Commentary and Analysis

Wheat

Platts European Wheat Daily Commentary

- Black Sea wheat trades sideways on weak demand
- Russia sets export wheat tax at zero

The Black Sea wheat market moved sideways on the day amid weak demand. Russian wheat buyers bid at $235/mt, compared to offers at a $5/mt premium. Despite recent price increases due to shipping disruptions, traders said overall demand was weak amid ample harvest supplies. Ukrainian sellers offered at $229-230/mt, with no firm bids on FOB.

The Russian agriculture ministry has set its variable export wheat tax to zero for a second consecutive week from July 22-28 on July 17. The export duty is calculated as a percentage of the difference between a base price and the average export prices on an FOB basis during the 60 days preceding the day of calculation. For the latest calculation, that average is at $229.10/mt.

The CVB market extended its gain up $2/mt on the day. The most competitive bid was at Eur 15 under Matif Sept, while offers were at a Eur 4 discount to Matif. "I haven't heard of a better bid for August," one buyer in Romania said.

Platts Asia Wheat Daily Commentary

- Australian wheat extends gains
- Australian offers rise $10-$15/mt on week

Australian Premium White rose $13/mt day over day to $287/mt July 17, while Australian Standard White with no protein guarantee rose $9/mt to $279/mt, tracking higher value indications.

FOB offers for APW were up $10-$15/mt week over week, according to multiple Asian trade sources. Two of the sources said they observed a similar price rise across all other Australian wheat grades.

"APW was still at $278/mt on Tuesday (July 14), and now it's $290/mt [FOB Western Australia]," said a Singapore-based grains trader.

However, firm bids were still hard to come by, though buyer interest was expected to grow as shipping risks in the Black Sea persist longer, according to a Perth-based trade source and two Singapore-based traders.

CFR offers of Black Sea 11.5% wheat have similarly risen at least $10/mt week over week, with indications heard around $290s/mt CFR, said another Singapore-based grains trader.

Platts Canada Wheat Daily Commentary

- September basis edges lower
- Farmer selling remains limited

Platts assessed Canadian Western Red Spring Wheat 13.5% FOB Vancouver 30-45 days forward at $307.46/metric ton on July 17, $3.40/mt higher than July 16, with market participants pointing to a quieter market and limited commercial activity as nearby values softened.

December Minneapolis Hard Red Spring wheat futures contract (MWZ) settled at 716.75 cents/bu, up 8 cents day over day.

One Canadian trader said 90 cents/bu over the December Minneapolis wheat futures contract was becoming a realistic indication for September, adding that "some say it might be weaker now, so September 90 MWZ is very possible."

Despite the softer nearby tone, farmer selling remained limited. Another Canadian trader said excessive moisture across parts of the Canadian Prairies continues to weigh on crop conditions and is reinforcing producer reluctance to market remaining supplies. "Farmers [are] not selling much as the crop is still under stress with excess moisture and risks of fusarium. It's a period where basis and futures are firm," they said.

Trading activity was otherwise subdued, with little fresh price discovery. A third trader said, "We have been inactive this week with limited inquiries, so haven't heard or seen much basis movement." A fourth trader reported seeing similar values to previous sessions.

The combination of thin demand, limited farmer selling and ongoing weather uncertainty continued to keep the Canadian wheat market largely stable despite softer indications for nearby September basis.

Corn

Platts Asia Corn Daily Commentary

- Asian corn prices fall on weak demand
- South Korea, Vietnam buyers on sidelines
- Thai millers buy US corn below $270/mt

Asian corn prices declined day over day July 17 following a lack of buyer interest across South Korea and Vietnam.

Platts assessed feed quality corn CFR Northeast Asia down $2.25/metric ton at $266.75/mt for cargoes arriving over Oct. 15 to Nov. 14.

South Korean buyers were on the sidelines to celebrate Constitution Day holiday July 17, while Vietnamese buyers held back from purchases amid healthy inventory levels for October-November arrivals, trade sources said.

A group of Thai feed millers purchased a cargo of US corn on July 16 for a September cargo at a level below $270/mt CFR, according to a Thai grains broker.

Platts Corn Arbitrage Price Matrix showed CFR Northeast Asia basis replacement levels at $267.43/mt for the most competitive origin, Argentina's September shipments, and $271.02/mt for Brazilian origin September shipments. US Pacific Northwest corn replacement levels were at $278.52/mt CFR.

US Pacific Northwest corn basis offer indications for September shipment were heard lower day over day at 143 cents/bushel over September (U) Chicago Board of Trade futures contract, while no new crop was offered for October-December shipments.

From December 16 to May 15 the prompt Brazil loading month value is not published.

The Brazilian FOB Santos premiums for September loading increased. No trades were heard.

A trader reported that traders were more active in the market for exports this week.

The US dollar to Brazilian real exchange rate stood at Real 5.1271/$1 as of 5:30 pm Brasilia time, up 0.30% day over day.

In Brazil's domestic market, prices were steady in the Sorriso and Maringá regions, while they rose in the Rio Verde region amid higher bids.

According to a buyer, winter corn harvest is advancing in Mato Grosso state, with favorable weather conditions. The expectation is to complete it in the first half of August.

In Paraná state, there is an expectation of a drop in spot prices of Real 1.00–2.00 by the end of July, another buyer said.

The Paraná State Agribusiness Department reported on July 14 that the winter corn harvest reaches 16% of the state area as of July 13. Regarding crop conditions, 80% was rated as good, 1% better than last week.

DERAL reported that in parts of the state, the cereal crop is developing well, mainly in the fruiting stage and advancing toward maturity, with harvesting in some areas and within yield expectations. However, in other locations, the high grain and soil moisture are delaying maturity and harvest.

Platts US Corn Daily Commentary

- US corn futures rise 3.25 cents to $4.4475
- Barge freight rates climb on China demand surge
- September basis jumps to 117 cents from 108

US corn Platts outright prices increased on July 17, tracking the Chicago Board of Trade, where September (U) futures gained 3.25 cents to $4.4475/bushel.

Amid a quiet business day reported by sources in the US, the value basis for the crop coming in September increased to 117 cents, up from 108 cents the previous day.

In the domestic market, sources from Iowa said on July 16 that crusher plants have cut hours because they are full, as growers continued to haul. And in general, looking more for August and September coverage.

From July 13 to 17, sources reported an increase in barge freight rates due to higher fuel prices.

"Barge freight has been firming the past two weeks as the China demand has trade wanting to be long most things associated with beans," a broker said.

Data from Platts and American Commercial Barge Line reported a 13.6% week-over-week increase in the number of barges loaded in Ohio for New Orleans, while from Illinois it jumped 12%, Mid-Mississippi 11.5%, and St. Louis 91%.

Meanwhile, September rates from Mid. Mississippi to NOLA jumped to 825%, down from 850% the prior week.

"A jump that much for September indicates something larger is going on, my guess is major export, but we aren't seeing it," a trader said.

Platts, part of S&P Global Energy, assessed on July 17 the outright price for July shipments to New Orleans in the incoterm CIF at $214.85/mt and for August shipments at $215.65/mt. For September shipment under the FOB Gulf incoterm at $221.95/mt.

Platts European Corn Daily Commentary

- Black Sea corn prices rise on limited supply
- Ukrainian port loading drops amid attacks

The Black Sea corn market rose slightly on July 17, following the global market and amid limited selling of the old crop.

Buying interest remained absent as buyers took a wait-and-see approach, awaiting clarity on freight rates.

"It is impossible to fix a vessel — there are no buyers in the market," a trader said.

Traders said loading from Ukrainian ports had decreased amid the attacks, and uncertainty about freight persisted. "I see vessels don't want to go there, and as of today, freight will not be the same for sure," a Turkey-based broker said.

Meanwhile, activity in the CPT market was also low, with traders making few new purchases. A buying idea in the market was reported at $195-$196/metric ton for DAP Chornomorsk. A trader based in Ukraine said the DAP offer was very low, as no one is really buying corn delivered to DAP ports.

In Turkey, however, the internal market rose, according to market participants. A second broker said the increase in the internal market was not unexpected to traders. "All market players were expecting this. We'll see what the top levels are. A $3–5 increase will not cover importers' losses," the second broker said.

"Turkish market prices are rising," a Turkey-based importer said, noting that the flow of Russian corn coasters had decreased amid heightened conflict in the Black Sea region.

Oilseeds

Platts Asia Soybean Daily Commentary

- Nearby shipments traded from multiple origins
- Limited upside for Chinese demand on Brazil soybeans

CFR China soybean month-one September shipment was assessed down $6.15/mt day over day at $527.92/mt July 17, while the basis was down 3 cents/bu at 246 cents/bu over November (X) Chicago Board of Trade (CBOT) futures.

Overnight, CFR China trading activity was scattered across US, Brazil and Argentine-origin soybeans, according to Chinese trade sources.

Up to 15 cargoes of US Gulf October shipments were heard sold to China's state reserves in the 300s cents/bu over November (X) CBOT, basis CFR China.

Meanwhile, September-October straddle and full-October shipment for Argentine soybeans were sold at 205 cents/bu and 215 cents/bu, respectively, over November (X) CBOT, basis CFR China.

The Argentine soybean October trades were equivalent to 260 cents/bu over November (X), normalized for equivalent quality and shipment specifications to Brazilian soybeans, accounting for a quality spread of 45 cents/bu.

Brazil September-October straddle shipments were traded at 255 cents/bu over November (X) CBOT, basis CFR China.

Brazil full-September and October shipments were also traded at 246-247 cents/bu and 262-263 cents/bu, respectively, over November (X) CBOT, basis CFR China.

A Chinese soybean trader said that elevated Brazilian basis premiums have capped the limited upside to Chinese demand for forward shipments.

Offer indications for Brazilian basis premiums for September shipment were heard at 252 cents/bu over November (X) CBOT, up 19 cents/bu week over week.

Platts Brazil Soybean Daily Commentary

- FOB prices extend gains on higher CBOT futures
- FOB Paranaguá basis strengthens for September
- Brazil's July soy exports seen at 13.76 million mt: ANEC

Brazilian soybean FOB outright prices extended gains on July 17, tracking higher Chicago Board of Trade futures, as the September (U) contract settled at $11.9350/bushel, up 8.25 cents/bu.

Some export demand optimism supported the CBOT references. The US Department of Agriculture reported a round of private soybean sales for delivery in the 2026-27 marketing year (September-October), including 340,000 metric tons to China.

Market activity was said to be subdued in both FOB Santos and FOB Paranaguá markets, with no trades heard.

Nevertheless, a firmer tone was indicated for nearby shipments, with price ideas for FOB Paranaguá September loading last heard at a premium of 128-137 cents/bu to the CBOT benchmarks.

In the meantime, Brazil is expected to export 13.76 million mt of soybeans in July, a record for the month and higher than 12.26 million mt predicted in the previous week, according to projections released by the Brazilian Grain Exporters Association, or ANEC, on July 14.

The volume would be 15.2% higher year over year, also nearly matching the 13.84 million mt exported in June 2026. ANEC's estimate is based on the current shipment schedule at the country's ports.

If confirmed, Brazil will have exported 86.34 million mt of soybeans between January and July this year, up 8% from the same period in 2025.

Platts US Soybeans Daily Commentary

- Prices rally to end week
- Bases rise amid USDA confirmation of China trades

Outright prices in the US soybeans market rose on July 17 after the US Department of Agriculture confirmed that China bought 340,000 mt of US soybeans.

Platts, part of S&P Global Energy, assessed SOYBEX FOB New Orleans for September shipment $4.41/metric ton up from July 16 at $486.85/mt. Platts assessed basis for FOB Gulf for September shipment climbed 4 cents day over day to 122 cents/bushel over the November (X) soybeans futures contract.

Platts assessed the outright price for CIF New Orleans for July shipment $4.59/mt up from the previous business day at $486.30/mt. Platts assessed basis for CIF NOLA for July shipment increased 3 cents day over day to 119 cents/bu over the August (Q) soybeans futures contract.

CBOT August (Q) futures contract increased 9.5 cents to 1204.5 cents/bu, while November (X) contract climbed 8 cents to 1203 cents/bu.

Sources in the export market said that the increase in basis was due to the China trades and to the war in the Middle East, which has also pushed fuel prices up.

A trader in the FOB Gulf market attributed the increase to China, "along with all the other geopolitical unrest."

"I think they will continue to buy," a trader in the CIF NOLA market said. "It doesn't make economic sense for them, but they continue anyway as part of the 25mmt agreement."

US officials announced in October that China had committed to buying 25 million mt per year until 2028. According to S&P Global Energy CERA, up to July 17 the USDA had confirmed 1.996 million mt of US soybeans sold to China this year.

Sources continue to report tight supply along the Mississippi River due to exports and good crush margins, creating "domestic competition," the trader in the CIF NOLA market said.

Crush margins in the US market have been heard at $4/bu for crushers with integrated biodiesel plants, and $2/bu for those without.

On July 17 the USDA reported the sale of 340,000 mt of soybeans for delivery to China during the 2026-27 marketing year, 256,634 mt for delivery to Mexico, and 110,000 mt for delivery to unknown destinations.

Animal Feed

Platts Latin America Soybean Meal Daily Commentary

- FOB prices slide on lower CBOT futures
- FOB Up River strengthens for September

South American soybean meal FOB prices decreased on July 17, pressured by lower Chicago Board of Trade futures, as the September (U) contract settled at $317.80/short ton, down $3.40/st.

Brazil's FOB Paranaguá had small volumes traded for September dates at a $5/st premium to the CBOT benchmarks, as overall trading activity was said to be subdued.

Argentina's FOB Up River, in turn, saw stronger prompt basis levels, amid higher offer and bid levels indicated. Local attention remained on the pace of farmer sales, following the conclusion of this year's soybean harvest, sources said.

According to the Ministry of Economy, Argentine farmers sold 711,600 metric tons of soybeans from the 2025-26 crop in the week through July 8, above 625,800 mt in the previous week. The volume considers sales for crushing activities and exports.

That brought cumulative sales for the cycle started in April to 21.63 million mt, compared to 26.23 million mt by this time last year regarding the 2024-25 cycle, the official data showed.

Platts European Animal Feed Daily Commentary

- European soybean meal demand stays subdued
- Feed mills remain well-covered during summer
- Spanish corn prices rise Eur1 to Eur227/mt

Northern Europe

The Dutch soybean meal was subdued July 17 amid low demand for the August period, market participants said.

Platts, part of S&P Global Energy, assessed the FOB Netherlands soybean price at Eur361/metric ton, unchanged from the previous session.

A Netherlands-based broker said the market is very quiet now, with most feed mills well covered during this period, which is also the summer holidays for most traders.

Southern Europe

The Spanish corn and soybean meal markets were similar to those in Northern Europe on July 17, with little overall demand, traders said.

The current soybean meal price level is due to CBOT futures movement, with the tradable level at Eur360/mt for the July-August period, according to a trader.

According to corn traders, offers rose on July 17 amid higher CBOT futures, with no bids or trades reported. Platts assessed EXW Tarragona corn at Eur227/mt, up Eur1 from the previous session.

Platts US Distiller Grains DDGS Daily Commentary

- Exports expected to drive demand
- High values limit buying activity

The US dried distillers grains with solubles market remained quiet July 17, with participants reporting limited trading activity and looking to export demand to support values as domestic buyers remained cautious.

Platts assessed CIF New Orleans dried distillers grains with solubles barges for the July shipment period at $198/short ton on Jul 17. The Chicago DDGS truck market for the July delivery period was assessed at $176/st and the South California rail market for the July delivery period was assessed at $228/st.

One broker said some activity was seen in soybean meal markets, but DDGS trading remained limited.

The broker added that soybean meal business was mostly focused on August and that eastern DDGS inventories appear to be building at transload facilities.

"Demand is there, but values are still too high," the broker said.

The broker said many market participants expect exports to absorb growing supplies.

"Feels like exports may need to do the heavy lifting for the crop," the broker said, adding that the carry structure in the DDGS market is encouraging storage rather than nearby sales. "The carry in the DDGS market is keeping us from dropping right now."

Another trader said Union Pacific values continue to lead the market.

"UP does seem to be the first mover," the second trader said, and that lower corn prices are limiting upside for DDGS.

The trader added that Iowa remains well supplied.

"Iowa is ripe with product they need to move," the source said, suggesting additional product could eventually move toward the river. "If Iowa is drowning in product, the calendar will force hands to trade lower."

A trader in Mexico reported that some business has been completed this week, but acknowledged that high prices continue to limit consumption.

"We have moved some volume this week," the trader said. "The general comment is that DDGS is expensive relative to other protein sources, and that has affected overall consumption."

Another US trader also described a quiet market.

"The DDGS market has been quiet this week. I haven't heard of any trades," the trader said, adding that soybean meal trading was more active.

The source said that buyers have been reluctant to pay the premium for fourth-quarter positions and questioned the latest ethanol production data, while adding that weather concerns remain a factor for the corn crop.

Platts is part of S&P Global Energy.

Vegetable Oils

Platts Asia Palm Oil Daily Commentary

- Asian palm oil market mixed
- India trades palm oil at $1,222.50/mt for August
- India prefers soybean oil over palm oil

The Asian palm oil market was mixed July 17, with palm oil futures on Bursa Malaysia slightly lower following the drop in Chinese vegetable oil futures.

The benchmark palm oil contract for October delivery on the Bursa Malaysia commodity exchange declined MR12/metric ton day over day to MR4,594/mt on July 17.

The benchmark RBD Palm Olein for October delivery on the Dalian Commodity Exchange fell RMB 9/mt to RMB 9,295/mt on July 17.

The benchmark Soybean Oil for October delivery on the Dalian Commodity Exchange fell RMB 33/mt to RMB 8,564/mt on July 17.

The Indian market was slow, with a trade reported at $1,222.50/mt for August shipment to the west coast of India.

Trades were reported to be concluded among a few grades July 16.

CPO traded at $1,217.50/mt for August shipment to the east coast of India.

Soybean oil traded at $1,250/mt for August shipment on a CFR India basis.

20,000 mt of sunflower oil traded at $1,442-$1,445/mt for July-August shipment on a CFR India basis.

Market participants said India prefers soybean oil over palm oil according to the narrow spread between both grades.

Platts assessed CPO CFR WC India at $1,222.50/mt on July 17 for August loading, unchanged day over day, while September shipment was $10/mt higher than August.

Platts assessed CPO FOB Indonesia at $1,185/mt on July 17 for August loading, down $2.50/mt from July 16, while September shipment was $10/mt higher than August.

Platts assessed RBDPS FOB Indonesia at $1,065/mt on July 17 for July loading, unchanged day over day, while September shipment was $10/mt higher than August.

Platts assessed PFAD FOB Indonesia at $1,015/mt on July 17 for July loading, down $2.50/mt from July 16, while September shipment was $10/mt higher than August.

Platts Latin America Soybean Oil Daily Commentary

- South American soy oil prices rise on CBOT rally
- Energy gains support futures, up 3.29% daily
- Brazilian participants buying paper to exit short positions: trader

South American soybean oil cash prices for August loading increased July 17, as regional basis values did not weaken enough to offset CBOT's sharp rally on the day.

Platts assessed the Brazilian soybean oil FOB Paranaguá price for August loading at $1,203.95/metric ton July 17, up $15/mt from July 16. September loading was assessed at $1,177.93/mt July 17, up $9.26/mt day over day.

CBOT August soybean oil futures settled at 74.81 cents/pound, up 2.38 cents/lb, or 3.29%. The contract gained 4.35 cents/lb, or 6.2%, over the week.

Energy prices provided support to the gains on the day, as WTI crude settled $3.54/b higher at $82.49/b, while Brent rose $3.87/b to $88.10/b, both gaining more than 4% on the day. Over the week, WTI gained $11.08/b, or 15.5%, and Brent increased $12.09/lb, or 15.9%.

On July 17, prices increased after the US and Iran expanded attacks across the Persian Gulf, further restricting tanker traffic through the Strait of Hormuz and raising the risk of disruptions in the Red Sea.

Higher petroleum diesel values support soybean oil because biodiesel and renewable diesel compete in the diesel pool, while soybean oil is used as a feedstock. A higher diesel selling price usually increases the value of the biofuel produced from each unit of soybean oil, allowing producers to pay more for feedstocks without the same reduction in margins, all else equal.

In Brazil, market participants reported commercial hedge unwinding.

"There are participants selling oil in the domestic market and buying paper to exit short positions as physical volumes are allocated," a Brazil-based trader said, as August negotiations saw liquidity on the day.

Another Brazil-based trader said that biodiesel margins were lower during the week, and many crushers have turned to the export market.

In Argentina, Platts confirmed more offers and bids throughout the session, with the most competitive offer-bid at minus 2,100 and minus 2,150 at the market close. The offer-bid spread narrowed to 50 points, down from 70 the previous day.

Platts assessed the Argentine soybean oil FOB Up River price for August loading at $1,179.69/mt July 17, up $6.17/mt from July 16.

Platts Europe Vegetable Oil Daily Commentary

- Prompt rapeseed oil posts sharp rally
- Sunflower oil remains constrained by logistics
- Physical tightness supports nearby rapeseed values

European vegetable oil markets strengthened sharply on July 17, driven by a significant rally in the nearby rapeseed oil complex, while sunflower oil remained unchanged.

RSO FOB Dutch Mills front-month surged Eur50 to Eur1,246/metric ton, marking the strongest daily gain across the curve. Fourth position also increased Eur12 to Eur1,179/mt, while second and third positions held steady at Eur1,184/mt and Eur1,173/mt, respectively. FOB Black Sea sunflower oil remained unchanged at $1,379/mt, highlighting the continued divergence between the rapeseed and sunflower oil markets.

The sharp increase in prompt rapeseed oil reflects renewed strength in the physical market alongside firmer underlying futures. Gains in both MATIF rapeseed and CBOT soybean oil provided additional support to European vegetable oil values, while the magnitude of the front-month move suggests tight nearby availability and active prompt buying. The flattening of gains beyond the front month suggested the rally remained concentrated in immediate supply rather than signaling a broad shift in long-term market expectations.

Sunflower oil continued to trade within a narrow range despite ongoing logistical uncertainty in the Black Sea. Recent attacks on Ukrainian export infrastructure and reduced operating rates at domestic crushing plants have constrained physical market activity, limiting both offers and liquidity. At the same time, subdued destination demand has prevented these supply-side risks from translating into higher FOB values, leaving the market balanced despite elevated geopolitical uncertainty.

For Europe, the vegetable oil complex remained increasingly differentiated. Rapeseed oil continued to respond to tightening nearby fundamentals and stronger benchmark markets, while sunflower oil remained anchored by the offsetting effects of constrained supply, muted demand and logistical disruption. Until Black Sea export conditions improve or demand strengthens materially, sunflower oil is likely to remain stable, while rapeseed oil is likely to continue exhibiting greater price volatility.

Platts is part of S&P Global Energy.

GLOBAL ANIMAL FEED WEEKLY: South American meal posts mixed trends; strength in Brazil

- Brazil to export 2.57M mt meal in July: Anec
- US DDGS market remains subdued amid weak demand

South American soybean meal

South American soybean meal export prices were mixed over the past week as Platts rolled its assessment period from August to September on July 16.

Argentine soybean meal FOB Up River was assessed at $349.54/mt on July 17, up 0.9% week on week. Meanwhile, Brazilian soybean meal FOB Paranaguá, in turn, fell slight 0.1% to $353.95/mt.

The FOB Up River cargo market was relatively quiet during the week, with limited business activity and no trades reported.

Conversely, the FOB Paranaguá paper market remained active, with August port differentials strengthening considerably amid a round of contract pricing in the domestic market. Several parcels were traded for that delivery window throughout the week.

Separately, Brazil is expected to export 2.57 million mt of soybean meal in July, up from 2.14 million mt a year earlier, Brazil's Anec grain exporters' association predicted July 14.

If confirmed, cumulative exports from January to July would reach 15.31 million mt, up 14.2% year over year, according to Anec, whose projections are based on the current shipment schedule.

EU soybean meal

The European soybean meal market was subdued this week amid low demand for July and August, market participants said.

Platts assessed the FOB Netherlands soybean price at Eur361/mt, with the EXW Spain soybean meal price at Eur360/mt on July 17.

In Spain, most buyers have already fulfilled their purchasing needs, according to a local trader, though some may continue to participate in the market.

A Spanish broker observed that soybean meal demand is softer than that for grains, as most demand has already been met.

The market is expected to be active by early September after the summer holidays in Europe, market participants based in Spain and the Netherlands said.

US DDGS

The US dried distillers grains with solubles market remained largely subdued during the week ended July 17, as participants continued to describe thin trading activity, cautious buying interest and ample nearby supplies, while expectations increasingly shifted toward export demand providing support later in the year. Rising freight costs and lower ethanol production offered some underlying support, but many market participants questioned whether current DDGS values remained competitive against soybean meal and corn.

Brokers described a "slow roll to start the week" and said trading remained "quiet so far," with Chicago truck values continuing to show relative strength despite a lack of transactions. Another broker said, "Chann seems to want to stay on the firmer side," while a third said that the recent rally had occurred despite "lackluster demand," and the first broker said, "no one hardly asks about Chann or CIF these days."

Attention is increasingly turned to freight and logistics. One trader reported freight values strengthening above St. Louis, supported by higher fuel costs, while some observed slower unloading activity around the New Orleans export corridor. However, brokers said they had not heard of operational disruptions in the Gulf, instead attributing slower movement to weak demand rather than logistical bottlenecks.

Several participants argued DDGS had become expensive compared with soybean meal and corn, discouraging nearby buying. Another trader said, "It's not a strong value versus meal or corn at these inflated values," while a third reported that international buyers remained unwilling to pay "$10-20/st higher" than purchases completed several weeks earlier.

Participants repeatedly described Iowa as oversupplied, with the third broker saying the state was "swimming in product" and adding that some FOB offers failed to attract buyers because of weak pickup demand. A third trader said Iowa remained "ripe with product they need to move," warning that seasonal pressures could eventually force lower prices if inventories continue to build.

By the end of the week, market participants increasingly viewed exports as the key outlet for growing supplies. The first broker said eastern DDGS inventories appeared to be building at transload facilities, adding, "Demand is there, but values are too high for many."

The broker said, "exports may need to do the heavy lifting for the crop," adding that a strong carry structure encouraged producers to store product rather than lower nearby prices.

GLOBAL SOYBEAN WEEKLY: China buys from US, high Brazilian basis deters participants

- China buys US soybeans, boosts prices
- High Brazilian basis slows China purchases
- Brazil soybean prices hit a 2.5-year high

China business boosts US prices

Outright prices in the US soybeans market increased during the week that ended on July 17, thanks to purchases from China, shifting weather forecasts, the war in the Middle East boosting fuel costs and good crush margins.

Sources suggested that business with China was the most prominent factor, with the US Department of Agriculture confirming the sale of 340,000 metric tons on July 17. According to S&P Global Energy CERA, up to July 17, the USDA had confirmed 1.996 million mt of US soybeans sold to China this year.

US traders said that this, along with seasonal elements and good crush margins, has caused tight supply along the Mississippi River, pushing the CIF New Orleans basis for July shipment from 107 cents/bushel over the Chicago Board of Trade August (Q) soybeans futures contract on July 13, to 119 cents/bu on July 17.

The FOB Gulf basis for September shipment also received a 4-cent boost from July 16 to 17, ending the week at 122 cents/bu over the November (X) soybeans futures contract.

"It's [because of] China," a trader in the FOB Gulf market said. "Along with all the other geopolitical unrest."

"I think they will continue to buy," a trader in the CIF NOLA market said. "It doesn't make economic sense for them, but they continue anyway as part of the 25 million mt agreement."

Crush margins in the US market have been heard at $4/bu for crushers with integrated biodiesel plants, and $2/bu for those without.

"The crush plants will continue to pull beans," a second trader in the CIF NOLA market said. "It's domestic competition."

Platts, part of S&P Global Energy, assessed SOYBEX FOB New Orleans for September shipment at $486.85/mt on July 17, and the outright price for CIF NOLA for July shipment at $486.30/mt.

Platts Soybex prices

China-Brazil trade slows down

CFR China soybean trading activity was steady during the week; however, buying interest for Brazilian soybeans has slowed due to high prices.

CFR China trades were scattered across US, Argentine and Brazilian soybeans, with up to 30 cargoes heard bought on a CFR basis.

However, elevated Brazilian basis premiums for nearby shipments continue to limit any upside to Chinese demand, sources say.

"The bid-offer gap for Brazilian soybeans remains wide," a Chinese trader said. "And with the high old-crop prices for September and October, buyers are adopting a wait-and-see approach."

According to another trader, as of July 14, 96% of the total open demand for the August shipment, at 7.9 million mt, has been covered.

Meanwhile, 68% of the total open demand, at 7.5 million mt, for the September shipment has been covered.

For the October shipment, open demand decreased to approximately 6.8 million mt, while open demand for the November shipment remains at 7.5 million mt.

Elsewhere, concerns over potential yield losses from elevated temperatures across key US growing regions have eased as weather forecasts improved.

"US weather is turning favorable," a Singapore-based soybean trader said. "With below-to-normal temperatures and normal-to-above-average rainfall expected over the next two weeks."

Platts assessed the soybean CFR China M1 basis at 246 cents/bushel, over the November (X) soybean futures contract on July 17. The soybean CFR China M1 flat price was assessed at $527.92/mt on July 17, up $11.85/mt week on week.

Brazil spot export prices exceed 2.5-year high

Brazilian soybean export spot prices reached a more than two-and-a-half-year high over the past week, supported by increases in futures and still-firm premium levels.

Platts assessed SOYBEX FOB Santos at $489.27/mt on July 17, up 2% week on week and the highest for a spot loading since Dec. 28, 2023.

Platts rolled the shipment period for SOYBEX FOB Santos from August to September on July 16.

Market participants attributed the bullish move to higher futures amid some optimism over Chinese purchases of US soybeans, while export demand in Brazil also remained consistent.

Throughout the week, several parcels were traded in the FOB Paranaguá paper market, both for old crop — mainly August and September — and new crop — April.

The SOYBEX FOB Santos basis was assessed July 17 at a 113-cent/bushel premium to the CBOT, the highest since Oct. 29, 2025.

Consolidated data from the Brazilian Foreign Trade Secretariat (Secex) indicated that Brazil's total soybean exports reached 14.50 million mt in June, a record volume for the month. China accounted for 71% of Brazil's total exports.

For July, Brazil is expected to export 13.76 million mt of soybeans, also a record for the month, according to projections released by the Brazilian Grain Exporters Association (Anec) on July 14. The volume would be 15.2% higher year over year.

GIWA forecasts MY 2026-27 wheat output in Western Australia at 9.54 mil mt

- Western Australia wheat output seen down 29% YOY
- Winter crop acreage estimate rises to 9.42 mil ha
- High variance seen on crop production estimates

The Grain Industry Association of Western Australia (GIWA) issued its first estimate for Western Australia's wheat production in the 2026-27 marketing year (October-September) at 9.54 million metric tons in its latest report, published July 17.

This marked a nearly 29% decrease in production, from 13.3 million mt in MY 2025-26.

GIWA has also slightly increased total winter crop acreage to 9.42 million hectares, up from 9.39 million ha in its June report, as downward revisions in wheat, lupins, and pulses were offset by increases in barley and canola acreage.

GIWA noted that winter crops in most Western Australian cropping regions were a month ahead of typical crop stages due to an early start to the season and a warm winter. However, GIWA also cautioned that lower nitrogen use—a 10%-15% decline per hectare—and the prospect of a drier, hotter spring are adding significant variance to upper and lower production estimates for the crop.

"Crops look exceptionally good and you could be deceived that we are on track for another massive year of grain production. Whilst this could still be the case, the variance in potential tonnage could be plus or minus twenty per cent from what is estimated at the moment," GIWA said.

GIWA Western Australia 2026-27 Season Crop Acreage
(in hectares)

Crop	July report (forecast)	June report (forecast)
Wheat	3,650,700	3,675,000
Barley	2,285,000	2,215,000
Canola	2,412,000	2,330,000
Oats	537,500	530,000
Lupins	443,000	530,000
Pulses	96,000	114,000
Total	9,424,200	9,394,000

Source: GIWA

GIWA Western Australia 2026-27 Season Crop Production Forecast (in metric tonnes)

Crop	July report (forecast)
Wheat	9,548,600
Barley	7,020,000
Canola	4,390,000
Oats	810,500
Lupins	760,000
Pulses	131,000
Total	22,660,100

Source: GIWA

GIWA's wheat production estimates appear low given current crop conditions and positive near-term precipitation, said a Perth-based trade source, who added that some industry estimates were closer to 11 million mt.

Nonetheless, weather developments in August-September will remain crucial to securing crop yield potentials, several Australian trade sources said.

Platts, part of S&P Global Energy, assessed Australian Premium White wheat up $2/mt day over day at $274/mt July 16 and Australian Standard White with no protein guarantee was assessed at $270/mt, up $3/mt over the same period.

CFR China soybean flat price hits 2.5-year high amid strong Chinese demand

- Sustained Chinese demand drives CBOT futures
- Brazilian basis premiums firm on tightening supply

CFR China soybean flat price reached a 2.5-year high, driven by strong Chinese demand for US soybeans and firm Brazilian basis premiums.

Platts, part of S&P Global Energy, assessed the soybean CFR China M1 flat price at $534.07/metric ton on July 16, up $11.94/mt day over day. The price was the highest since Dec. 15, 2023, when it was assessed at $542.25/mt.

The rally was initially driven by renewed Chinese demand for US-origin soybeans, which supported Chicago Board of Trade soybean futures.

CBOT November (X) futures rose 10.75 cents day over day to 1,204.50 cents/bu at the 0830 GMT Asian close July 16.

Last week, approximately 30 cargoes of US-origin soybeans were reported sold to China for September shipment onward, according to a Chinese soybean trader.

This week, CFR China market continued to see sustained demand for US-origin soybeans.

Overnight, up to 15 cargoes of US Gulf soybeans for October shipments were heard traded at over 300 cents/bu over Nov (X) CBOT, basis CFR China, according to multiple Chinese soybean trade sources.

Meanwhile, firm Brazilian basis premiums have further supported the CFR China soybean flat price, as farmer selling in Brazil slowed toward the end of the export season, according to multiple Chinese soybean traders.

"Farmer selling in Brazil is not very strong as its nearing the end of its season," said a Singapore-based soybean trader.

Another Singapore-based soybean trade echoed similar sentiments, noting that elevated prices from competing origins continued to support Brazilian basis premiums.

"Brazilian soybean basis levels have remained firm as old-crop supplies tighten towards the end of its export season. In addition, Brazilian exporters have been reluctant to lower prices due to elevated US Gulf and Pacific Northwest soybean offers," the trader said.

Offer indications for Brazilian basis premiums for September shipment is heard at 252 cents/bu over November (X) CBOT, basis CFR China, up 19 cents/bu week over week.

US weather concerns fade

Earlier in the month, soybean market participants closely monitored forecasts of elevated temperatures across key US growing regions. A Singapore-based trader noted that temperatures in the 11-15-day outlook were expected to remain relatively high.

However, traders believe the weather outlook is not severe enough to pose a significant threat to crop yields, as crop conditions remain favorable due to ample moisture.

"Despite the relatively higher temperatures recently, soil moisture conditions were fairly good earlier, so in the short term the impact is not expected to be significant," said a Chinese soybean trader.

"US weather is turning favorable, with below-to-normal temperatures and normal-to-above-average rainfall expected over the next two weeks," a Singapore-based soybean trader said.

Argentina raises MY 2025-26 corn output forecast to record 71.5 mil mt

- Argentina corn harvest 75% complete
- MY 2025-26 corn export forecast at 44 mil mt, up 52% YOY
- Ending stocks forecast at 9.91 million mt, up 167% YOY

Argentina raised its corn production forecast for the marketing year 2025-26 (March-February) to a record 71.5 million metric tons in July, up 2.1% from the June estimate and 38.3% year over year, the Secretariat of Agriculture, Livestock and Fisheries said in a July 16 report.

The higher outlook reflected increased harvested area and higher yield expectations.

Harvested area for grain was revised up to 9.9 million hectares from 9.7 million hectares in June, while the national average yield was projected at 72.4 quintals/hectare.

The ministry also increased its corn-planted area estimate to a record 11.6 million hectares, up 26.1% from the previous year.

Corn harvest was 75% complete nationally, compared with 82% a year earlier.

According to the report, harvesting of the remaining corn is progressing slowly as grain moisture levels gradually reach levels suitable for harvest.

Argentina's corn exports for MY 2025-26 were maintained at 44 million mt, up 52.2% from the previous year.

Domestic consumption was left unchanged at 21.3 million mt, including 18 million mt for feed use and 3.3 million mt for processing and other uses.

Ending stocks for MY 2025-26 were raised to 9.91 million mt in the July report, up 18% from the June forecast and 167% year over year.

S&P Global Energy CERA, on July 10, forecast Argentina's corn production for MY 2025-26 at 65 million mt, up from 49 million mt in the previous year.

Corn exports for MY 2025-26 were projected at 45 million mt, 54.6% higher year over year, according to CERA.

The US Department of Agriculture, in its World Agricultural Supply and Demand Estimates report published on July 10, estimated Argentina's corn production for MY 2025-26 at 63 million mt, up from 49 million mt in the previous year.

Corn exports for MY 2025-26 were projected at 45 million mt, up 54.8% year over year.

Platts, part of S&P Global Energy, assessed Argentine corn FOB Up River at $206.89/mt on July 16, unchanged day over day.

Australian wheat prices near seven-week high on Black Sea disruption fears

- Australian wheat offers up $10-$15/mt on week
- Black Sea 11.5% offers heard at $290s/mt CFR

Australian wheat prices approached seven-week highs July 17 as mounting concerns over Black Sea shipping disruptions prompted traders to seek alternative supply sources, said multiple Asian trade sources.

Australian Premium White, or APW, rose $13/mt day over day to $287/mt FOB Kwinana July 17, while Australian Standard White with no protein guarantee, or ASW1, rose $9/mt to $279/mt, both reaching their highest levels since late May, according to price assessment data from Platts, part of S&P Global Energy.

Multiple Australian and Asian trade sources said they observed offers for Australian wheat for September shipment up $10-$15/mt week over week.

The price strength comes as the offer liquidity for September shipment tightens seasonally due to scheduled port shutdowns for maintenance at Australian export terminals.

"The whole [wheat] complex is up," a Victoria-based trade source said.

A Perth-based trader said prices for all grades were firmer.

Despite the firmer offers, several sources said firm bids remained thin, though they anticipated buyer interest would strengthen if shipping risks out of Ukraine and Russia persist, keeping Black Sea wheat prices elevated.

Offer indications of Black Sea 11.5% wheat were heard at $290s/mt CFR, up from low to mid $270s/mt CFR last week, according to several Asian grains traders.

Black Sea wheat prices hit multiweek highs amid shipping disruptions

- Romania-Bulgaria premiums widen
- Buyers hold off on market uncertainty

Black Sea wheat prices have risen sharply over the past week amid escalated Russia-Ukraine attacks since July 10, which included strikes on vessels loading at ports and export infrastructure, according to multiple market participants.

The Platts wheat benchmark, the Milling Wheat Marker, climbed nearly 3% for the week, reaching a three-week high.

Prices in Romania and Bulgaria rose further, by 10.59%, to their highest levels since June 2024 amid added premiums for wheat shipped via these safer routes, widening the price spread between the Constanta-Varna-Burgas market and Russian and Ukrainian wheat to about $25/mt. Limited offers of 12.5% wheat from Romania amid quality concerns of the new crop also contributed to the price surge.

Within the CVB market, the spread between 11.5% and 12.5% wheat was at $7-$8/mt, and $10/mt for the feed wheat market. Russian 12.5% and Ukrainian 11.5% wheat prices rose to three- or four-week highs, up 3.72% and 2.24%, respectively.

There were market talks in Ukraine that military forces were planning to set up a special convoy to escort ships in and out of the country, a local Ukraine-based seller said.

Meanwhile, the coasters market from the Azov Sea saw sellers refrain from offering cargoes, while buyers remained cautious and reluctant to book vessels amid ongoing uncertainty. "I see no offers or bids for coasters," said one buyer.

Russia's Ministry of Agriculture said on Telegram on July 14 that the situation in the Sea of Azov would not affect food exports, and supply logistics would be reoriented if needed.

Platts Milling Wheat Marker at multi-weeks high

Source: S&P Global Energy

Demand remains weak

Buyers remained cautious, holding back bids as they awaited greater market clarity.

"It is difficult to find demand," said a seller based in Romania.

Some short-covering activity was observed, with a trade for Saudi Arabia's 12.5% specification concluded at $267/mt, as traders aimed to fulfill August shipment tenders. Russian wheat FOB buyers were seen bidding at $235/mt, but overall, firm FOB bids were scarce.

"There are no buyers on FOB," said a Ukraine-based seller.

In Egypt, one of the largest importers of Black Sea wheat, buyers also paused, waiting for further direction before entering the market. CIF offers for 12.5% wheat were quoted at $254/mt for August-September shipment.

Platts assessed the CIF East Mediterranean 12.5% price at $253/mt on July 16, up nearly 3% from July 10. Platts is part of S&P Global Energy.

These price movements follow strong Black Sea wheat supply and the marketing of the new crop, even as Ukraine faces ongoing infrastructure and labor shortages and Russia contends with a fuel crisis.

China books additional 340,000 mt of US soybeans for MY 2026-27: USDA

- New-crop US soybean sales to China continue
- Total US soybean sales to China since July 8 reach 1.21 mil mt
- US soybeans remain at a tariff disadvantage in China

US private exporters reported sales of 340,000 metric tons of soybeans to China for delivery in marketing year 2026-27 (September-August), the US Department of Agriculture's Foreign Agricultural Service said July 17.

The latest sale brings total US soybean sales to China reported through USDA daily export sales announcements since July 8 to 1.21 million mt.

The purchases come amid improving US-China trade ties following the Beijing summit in May.

China's commitments for US soybeans in MY 2025-26 stood at 12.4 million mt as of July 9, down 45% from a year earlier, USDA data showed July 16.

Under the Busan agreement reached in October 2025, China committed to purchase at least 25 million mt of US soybeans annually from 2026 to 2028.

USDA forecasts US soybean exports at 1.66 billion bushels for MY 2026-27, up 9.2% year over year.

S&P Global Energy CERA projects exports slightly higher at 1.7 billion bushels, up 11.8% year over year.

CERA expects US soybean exports to China to reach 25 million mt in MY 2026-27.

However, US soybeans remain uncompetitive for Chinese private crushers due to the additional 10% tariff, CERA said in a July 10 report. Removing the existing 10% tariff on US soybeans would make them more competitive, but not cheaper than Brazil's, the report added.

Platts, part of S&P Global Energy, assessed CFR China first-month soybeans at $527.92/mt on July 17, down $6.15/mt from the previous day.

Platts assessed SOYBEX FOB New Orleans at $482.44/mt on July 16, down $3.04/mt day over day.

Assessment Rationale

Grains

Platts Ags EMEA Wheat Daily Rationale

Platts assessed the Milling Wheat Marker at $234.75/metric ton on July 17, unchanged from the previous assessment.

Ukraine 11.5% handysize wheat, assessed at $228/mt, was normalized to the nearest 25 cents of $234.63/mt when adding June's quality normalisation of $6.63/mt, to account for its lower protein content, was the most competitive wheat out of the three components of the Milling Wheat Marker, which also includes CVB 12.5%, assessed at $263/mt, and Russian 12.5% wheat assessed at $237/mt on the day. The structure between the first and second halves of August was assessed as flat. This reflects the Platts assessment window from Aug. 14-28.

Platts assessed Black Sea wheat (Russian deepsea, 12.5% protein) unchanged at $237/mt on July 17, in line with an indicative value at $237/mt, below an offer at $240/mt and above a bid at $235/mt. The structure between the first and second halves of August was assessed as flat. This reflects the Platts assessment window from Aug. 14-28.

Platts assessed Black Sea wheat (Ukraine deepsea, 11.5% protein) unchanged at $228/mt on July 17, below an offer at $229/mt for the first half of August. Market participants said there were no firm FOB bids amid ongoing war escalations at the ports. The structure between the first and second halves of August was assessed as flat. This reflects the Platts assessment window from Aug. 14-28.

Exclusions: No market data was excluded from the July 17 Black Sea wheat assessments.

Platts is part of S&P Global Energy.

Platts Asia Wheat Daily Assessment Rationale

Platts assessed Australian Premium White wheat up $13/mt day over day at $287/mt FOB Kwinana July 17 for cargoes loading between Sept. 15 and Oct. 15, above a bid at $280/mt, under an offer at $290/mt, and partially tracking higher indicative values.

Platts assessed Australian Standard White wheat with no protein guarantee up $9/mt at $279/mt for cargoes loading over the same period, tracking higher indicative values at $279/mt.

This widens the spread between Australian Premium White and Australian Standard White with no protein guarantee to $8/mt.

Platts is part of S&P Global Energy.

Market commentary can be found on <PAA2699>

This rationale applies to symbol(s) <WAUSA00>

Platts Canada Wheat Daily Rationale

Platts assessed Canada Western Red Spring Wheat 13.5% FOB Vancouver 30-45 days forward at $307.46/metric ton on July 17, $3.40/mt higher than July 16.

CWRS Wheat 13.5% FOB Vancouver basis 30-45 days forward, spanning August 16-31 was assessed 1 cent/bushel higher at MIAX Hard Red Spring Wheat December (Z) futures plus 120 cents/bu. The assessment maintained the structure, with a 45-60-day forward assessment based on nearby old-crop premiums.

CWRS Wheat 13.5% FOB Vancouver basis 45-60 days forward, spanning August 31-September 15 was assessed 1 cent/bu higher at Z plus 120 cents/bu, based on a September value indication heard at Z plus 120 cents/bu.

CWRS Wheat 13.5% FOB Vancouver basis 60-75 days forward, spanning September 15-30 was assessed unchanged at Z plus 109 cents/bu, amid no disproving information and a firm market sentiment.

Platts is part of S&P Global Energy.

Platts Argentina Corn FOB Up River Daily Rationale

Platts assessed corn FOB Up River for loading in September at $209.74/metric ton on July 17, $2.85/mt higher from the previous assessment.

The assessment considered the FOB premium for Up River September-loading cargoes 4 cents/bushel higher at plus 88 cents/bu to Chicago Board of Trade September (U) corn futures, based on an indicative value heard at U plus high 80's cents/bu, higher offers heard at U plus 95 cents/bu and no bids heard at the market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <ARGCA00> <ARGCB00>

Platts Brazil Corn Daily Rationale

Platts assessed the Brazilian corn FOB Santos price for September loading at $225.09/metric ton on July 17, $2.07/mt higher from the previous assessment.

The assessment considered the FOB Santos basis for September loading cargoes 2 cents/bushel higher at plus 127 cents/bu to the Chicago Board of Trade September (U) contract, based on an indicative value last heard at that level, bids for September H1 at U plus 120 cents/bu, higher bids for September H2 at U plus 124 cents/bu, higher offers for September H1 at U plus 130 cents/bu and offers for September H2 at U plus 133 cents/bu at the market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <ABCSA00> <ABCSB00>

Platts US Corn Daily Assessment Rationale

Platts assessed the US Yellow Corn No. 2 CIF New Orleans barge basis for July shipment at 101 cents/bushel over the Chicago Board of Trade September (U) corn futures contract on July 17, unchanged from July 16. This was based on a bid heard at 100 cents/bu, and no offers were heard.

Platts assessed the US Yellow Corn No. 2 CIF New Orleans barge basis for August shipment at 103 cents/bu over the CBOT September (U) corn futures contract on July 17, unchanged from July 16. This was based on a bid heard at 102 cents/bu, and no offers were heard.

Platts assessed the US Yellow Corn No. 2 FOB Gulf basis for September shipments at 119 cents/bu over the CBOT September (U) corn futures contracts on July 17. Based on offers heard at 120 cents/bu for the first half of September, and 125 cents/bu for the second half of the month assessed.

Platts is part of S&P Global Energy.

No information was excluded.

Platts FOB Black Sea Corn Daily Assessment Rationale

Platts assessed Ukrainian corn up $2/metric ton to $228/mt on July 17, below an indicative offer of $235/mt for August loading, and following the global corn price trend amid limited sellers. Trading activities remain limited in Ukraine amid attacks on ports and infrastructure. The structure between the first and second halves of August was assessed flat. This reflects the Platts assessment window from August 14-28.

Platts is part of S&P Global Energy.

Exclusions: No market data was excluded from the July 17 Black Sea corn assessment.

This rationale applies to symbol(s) <CUBSU00>.

Oilseeds.

Platts Asia Soybeans Daily Rationale

Platts assessed CFR China first-month soybeans down $6.15/mt day over day at $527.92/mt while the basis was down 3 cents/bu at 246 cents/bu over November (X) Chicago Board of Trade on July 17, tracking an overnight trade at 246 cents/bu and under the sharpest offer at 252 cents/bu over November (X) CBOT for September shipment.

Platts assessed CFR China second-month soybeans down $5.42/mt day over day at $533.43/mt, while the basis was down 1 cent/bu at 261 cents/bu over November (X) CBOT, considering a normalized trade at 261 cents/bu and under the sharpest offer at 265 cents/bu over November (X) for Brazil October shipment.

Platts Brazil Soybean Daily Assessment Rationale & Exclusions

Platts assessed the SOYBEX FOB Santos soybean contract for September loading on July 17 at $489.27/metric ton, $4.87/mt higher from the previous assessment.

The FOB Santos basis for September loading was assessed 5 cents/bushel higher at plus 138 cents/bu to the Chicago Board of Trade September (U) contract. The assessment considered an FOB Santos port spread heard at plus 5 cents/bu to the FOB Paranaguá paper market, as neither offers nor bids were heard for FOB-Santos September-loading cargoes.

The FOB Paranaguá basis for September loading was assessed 5 cents/bu higher at plus 133 cents/bu to the CBOT U contract, taking into consideration an indicative value last heard at that level, higher bids at plus 128 cents/bu and lower offers at plus 137 cents/bu to the CBOT U contract at market close.

Platts assessed the SOYBEX FOB Santos soybean contract for March loading on July 17 at $447.56/mt, $2.39/mt higher from the previous assessment.

The FOB Santos basis for March loading was unchanged at minus 2 cents/bu to the CBOT March (H) contract, based on a spread to the FOB Paranaguá paper market heard at plus 5 cents/bu. There were no offers and bids heard for FOB-Santos March-loading cargoes.

The new crop FOB Paranaguá basis for March loading was unchanged at minus 7 cents/bu to the CBOT H contract, considering an indicative value heard at that level, higher offers at minus 3 cents/bu and lower bids at minus 12 cents/bu to the CBOT H contract at market close.

Platts is part of S&P Global Energy.

Exclusions: No data was excluded.

Platts US Soybeans Daily Rationale

Platts SOYBEX FOB New Orleans for the September shipment was assessed at $486.85/metric ton on July 17, up $4.41/mt from July 16. The FOB Gulf basis for September shipment was assessed at 122 cents/bushel over the Chicago Board of Trade November (X) soybeans contract day over day, based on a value indication heard at 122 cents/bushel, and an offer heard at 130 cents/bu.

The CIF New Orleans basis for July shipment was assessed at 119 cents/bu over the August (Q) soybeans futures contract day over day, up 3 cents from the previous assessment based on bids heard at 118 cents/bu, and offers heard at 128 cents/bu. A bid at 115 cents/bu heard earlier in the day was initially considered but overtaken by the most recent values.

Platts is part of S&P Global Energy.

No information was excluded.

Animal Feed and Protein

Platts Argentina Soybean Meal Daily Rationale

Platts assessed the Argentine soybean meal FOB Up River price for September loading on July 17 at $349.54/metric ton, $1.54/mt lower than the previous assessment.

The basis for September loading in the Up River cargo market was assessed $2/short ton higher at par to the September (U) futures at the Chicago Board of Trade. The assessment considered higher bids at minus $1/st and higher offers at plus $2/st to the CBOT U contract at market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYMAA00> <SYMAB00>

Platts Brazil Soybean Meal Daily Rationale

Platts assessed the Brazilian soybean meal FOB Paranaguá price for September loading on July 17 at $353.95/metric ton, $4.85/mt lower than the previous assessment.

The basis for September loading in the Paranaguá paper market was assessed $1/short ton lower at plus $4/st to the September (U) futures at the Chicago Board of Trade. The assessment considered an indicative value heard at plus $5/st earlier on the day, followed by offers at plus $5/st and bids at plus $3/st to the CBOT U contract at market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYMBA00> and <SYMBB00>.

Platts US Dried Distiller Grains DDGS Daily Assessment Rationale

Platts assessed CIF New Orleans dried distillers grains with solubles barges for the July shipment period at $198/short ton on Jul 167 steady from the previous session, based on a bid heard at $194/st and an offer heard at $200/st.

The Chicago DDGS truck market for the July delivery period was assessed at $176/st, increasing $1/st from the previous session, based on a bid heard at $175/st and an offer at $184/st.

The South California rail market for the July delivery period was assessed at $228/st, unchanged from the previous session, amid no disproving information.

Platts is part of S&P Global Energy.

This rationale applies to symbols <ACDDG00> <AADDG00>.

Vegetable Oils.

Platts Asia Palm Oil Daily Rationale

Platts assessed CPO CFR WC India at $1,222.50/metric ton July 17 for August loading, unchanged day over day, in line with a trade at the same level and below an offer.

A CPO trade was heard at $1,222.50/mt and an offer at $1,227.50/mt on a CFR WC India basis, shipping in August.

A September shipment of CPO CFR WC India was at $1,232.50/mt July 17, unchanged day over day, considering a $10/mt carry between August and September.

Platts assessed CPO FOB Indonesia at $1,185/mt July 17 for August loading, down $2.5/mt from July 16, below an offer and above a bid.

A CPO offer was heard at $1,195/mt and an indicative bid at $1,175/mt on an FOB Dumai basis, shipping in August.

A September shipment of CPO FOB Dumai was at $1,195/mt July 17, down $2.50/mt from July 16, considering a $10/mt carry between August and September.

Platts assessed RBDPS FOB Indonesia at $1,065/mt July 17 for July loading, unchanged day over day, below an offer and above a bid.

An RBDPS offer was heard at $1,080/mt and an indicative bid at $1,050/mt on an FOB Dumai basis, shipping in August.

A September shipment of RBDPS FOB Dumai was at $1,075/mt July 17, unchanged day over day, considering a $10/mt carry between August and September.

Platts assessed PFAD FOB Indonesia at $1,015/mt July 17 for July loading, down $2.50/mt from July 16, below an offer and above a bid.

A PFAD offer was heard at $1,030/mt and an indicative bid at $1,000/mt on an FOB Dumai basis, shipping in August.

A September shipment of PFAD FOB Dumai was at $1,025/mt July 17, down $2.50/mt from July 16, considering a $10/mt carry between August and September.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <ACPOA00> <ACPOB00> <APFAD00> <ARBSA00>

Platts Argentina Soybean Oil Daily Rationale

Platts assessed the Argentine soybean oil FOB Up River price for August loading at $1,179.69/mt July 17, up $6.17/mt from July 16.

The basis for August loading in the Up River paper market was assessed 210 points lower at minus 2,130 points to the August (Q) futures at the Chicago Board of Trade.

The assessment considered an indicative value last heard at that level, offers at minus 2,100 points and bids at minus 2,150 points to the CBOT Q contract at the market close.

No trades were confirmed before the market close for August loading in the FOB Up River paper market July 17.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYOAA00> <SYOAB00>

Platts Brazil Soybean Oil Daily Rationale

Platts assessed the Brazilian soybean oil FOB Paranaguá price for August loading at $1,203.95/mt July 17, up $15.00/mt from July 16.

The basis for August loading in the Paranaguá paper market was assessed 170 points lower at minus 2,020 points to the August (Q) futures at the Chicago Board of Trade.

The assessment considered an indicative value last heard at that level, offers at minus 1,980 points and bids at minus 2,050 points to the CBOT Q contract at the market close.

No trades were confirmed before the market close for August loading in the FOB Paranaguá paper market July 17.

Platts assessed the Brazilian soybean oil FOB Paranaguá price for September loading at $1,177.93/mt July 17, up $9.26/mt from July 16.

The basis for September loading in the Paranaguá paper market was assessed 180 points lower at minus 2,050 points to the September (U) futures at the Chicago Board of Trade.

The assessment considered an indicative value last heard at that level, offers at minus 2,000 points and bids at minus 2,120 points to the CBOT U contract at the market close.

No trades were confirmed before the market close for September loading in the FOB Paranaguá paper market July 17.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYOBB00> and <SYOBA00>.

Platts Europe Sunflower Oil Daily Rationale

Platts assessed sunflower oil FOB Black Sea Ukraine for September unchanged on July 17 at $1,379/metric ton, with no data disproving the value.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SFWBL00>
