly rose after the Iran conflict began, reaching around $27/mt, but has since softened amid lower demand and reduced risk premiums. Any further decline amid the peace deal could keep delivered prices under pressure.

"If all macros go down, wheat prices might follow," one trader said, of the potential impact of weaker oil and broader commodity markets.

Currency, weather key price drivers for Australia

In Australia, weather developments and new crop prospects are expected to remain the major drivers of Australian wheat prices in the near term, according to several Australian trade participants, with limited impact anticipated from the peace deal announcement.

Australian Premium White rose $1/mt on the day to $276/mt, while Australian Standard White with no protein guarantee rose $1/mt to $271/mt June 17.

Two Australian trade sources said CFR offers would see a greater reprieve compared to FOB offers tracking weaker crude oil prices and, consequently, freight rates, though an upcoming Black Sea harvest would still make it challenging for Australia to compete in the near term.

"Despite a late-May commodity sell-off triggered by US-Iran peace hopes, Australian cash wheat prices remain driven by local supply and demand rather than global macro events. For old crop, a softening in freight rates presents a minor headwind, but the Russian harvest and exports will ultimately set the price direction during this seasonally uncompetitive period for Australian wheat," said Vladimir Zinkovski, associate director and head of Asia-Pacific crops at S&P Global CERA.

"For new crop, key signposts include the resumption of nitrogen and feedstock imports alongside critical August–September rainfall, though strong current soil moisture buffers potential El Niño risks and points toward improved liquidity ahead," Zinkovski added.

North American traders remain cautious

Canadian and US wheat market participants reported cautious reaction from the market following the US-Iran trade deal, with many still skeptical on its longevity.

"So many faints, tough to know if this will stick," a Canadian trader said. "I think most will take a wait-and-see approach."

No immediate impacts were heard on cash prices, with Platts Canadian Western Red Spring wheat 13.5% protein FOB Vancouver 30-45 days forward assessed at $268.60/mt June 16, only $2.57/mt lower than June 12, before the deal was announced.

Despite no immediate market repercussions, downward pressure on prices in the long term was anticipated by some participants, particularly on freight rates.

"I suspect ocean freight will continue [a] long and slow decline," a US trader said. "It was inflated by about $8/mt into [the] far east after the war. So, these need to be given back."

The Canadian trader shared a similar view, speculating freight declines amid lowered war risk.

"I think [we] would see the liners being a little more receptive to putting trades on without a bunch of protection," he said, adding, "the lower the risk, the more willingness to negotiate the rates."

Ukraine corn prices slide as demand from key buyer Turkey fades

- Ukraine corn prices drop $11/mt on weak demand
- Turkey imports slow as wheat, barley compete
- European demand limited; prices face pressure

Ukrainian corn prices are down $11/metric ton month over month as demand from Turkey, the country's key buyer, weakened following an earlier rally sparked by an import quota.

Platts, part of S&P Global Energy, assessed Ukraine corn FOB POC at $229/mt on June 16, down from $240/mt on May 15.

"At current Chicago levels, Ukraine calculates only to Turkey, and that demand is not enough," a Ukrainian seller said.

Turkey has been the leading destination for Ukrainian corn so far in the 2025-26 marketing year. According to port line-up data shared by a trader, Turkey imported 4.8 million mt of Ukrainian corn from September through May, accounting for about 30% of Ukraine's total corn exports during the period.

Prices initially rallied after Turkey introduced a corn import quota on April 17. The measure opened a 3 million mt tariff quota for corn imports, with a reduced customs duty of 5%, for the period from April 20 to July 31. Following the announcement, Ukrainian corn prices climbed to a nine-month high, with Platts assessing Ukraine corn FOB POC at $240/mt on May 13, up from $227/mt on April 17.

However, the rally lost momentum as demand from Turkey's feed industry — the country's main corn consumer — weakened. Turkish importers said competitively priced wheat and barley have reduced corn demand in feed production.

"Corn consumption has come down, and most feed producers will change their ratios toward feed wheat as the harvest has started," a Turkey-based importer said. "There is also the cost of finance, which is high. It doesn't mean the quota has to be fulfilled."

Importers said more than half of Turkey's corn import quota has already been used. "If CIF Turkey prices fall further, the full quota can be used," a Turkish importer said. "If not, feed factories will use domestic barley from their regions."

Still, some market participants expect Turkish corn demand to re-emerge later in the season, driven by delays in the domestic corn harvest.

"The corn harvest will be delayed in Turkey because rain has delayed planting, so there will be a two-month gap between the end of the quota and the corn harvest," a Turkish feed producer said. "Feed factories close to the ports are somewhat far from the main barley harvest areas. Barley may affect corn consumption, but it will not replace corn one-for-one. There will also be a surplus of feed-grade wheat, but it must be priced as cheaply as corn to replace it."

Demand from Europe limited

Moreover, Turkish authorities on June 12 appointed temporary administrators for 13 major poultry companies as part of an investigation into alleged violations of competition law, unjustified price increases and consumer harm. The move weighed on sentiment in the poultry sector, one of Turkey's largest corn-consuming industries.

"Poultry companies received only fines, but there is still no demand," a Turkey-based broker said.

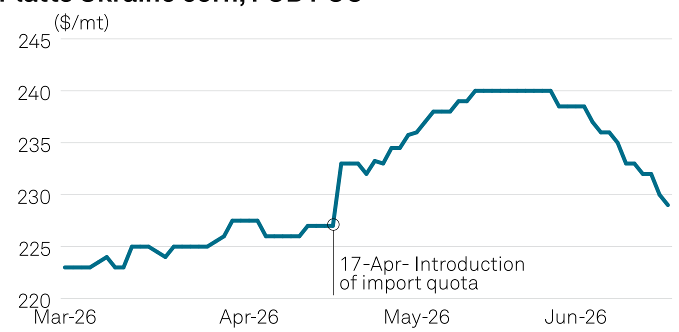
With Turkish demand slowing, Ukrainian sellers have lowered their prices to remain competitive with other destinations, particularly Europe. However, demand there has also been limited.

In Italy, demand in the feed sector remains slow, market participants said. "Some industries report their inventories one month later because of slower feed usage for animals," an importer said. "Since the war started, retail consumption has dropped dramatically — meat, eggs, poultry, flour-mill semolina and other products are down by 20% over the last two months."

In Spain, traders said South American corn remains more competitive than Ukrainian origin. "South American corn is calculating cheaper everywhere," a Geneva-based trader said.

Despite weaker nearby demand, Europe remains an important outlet for Ukrainian corn. According to port line-up data shared by a trader, Italy, Spain and the Netherlands together accounted for 32% of Ukraine's total corn exports from September through May in MY 2025-26.

Platts Ukraine corn, FOB POC



Source: S&P Global Energy

Traders expect Ukrainian corn prices to remain under pressure amid strong new-crop production prospects and lower CPT prices, unless Turkey returns with another round of buying before the quota expires on July 31.

Subscriber Notes

Platts corrects Soybean meal FOB Netherlands assessment for June 9

Platts, part of S&P Global Energy, has corrected the assessment for the Soybean meal FOB Netherlands (EUPMQ00) for June 9.

The assessment should read as Eur357/mt. The correction has been updated in the Platts database under the code EUPMQ00.

The assessment appears in Platts Connect on fixed page PAA(0805) and in Platts Daily Grains.

Assessment Rationale

Grains

Platts Ags EMEA Wheat Daily Rationale

Platts assessed the Milling Wheat Marker at $237.50/metric ton June 17, down 50 cents from the previous assessment. Russian 12.5% Handysize wheat, assessed at $237.50/mt, was the most competitive wheat out of the three components of the Milling Wheat Marker, which also includes Ukraine 11.5%, normalized to the nearest 25 cents of $240.25/mt when adding May's quality normalisation of $6.15/mt, to account for its lower protein content, and CVB 12.5% wheat assessed at $239/mt on the day. This reflects the Platts assessment window from July 15-29.

Platts assessed Black Sea wheat (Russian deepsea, 12.5% protein) down 50 cents at $237.50/mt June 17, below an offer at $238/mt and above an FOB equivalent bid at $237/mt using CIF Egypt July bid at $255/mt normalized with a Russia-Egypt freight heard at $18/mt. The structure between the first and second halves of July was assessed flat. This reflects the Platts assessment window from July 15-29.

Platts assessed Black Sea wheat (Ukraine deepsea, 11.5% protein) unchanged at $234/mt June 17, in line with an indicative value at $234/mt and below an offer for the second half of July at $235/mt. The structure between the first and second halves of July was assessed flat. This reflects the Platts assessment window from July 15- 29.

Exclusions: No market data was excluded from the June 17 Black Sea wheat assessments.

Platts is part of S&P Global Energy.

Platts Asia Wheat Daily Assessment Rationale

Platts assessed Australian Premium White wheat up $1/metric ton day over day at $276/mt FOB Kwinana on June 17 for cargoes loading between Aug. 16 and Sept. 15, tracking a higher indicative value at $276/mt and under the lowest indicative offer at $278/mt.

Platts assessed Australian Standard White wheat with no protein guarantee up $1/mt at $271/mt for cargoes loading over the same period, tracking a higher indicative value at $271/mt. This maintains a $5/mt spread between Australian Premium White and Australian Standard White with no protein.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <WAUSA00>

Platts Canada Wheat Daily Rationale

Platts assessed Canada Western Red Spring Wheat 13.5% FOB Vancouver 30-45 days forward at $273.47/metric tons on June 17, $4.87/mt higher than June 16.

CWRS Wheat 13.5% FOB Vancouver basis 30-45 days forward, spanning July 17 – Aug 1 was assessed unchanged at MIAX Hard Red Spring Wheat September (U) futures plus 96 cents/bushel.

CWRS Wheat 13.5% FOB Vancouver basis 45-60 days forward, spanning Aug 1 – Aug 16 was assessed unchanged at U plus 96 cents/bushel.

CWRS Wheat 13.5% FOB Vancouver basis 60-75 days forward, spanning Aug 16 – Aug 31 was assessed unchanged at U plus 96 cents/bushel.

The assessments were based on an August bid indicated at U plus 90 cents/bu and an August offer indicated at U plus 105 cents/bu, unchanged on the day. The assessments also considered stable market feedback.

Exclusions: No data was excluded in the assessments.

Platts Asia Corn Daily Rationale

Platts assessed corn CFR Northeast Asia up $2/mt day over day at $259/mt CFR June 17 for feed-quality corn arriving over Sept. 15 to Oct. 15 into Pyeongtaek, tracking a normalized trade at $259.19/mt CFR South Korea, accounting for a $1.5/mt freight spread of CFR Taiwan over CFR South Korea.

Platts is part of S&P Global Energy.

Asia corn assessments can be found on <PAA2440>

Market commentary can be found on <PAA2688>

This rationale applies to symbol(s) <WCINV00>

Platts Argentina Corn FOB Up River Daily Rationale

Platts assessed corn FOB Up River for loading in August at $202.56/metric ton on June 17, up $2.76/mt from the previous assessment.

The assessment considered the FOB premium for Up River August-loading cargoes unchanged at plus 85 cents/bu to Chicago Board of Trade September (U) corn futures, based on steady offers heard at U plus 90 cents/bu, and higher bids heard at U plus 83 cents/bu at the market close. The higher bid level did not challenge the previous assessment.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <ARGCA00> <ARGCB00>

Platts Brazil Corn Daily Rationale

Platts assessed the Brazilian corn FOB Santos price for August loading at $215.54/metric ton on June 17, $1.97/mt higher than the previous assessment.

The assessment considered the FOB Santos basis for August loading cargoes 2 cents/bushel lower at plus 118 cents/bu to the Chicago Board of Trade September (U) contract, based on a trade heard at that level, steady offers heard at U plus 123 cents/bu, and no bids heard at the market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <ABCSA00> <ABCSB00>

Platts US Corn Daily Assessment Rationale

Platts assessed the US Yellow Corn No. 2 CIF New Orleans barge basis for June shipment at 79 cents/bushel over the CBOT July (N) corn futures contract on June 17, unchanged from the previous business day. Based on a bid heard in the session at 75 cents/bu, and an offer at 83 cents/bu.

Platts assessed the US Yellow Corn No. 2 CIF New Orleans barge basis for July shipment at 90 cents/bu over the Chicago Board of Trade July (N) corn futures contract on June 17, unchanged from the previous assessment. This was based on a bid heard at 89 cents/bu, and an offer heard at 92 cents/bu.

Platts assessed the US Yellow Corn No. 2 FOB Gulf basis for August shipments at 98 cents/bu over the CBOT September (U) corn futures contracts on June 17. Offers were heard at 102 cents/bu for the first half of August, and 103 cents/bu for the second half of the month.

No information was excluded.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <WCNOE00> <WCNOU00>

Platts FOB Black Sea Corn Daily Assessment Rationale

Platts assessed Ukrainian corn unchanged at $229/metric ton on June 17, below an offer at $230/mt for July loading.

The competitive bid for the day was heard for CIF Marmara at $243/mt for July loading, normalized to $227/mt, reflecting the freight rate of $16/mt from Ukraine ports to Marmara port. The structure between the first and second halves of July was assessed flat. This reflects the Platts assessment window from July 15-29.

Platts is part of S&P Global Energy.

Exclusions: No market data was excluded from the June 17 Black Sea corn assessment.

This rationale applies to symbol(s) <CUBSU00>

Oilseeds.

Platts Asia Soybeans Daily Rationale

Platts assessed CFR China first-month soybeans up $5.98/mt day over day at $499.26/mt, while the basis was down 8 cents/bu at 220 cents/bu over Aug (Q) CBOT June 17. Considering a normalized overnight trade at 220 cents/bu and below the sharpest normalized offer at 229 cents/bu over Aug (Q), for Brazil August shipment.

Platts assessed CFR China second-month soybeans up $7.80/mt day over day at $508.62/mt, while the basis was down 4 cents/bu at 233 cents/bu over Nov (X) CBOT, below the sharpest offer at 234 cents/bu over Nov (X), for Brazil September shipment.

Platts Brazil Soybean Daily Assessment Rationale & Exclusions

Platts assessed the SOYBEX FOB Santos soybean contract for August loading at $453.17/metric ton on June 17, down $1.75/mt from the previous assessment.

The FOB Santos basis for August loading was assessed 7 cents/bushel lower at plus 98 cents/bushel to the Chicago Board of Trade August (Q) contract, based on a spread to the Paranaguá paper market heard at parity. No bids or offers were heard for the full August loading of FOB Santos cargo on the day.

Offers for FOB Santos first-half and second-half August 2026 loadings were heard at Q plus 105 cents/bu and 100 cents/bu, respectively, earlier on the day.

The FOB Paranaguá basis for August loading was assessed 2 cents/bu lower at plus 98 cents/bu to the CBOT Q contract, based on an indicative value heard at that level, lower bids at Q plus 90 cents/bu and steady offers at Q plus 105 cents/bu at the market close.

Platts assessed the SOYBEX FOB Santos soybean contract for March loading at $428.73/mt on June 17, down $1.83/mt from the previous assessment.

The FOB Santos basis for March loading was assessed 8 cents/bu lower at minus 3 cents/bu to the CBOT H contract, based on a spread to the Paranaguá paper market heard at parity. No bids or offers were heard for the full March loading of FOB Santos cargo on the day.

A bid for FOB Santos H1 March 2027 loading was heard at H minus 15 cents/bu earlier on the day.

An offer for FOB Santos H2 March 2027 loading was heard at H plus 3 cents/bu earlier on the day, with bids at H minus 15 cents/bu.

The new crop FOB Paranaguá basis for March loading was assessed 3 cents/bu lower at minus 3 cents/bu to the CBOT March (H) contract, based on an indicative value heard at that level, lower offers at H plus 2 cents/bu and higher bids at H minus 8 cents/bu at the market close.

Exclusions: No data was excluded.

Platts is part of S&P Global Energy.

Platts US Soybeans Daily Rationale

Platts SOYBEX FOB New Orleans for August shipment was assessed at $455.16/metric ton June 17, $1.56/mt up from June 16. The FOB Gulf basis for August shipment was assessed at 102 cents/bushel over the Chicago Board of Trade August (Q) soybeans contract day over day, up 2 cents up from the previous day. This was based on a value indication heard at 102 cents/bu, and an offer at 107 cents/bu.

The CIF New Orleans basis for June shipment was assessed at 76 cents/bu over the July (N) soybeans futures contract day over day. This was based on bids heard at 75 cents/bu and an offer heard at 92 cents/bu.

No information was excluded.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYBBI00> <SYBBL00> <SYBBK00> <SYBBJ00>.

Animal Feed and Protein

Platts Argentina Soybean Meal Daily Rationale

Platts assessed the Argentine soybean meal FOB Up River price for August loading at $336.20/metric ton on June 17, 22 cents/mt lower than the previous assessment.

The basis for August loading in the Up River cargo market was assessed unchanged at $0/short ton to the August (Q) futures at the Chicago Board of Trade. The assessment considered higher offers at plus $4/short ton and steady bids at minus $2/st to the CBOT Q contract at the market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYMAA00> <SYMAB00>

Platts Brazil Soybean Meal Daily Rationale

Platts assessed the Brazilian soybean meal FOB Paranaguá price for August loading at $337.85/metric ton on June 17, up $1.43/mt from the previous assessment.

The basis for August loading in the Paranaguá paper market was assessed $1.50/short ton higher at $1.50/st to the August (Q) futures at the Chicago Board of Trade. The assessment considered a trade at that level, higher bids at minus $1/st and higher offers at plus $3/st to the CBOT Q contract at the market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYMBA00> and <SYMBB00>.

Platts US Dried Distiller Grains DDGS Daily Assessment Rationale

Platts assessed CIF New Orleans dried distillers grains with solubles barges for the June shipment period at $194/st on June 17, unchanged from the previous session based on a bid heard at $185/st and an offer heard at $195/st.

The Chicago DDGS truck market for the June delivery period was assessed at $169/st, holding steady amid no disproving information.

The Southern California rail market for the June delivery period was assessed at $220/st, unchanged amid no disproving information.

Platts is part of S&P Global Energy.

Vegetable Oils.

Platts Argentina Soybean Oil Daily Rationale

Platts assessed the Argentine soybean oil FOB Up River price for July loading at $1,167.13/metric ton on June 17, up 44 cents/mt from June 16.

The basis for July loading in the Up River paper market was assessed 140 points higher at minus 1,860 points to the July (N) futures at the Chicago Board of Trade. The assessment considered an indicative value last heard at that level, offers at minus 1,850 points and bids at minus 1,900 points to the CBOT N contract at the market close.

No trades were confirmed before the market close for July loading in the FOB Up River paper market June 17.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYOAA00> <SYOAB00>

Platts Brazil Soybean Oil Daily Rationale

Platts assessed the Brazilian soybean oil FOB Paranaguá price for July loading at $1,191.38/mt June 17, up $2.65/mt from June 16. The basis for July loading in the Paranaguá paper market was assessed 150 points higher at minus 1,750 points to the July (N) futures at the Chicago Board of Trade. The assessment considered an indicative value last heard at that level and bids at minus 1,900 points to the CBOT N contract at the market close. No offers or trades were confirmed before the market close for July loading in the FOB Paranaguá paper market June 17.

Platts assessed the Brazilian soybean oil FOB Paranaguá price for August loading at $1,166.91/mt June 17, up $1.10/mt from June 16. The basis for August loading in the Paranaguá paper market was assessed 120 points higher at minus 1,720 points to the August (Q) futures at the Chicago Board of Trade. The assessment considered an indicative value last heard at that level. No bids, offers or trades were confirmed before the market close for August loading in the FOB Paranaguá paper market June 17.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYOBB00> and <SYOBA00>.

Platts Europe Sunflower Oil Daily Rationale

Platts assessed sunflower oil FOB Black Sea Ukraine for July, unchanged on June 17 at $1,381/mt, above a bid heard at $1,380/mt.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SFWBL00>
