Commentary and Analysis

Wheat

Platts European Wheat Daily Commentary

- Black Sea wheat prices hit a five-month low
- Platts Milling Wheat Marker drops $4.72/mt in June
- Weak demand pressures market trend

The Black Sea wheat market continued to decline on July 1 amid a drop in sellers' offers amid weak demand.

Russia's 12.5% sellers offered at $229/metric ton, compared to $227/mt. The market traded at $228.50/mt June 29, traders said. Meanwhile, the CIF East Med market basis Egypt's declined by $3/mt amid lower offers at $247/mt. Overall, prices fell to a five-month low, pressured by weak demand and a favorable new crop harvest.

The June average for the Platts wheat benchmark, the Milling Wheat Marker, is $237.28/mt, down $4.72 from $242/mt in May. The MWM June 30 was assessed at $229/mt, tracking mostly Russian wheat prices.

Ukrainian 11.5% saw a tight spread of $227/mt in offers and $226/mt in bids, as market participants listed limited demand, mainly to Algeria and Egypt, in June. The CPT market was at bids of $204/mt, $212/mt, and $214/mt, respectively, for the feed, 11.5% and 12.5% protein. "The market is bearish on all positions," one local seller said.

The Constanta-Varna-Burgas market also fell, amid bids for the 12.5% and 11.5% at Eur3 below Matif September and 5 below MU ($228.5/mt and $226/mt), respectively, versus offers at $235/mt and $237/mt.

Platts Asia Wheat Daily Commentary

- Australian wheat eases
- South Korea buys feed wheat June 30

The Platts-assessed Australian Premium White and Australian Standard White with no protein guarantee both were down $2/metric ton day over day July 1, at $271/mt and $266/mt FOB, respectively, tracking lower value and offer indications.

Grower sales and activity in the Australian FOB market were still centered around old crop shipments, with very limited offers seen for new crop shipments, several Australian trade sources said.

East Coast indications remained under pressure, with offer indications decreasing as much as $10/mt week over week, which has also led to sharper containerized wheat offers for the August-September shipment, three Australian and Asia-based trade sources said.

Several Asia-based trade sources said they observed limited bids for new-crop Black Sea wheat shipments, as offer indications were between mid- to high-$270s/mt CFR, while buying ideas are below or very close to $270/mt CFR.

A South Korean feed buyer bought one cargo of optional-origin feed wheat in a private deal late June 30, according to a Singapore- and a Seoul-based grains trader. The buyer paid $275.93/mt CFR, with the cargo likely to be delivered from European or Black Sea ports, excluding Russia and Ukraine.

Platts is part of S&P Global Energy.

Platts Canada Wheat Daily Commentary

- Wheat acreage falls 5.9% to 25.3 million acres
- CWRS trades at discount to US Northern Spring

Platts assessed Canada Western Red Spring Wheat 13.5% FOB Vancouver 30-45 days forward at $286.88/metric tons on July 1, $3.77/mt higher than June 30 as futures continued to escalate and basis levels held unchanged. Overall Canadian wheat market activity was subdued on July 1 as Canadian traders were away from the market for the Canada Day holiday.

The December (Z) MIAX Hard Red Spring Wheat futures contract firmed 10.25 cents/bushel on the day to 641.75 cents/bu as the bullish US Department of Agriculture acreage report from June 30 that lowered wheat acreage continued to sway market sentiment.

Statistics Canada similarly released its June update for the Principal Crop Areas report on June 30, indicating lower acres planted to wheat as producers opted to increase acres planted to canola, barley, corn, and soybeans. Wheat area was down 5.9% year over year to 25.3 million acres in 2026. Spring wheat in particular fell 3.9% to 18.1 million acres. No immediate market reaction was heard on the day.

The South Korean tender from June 30 for two cargoes of US Northern Spring wheat 14% protein FOB Pacific Northwest – one for 14,000 mt and the other for 22,000 mt – reported traded between 140-150 cents/bu over Z, which was reflective of non-tender October/November prices, sources said.

For US NS 13.5% protein wheat FOB PNW, an offer was heard at 150 cents/bu over Z for October and 160 cents/bu over Z for November. Comparatively, CWRS wheat 13.5% protein for October/November was heard offered between 110-120 cents/bu, with bids at Z plus 100 cents/bu, reflecting a significant discount to US NS.

"With the soy and corn export program for Oct and Nov, PNW NS and HRW values have increased a lot in the past two weeks," a US trader said on the price difference.

In Bangladesh, a CWRS CFR-Chittagong offer for September was heard at $325/mt, although buyer activity remained slowed.

"We are still sidelined," a trader in the region said, attributing the slowdown to broader financial issues in the country.

Corn

Platts Asia Corn Daily Commentary

- Asian corn prices rise $2.5/mt to $258.5/mt
- Japan covers 90% Aug, 40% Sep shipment demand

Asian corn prices rebounded on July 1 following the release of the US Department of Agriculture's 2026 Acreage and Stocks Reports on the evening of June 30.

Platts assessed feed quality corn CFR Northeast Asia up $2.5/mt at $258.5/mt for cargoes arriving over Sept. 29-Oct. 29.

Market participants retreated to the sidelines following the report and changes in the Chicago Board of Trade corn futures market, as buyers had expected prices to fall while sellers announced that the previous day's offer prices were no longer available.

"No sounds after the report, it was also too late for them because futures are up... [offer levels] should be higher today, we won't sell at $253/mt [anymore] buy maybe some others would," said a grains trader based in Singapore.

In Japan, feed millers were reported to have covered about 90% of August shipments, and 40% for September shipments, according to a Japanese trader.

USDA's June 30 Acreage report printed a 3% decline year over year in corn acreage at 95.3 million acres, Platts reported earlier.

"The bigger corn acreage number that some feared was not printed, and the market will now focus on yield," said a grains analyst.

From December 16 to May 15 the prompt Brazil loading month value is not published.

A second Singapore-based trader said, “The increase in soybeans and decrease in corn does not seem like a lot, but prices are still in a bearish trend. Perhaps we need a weather or another factor [to turn the trend around].”

Traders continued to report a lack of US Pacific Northwest corn basis offer indications for September shipment.

Platts is part of S&P Global Energy.

Platts Latin America Corn Daily Commentary

- Latin American corn prices rise with CBOT
- Brazil domestic prices fall in key regions
- Anec cuts June corn export forecast to 497,640 mt

Platts, part of S&P Global Energy, assessed Latin American FOB corn prices higher on July 1 as Chicago Board of Trade futures rose.

Argentine FOB Up River premiums for August loading and Brazilian FOB Santos premiums for August loading declined during the day.

The US dollar to Brazilian real exchange rate stood at Real 5.2249/$1 as of 5:30 pm Brasilia time, up 0.87% day over day.

In Brazil’s domestic market, prices decreased in the Sorriso, Rio Verde, and Maringá regions.

In the spot market, a trade was reported in Santa Helena, Goiás state, at Real 51.00, with payment in cash.

According to a buyer in Paraná state, buyers were consuming stored volumes and waiting for the harvest advance to return to the market, expecting lower prices.

The Brazilian grain exporters association, Anec, forecast Brazil’s June corn shipments at 497,640 metric tons, lower than last week’s estimate of 774,020 mt and down from 568,668 mt a year earlier.

The association projects corn exports for January through June at 6.25 million mt, up from 5.66 million mt in the same period of 2025.

Anec also expects 381,187 mt of corn to be shipped from the ports of Itacoatiara, Santarém, and Barcarena for the week ending July 4.

Platts US Corn Daily Commentary

- US corn prices increase, tracking Sep CBOTs
- Light farmer selling keeps market firm: sources
- Export sales expected above 0.5 million mt

Platts US corn outright prices increased July 1, tracking Chicago Board of Trade September (U) futures, which rose 6 cents on the session to settle at $4.2275/bushel.

A broker said prices remain firm as farmer selling stays very light, and processors are beginning to address ownership ahead of harvest.

“Bids start to need to create space for new crop,” said the source.

Basis for July was reported at 88 in bids and 90 for offers, while the spread in August was at 96 for bids and 99 for offers.

USDA will release weekly Export Sales on July 2. Old-crop corn sales for the week ended June 25 are expected to exceed 0.5 million mt.

Platts assessed outright prices for July shipment CIF New Orleans at $201.50/mt and for August at $204.65/mt. FOB Gulf September shipment under the FOB Gulf incoterm was assessed at $210.14/mt.

Platts is part of S&P Global Energy.

Platts European Corn Daily Commentary

- Black Sea corn prices drop marginally
- Low demand pressures prices in key destinations

The Black Sea corn market dropped marginally July 1, with a tight spread between sellers and buyers.

In the FOB market, competitive offers for July loading were at $222/metric ton, while the bid against the same was at $220/mt. The most competitive offer for August loading was at $225/mt, and the buyer was at $221/mt. Traders confirmed that no spread was seen between the two months.

Despite old crop offers dropping, new crop offers increased. In the FOB market, offers for November shipment were at $228/mt, up $2/mt from the previous day, while the bid against the same was at $224/mt.

Lower demand and negative margins in the primary destinations are pressuring corn prices, traders said.

A seller of Ukrainian corn said there was “logistical availability but no demand,” and noted that “main destinations Turkey, Egypt are having negative import margins”

Market participants also noted that countries such as Syria and Libya are currently the destinations for Ukrainian corn. Furthermore, Greece and Cyprus remained the major destination for coaster cargoes from Ukraine.

In CVB, traders said the market is currently focusing on other crops, such as barley, as old-crop sales are almost over in the region. Traders also said that carryout of old-crop corn would be lower.

“There is no old crop corn, just the usual carryout, which is on the low side, anyway,” a seller from Romania said.

Oilseeds

Platts Asia Soybean Daily Commentary

- Brazil August shipment traded
- Bullish sentiment following USDA report

Platts assessed the CFR China soybean month-one August shipment up $5.42/metric ton day over day at $498.43/mt on July 1, while the basis was up 7 cents/bu at 229 cents/bu over August (Q) Chicago Board of Trade futures.

Overnight, CBOT futures saw heightened volatility following the release of the latest US crop progress report.

Soybean market participants expected soybean acreage to be higher at 86 million acres or more, according to a China-based soybean trader.

“A lot of long positions had been reduced prior to the release of the report, which is why the futures were drifting lower,” said the trader.

“After the release of the report, soybean prices rose partly due to corn leading the move, and also due to fresh long re-entry to the market,” the trader added, citing that it was a situation of “bearish news has already been priced in”.

One cargo of the August shipment for Brazilian soybeans was heard traded at 210 cents/bu over November (X) CBOT, basis CFR China, according to multiple China-based soybean traders.

US soybean emergence reached 96% across 18 major producing states in the week to June 28, about 3 percentage points higher than the previous week, according to the US Department of Agriculture’s Crop Progress report released June 29.

US farmers intend to plant soybeans across 84.7 million acres in 2026, up 4% from 2025, the USDA said in its March 31 Prospective Plantings report.

Platts is part of S&P Global Energy.

Platts Brazil Soybean Daily Commentary

- CFR China soybean activity falls sharply on the week
- CBOT futures rise on Midwest heat, China demand hopes

Platts assessed the SOYBEX FOB Santos soybean contract for August loading at $457.57/metric ton on July 1, up $5.14/mt from the previous assessment.

CBOT soybean futures settled higher, as traders focused on the risk of crop stress from elevated Midwest temperatures and prospects for additional US soybean sales to China, analysts said.

Brazilian grain exporters' association ANEC cut its June soybean export forecast by 1.20 million metric tons from the previous week's estimate, now expected at 14.05 million mt. Despite the downward revision, exports are still on track to reach the highest volume ever recorded for the month, the group said.

The latest estimate represents an increase of 1.9% from Anec's June 2025 data, it said.

Brazil's soybean exports through the first six months of 2026 are projected at 72.79 million mt, up 7.0% over the same period in 2025, according to Anec.

There was thin trading activity in the Paranaguá soybean FOB market, with no trades heard on the day.

The volume of CFR China soybean cargoes traded this week dropped considerably, as domestic crush margins continued to erode, according to market participants.

The US dollar versus the Brazilian real settled at Real 5.2077/$1 at 4:30 pm Brasilia time. Domestic soybean prices were higher in the main producing regions.

Platts US Soybeans Daily Commentary

- Outright prices rise; CIF NOLA basis falls
- Demand in NOLA market low, sources say

The US soybeans market saw the CIF New Orleans basis fall July 1 amid bearish demand, but futures rose amid unconfirmed reports that China was inquiring about US soybeans, sources said.

Platts, part of S&P Global Energy, assessed SOYBEX FOB New Orleans for August shipment up $3.31/metric ton from the previous business day at $453.14/mt. Platts assessed the basis for FOB Gulf for August shipment steady day over day at 100 cents/bushel over the August (Q) soybeans futures contract.

Platts assessed the outright price for CIF NOLA for July shipment up $2.39/mt from June 30 at $445.79/mt. Platts assessed the basis for CIF NOLA for July shipment down 3 cents day over day to 87 cents/bu over the July (N) soybeans futures contract.

Sources attributed the fall in the CIF NOLA basis to low demand.

"More sellers than buyers," a trader in that market said. "Old crop soybean export demand has been very limited. Farmers are spotting out beans daily here and there, and the exporter doesn't really need them. More and more beans should start flowing to the processors."

Contrary to that downward movement, the futures market climbed July 1, with July (N) contract increasing 9.5 cents day over day to 1,126.25 cents/bu and August (Q) futures increasing 9 cents to 1,133.25 cents/bu.

Sources said unconfirmed information pointing to China inquiring about US soybeans July 1 was heard in the market, which helped to boost futures.

"There was a rumor that China was price checking this morning," a second trader in the CIF NOLA market said. "It was

Speaking of China, a trader in the FOB Gulf market said, "I'm only left with the hope that they appear at some point."

Animal Feed

Platts Latin America Soybean Meal Daily Commentary

- FOB prices increase on higher CBOT futures
- FOB Paranaguá trades lower for August dates

South American soybean meal FOB prices rose on July 1, following gains in Chicago Board of Trade futures, as the August (Q) contract settled at $305.30/short ton, up $1.40/st.

In Argentina, the FOB Up River cargo market posted a relatively quiet session. There were no trades heard, despite a narrower offer-bid gap reported for August shipments throughout the session.

Regarding Brazil's FOB Paranaguá, a weaker sentiment set the tone, with August parcels traded at a $1/st premium to the CBOT references, below June 30 levels. There was a deal for September loading as well.

Among market fundamentals, S&P Global Energy CERA analysts raised their forecast for Brazil's 2025-26 soybean crush by 1 million metric tons to a record 63.50 million mt, up from 58.70 million mt in 2024-25.

According to the analysts, the upward revision followed strong soybean meal exports and rising domestic demand for soybean oil.

Platts European Animal Feed Daily Commentary

- Dutch rapeseed harvest shifts August demand
- Spanish corn demand drops on cheaper grains
- Soybean meal prices rise on CBOT rally

Northern Europe

On July 1, the Dutch market was active, with prices and offer levels remaining steady.

According to a broker, there are very limited offers for August, because of a smaller lineup, rapeseed harvest is on the way in Netherlands, which will be in the market by August, shifting he demand towards rapeseed.

He added that, the August offers can be the same level as July for Brazilian pellets at Eur352/mt, with no trades or bids seen from the market.

Southern Europe

The Spanish corn market was unchanged on July 1, with steady offers.

A trader said the demand for corn was slightly lower because wheat and barley were much cheaper. With the barley harvest expected to be completed by the end of July or the beginning of August, the shift will be seen.

The soybean meal market was bearish day over day, with higher offers and tradable levels.

According to a trader, soybean meal prices have increased amid the CBOT rally, as the USDA report was released on June 30.

A Germany-based news agency reported that CBOT soybean meal prices have risen amid stronger, sustained demand from Asia.

Platts US Distiller Grains DDGS Daily Commentary

- Limited trading as processors support prices
- Corn futures uptick lifts nearby values
- Holiday trading remains quiet

The US dried distillers grains with solubles market showed modest firmness July 1, with participants reporting limited trading activity as processors supported nearby values following an uptick in corn futures ahead of the Fourth of July holiday.

Platts assessed CIF New Orleans dried distillers grains with solubles barges for the July shipment period at $182/short ton,

the Chicago DDGS truck market for the July delivery period was assessed at $166/st, and the South California rail market for the July delivery period was assessed at $210/st.

One broker said participation remained light with "limited players in this week," adding that processors were supporting DDGS as corn moved higher.

The broker said the market may be following a seasonal pattern often seen ahead of the holiday, with processors firming offers in anticipation of potential summer weather concerns before activity slows.

"Processors hope for that summer weather scare, take offers, and go on," the source said.

Another broker agreed that nearby values appeared to have stabilized after recent declines.

"We oversold the bottom," the broker said, adding that firmer processor bids were contributing to the improved tone.

The broker also described trading activity as very limited and added that soybean meal was "a little firmer."

A third broker reported stronger truck values, and some participants believe the market may have found a floor. The source also reported increased producer buying interest during the week.

The US Energy Information Administration reported weekly ethanol production for the week ending June 26 at 1.117 million barrels/day, up 2.48% from the previous week.

Vegetable Oils

Platts Asia Palm Oil Daily Commentary

- Asian palm oil market declines July 1
- Indonesia implements B50 biodiesel mandate
- BPS reported exports rose 7.4% Jan-May versus 2025

The Asian palm oil market declined July 1, with palm oil futures on Bursa Malaysia little changed, amid a weakened ringgit against the dollar, as gains were capped by a decline in other rival oils and crude prices.

Indonesia implemented the B50 biodiesel mandate on July 1, in its efforts towards energy transition. With crude prices moving near pre-war levels, market participants continued to monitor both price movements as palm oil typically is sold at a premium over diesel.

BPS-Statistics Indonesia reported Indonesia's export data for January to May 2026 showed 7.4% increase from the same period last year.

The benchmark palm oil contract for September delivery on the Bursa Malaysia commodity exchange rose MR8/mt to MR4,557/mt July 1.

The Indian market was slow July 1, with one trade heard.

"Market remained slightly cautious as the B50 biodiesel mandate was implemented [on July 1]," an Indonesia-based trader said.

Platts Latin America Soybean Oil Daily Commentary

- Argentine, Brazilian soybean oil FOB rises
- CBOT futures fall 0.36% on supply outlook
- FOB basis strengthens on resilient demand

Brazilian and Argentine soybean oil FOB markets strengthened July 1 as Chicago Board of Trade soybean oil futures edged lower, while FOB basis levels in both countries continued to recover amid resilient physical export demand.

CBOT August soybean oil futures fell 0.36% day over day to settle at 66.69 cents/pound.

Market participants said soybean oil futures remained under pressure following the bearish USDA acreage and quarterly stocks data released June 30, which reinforced expectations for abundant US soybean supplies. However, losses were relatively modest as the market consolidated after the sharp decline recorded in the previous session.

In Argentina, Platts assessed the soybean oil FOB Up River price for August loading at $1,161.62/metric ton July 1, up $3.53/mt from June 30. The basis for August loading in the Up River paper market was assessed 40 points higher at minus 1,400 points to August (Q) futures at the Chicago Board of Trade.

In Brazil, Platts assessed the soybean oil FOB Paranaguá price for August loading at $1,177.05/mt July 1, up $7.94/mt from June 30. The basis for August loading in the Paranaguá paper market was assessed 60 points higher at minus 1,330 points to the August (Q) futures at the Chicago Board of Trade.

Platts also assessed the soybean oil FOB Paranaguá price for September loading at $1,155.44/mt July 1, up $5.95/mt from June 30. The basis for September loading in the Paranaguá paper market was assessed 40 points higher at minus 1,390 points to the September (U) futures at the Chicago Board of Trade.

Market participants said the continued strengthening in FOB basis reflected resilient physical export demand despite ongoing weakness in CBOT soybean oil futures.

Traders noted that basis values in both Argentina and Brazil have now recovered substantially from the historically weak discounts observed in early June, allowing outright FOB prices to remain relatively stable even as futures have corrected sharply from their recent highs.

Participants added that the divergence between financial and physical markets remains a defining feature of the current soybean oil market. While CBOT soybean oil futures continue to respond primarily to speculative positioning and improving global supply expectations following recent USDA data, South American FOB markets remain supported by steady export demand, competitive pricing and active commercial buying.

Brazil's record soybean crop and crush outlook, together with abundant regional soybean oil supplies, continued to provide a comfortable supply backdrop for exporters. However, traders said the recovery in basis demonstrates that physical market fundamentals remain considerably stronger than the recent performance of the futures market alone would suggest.

Platts is part of S&P Global Energy.

Platts Europe Vegetable Oil Daily Commentary

- Rapeseed oil prices fall despite tight supply
- Sunflower oil remains stable on slow trading
- Indonesia launches B50 biodiesel mandate

European rapeseed oil prices declined across the board on July 1 despite market participants noting limited supply on the day, while sunflower oil prices saw stability on slow trading activity.

The FOB-Dutch-Mill RSO front run Aug-Sept-Oct contract fell Eur12/mt day over day to Eur1,144/mt. The rest of the curve decreased, albeit showing smaller losses. The second run, Nov-Dec-Jan fell Eur3/mt day over day to Eur1,148/mt, while the third run Feb-Mar-Apr was assessed at Eur1,134/mt, down Eur4/mt day over day. At the end of the curve, the fourth run May-June-July was assessed down Eur5/mt at Eur1,132/mt.

One rapeseed methyl ester producer noted tightness in the old crop. "No big stocks of RSO available," the producer said, pointing to worsening RME production margins amid limited feedstock supply.

A similar picture was seen in the Black Sea sunflower oil market, with one Black Sea-based trader observing limited liquidity and increased offer levels on the day, adding that it "feels firmer." Despite higher prices on the seller side, no bids were heard on the day in the Ukrainian sunflower oil market.

Platts assessed FOB Black Sea sunflower oil at $1,379/mt, flat day over day and unchanged since June 19.

Elsewhere, Asian palm oil prices fell on the day with Bursa Malaysia futures little changed following a weakened ringgit against the dollar, as gains were capped by falls in other rival oils and crude prices.

Indonesia implemented the B50 biodiesel mandate on July 1, in its efforts toward energy transition.

The same Black Sea trader said that the impact of Indonesia's biodiesel mandate is yet to be seen in the vegetable oil complex.

Platts is part of S&P Global Energy.

News

EMEA MONTHLY FEED WRAP UP: European corn, soybean meal prices drop in June

- CBOT rally, euro decline boost prices mid-June
- Low demand shifts corn buyers to wheat, barley

European corn and soybean meal prices declined month over month in June as ample soybean meal supply and a shift in demand to other grains weighed on the market.

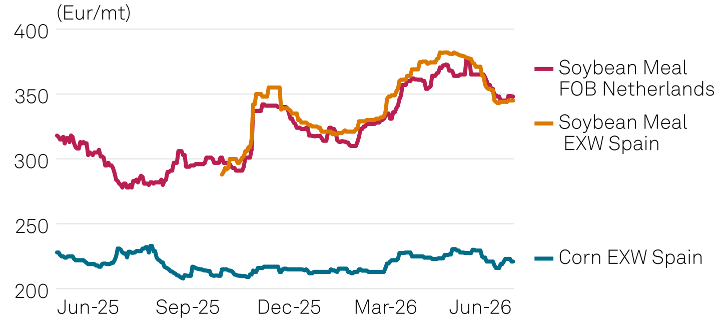
At the same time, prices increased slightly mid-month due to movements on the Chicago Board of Trade and changes in the euro-dollar exchange rate, according to brokers and traders in Spain, Italy and the Netherlands.

Platts, part of S&P Global Energy, assessed FOB Netherlands soybean meal at Eur348/metric ton on June 30, down Eur17/mt month over month. EXW Spain soybean meal was assessed at Eur45/mt on June 30, down Eur26/mt month over month, while EXW Spain corn was assessed at Eur221/mt, down Eur8.50/mt over the same period.

Corn prices began to rise after June 17 as the euro depreciated against the dollar and an uptick on the CBOT pushed prices higher, according to Spanish brokers and traders.

Exchange rates and the CBOT uptick also affected the soybean meal market in Spain and the Netherlands, traders and procurement managers said.

EU Feed Spain and Netherlands prices



Source: S&P Global Energy

"Corn offer levels were almost unchanged during the month, but traded levels fluctuated following exchange rate and CBOT movements," a Spanish corn trader said June 24.

Demand for corn is very low because it is now expensive, a Dutch broker said June 30. Buyers are purchasing wheat and barley, which are less expensive.

The broker added that lower water levels are affecting transportation and raising freight rates.

The heat wave did not affect the current corn and barley harvest in Spain, since most corn is cultivated under irrigated land and "we have good water reserves now," another Spanish corn trader said.

At the same time, the new crop is expanding due to the heat wave, which is raising corn prices, according to an Italian trader.

Spanish, Italian and Dutch soybean meal traders reported price declines with ample supply at the beginning of the month, followed by an uptick recently amid tight supply from the origin market.

A Spanish soybean trader confirmed this, adding that the market has a delayed structure, with lower prices expected in August and September, as of June 27.

There are no offers available for August as of June 30, because there is very little volume available now, a Dutch soybean meal trader said.

The corn and soybean meal markets are "quiet" amid CBOT rally and exchange rate fluctuations, the Spanish, Italian and Netherlands corn and soybean meal traders said, noting that the market is expected to be more active in August.

Wheat drops to 5-month low; harvest supply meets weak Egypt demand

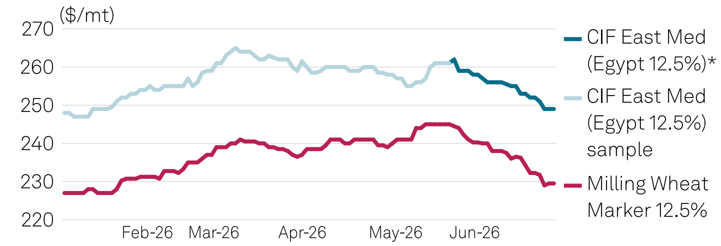
- Wheat prices fall to a five-month low
- Egypt's wheat imports expected to drop
- Private importers gain a larger market share

Wheat prices fell to a five-month low June 30, pressured by weak demand from major importing countries including Egypt and Turkey, while fresh supply from the new-crop Black Sea harvest weighed on sentiment.

The decline comes as Egypt, the world's largest wheat importer, undergoes significant changes to its wheat import system. Private companies are taking a larger share of the market, local production is higher, and the government is considering changes to its subsidized bread program.

Platts wheat benchmark, the Milling Wheat Marker, was assessed at $229/metric ton June 30, its lowest level since Jan. 30. The CIF market moved similarly, with Platts CIF East Mediterranean basis Egypt 12.5% assessed at $249/mt on June 30.

Platts wheat prices fall amid new crop harvest; weak demand



*Platts officially launched the price assessment on June 1

Source: S&P Global Energy

Egypt's import demand slows

Egypt concluded the June-to-July wheat marketing year with its largest-ever annual wheat purchases, totaling more than 14 million mt.

However, demand has slowed as importers point to high volumes in bonded warehouses, estimated at around 1.4 million mt. Some importers have paused new purchases, while others are focusing on covering demand for the second half of July and August.

Local prices could fall further as storage conditions become more difficult during the summer months, market participants said. Higher temperatures increase the risk of pest infestation, while ventilation and sealing costs also rise. "Storing wheat will be hard," one buyer said, adding that some holders may lower prices to sell off stocks. "The local situation is terrible," a second importer said.

Ex-warehouse 12.5% wheat prices are at EGP 13,000/mt ($265/mt), down from EGP 14,200/mt a month earlier, according to market participants. Traders are also monitoring the appreciation of the Egyptian pound against the US dollar, at EGP 49/$1, compared with a peak near EGP 55/$1 in April.

Private importers take larger share

Egypt's wheat import structure has shifted, moving away from traditional state tenders toward greater participation by private importers.

Government imports accounted for 37.3% of Egypt's total wheat imports in the MY 2025-26, while private companies accounted for 62.7%, different from the usual 50:50 split in previous years, data from local agency LATT Shipping and Trading Co. showed. Egypt's strategic wheat reserves remain at six months.

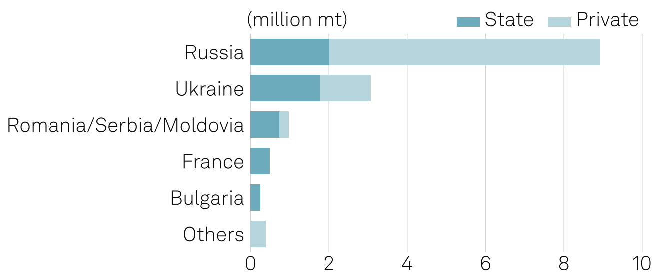
"The state will still import to cover demand, but private participation is expected to grow over time," a third importer said.

The state has also increased purchases from local farmers, buying 4.7 million mt of domestic wheat, and is aiming to reach 5 million mt before the supply season ends in mid-August. That would be well above last year's total of 3.9 million mt, multiple importers said.

The increase follows a higher government procurement price of EGP 2,500 per ardeb, introduced to encourage farmers to sell more wheat to the state.

With strong domestic output, importers expect Egypt's wheat imports for MY 2026-27 to ease to 12 million-13 million mt in the coming year. "We will keep importing, just a bit less," a fourth buyer said.

Egypt's wheat imports in MY 2025/26



Note: Others include Argentina, Australia, Canada, USA

Subsidized bread reform mulled

The government is also considering changes to Egypt's subsidized bread system, including a proposed cash-transfer model, multiple importers said.

Under the proposal, subsidized bread could be priced at EGP 1.5 per loaf, while eligible citizens could receive a monthly cash subsidy of about EGP 325 per person. Market participants said any rollout would likely begin in selected provinces before expanding more broadly.

The proposal follows a major change in 2024, when Egypt raised the price of subsidized bread to EGP 0.20 per loaf from EGP 0.05, the first increase in decades. Previously, eligible citizens used smart cards to buy up to five loaves per day at subsidized prices, creating a fiscal burden for the government.

Importers said the proposed changes were likely aimed at improving the efficiency of state support programs and better targeting eligible beneficiaries. "This is cheaper for the government when food subsidy [budget] is EGP 140 billion per year," a fifth importer said.

Other importers said unsubsidized standard bread is already priced at EGP 1.5-2 per loaf in the market.

The combination of weaker near-term import demand, large local procurement, rising private-sector participation and potential subsidy reform is reshaping Egypt's wheat market at a time when global prices are already under pressure from new-crop Black Sea supply.

South American FOB soybean oil values remain resilient as basis absorbs CBOT futures volatility

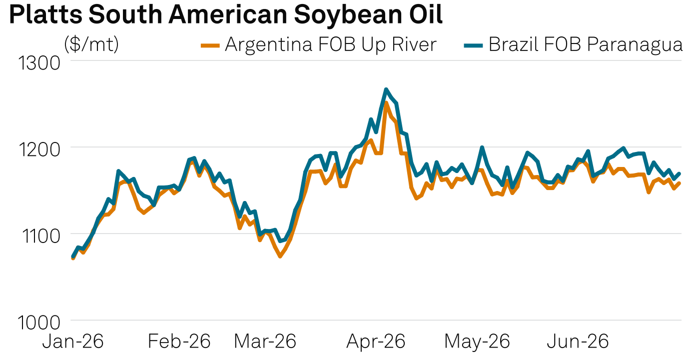
- South American soybean oil FOB prices stay stable
- Basis strengthens sharply to offset CBOT decline
- CBOT futures fall 34% on speculative selling

South American soybean oil FOB prices remained stable throughout June despite one of the sharpest corrections in Chicago Board of Trade soybean oil futures in recent years, as FOB basis levels in Argentina and Brazil adjusted aggressively to absorb the volatility in the futures market.

While CBOT soybean oil futures experienced a sharp correction during the month, physical export prices in South America continued to trade within a comparatively narrow range, highlighting the divergence between financial and physical soybean oil markets.

South American FOB soybean oil prices stable despite futures volatility

Platts South American Soybean Oil



Source: S&P Global Energy

Platts-assessed soybean oil FOB Paranaguá in Brazil and FOB Up River in Argentina traded within a relatively narrow range throughout June despite significant volatility in the underlying futures market.

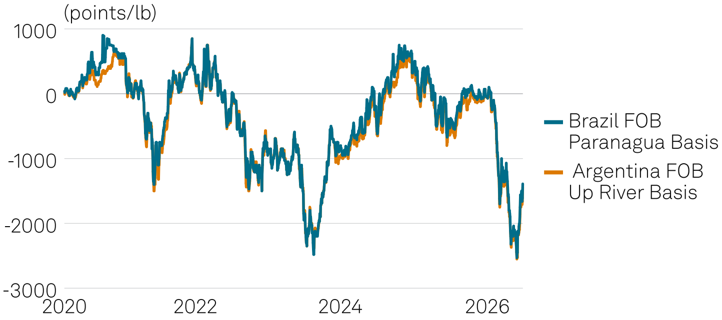
Although both markets experienced normal day-to-day fluctuations, neither reflected the magnitude of the correction taking place in CBOT soybean oil futures. Market participants attributed the resilience to steady international demand, competitive export pricing and stable physical market fundamentals.

FOB basis strengthens sharply to offset declining CBOT soybean oil futures

The stability of South American FOB prices was largely explained by the behavior of FOB basis, which became the primary adjustment mechanism during June.

As CBOT soybean oil futures declined, basis strengthened sharply in both Argentina and Brazil, offsetting much of the weakness in futures and limiting declines in outright FOB prices.

Soybean Oil FOB Basis



Source: S&P Global Energy

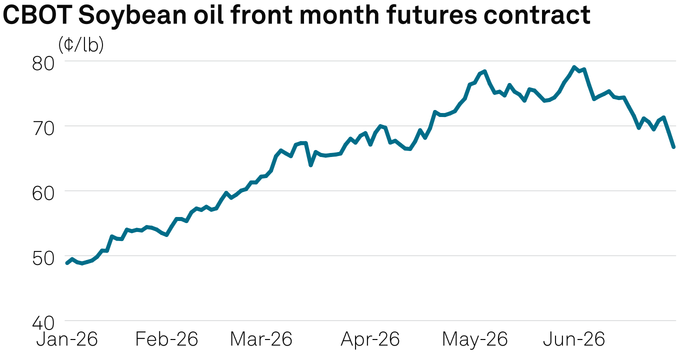
Basis levels had weakened to historically large discounts during late May and early June as soybean oil futures rallied to multiyear highs, briefly exceeding discounts of 2,000 points below CBOT futures. As futures corrected, basis recovered aggressively, strengthening to approximately 1,400-1,700 points below CBOT by month-end.

Market participants said the recovery reflected lower futures prices rather than tighter soybean oil availability.

"The futures market has been extremely volatile, but the physical market has not moved nearly as much," a Brazil-based soybean oil trader said. "Soybean oil futures had an aggressive correction that started on June 4 and reached a near-term bottom on June 18, when July futures traded through a large concentration of stop-loss orders around 70 cents/lb. The underlying demand fundamentals for renewable diesel and soybean oil as a feedstock in the United States have not materially changed, so I view this as a temporary correction."

CBOT soybean oil futures driven lower by speculative liquidation and improving supply outlook

CBOT Soybean oil front month futures contract



Source: S&P Global Energy

The correction in CBOT soybean oil futures reflected a combination of technical selling and increasingly bearish supply fundamentals.

After rallying to nearly 79 cents/lb in early June, front-month soybean oil futures fell below 67 cents/lb by month-end. The decline accelerated as speculative funds liquidated long positions, triggering additional stop-loss selling after key technical support levels were breached.

Bearish sentiment was reinforced by favorable US weather, larger soybean acreage, higher-than-expected quarterly soybean stocks and record soybean production forecasts in Brazil, all of which strengthened expectations for abundant global soybean and soybean oil supplies.

Recent CFTC Commitments of Traders data confirmed the scale of speculative liquidation. Between June 2 and June 23, Managed Money reduced its net long soybean oil position from 156,433 contracts to 103,589 contracts, a decline of nearly 34%, driven primarily by long liquidation rather than aggressive new short selling. Meanwhile, Producer/Merchant/Processor/User participants expanded short hedge positions while Swap Dealers modestly reduced spreading activity, indicating that commercial hedging remained orderly despite the sharp futures correction.

Despite the decline in futures, market participants said renewable diesel demand and physical export demand remain broadly supportive for soybean oil.

The contrasting performance of futures and FOB markets highlights the different forces driving price formation. While CBOT soybean oil futures remain heavily influenced by speculative positioning and evolving supply expectations, South American FOB markets continue to respond primarily to export demand, freight economics and regional supply availability.

For physical traders, June demonstrated that basis successfully absorbed much of the volatility in CBOT soybean oil futures, allowing FOB soybean oil values in Argentina and Brazil to remain comparatively stable despite exceptional turbulence in the financial market.

Assessment Rationale

Grains

Platts Ags EMEA Wheat Daily Rationale

Platts assessed the Milling Wheat Marker at $228/metric ton July 1, down $1/mt from the previous assessment. Russian 12.5% handysize wheat, assessed at $228/mt, was the most competitive wheat out of the three components of the Milling Wheat Marker, which also includes Ukraine 11.5% at $233.13/mt when adding June's quality normalisation of $6.63/mt, to account for its lower protein content, and CVB 12.5% wheat assessed at $235.75/mt on the day. The structure between the second half of July and the first half of August was assessed flat. This reflects the Platts assessment window from July 29-Aug. 12.

Platts assessed Black Sea wheat (Russian deepsea, 12.5% protein) down $1/mt at $228/mt on July 1, below an offer at $229 and above a bid at $227/mt. The structure between the second half of July and the first half of Aug was assessed flat. This reflects the Platts assessment window from July 29-Aug. 12.

Platts assessed Black Sea wheat (Ukraine deepsea, 11.5% protein) unchanged at $226.50/mt July 1, below an offer at $227/mt, and above bid last heard at $226/mt. The structure between the second half of July and the first half of August was assessed flat. This reflects the Platts assessment window from July 29-Aug. 12.

Exclusions: No market data was excluded from the July 1 Black Sea wheat assessments.

Platts Asia Wheat Daily Assessment Rationale

Platts assessed Australian Premium White wheat down $2/metric ton at $271/mt FOB Kwinana July 1 for cargoes loading between Aug. 30-Sept. 29, under a lower indicative offer at $273/mt.

Platts assessed Australian Standard White wheat with no protein guarantee down $2/mt at $266/mt for cargoes loading over the same period, tracking lower indicative value at $266/mt.

This maintains the spread between Australian Premium White and Australian Standard White with no protein guarantee at $5/mt.

Platts is part of S&P Global Energy.

Platts Canada Wheat Daily Rationale

Platts assessed Canada Western Red Spring Wheat 13.5% FOB Vancouver 30-45 days forward at $286.88/metric ton on July 1, $3.77/mt higher than June 30.

CWRS Wheat 13.5% FOB Vancouver basis 30-45 days forward, spanning July 31-August 15 was assessed unchanged at MIAX Hard Red Spring Wheat December (Z) futures plus 139 cents/bushel based on an August offer indicated at Z plus 140 cents/bu.

CWRS Wheat 13.5% FOB Vancouver basis 45-60 days forward, spanning August 15-August 30 was assessed unchanged at Z plus 119 cents/bu. The assessment was unchanged to maintain the previous market structure.

CWRS Wheat 13.5% FOB Vancouver basis 60-75 days forward, spanning August 30-September 14 was assessed unchanged at Z plus 119 cents/bu based on a September offer indicated between Z plus 120-140 cents/bu.

Platts Argentina Corn FOB Up River Daily Rationale

Platts assessed corn FOB Up River for loading in August at $204.63/metric ton on July 1, $1.19/mt higher from the previous assessment.

The assessment considered the FOB premium for Up River August-loading 3 cent/bushel lower at plus 97 cents/bu to Chicago Board of Trade September (U) corn futures, based on an indicative value heard at that level, lower offers heard at U plus 100 cents/bu, and steady bids heard at U plus 95 cents/bu at the market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <ARGCA00> <ARGCB00>.

Platts Brazil Corn Daily Rationale

Platts assessed the Brazilian corn FOB Santos price for August loading at $213.67/metric ton on July 1, $1.18/mt higher from the previous assessment.

The assessment considered the FOB Santos basis for August loading cargoes 3 cent/bushel lower at plus 120 cents/bu to the Chicago Board of Trade September (U) contract, based on an indicative value heard at that level, lower offers for August H1 loading at U plus 125 cents/bu, lower offers for August H2 loading at U plus 125 cents/bu, offers for full August loading at U plus 128 cents/bu, and no bids heard at the market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <ABCSA00> <ABCSB00>.

Platts US Corn Daily Assessment Rationale

Platts assessed the US Yellow Corn No. 2 CIF New Orleans barge basis for July shipment at 89 cents/bushel over the Chicago Board of Trade September (U) corn futures contract on July 1, down 3 cents from the previous assessment. This was based on a competitive bid heard at 88 cents/bu, and an offer at 90 cents/bu.

Platts assessed the US Yellow Corn No. 2 CIF New Orleans barge basis for August shipment at 97 cents/bu over the CBOT September (U) corn futures contract on July 1, up 3 cents in comparison with the previous business day. This was based on a competitive bid heard at 96 cents/bu, and an offer at 99 cents/bu.

Platts assessed the US Yellow Corn No. 2 FOB Gulf basis for September shipments at 111 cents/bu over the CBOT September (U) corn futures contracts on July 1. This was based on offers heard at 118 cents/bu for the first half of September, and 123 cents/bu for the second half of the month.

No information was excluded.

Platts Brazil Soybean Daily Assessment Rationale & Exclusions

Platts assessed the SOYBEX FOB Santos soybean contract for August loading at $457.57/metric ton on July 1, up $5.14/mt from the previous assessment.

The FOB Santos basis for August loading was assessed 5 cents/bu higher at plus 112 cents/bushel to the Chicago Board of Trade August (Q) contract, based on a spread to the Paranaguá paper market heard at plus 7 cents/bu. No bids or offers were heard for the full August loading of FOB Santos cargo on the day.

The FOB Paranaguá basis for August loading was assessed 2 cents/bu lower at plus 105 cents/bu to the CBOT (Q) contract, based on an indicative value heard at that level, lower bids at Q plus 103 cents/bu and higher offers at Q plus 115 cents/bu at market close.

Platts assessed the SOYBEX FOB Santos soybean contract for March loading at $430.29/mt on July 1, up 74 cents/mt from the previous assessment.

The FOB Santos basis for March loading was assessed 2 cents/bu lower at parity to the CBOT March (H) contract, based on a spread to the Paranaguá paper market heard at plus 5 cents/bu. No bids or offers were heard for the full March loading of FOB Santos cargo on the day.

The new crop FOB Paranaguá basis for March loading was assessed 4 cents/bu lower at minus 5 cents/bu to the CBOT March (H) contract, based on an indicative value heard at that level, lower offers at H minus 1 cent/bu and lower bids at H minus 15 cents/bu at market close.

Exclusions: No data was excluded.
