Commentary and Analysis

Wheat

Platts European Wheat Daily Commentary

- Turkey production jumps 5-6 million mt/year
- EU wheat forecast at 143.7 million mt: COCERAL

The Russian wheat market fell June 12, as sellers reduced their offers for the second half of July.

New crop prices were low amid expectations of high yields.

In Turkey, importers said local wheat production is expected to be 5 million-6 million metric tons higher than last year, which will affect wheat imports. Offers for June-July loading also declined, leading to lower CIF Marmara coaster prices.

"The new harvest started in early June. Crop expectations are about 23-24 million mt, up about 5-6 million metric tons," an importer from Turkey said.

Meanwhile, the Ukraine and Constanta-Varna-Burgas markets remained quiet with low demand. Despite buying interest from Egypt and Asia, the higher supply of the new crop limited sellers' ability to raise offers in the Ukrainian market.

A seller from CVB said Middle-East countries are the main destinations for CVB wheat lately; however, demand remains low.

"Saudi Arabia, Egypt and Jordan are the main destinations for Constanta now," the Romanian seller said.

French wheat prices declined on the day, mirroring the futures market. Both FOB and CPT Rouen fell by nearly Eur2/mt.

Meanwhile, the Organization of European Grain Traders said the recent heat wave in France, the EU's largest grain producer, should not significantly impact wheat yields. It also raised its annual soft wheat forecast for 2026, noting that the harvest will reach 143.7 million metric tons, up from 142.6 million mt in its March forecast.

Platts Asia Wheat Daily Commentary

- Australian wheat stable
- GIWA revises WA wheat acreage lower

Australian wheat prices were stable day over day June 12.

Much of Australia's Wheat Belt is anticipated to receive precipitation over the coming eight days, with strong falls expected over South Australia, Victoria and northern cropping zones in Western Australia, based on the latest rainfall forecast from the Bureau of Meteorology.

The forecast, coupled with recent rains across New South Wales and Western Australia, continues to boost crop prospects nationwide, even as a super El Niño forecast later this year looms over Australia, said several Australian trade sources.

The Grain Industry Association of Western Australia revised its 2026-27 marketing year (October-September) wheat acreage 1.4% lower to 3.67 million hectares in its latest crop report published June 12, Platts reported previously.

The same report highlighted that crop conditions were much improved thanks to recent rains, which could drive reasonable grain yields for crops that had not yet emerged.

Platts Canada Wheat Daily Commentary

- Low farmer sales tighten supply, support basis
- Canadian exports remain ahead of previous year's pace

Platts assessed Canadian Western Red Spring Wheat 13.5% FOB Vancouver 30-45 days forward at $271.17/metric ton June 12, $1.29/mt lower than the previous day, as basis premiums held steady and futures saw a slight decline.

Basis premiums remained firm for CWRS as supply constraints persisted in the nearby periods. Reduced farmer sales tightened August old crop availability, boosting levels June 11 after offers were 20 cents higher than June 8 levels in the Japanese Ministry of Agriculture, Forestry and Fisheries wheat tender.

"Not a lot of farmer sales," a trader confirmed.

Levels remained elevated day over day, with August bids indicated as unchanged at 95 cents/bushel over the September (U) MIAX Hard Red Spring Wheat futures contract and offers at 110 cents/bu over U. The U contract continued to weaken June 12 after a brief uptick June 11, closing 1.25 cents/bu lower day over day at 618.25 cents/bu.

Canadian wheat exports for the week ended June 7 dipped week over week to 473,300 mt compared with 514,800 the week prior. To date, exports remained ahead of pace, however, at 19.48 million mt compared with 18.99 million mt a year ago.

In the US Pacific Northwest, first-half August capacity was heard tightening due to active corn sales, supporting US Northern Spring wheat 14% protein prices. A trade to the Philippines for the week ended June 5 was heard at around U plus 115 cents/bu, though additional details could not be confirmed before the market close.

Corn

Platts Asia Corn Daily Commentary

- Asian corn prices fall on USDA estimates
- South Korea buys November corn at $257.35/mt

Asian corn prices declined June 12 following higher production estimates by the US Department of Agriculture's World Agriculture Supply and Demand Estimates in its report released on June 11, while a South Korean buyer secured a cargo for November arrival.

Platts assessed feed quality corn CFR Northeast Asia down $2/mt at $256/mt for cargoes arriving over Sept. 10 to Oct. 10.

In the June report, USDA WASDE raised its forecast for the total world corn crop for September 2025-August 2026 by 14 million mt, supported by higher estimates for Argentina and Brazil, up 2 million mt at 61 million mt and up 3 million mt at 138 million mt, respectively.

A South Korean feed miller group purchased a cargo of Nov. 4 arrival feed corn through a tender on June 12 at $257.35/mt CFR, a local Korean trader agent involved in the tender said.

This was the first November 2026 arrival corn cargo purchased by South Korea, 145 days forward of delivery, significantly more than the usual 90-120 days forward window, the trader said.

Vietnamese feed millers were quiet overnight June 11 and during the day June 12 as they were "waiting for the USDA WASDE report," according to a trader.

The trader added that "Chicago Board of Trade futures are down, but the basis is up again, so [there is] no big impact on the overall flat price."

A Singapore-based trader said, "The flat price did not really move with the fall in futures and weaker Brent; premiums and forward freight agreements took back the corresponding losses."

Platts Latin America Corn Daily Commentary

- South American FOB corn prices rise with CBOT
- Brazil domestic prices steady, Rio Verde falls
- USDA raises global corn output to 1.3 bil mt

South American FOB corn prices increased June 12, tracking higher Chicago Board of Trade futures.

Argentine FOB Up River premiums for July loading and Brazilian FOB Santos premiums for August loading increased day over day.

The US dollar to Brazilian real exchange rate stood at Real 5.0778/$1 as of 5:30 pm Brasilia time, down 0.73% day over day.

In Brazil's domestic market, prices remained steady in the Sorriso and Maringá regions, while they declined in the Rio Verde region.

"Spot prices are hovering around Real 53/60 kilogram, with smaller volumes potentially being traded below this level," a broker based in Rio Verde said.

The US Department of Agriculture's World Agricultural Supply and Demand Estimates report, released June 11, increased global corn production projection to 1.300 billion metric tons for the 2026-27 marketing year, up from 1.295 billion mt in the May report.

According to USDA data, Brazilian corn production projection remained at 139 million mt, and the Argentine corn production projection remained at 55 million mt for the same marketing year.

Platts US Corn Daily Commentary

- US corn prices rise on weather concerns
- Farmers delay sales until July, market quiet

US corn Platts outright prices increased on June 12, tracking the Chicago Board of Trade amid weather concerns in the market.

"Recent rains have driven water levels higher on the [Mississippi], but crest should not be too concerning as levels are expected to decline in the days ahead," said a broker source.

During the session, trader sources reported a slow and quiet market day.

"Farmer likely doesn't reengage new sales until July at this point," said a trader source.

After US Department of Agriculture's World Agriculture Supply Demand Estimates report on June 11, market participants said that now the focus will be on US weather and the acres report at the end of this month.

In line with CERA expectations, USDA's June WASDE report featured a 25 million-bushel reduction to the agency's marketing year 2025-26 (September-August) US corn used for ethanol forecast to 5.575 billion bushels; the reduction was offset by a 25-million-bushel increase to the agency's export forecast, now seen at 3.325 billion bushels, slightly below CERA's 3.375 billion forecast.

Despite the reduction in ethanol use, CERA sees further downside as grain crushing data consistently reflect a strong conversion rate of corn into ethanol.

"Agree that ethanol yields near or above 3 are a headwind, they had room to cut ethanol use and raise exports, but I understand their cautious approach," a source said.

Platts, assessed on June 12 the outright price for June shipments to New Orleans in the incoterm CIF at $193.50/mt and for July shipments at $197.55/mt. And FOB Gulf for August was assessed at $203.84/mt.

Platts is part of S&P Global Energy.

Platts European Corn Daily Commentary

- Turkey fills half import quota for corn
- Ukraine ships 719,993 mt corn in early June period

The Black Sea corn market remained stable on June 12 amid slow FOB activity. In the FOB market, competitive offers for July loading were at $235/metric ton, while the market lacked firm buyers for the FOB basis.

However, in the CIF market, a buyer from Turkey was seen, indicating a bid of $245/mt for July loading. Selling ideas for CIF Marmara were heard around $250–$251/mt for June/July loading.

Importers noted that more than half of Turkey's import quota has been filled so far. An importer from Turkey said, "Now half of the quota is finished." The importer added, "If prices fall further for CIF Turkey, it can use all of the quota. If not, feed factories will use domestic barley from their zones."

In Ukraine, according to port line-up data shared by traders, about 719,993 mt of corn was loaded from Ukrainian ports during June 1–9. Turkey, Italy, Spain, and the Netherlands accounted for the major destinations for corn loaded from Ukraine during this period. About 185,434 mt was destined for Turkey, 138,079 mt for Italy, 110,500 mt for Spain, and 109,200 mt for the Netherlands.

Furthermore, during marketing year (MY) 2025/2026 so far—from September through May—a total of 16.9 million mt has been loaded from Ukrainian ports, with Turkey, Italy, Spain, and the Netherlands being the top destinations. Turkey received around 4.8 million mt, while 2.4 million mt was destined for Italy, 1.8 million mt for Spain, and 1.1 million mt for the Netherlands.

Oilseeds

Platts Asia Soybean Daily Commentary

- Nearby shipment traded
- USDA maintains 2026-27 soybean output forecast

CFR China soybean month-one July shipment was down $2.39/mt on the day at $485.02/mt June 12, while basis was up 5 cents/bu at 210 cents/bu over July (N) Chicago Board of Trade (CBOT) futures.

Overnight, trading activity was subdued following the release of the US Department of Agriculture report.

"There could be some demand during the first half of the US trading session last night, but sentiment weakened following the release of the USDA report, which pressured CBOT soybean futures," said a Chinese soybean trader.

"The resulting rise in Brazilian basis levels prompted market participants to withdraw offers," the trader said.

Nonetheless, one cargo of July and August shipments was heard traded at 220 cents/bu and 230 cents/bu, respectively, over July (N) CBOT, basis CFR China, according to a second Chinese soybean trader.

The bid-offer spread for CFR China Brazilian soybeans was at about 10 cents/bu, with the sharpest indicative offer for August shipment at 227 cents/bu over July (N) CBOT, according to a third Chinese soybean trader.

The USDA maintained US soybean production in marketing year 2026-2027 (September-August) at 120.7 million metric tons, according to the World Agricultural Supply and Demand Estimates report released June 11.

For Brazil, the USDA kept soybean production in MY 2026-27 (October-September) steady at 186 million mt, but 3.3% higher year over year, the report added.

US soybean exports in MY 2026-27 are likely to be 7.9% higher year over year at 44.36 million mt, according to the report. However, the department kept the forecast unchanged month over month.

The USDA also maintained Brazil's soybean exports in MY 2026-27 at 117.5 million mt, up 2.2% year over year, the report said.

Platts is part of S&P Global Energy.

Platts Brazil Soybean Daily Commentary

- Old and new crop shipments traded in Paranaguá
- Favorable weather and strong supply pressures CBOT prices

Platts assessed the SOYBEX FOB Santos soybean contract for July loading at $442.60/metric ton on June 12, 92 cents/mt higher than the previous assessment.

CBOT soybean futures settled lower, driven down by sluggish weekly export sales reported by the US Department of Agriculture and favorable weather in the Midwest, analysts said.

This downward pressure is further reinforced by comfortable South American production estimates and losses in the soybean oil market, which are offsetting minor gains in the soybean meal market.

In its ninth survey for the 2025-26 crop season, Brazilian agricultural agency Conab said the Northeastern region of the country is expected to harvest 35.1 million mt of grains, up 11.7% from 31.4 million in the previous cycle. The increase is more than six times the national growth rate of 1.8% and is driven by expanded planted areas, higher yields and improved weather in regions historically prone to drought.

Bahia, the region's largest grain producer, is forecast to harvest 15.74 million mt, up 12.3% from 2024-25, with record soybean yields of 4,260 kg/hectare driven by favorable weather and expanded irrigation.

Piauí posts the strongest growth among Northeastern states, with output rising 21.2% to 7.58 million mt in the current season. Soybean yields in the state are estimated at 3,955 kg/hectare, up 15% year over year amid favorable weather and increased investment in technology.

Maranhão, the second-largest producer in the region, is expected to reach 8.99 million mt, an increase of 2.3%, with soybean harvest 92% complete by late May and yields about 3,540 kg/hectare.

The Matopiba region—covering southern Maranhão, Tocantins, southern Piauí, and western Bahia—is expected to produce 25.4 million mt of grains, an increase of 11.4% from the prior season, Conab reported.

The FOB Paranaguá paper market saw interest for both old and new crop 2027 shipments on the day, with trades heard for July, August, February and March loadings.

Brazilian FOB premiums continue to rise amid a combination of lower CBOT futures and steady demand, especially for old crop shipments, market participants said.

The US dollar versus the Brazilian real settled at Real 5.0624/$1 at 4:30 pm Brasilia time. Domestic soybean prices were lower in the main producing regions.

downtrend, amid little exports and no news regarding US-China soybean trade.

Platts, part of S&P Global Energy, assessed SOYBEX FOB New Orleans for July shipment 56 cents down from June 11 at $445.88/metric ton. Platts assessed basis for FOB Gulf for July shipment remained unchanged day over day at 100 cents/bushel over the July (N) soybeans futures contract.

Offers in the export market increased slightly from 106 cents/bu to 107 cents/bu.

"[It's] normal Friday activity," a trader in the FOB Gulf market said. "They [exporters] don't want to deal with something going into the weekend unless it is worth it."

Levels for bids and offers for June in the CIF NOLA market have remained steady for three consecutive days amid bearish exports.

"The longer we go with no defined China business, the lower we will go on the board and basis," a trader in the CIF New Orleans market said. "There just isn't enough of a summer [export] program."

Prices fell on June 8-9 pressured by the futures market, with sources attributing the decline to the liquidation of long positions in the futures market.

"[We're seeing good] weather, China, Iran, crisis," a trader in the FOB Gulf market said. "And tired entities who don't know why keeping a long position in a market that is not giving them good business for it."

The fall paused on June 10, amid developments on the war in the Middle East and unconfirmed reports pointing to China inquiring about US soybeans but resumed on June 11 after what sources considered a "bearish" World Agricultural Supply and Demand Estimates report, published by the US Department of Agriculture.

"The report didn't feed the market," a trader in the FOB Gulf market said. "It didn't provide anything bullish."

"The USDA left old and new crop carryout unchanged as we expected," said Aaron Gerdts, crop principal analyst at S&P Global Energy. "It raised crush and lowered exports in an offsetting 20-million-bushel move, slightly larger than the 10-million-bushel move we expected."

Platts Latin America Soybean Meal Daily Commentary

- Premiums rise in Brazil amid stability in Argentina
- Latin America sees mixed prices

Platts, part of S&P Global Energy, assessed Latin American FOB soybean meal prices mixed on June 12, with FOB Paranaguá prices rising and FOB Up River prices falling, tracking Chicago Board of Trade futures.

Argentine FOB Up River premiums for July loading were unchanged.

The Buenos Aires Grain Exchange reported June 11 that the 2025-26 soybean harvest in Argentina reached 95.2% as of June 10, up 3.5% from the previous week and higher than the previous season at the same time.

BAGE reported that harvesting is nearing its final phase, with progress being made mainly in the northern and southern sectors of the agricultural area. The North of La Pampa, West of Buenos Aires, has recorded a historic yield record, coming in 4.5% above the previous peak.

Brazilian FOB Paranaguá premiums for July loading rose amid higher bids during the day.

The Chicago Board of Trade July (N) soybean meal contract settled at $301.30/short ton, down $0.40/st.

Platts European Animal Feed Daily Commentary

- Dutch feed market shows bearish tone at Eur343/mt
- Spanish prices fall on USDA crop report news
- Global soybean meal output reaches 300M tons

Northern Europe

The Dutch market had a bearish tone day over day.

A Dutch trader said the offer levels for the July period are at the Eur343/metric ton range, with the market being very quiet now.

According to a US Department of Agriculture report published on June 11, global soybean meal demand in 2026-27 is expected to grow steadily, with production rising to about 300 mt and consumption to around 295 mt. Trade remained strong, led by exports from Argentina, Brazil, and India and by solid imports into the EU, Mexico, and Southeast Asia.

Ending stocks stayed low (around 20 million mt), indicating a firm but not oversupplied market. In the US, higher crush boosts soybean meal production and use, while ending stocks remain broadly flat, suggesting stable demand.

Southern Europe

The Spanish animal feed market was bearish day over day.

" The market is falling now as the USDA report came with saying a good crop and crushing in the US and CBOT falling," a Spain-based trader said.

"The corn offers went down to Eur218/219/mt, with not much buying interest seen," a broker said.

According to the USDA report published on June 11, the 2026-27 corn outlook shows comfortable global supplies, with production near 1,300 million mt and ending stocks around 281 mt, slightly above 2025-26. Modestly higher stocks are mainly due to larger carryout in India, Argentina, and South Africa, with a partial offset from Brazil.

Trade is set to expand slightly, and in the US production (15.995 billion bushels), ending stocks (about 1.96 billion bu), and the $4.40/bu farm price all point to a broadly balanced market.

Platts US Distiller Grains DDGS Daily Commentary

- Forward spreads start flattening
- Bids improve amid weakness

The US dried distillers grains with solubles market appeared to be steadier June 12 following recent losses, though participants continued to describe the overall trend as weaker.

Platts assessed CIF New Orleans dried distillers grains with solubles barges for the June shipment period at $199/short ton on June 12, the Chicago DDGS truck market for the June delivery period was assessed at $171/st, and the South California rail market for the June delivery period was assessed at $222/st.

One broker said the market remains under pressure despite signs of stabilization. "Trending lower on all fronts, I'd say," the broker said, noting that sellers appear reluctant to accept lower values. "I don't see anyone that wants that today, even with a little green on the board."

The broker added that forward spreads may be beginning to flatten after the recent fall. "June/July/JAS may be starting to flatten out a bit," the source said, noting that deferred positions were beginning to show a small carry into July, August and September.

The broker also pointed to healthy ethanol margins as a factor that could support production levels going forward. "I think there is plenty of margin in ethanol," the source said.

Another broker agreed that bids were showing some improvement on the day. "Agree," the broker said when discussing slightly higher bids, while adding that values were expected to remain largely unchanged.

Vegetable Oils

Platts Asia Palm Oil Daily Commentary

- Asian palm oil futures decline
- Indian market sees slow trading activity

The Asian palm oil market dipped on June 12, with palm oil futures on Bursa Malaysia Derivatives declining after midday following a drop in the energy market.

The benchmark palm oil contract for August delivery on the Bursa Malaysia commodity exchange declined MR72/mt to MR4,479/mt on June 12.

Activity remained slow in the Indian market, with no trades heard on the day despite the market drop following weakness in the energy market.

"Buyers are waiting and monitoring the market for further developments, and no aggressive selling was seen after the drop," an India-based trader said.

Platts assessed CPO CFR WC India price at $1,217.5/mt June 12 for June loading, down $15/mt from June 11, while July shipment was $5/mt higher than June.

Platts assessed CPO FOB Indonesia price at $1,185/mt June 12 for June loading, down $7.5/mt from June 11, while July shipment was $5/mt higher than June.

Platts assessed the RBDPS FOB Indonesia price at $1,060/mt June 12 for June loading, unchanged day over day, while July shipment was $2.5/mt higher than June.

Platts assessed the PFAD FOB Indonesia price at $975/mt June 12 for June loading, up $2.5/mt from June 11, while July shipment was $5/mt higher than June.

Platts is part of S&P Global Energy.

Platts Latin America Soybean Oil Daily Commentary

- CBOT soybean oil futures retreat from multiyear highs
- South American basis levels recover from record discounts
- USDA raises Argentina soybean crop estimate to 50 million mt

South American soybean oil markets remained volatile during the period from June 5-12, as Chicago Board of Trade soybean oil futures stabilized following a sharp correction from multiyear highs, while FOB soybean oil basis levels in Brazil and Argentina recovered from the record discounts recorded at the beginning of the month.

CBOT July soybean oil futures settled at 74.12 cents/lb June 5 after falling 5.83% over the prior two trading sessions from a multiyear high of 79.09 cents/lb reached June 1. The correction followed favorable US crop conditions, the absence of confirmed Chinese soybean purchases and speculative long liquidation by commodity funds.

Following the selloff, futures recovered modestly, rising to 75.33 cents/lb June 10 before easing to 74.28 cents/lb by June 12. Market participants said soybean oil futures continued receiving support from renewable diesel demand expectations and US biofuel policy, although favorable US crop development and abundant global soybean supplies limited upside momentum.

Additional market attention during the week focused on the USDA's June World Agricultural Supply and Demand Estimates report, released June 11.

The USDA maintained its estimate for Brazil's 2025-26 soybean crop at 180 million mt while increasing its estimate for Argentina's soybean production to 50 million mt from 48 million mt previously. The report also left US soybean ending stocks largely unchanged and made only limited adjustments to broader global soybean supply and demand balances.

Market participants described the report as broadly neutral, reinforcing expectations for ample soybean availability in both South America and the United States.

Despite continued volatility in futures markets, physical soybean oil values in South America remained comparatively stable throughout the period.

In Argentina, Platts-assessed soybean oil FOB Up River prices for July loading increased from $1,160.07/mt June 5 to $1,174.62/mt June 12. In Brazil, FOB Paranaguá soybean oil prices for July loading rose from $1,166.69/mt to $1,194.47/mt over the same period.

August-loading FOB Paranaguá soybean oil values weakened from $1,177.93/mt June 5 to $1,165.36/mt June 12, reflecting continued pressure on forward export premiums despite relatively stable nearby market conditions.

Market participants said FOB soybean oil markets continued reflecting a fundamentally different set of drivers than CBOT soybean oil futures.

While US soybean oil futures remained heavily influenced by renewable diesel demand expectations, biofuel policy developments and domestic feedstock balances, South American export markets continued responding primarily to regional supply availability, exporter competition and global vegetable oil trade flows.

FOB soybean oil basis levels strengthened steadily throughout the week following the record discounts observed in early June.

Argentina FOB Up River July basis improved from minus 2,150 points to minus 2,100 points between June 5 and June 12. Brazil FOB Paranaguá July basis strengthened from minus 2,120 points to minus 2,010 points, while August basis improved from minus 1,970 points to minus 2,000 points after fluctuating during the week.

Despite the recovery, traders said basis levels remained historically weak relative to long-term averages and continued reflecting abundant soybean oil supplies across the region.

"The extreme discounts have eased, but physically the market still feels well supplied," a Brazil-based soybean oil trader said. "Exporters continue competing aggressively because there is still plenty of soybean oil available."

Participants continued monitoring Brazil's record soybean crop and crush outlook after Conab maintained its 2025-26 soybean production estimate at 180.13 million mt. At the same time, ABIOVE projected Brazilian soybean processing at a record 62.5 million mt in 2026 and soybean oil production at 12.55 million mt.

Market participants said Brazil's B15 biodiesel mandate continued helping absorb part of the expanding soybean oil supply, although elevated production levels and strong exporter competition continued weighing on FOB premiums.

Trading activity in Argentina slowed toward the end of the week ahead of the June 16 holiday commemorating the Paso a la Inmortalidad del General Martín Miguel de Güemes. Market participants said reduced commercial participation contributed to quieter market conditions in the FOB Up River market.

Demand into Asia remained broadly steady but continued lagging the pace of South American supply growth. Market participants said elevated freight costs and competition from palm oil continued constraining delivered arbitrage opportunities for soybean oil exports into key destination markets.

Overall, the week highlighted the continuing divergence between policy-supported US soybean oil futures and structurally well-supplied South American export markets, although the recovery in basis levels suggested some moderation in the extreme disconnect observed earlier in June.

Platts is part of S&P Global Energy.

Platts Europe Vegetable Oil Daily Commentary

- Higher soybean supply pressures veg oil benchmarks
- Ukrainian processing reduces rapeseed export availability
- Sunflower oil gets support from tight supply

European vegetable oil markets weakened in the rapeseed oil complex, while sunflower oil remained resilient June 12, amid more comfortable global oilseed supply expectations.

RSO FOB Dutch Mills front month fell Eur9 to Eur1,172/metric ton, while second position declined Eur7 to Eur1,169/mt. Third position held unchanged at Eur1,156/mt, while fourth position eased marginally to Eur1,155/mt.

In contrast, FOB Black Sea sunflower oil remained unchanged at $1,381/mt, highlighting continued support from tight physical availability despite softer broader markets.

The decline in rapeseed oil values follows the latest USDA balance sheet update, which reinforced expectations of ample global oilseed supplies. In its June report, the USDA made only limited adjustments to the MY 2026-27 oilseed outlook but increased the soybean crop estimate for the season.

The greater soybean supply outlook was adding pressure to global vegetable oil benchmarks, particularly soybean oil, which remains a key competitor to rapeseed oil in both food and biofuel markets. This led to bearishness across the rapeseed complex despite otherwise supportive regional fundamentals.

For Ukraine, the report highlighted a structural shift within the rapeseed sector. The USDA reduced its MY 2025-26 rapeseed export forecast by 200,000 metric tons to 2.1 million mt due to stronger domestic processing demand. This suggests a greater proportion of Ukrainian rapeseed being retained domestically for crushing into oil and meal, rather than being exported as raw seed.

The trend aligns with broader developments observed throughout the season, where increasing processing activity has strengthened the role of value added exports within Ukraine's oilseed sector.

Platts is part of S&P Global Energy.

GIWA trims Western Australian wheat acreage forecast to 3.67 mil ha

- Rains boost yield prospects despite dry May
- Australian wheat prices dip amid rain, competition

The Grain Industry Association of Western Australia, or GIWA, has projected Western Australian wheat acreage for the 2026-27 marketing year (October-September) at 3.67 million hectares, down 1.4% from its May estimate, according to its latest crop report for the 2026 season published June 12.

GIWA slightly increased total winter crop acreage to 9.39 million ha from 9.38 million ha in May, with downward revisions in wheat, oats and lupin acreage offset by gains in barley and canola acreage.

The report highlighted that crops benefited from recent rains through June 11, with a chance of achieving reasonable grain yields despite a dry May.

"While based on global climate models, the forecast for a below-average rainfall year and warmer-than-average spring temperatures remains, the current state of the grain crop in Western Australia is good," the report said. "Crop growth stages across large areas of the grain belt are more advanced than is often the case at this time of year."

GIWA Western Australia 2026-27 season crop acreage

Crop	June report (forecast)	May report (forecast)
Wheat	3,675,000	3,725,999
Barley	2,215,000	2,165,000
Canola	2,330,000	2,280,000
Oats	530,000	560,000
Lupins	530,000	550,000
Pulses	114,000	103,000
Total	**9,394,000**	**9,383,000**

Source: GIWA

Platts, part of S&P Global Energy, assessed Australian Premium White at $279/mt and Australian Standard White at $272/mt on June 11, both down $1/mt day over day.

A weaker Australian dollar, combined with beneficial rains in late May and the first half of June, has improved new crop prospects throughout much of Australia, increasing the liquidity of old-crop grower sales on the east coast, according to Australian and Southeast Asian trade sources.

However, Australia continues to face stiff competition from the Black Sea region, which is expected to begin harvesting soon and is attracting stronger regional demand due to lower prices driven by a large old-crop carryout, particularly in Ukraine, Southeast Asian grain traders and flour millers said.

CFR offers for Black Sea 11.5% wheat were reported to be $20-$25/mt cheaper than Australian mid-protein milling wheat, according to Singapore-based grain traders in the week ended June 12. A flat price spread between old- and new-crop shipments of Black Sea wheat has led some buyers to remain on the sidelines, anticipating further price declines once new crop harvest pressure begins.

US DATA: Net corn sales rise 13% on week to 1 mil mt

- Japan, Mexico lead purchases for week
- Export commitments rise 25.5% YOY
- Mexico leads as top buyer of US corn in MY 2025-26

US net corn sales totaled 1 million metric tons for the week ended June 4, up 13% from the previous week, Department of

Agriculture data showed June 11.

During the week, Japan, Mexico, Spain, Colombia and Honduras booked the largest quantities of corn, data showed.

Through the week ended June 4, total US corn export commitments for marketing year 2025-26 (September-August) were 25.5% higher year over year at 82.77 million mt, data showed.

So far in MY 2025-26, Mexico, Japan, South Korea, Colombia and Spain have been the top buyers of US corn.

The US Department of Agriculture forecast corn exports at 84.46 million mt in MY 2025-26, up 16.3% year over year, in its World Agricultural Supply and Demand Estimates report released June 11.

The US is expected to harvest 432.34 million mt of corn in MY 2025-26, 14.3% higher year over year, the USDA said.

Platts, part of S&P Global Energy, assessed US corn CIF New Orleans at $193.20/mt on June 11, down $2.85/mt day over day.

Top export destinations for US corn (mt)

Location	Volume
Week ended June 4	
Japan	373,100
Mexico	356,200
Spain	237,200
Colombia	219,100
Honduras	74,400
In MY 2025-26 as of June 4	
Mexico	23,546,300
Japan	14,849,300
South Korea	8,582,800
Colombia	7,685,700
Spain	3,831,200

CVB wheat sets Platts MWM for first time as Black Sea pricing dynamics shift

- CVB wheat sets Milling Wheat Marker at $240/mt
- Black Sea wheat prices ease on weak demand

The Platts Milling Wheat Marker was set by the CVB 12.5% FOB wheat assessment for the first time this week since its launch last June, reaching $240/mt for July loading, as European wheat shipped from Constanta-Varna-Burgas emerged as the most competitive origin in the Black Sea market.

Launched in June 2025, the Milling Wheat Marker captures the price of wheat from the Black Sea, the world's largest wheat export region. It is determined daily by the most competitive of three FOB assessments: Russian 12.5% protein wheat, Ukrainian 11.5% wheat normalized for protein, and CVB 12.5% wheat.

On June 10, Platts assessed CVB 12.5% wheat at $240/mt, Russian 12.5% at $242/mt and Ukrainian 11.5% at $234/mt. After applying May's quality normalization factor of $6.15/mt to account for Ukrainian wheat's lower protein content, and rounding to the nearest 25 cents, the normalized Ukrainian value stood at $240.25/mt for July 8-22 loading.

The Milling Wheat Marker averaged $242.08/mt in May, up $3.47/mt from April. It has since eased, falling from $242.25/mt on June 1 to $240/mt on June 10 and holding at that level June 11, reflecting slower demand and the market's transition to new-crop supply.

CVB wheat prices have come under pressure as sellers lowered offers amid limited buying interest. Offers heard by Platts fell from $245/mt to $242/mt over the week, while the market lacked firm buying ideas.

"The market is weaker," a Romanian seller said, adding that barley had attracted more pre-harvest interest than wheat, leaving limited spot demand for wheat.

Market participants in the Black Sea said Russian and CVB wheat values were moving closer to parity, underscoring the narrowing spread between the two origins.

New-crop wheat, expected to become available in the second half of July, has been offered at lower levels as strong global production prospects point to ample supply. At the same time, demand has been capped by progressing domestic harvests and higher stocks in key import markets, including Turkey and Egypt.

However, some sellers said demand from Asian destinations could support new-crop sales in the coming weeks for Black Sea wheat.

On June 11, CVB 12.5% remained the most competitive assessment. Platts assessed CVB 12.5% at $240/mt, Russian 12.5% at $241/mt and Ukrainian 11.5% at $234/mt. With May's $6.15/mt quality normalization applied and rounded to the nearest 25 cents, the Ukrainian value was normalized to $240.25/mt for July 9-23 loading.

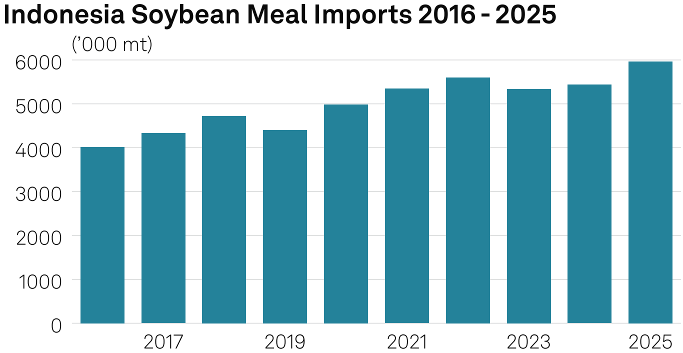
Indonesian market participants expect new soybean meal import quota to be released soon

- See new 5.4M mt soymeal quota
- Quota split seen at 3.6M mt state, 1.8M mt private

Indonesia's animal feed industry is expecting a new soybean meal import quota to be released soon, according to market participants on June 12.

The government is expected to release a new 5.4 million mt import license and quota for soybean meal soon, with 3.6 million mt for state-owned enterprises and 1.8 million mt for private firms such as traders and millers, according to an Indonesia-

Indonesia Soybean Meal Imports 2016 - 2025



Source: S&P Global Trade Analytics Suite / Global Trade Atlas based feed miller source, an Indonesia-based grains trader and a Singapore-based trader.

The expected 5.4 million mt total quota would be in addition to the 3 million mt already imported since January, resulting in a quota "much bigger than we expected," according to the feed miller.

However, Indonesia's annual demand for soybean meal averages around 6 million mt, according to data from S&P Global Market Intelligence's Global Trade Atlas.

The Indonesian grains trader did not anticipate any oversupply, as he expected the new quota to include purchases that had already been concluded earlier in 2026.

A second Singapore-based trader expressed doubts about the import quota number of 5.4 million mt, saying it was "hard to verify," but added that "that is the news that's going around now."

Platts, part of S&P Global Energy, assessed CFR China soybean month-one July shipment down $2.39/mt day over day at $485.02/mt June 12, while basis was up 5 cents/bu at 210 cents/bu over July (N) Chicago Board of Trade (CBOT) futures.

China cuts MY 2026-27 corn consumption to 311.65 mil mt: CASDE

- MY 2026-27 food use at 9.96 mil mt
- Feed substitution weakens corn demand outlook
- Corn production forecast holds at 306 mil mt

China's Ministry of Agriculture and Rural Affairs has maintained its corn production and import forecasts for marketing year 2026-27 (October-September) from the previous month, according to the Chinese Agricultural Supply and Demand Estimates report June 11.

Corn production is projected at 306 million metric tons, up 1.6% year over year, while imports are forecast at 6 million mt, unchanged from the previous year.

Corn planting area for MY 2026-27 is projected at 45.13 million hectares, a 0.4% increase year over year, supported by improved farmer returns in the previous season.

According to the report, weather conditions in Northeast China are improving soil moisture and benefiting crop growth, with yields projected at 6,780 kilograms/hectare, up 1.2% year over year.

S&P Global Energy CERA pegs China's corn output at 303.4 million mt in MY 2026-27, up 0.7% year over year, with imports forecast at 8 million mt, up 60% year over year.

Corn demand edges lower

MARA marginally lowered its total corn consumption forecast for MY 2026-27 by 240,000 mt month over month to 311.65 million mt, reflecting weaker food use. This represents a 0.4% year-over-year decline.

Corn for food use was reduced to 9.96 million mt, down 240,000 mt from the previous estimate.

"Domestically, policy grain releases continue, new wheat is gradually entering the market, and feed substitution is rising," the report said.

Higher imports of substitute feed grains, such as sorghum and barley, have led to weaker demand for corn as feed than in the previous period, easing the overall supply-and-demand relationship, MARA added.

For MY 2025-26, the ministry trimmed its corn consumption forecast by 120,000 mt to 312.8 million mt, again due to reduced food use.

Food use demand was cut to 9.98 million mt, down 120,000 mt from the May estimates.

China maintained its corn production and import projections for MY 2025-26 from the previous month. Corn output is forecast at 301.24 million mt, up 2.1% from last year, while corn imports were at 6 million mt, up 228% year over year.

CERA projects China's corn imports for MY 2025-26 at 5 million mt, 1 million mt below the Chinese agricultural ministry's estimate.

Platts, part of S&P Global Energy, assessed corn CFR Northeast Asia at $256/mt June 12, down $2/mt day over day.

European soybean meal imports face deforestation rule pressure

- EUDR and African swine fever may impact European feed demand
- Brazil leads soybean meal exports; deforestation rules may affect trade.

European soybean meal imports could be impacted by the EU's deforestation regulation in the second half of 2026, panelists at the International Grain Conference said in the week to June 12.

Industry leaders and market analysts gathered at the International Grain Conference in London June 9-10 to discuss the outlook for European grain and feed markets amid regulatory and disease-related challenges. Panelists noted that the European Deforestation Regulation, or EUDR, and African swine fever are expected to influence demand and trade flows in the coming months.

According to EU Commission data presented at the event, Europe imported 7.68 million metric tons of soybean meal from Brazil in the marketing year 2025-26, representing 51.3% of total imports.

A Brazilian expert said the country harvested 180 million mt of soybeans this year, with exports rising to 112 million mt, but cautioned that EUDR requirements for deforestation-free certification may affect shipments to the EU.

An Argentine panelist said EUDR could pose challenges for exporters, but may also promote global sustainability.

In a panel discussion about the grain trade and logistics, a grain market expert for Spain noted that factors like high freight rates and oil prices are affecting the grain trade, but at the same time, the biggest challenge is the ASF outbreak. Pork production is expected to decrease by 1.3%, which would directly impact grain demand, the source said.

Platts, part of S&P Global Energy, assessed Soybean meal FOB Netherlands at Eur354/mt on June 11, Soybean meal EXW Spain at Eur353/mt and Corn EXW Spain at Eur221/mt on the same day.

China maintains soybean outlook for MY 2026-27: CASDE

- MY 2026-27 soybean imports seen at 95.5 mil mt, down 7.6% YOY
- Second consecutive year of declining import demand
- Northeast China growing conditions favorable for new crop

China's Ministry of Agriculture and Rural Affairs maintained its soybean supply and demand outlook for the marketing year 2026-27 (October-September), according to the latest Chinese Agricultural Supply and Demand Estimates released June 11.

Soybean imports for MY 2026-27 were maintained at 95.5 million metric tons, down 7.6% year over year.

China's soybean production and domestic consumption for MY 2026-27 remained unchanged, with soybean output forecast at 20.95 million mt, up 0.2% year over year, and domestic consumption at 114 million mt, down 6.1% from the previous year.

China is expected to import 108 million mt of soybeans in MY 2026-27, down 1.8% year over year, with production forecast at 21.5 million mt, up 2.9% year over year, according to S&P Global Energy CERA.

"Currently, farmers in major producing areas have almost exhausted their stock of old soybeans, and market transactions are sluggish," the ministry said.

According to the ministry, sowing of the new season's soybeans in Northeast China is complete, with most areas experiencing favorable light, temperature and moisture conditions conducive to emergence and growth.

For MY 2025-26, China's soybean import estimate was maintained at 103.3 million mt, a 5.5% decrease year over year.

S&P Global Energy CERA projects China's soybean imports for MY 2025-26 at 110 million mt, 6.7 million mt above MARA's estimate.

China's soybean production and consumption for MY 2025-26 remained unchanged, with soybean output forecast at 20.91 million mt, up 1.3% year over year and consumption is expected at 121.35 million mt, up 2.4% year over year.

China is the world's largest importer of soybeans.

Platts, part of S&P Global Energy, assessed CFR China first-month soybeans at $485.01/mt on June 12, down $2.39/mt day over day.

UKRAINE DATA: MY 2025-26 wheat exports fall 15%, corn down 6% as of June 12

- Wheat export forecast at 12 mil mt for MY 2025-26: CERA
- Corn exports seen at 22.2 mil mt: CERA

Ukraine's wheat exports during the marketing year 2025-26 (July-June) totaled 13.1 million metric tons as of June 12, down 15% year over year, according to the Ministry of Agrarian and Food Policy.

Between June 1-12, the country exported 551,000 mt of wheat, up from 495,000 mt shipped during the same period last year.

In MY 2024-25, Ukrainian wheat exports were at 15.7 million mt, data showed.

S&P Global Energy CERA forecast Ukraine's wheat export for MY 2025-26 at 12 million mt while wheat production for the season is projected at 24.1 million mt.

Platts, part of S&P Global Energy, assessed Ukrainian 11.5% wheat FOB Black Sea at $234/mt June 11, unchanged day over day.

Corn exports drop

Ukrainian corn shipments stood at 19.9 million mt as of June 12 in MY 2025-26, down 6.5% year on year, ministry data showed.

Between June 1-12, about 625,000 mt of corn was exported, down from 713,000 mt in the same period last year, data showed.

In MY 2024-25, Ukraine corn exports were at 21.2 million mt.

CERA's Ukraine corn production forecast for the current season is at 30.9 million mt, while exports are seen at 22.2 million mt.

Platts assessed Ukraine corn FOB Black Sea at $232/mt June 11, down $1/mt day over day.

WEEKLY EMEA PORK WRAP: European market pressured by domestic oversupply amid LatAm competition

- EU pork drops Eur10/mt on oversupply pressure
- Spain redirects exports to the domestic market
- Brazil competition squeezes European exports

The European pork market faced downward pressure during the week ended June 12, with Platts, part of S&P Global Energy, assessing the EU pork marker at Eur2,520/metric ton FCA Barcelona, down Eur10/mt week over week.

Trading activity was quiet throughout the week as regional supply continued to outweigh demand, and participants noted a persistent high inventory level across the EU bloc.

Market conditions left sellers unable to support any price recovery amid weak export demand and flat domestic consumption.

Production updates

In Germany, the pork sector faced significant strain as slaughterhouses pushed for lower pig prices.

Producer associations actively debated potential price drops, with market sources expecting the pressure to lower farmgate values to intensify to protect shrinking processor margins.

The ongoing market pressures squeezed the supply chain, leaving farmers facing financial losses.

In Spain, processors struggled to place frozen pork belly volumes in international markets, leading to the redirection of pork supply back into the domestic European market and adding to regional supply burdens.

Consumption trends

Demand remained weak across major European markets, as expectations of a seasonal boost in consumption from summer grilling had yet to materialize.

This lack of seasonal domestic uptake left wholesalers reliant on releasing existing frozen inventories rather than purchasing fresh cuts.

The combination of sluggish spot volumes and the redirection of Spanish export volumes left the regional market oversupplied, preventing sellers from exerting any support in prices.

Pricing analysis

European price levels contrast with cheaper alternatives for products bound for Asia, leaving European exporters less competitive.

In the European spot market, an offer for a 20 mt cargo of French-origin, frozen, bone-in, skin-on, tip-off pork belly was heard at Eur2,650/mt ex-works.

In the Asian market, the last heard offer for Spanish-origin frozen single-ribbed, skin-on pork belly stood at $3,800/mt CFR Busan for a 24 mt cargo for July-August shipment.

Key events

Subdued buying interest across Asia prompted importers to seek cheaper cuts, allowing Brazilian exporters to aggressively expand their global market share.

The export squeeze consistently limited European trade opportunities, forcing Spanish and other European processors to compete heavily within the domestic continent.

Outlook

Market participants expected conditions to remain challenging through the summer, with ongoing market pressures and uncertainties in the pig sector.

The combination of sluggish global export demand, heavy domestic oversupply, and the absence of a strong summer barbecue season suggested continued pressure on producer and processor margins.

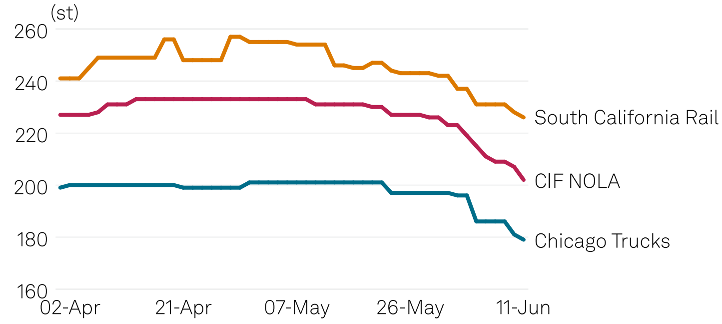
US DDGS prices slide in June as weak demand, rising supply pressure the market

- CIF NOLA market leads decline as export demand fades
- Market searches for demand

The US dried distillers grains with solubles prices have fallen sharply since the start of June as weak export demand, improving supply availability and seasonally slower feed consumption have weighed on the market.

Platts CIF New Orleans DDGS prices have declined $24/short ton since the start of June, while Chicago truck prices have fallen $25/st and Union Pacific California rail prices have dropped $20/st over the same period.

US DDGS values decline amid weak demand



Source: S&P Global Energy

Platts, part of S&P Global Energy, assessed CIF New Orleans DDGS barges for the June shipment period at $199/st on June 12, the Chicago DDGS truck market for the June delivery period was assessed at $171/st, and the South California rail market for the June delivery period was assessed at $222/st.

Market participants repeatedly pointed to the absence of export demand as the primary driver. “Exports don’t exist right now,” one trader said, while another said that “export demand is very weak right now. Everywhere.”

The downturn has coincided with strong ethanol production and the end of the spring maintenance season, increasing product availability. “Production is high,” the second trader said, while a broker added that supplies were increasing as plants returned to normal operating rates.

Demand has weakened both internationally and domestically. “Feed demand will stay down for a month here at least,” a second broker said, citing summer feeding patterns.

The second trader added that “there is no international demand right now,” forcing sellers to lower their prices to attract buyers.

The correction accelerated during the week ended June 12 as CIF values came under heavy pressure.

“Big time drop,” the second broker said of the export market and described conditions more broadly as a “weaker tone on everything, not just DDGS.”

Participants said lower corn and soybean meal prices have also made competing feed ingredients more attractive, reducing DDGS inclusion rates in some rations.

“We have to price this way to keep ration space,” a third trader said.

Despite the bearish sentiment, some market participants believed values could eventually stabilize if lower prices stimulate buying.

“We have to find demand,” the second trader said, while the second broker suggested the market could eventually “find some footing.”

GLOBAL SOYBEAN WEEKLY: Brazil basis premiums remain strong on CBOT pressure

- Sentiment in China weakens after WASDE publication
- US prices halt downward trend from previous week
- Brazil June soybean exports headed for monthly record: ANEC

Brazilian soybean basis premiums remained elevated in the week ended June 12 amid pressure on Chicago Board of Trade futures.

Up to 16 cargoes were heard traded for CFR China for Brazilian old and new crop shipments, according to multiple China-based traders.

Most of the demand was concentrated on August shipment, trading at levels 220-225 cents/bushel over July (N) CBOT, basis CFR China.

However, market sentiment was dampened following the release of the US Department of Agriculture's World Agricultural Supply and Demand Estimates report on June 11, which provided limited bullish catalysts and led to lower futures prices, **a China-based soybean trader said.**

"The resulting rise in Brazilian basis levels prompted market participants to withdraw offers during the June 10 US trading session," the trader added.

As of June 9, 9.8 million metric tons, or 82% of the total open demand for the July shipment, had been covered, according to another China-based soybean trader.

Meanwhile, 8 million mt, or 55% of the total open demand for the August shipment, had been covered.

For the September shipment, open demand decreased to about 6.5 million mt, while open demand for the October shipment stands at 8.9 million mt.

Platts, part of S&P Global Energy, assessed the soybean CFR China M1 basis at 210 cents/bu, over the Chicago Board of Trade July (N) contract on June 11. The soybean CFR China M1 flat price was assessed at $485.02/mt on June 11, down $2.75/mt week on week.

Bearish exports, forecasts pressure US prices

The US soybeans market saw mixed price movements in the week ended June 12, halting the downward trend seen until June 9, amid bearish exports and entities continuing to liquidate positions in the futures market, sources said.

"The longer we go with no defined China business, the lower we will go on the board and basis," a trader in the CIF New Orleans market said. "There just isn't enough of a summer [export] program."

Prices fell over June 8-9, pressured by the futures market, with sources attributing the decline to the liquidation of long positions in the futures market.

"[We're seeing good] weather, China, Iran, crisis," a trader in the FOB Gulf market said. "And tired entities who don't know why keeping a long position in a market that is not giving them good business for it."

The decline paused on June 10 amid developments on the war in the Middle East and unconfirmed reports pointing to China enquiring about US soybeans. However prices fell again on June 11 after the USDA published what sources considered a "bearish" WASDE report.

The USDA's latest Crop Progress report showed that 92% of soybeans have been planted as of June 7 in the 18 main producing states, 5 percentage points higher than the previous week and 3 percentage points higher on the year.

Platts assessed SOYBEX FOB New Orleans for July shipment at $445.88/metric ton on June 12 and assessed the outright price for CIF NOLA for June shipment at $438.17/mt

Activity increases in Brazil throughout week

Trading activity in the Paranaguá paper market was slow to start the week, but gradually gained momentum, with trades reported for both old-and new-crop positions. Deals were reported for shipments from July to September 2026 and from February to March 2027, indicating continued forward coverage interest.

Market sentiment remained supported by strong export demand, as China-based crushers continued to prioritize coverage for July and August shipments, sustaining interest for prompt loadings, despite market talk that China was inquiring about US supplies, sources said.

Brazilian grain exporters' association Anec updated its estimate for soybean exports in June to 14.38 million mt, the highest volume recorded for the month, it said June 9.

The latest estimate was about 2 million mt higher than the prior week's export volume and was 4.3% higher than June 2025 data, according to Anec.

Anec projected Brazil's soybean exports in the first half of 2026 at 72.89 million mt, up 7.1% on the year.

Platts assessed the SOYBEX FOB Santos price for July delivery at $442.60/mt on June 12, down 0.2% week over week.

GLOBAL ANIMAL FEED WEEKLY: European soybean meal falls as urgent demand needs already met, US DDGS prices fall in June

- Higher June soybean meal export expectations
- EU soybean meal market turns bearish
- US DDGS market declines on weak demand, lower futures

South America

South American soybean meal FOB prices were mixed over the week, rising for the FOB Up River prices and showing a slow decrease in FOB Paranaguá prices.

On June 12, Platts assessed the Argentine soybean meal FOB Up River outright price for July dates at $333.23/metric ton, up 0.6% week over week. The Brazilian FOB Paranaguá value for the same loading decreased 0.07% to at $333.23/mt in the same comparison.

According to a broker, demand in Argentina was firm, with buyers active in the market.

The Buenos Aires Grain Exchange reported June 11 that the 2025-26 soybean harvest in Argentina reached 95.2% as of June 10, up 3.5% from the previous week and higher than the previous season at the same time.

BAGE reported that harvesting is nearing its final phase, with progress being made mainly in the northern and southern sectors of the agricultural area.

A broker said demand for soybean meal for export in Brazil was low this week.

The Mato Grosso Federation of Agriculture and Livestock System, or Famato, reported June 6 that the soybean sanitary void began June 8 and lasts until Sept. 7. During this period, the presence of live soybean plants is prohibited in fields, along roadsides, storage areas and in any other locations where spontaneous germination may occur.

Brazilian grain exporters' association Anec estimated that Brazil will export 2.31 million mt of soybean meal in June, up from 1.67 million mt in the same month last year, it said on June 9.

EU

The European soybean meal market was bearish during the week ending June 12.

Dutch traders reported that offer prices are following the CBOT rally this week, with prices declining.

"Not many trades were reported this week as people were awaiting the USDA report and price stability," a trader said.

A Spanish trader said, "CBOT is now the main driver of prices." The same trader said that "current demand has declined as the most urgent needs have already been met."

Platts assessed FOB Netherlands soybean meal at Eur349/mt, down Eur6/mt, and EXW Spain at Eur345/mt, down by Eur9/mt, week over week.

US DDGS

The US dried distillers grains with solubles market moved lower during the week of June 8-12, as weak export demand, high production levels and falling grain futures pressured values across domestic and export channels.

Platts assessed CIF New Orleans dried distillers grains with solubles barges for the June shipment period at $199/st on June 12, the Chicago DDGS truck market for the June delivery period was assessed at $171/st, and the South California rail market for the June delivery period was assessed at $222/st.

Participants began the week expecting softer summer demand to weigh on the market. "Demand is lowered already," one broker said June 8, adding that feed formulations for June had largely been established. "It won't come any earlier than July," the source said regarding any potential recovery in demand.

Market sentiment deteriorated further as participants pointed to a lack of export business. "Exports don't exist right now," one trader said June 9, noting that production remains elevated while feed demand is seasonally weak. "We have to price this way to keep ration space."

"Export demand is very weak right now. Everywhere," another trader said, citing strong production, freight costs and competition from cheaper local feed ingredients in importing countries.

The market saw increased activity June 10 as values moved lower across CIF NOLA and rail markets. "It's the most action DDGS has seen in a while," another broker said, though adding that the activity reflected a heavier market tone. "It's heavy."

"Weaker tone on everything, not just DDGS," the same broker said by the end of the week, pointing to declines in corn and soybean meal markets.

A buyer also reported lower truck prices in some regions. "With the corn board down last week, we did see a break in prices finally in CNE for trucks," the buyer said.

Market participants repeatedly stressed that demand remains the missing piece. "There is no international demand right now," the second trader said.

"I think values will need to move lower before buyers purchase anything," the source said.

The trader added that the market's direction will ultimately depend on attracting new business. "We have to find demand."

Platts is part of S&P Global Energy.

Subscriber Notes

June 15 publishing schedule for Argentine biodiesel, grains and oilseeds price assessments

Please note that Platts, part of S&P Global Energy, will not publish Argentine biodiesel, grains and oilseeds price assessments June 15 in observance of the Paso a la Inmortalidad del Gral. de Guemes holiday.

No Argentine biodiesel, corn, soybean oil or soybean meal assessments will be published on that day. The Daily Grains report will be published June 15 without Argentine assessments and rationales. Argentina's normal publishing schedule will resume June 16.

For full details of the Platts publishing schedule and services affected, refer here.

For queries, please contact support@spglobal.com.

Platts corrects Soybean meal FOB Netherlands assessment for June 9

Platts, part of S&P Global Energy, has corrected the assessment for the Soybean meal FOB Netherlands (EUPMQ00) for June 9.

The assessment should read as Eur357/mt. The correction has been updated in the Platts database under the code EUPMQ00.

The assessment appears in Platts Connect on fixed page PAA(0805) and in Platts Daily Grains.

Please send any questions to platts_agricultureandFood@spglobal.com with a cc to pricegroup@spglobal.com.

Assessment Rationale

Grains

Platts Ags EMEA Wheat Daily Rationale

Platts assessed the Milling Wheat Marker at $239/metric ton on June 12, down $1/mt from the previous assessment. Russian 12.5% handysize wheat, assessed at $239/mt, was the most competitive wheat out of the three components of the Milling Wheat Marker, Ukraine 11.5%, normalised to the nearest 25 cents of $240.25/mt when adding May's quality normalisation of $6.15/mt, to account for its lower protein content, assessed at $234/mt, and CVB 12.5% wheat assessed at $240/mt on the day. This reflects the Platts assessment window from July10-24.

Platts assessed Black Sea wheat (Russian deepsea, 12.5% protein) down $2/mt to $239/mt June 12, below the offer at $240/mt for H2 July loading. The structure between the first and second halves of July was assessed flat. This reflects the Platts assessment window from July 10 -24.

Platts assessed Black Sea wheat (Ukraine deepsea, 11.5% protein) unchanged at $234/mt on June 12, below an offer for July at $236/mt. The structure between the first and second halves of July was assessed flat. This reflects the Platts assessment window from July 10-24.

Exclusions: No market data was excluded from the June 12 Black Sea wheat assessments.

Platts is part of S&P Global Energy.

This rationale applies to symbol (s) <BSMWM00> , <WRBSD00>, <WUBSA00>

Platts Asia Wheat Daily Assessment Rationale

Platts assessed Australian Premium White wheat unchanged at $279/metric ton FOB Kwinana June 12 for cargoes loading between Aug. 11 and Sept. 10, under an indicative offer of $281/mt.

Platts assessed Australian Standard White wheat with no protein guarantee unchanged at $272/mt for cargoes loading over the same period, under an indicative offer at $275/mt. This maintains the spread between Australian Premium White and Australian Standard White with no protein guarantee at $7/mt.

Platts is part of S&P Global Energy.

Platts Canada Wheat Daily Rationale

Platts assessed Canada Western Red Spring Wheat 13.5% FOB Vancouver 30-45 days forward at $271.17/metric ton on June 12, down $1.29/mt from June 11.

CWRS Wheat 13.5% FOB Vancouver basis 30-45 days forward, spanning July 12-27, was assessed unchanged at MIAX Hard Red Spring Wheat September (U) futures plus 96 cents/bushel. No disproving information was heard day over day.

CWRS Wheat 13.5% FOB Vancouver basis 45-60 days forward, spanning July 27-August 11 was assessed unchanged at U plus 96 cents/bu based on an August bid indicated at U plus 95 cents/bu and an August offer indicated at U plus 110 cents/bu.

CWRS Wheat 13.5% FOB Vancouver basis 60-75 days forward, spanning August 11-26 was assessed unchanged at U plus 96 cents/bu based on an August bid indicated at U plus 95 cents/bu and an August offer indicated at U plus 110 cents/bu.

Platts is part of S&P Global Energy.

Exclusions: No data was excluded in the assessments.

This rationale applies to symbol(s) <AWHCA00> <AWHCB00> <AWHCC00> <AWHCD00> <AWHCE00> and <AWHCF00>.

Platts Asia Corn Daily Rationale

Platts assessed corn CFR Northeast Asia down $2/metric ton day over day at $256/mt CFR June 12 for feed-quality corn arriving over Sept. 10 to Oct. 10 into Pyeongtaek, below a normalized offer at $256.69/mt CFR and partially tracking the decline in futures.

Platts is part of S&P Global Energy.

Asia corn assessments can be found on <PAA2440>

Market commentary can be found on <PAA2688>

This rationale applies to symbol(s) <WCINV00>

Platts Argentina Corn FOB Up River Daily Rationale

Platts assessed corn FOB Up River for loading in July at $200.29/metric ton on June 12, up $3.54/mt from June 11.

The assessment considered the FOB premium for Up River July-loading cargoes 8 cents/bushel higher at plus 96 cents/bu to Chicago Board of Trade July (N) corn futures, based on higher bids heard at N plus 95 cents/bu, and no offers heard at the market close.

Platts is part of S&P Global Energy.

This rationale applies to symbols <ARGCA00> <ARGCB00>.

Platts Brazil Corn Daily Rationale

Platts assessed the Brazilian corn FOB Santos price for August loading at $212.88/metric ton on June 12, $2.26/mt higher than the previous assessment.

The assessment considered the FOB Santos basis for August loading cargoes 5 cents/bushel higher at plus 120 cents/bu to the Chicago Board of Trade September (U) contract, based on an indicative value heard at that level, bids for full August loading heard at U plus 115 cents/bu, bids for August H2 loading at U plus 113 cents/bu, and no offers heard at the market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <ABCSA00> <ABCSB00>

Platts US Corn Daily Assessment Rationale

Platts assessed the US Yellow Corn No. 2 CIF New Orleans barge basis for June shipment at 79 cents/bushel over the CBOT July (N) corn futures contract on June 12, unchanged from the previous business day. Based on the last bid heard in the session at 75 cents/bu, and offers at 80 cents/bu.

Platts assessed the US Yellow Corn No. 2 CIF New Orleans barge basis for July shipment at 89 cents/bu over the Chicago Board of Trade July (N) corn futures contract on June 12, up one cent from the previous assessment. This was based on a trade heard at 89 cents/bu. In the session, competitive bids were heard at 88 cents/bu, and offers at 90 cents/bu.

Platts assessed the US Yellow Corn No. 2 FOB Gulf basis for August shipments at 97 cents/bu over the CBOT September (U) corn futures contracts on June 12. Offers were heard at 98 cents/bu for first half of August, and 101 cents/bu for the second half of the month

No information was excluded.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <WCNOE00> <WCNOU00>

Platts FOB Black Sea Corn Daily Assessment Rationale

Platts assessed Ukrainian corn unchanged at $232/metric ton on June 12, below an offer at $235/mt for June-July loading. The structure between the first and second halves of July was assessed flat. This reflects the Platts assessment window from July 10-24.

Platts is part of S&P Global Energy.

Exclusions: No market data was excluded from the June 12 Black Sea corn assessment.

This rationale applies to symbol(s) <CUBSU00>

Oilseeds.

Platts Asia Soybeans Daily Rationale

Platts assessed CFR China first-month soybeans down $2.39/mt on the day at $485.02/mt, while basis was up 5 cents/bu at 210 cents/bu over July (N) CBOT June 12, tracking indicative value at 210 cents/bu over July (N), for Brazil July shipment.

Platts assessed CFR China second-month soybeans down $0.18/mt on the day at $492.37/mt, while basis was up 11 cents/bu at 230 cents/bu over July (N) CBOT, considering an overnight trade at 230 cents/bu. This is below the normalized offer at 234 cents/bu and above the indicative bid at 217 cents/bu over July (N) for Brazil August shipment.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYBAB00> <SYBAA00> <SYBAF00> <SYBAD00> <SYBAC00> <SYBAE00>

Platts Brazil Soybean Daily Assessment Rationale & Exclusions

Platts assessed the SOYBEX FOB Santos soybean contract for July loading at $442.60/metric ton on June 12, 92 cents/mt higher than the previous assessment.

The FOB Santos basis for July loading was assessed 4 cents/bu higher at plus 91 cents/bu to the CBOT July (N) contract, based on a spread to the Paranagua paper market heard at plus 5 cents/bu. No bids or offers were heard for the full July loading of FOB Santos cargo.

A bid for FOB Santos H2 July was heard at N plus 86 cents/bu earlier on the day, with offers at N plus 93 cents/bu.

The FOB Paranagua basis for July loading was assessed 4 cents/bu higher at plus 86 cents/bu to the CBOT July (N) contract, based on an indicative value heard at that level, higher bids at N plus 85 cents/bu and lower offers at N plus 90 cents/bu at market close.

Exclusions: No data was excluded.

Platts is part of S&P Global Energy.

<SYBBD00> <SYBBH00> <SYBBA00> <SYBBE00> <SYBBB00> <SYBBG00>

Platts US Soybeans Daily Rationale

Platts SOYBEX FOB New Orleans for July shipment was assessed at $445.88/metric ton on June 12, down 56 cents from June 11. The FOB Gulf basis for July shipment was assessed at 100 cents/bushel over the Chicago Board of Trade July (N) soybeans contract on the day, unchanged from June 11. This was based on a value indication heard at 100 cents/bu, and an offer at 107 cents/bu.

The CIF New Orleans basis for June shipment was assessed at 79 cents/bu over the July (N) soybeans futures contract on June 12, unchanged from June 11. This was based on a bid heard at 75 cents/bu, and an offer heard at 80 cents/bu.

No information was excluded.

Platts is part of S&P Global Energy.

This rationale applies to symbols <SYBBI00> <SYBBL00> <SYBBK00> <SYBBJ00>.

Animal Feed and Protein

Platts Argentina Soybean Meal Daily Rationale

Platts assessed the Argentine soybean meal FOB Up River price for July loading at $333.23/metric ton on June 12, down 44 cents/mt from the previous assessment.

The basis for July loading in the Up River cargo market was assessed unchanged at $1/st to the July (N) futures at the Chicago Board of Trade. The assessment considered steady bids at $0/st and higher offers at $5/st to the CBOT N contract at the market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYMAA00> <SYMAB00>.

Platts Brazil Soybean Meal Daily Rationale

Platts assessed the Brazilian soybean meal FOB Paranagua price for July loading at $333.23/metric ton on June 12, $1.77/mt higher than the previous assessment.

The basis for July loading in the Paranagua paper market was assessed $2/short ton higher at $1/st to the July (N) futures at the Chicago Board of Trade. The assessment considered an indicative value heard at that level, higher bids at minus $1/st and higher offers at $5/st to the CBOT N contract at the market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYMBA00> and <SYMBB00>.

Platts US Dried Distiller Grains DDGS Daily Assessment Rationale

Platts assessed CIF New Orleans dried distillers grains with solubles barges for the June shipment period at $199/short ton on June 12, down $3/st from June 11 based on a bid heard at $198/st and an offer heard at $200/st.

A trade at $197/st was discounted after a higher bid value was reported later in the session.

The Chicago DDGS truck market for the June delivery period was assessed at $171/st, down $8/st from June 11, based on a value indication at that level, a bid heard at $168/st and an offer heard at $178/st.

The South California rail market for the June delivery period was assessed at $222/st, down $4/st from June 11, based on a trade heard at that level for June 11.

Platts is part of S&P Global Energy.

This rationale applies to symbols <ACDDG00> <AADDG00>.

Vegetable Oils.

Platts Asia Palm Oil Daily Rationale

Platts assessed CPO CFR WC India price at $1,217.5/mt June 12 for June loading, down $15/mt from June 11, below an offer and above a bid.

CPO offer was heard at $1,222.5/mt and an indicative bid at $1,210/mt on a CFR WC India basis, shipping in June.

July shipment of CPO CFR WC India was at $1,222.5/mt June 12, down $15/mt from June 11, considering a $5/mt carry between June and July.

Platts assessed CPO FOB Indonesia price at $1,185/mt June 12 for June loading, down $7.5/mt from June 11, below an offer and above a bid.

CPO offer was heard at $1,195/mt and an indicative bid at $1,175/mt on a FOB Dumai basis, shipping in June.

July shipment of CPO FOB Dumai was at $1,190/mt June 12, down $7.5/mt from June 11, considering a $5/mt carry between June and July.

Platts assessed the RBDPS FOB Indonesia price at $1,060/mt June 12 for June loading, unchanged day over day, below an offer and above a bid.

RBDPS offer was heard at $1,075/mt and an indicative bid at $1,045/mt on a FOB Dumai basis, shipping in June.

July shipment of RBDPS FOB Dumai was at $1,062.5/mt June 12, down $2.5/mt from June 11, considering a $2.5/mt carry between June and July.

Platts assessed the PFAD FOB Indonesia price at $975/mt June 12 for June loading, up $2.5/mt from June 11, below an offer and above a bid.

PFAD offer was heard at $990/mt and an indicative bid at $960/mt on a FOB Dumai basis, shipping in June.

July shipment of PFAD FOB Dumai was at $980/mt June 12, up $2.5/mt from June 11, considering a $5/mt carry between June and July.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <ACPOA00> <ACPOB00> <APFAD00> <ARBSA00>

Platts Argentina Soybean Oil Daily Rationale

Platts assessed the Argentine soybean oil FOB Up River price for July loading at $1,174.62/mt June 12, up $5.07/mt from June 11. The basis for July loading in the Up River paper market was assessed 40 points higher at minus 2,100 points to the July (N) futures at the Chicago Board of Trade. The assessment considered an indicative value last heard at that level, offers at minus 2,050 points and bids at minus 2,250 points to the CBOT N contract at the market close. No trades were confirmed before the market close for July loading in the FOB Up River paper market June 12.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYOAA00> <SYOAB00>

Platts Brazil Soybean Oil Daily Rationale

Platts assessed the Brazilian soybean oil FOB Paranaguá price for July loading at $1,194.47/mt June 12, up $5.08/mt from June 11. The basis for July loading in the Paranaguá paper market was assessed 40 points higher at minus 2,010 points to the July (N) futures at the Chicago Board of Trade. The assessment considered an indicative value last heard at that level, offers at minus 1,950 points and bids at minus 2,200 points to the CBOT N contract at the market close. No trades were confirmed before the market close for July loading in the FOB Up River paper market June 12.

Platts assessed the Brazilian soybean oil FOB Paranaguá price for August loading at $1,165.36/mt June 12, up $1.32/mt from June 11. The basis for August loading in the Paranaguá paper market was assessed 40 points higher at minus 2,000 points to the August (Q) futures at the Chicago Board of Trade. The assessment considered an indicative value last heard at that level. No bids, offers or trades were confirmed before the market close for August loading in the FOB Paranaguá paper market June 12.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYOBB00> and <SYOBA00>.

Platts Europe Sunflower Oil Daily Rationale

Platts assessed sunflower oil FOB Black Sea, Ukraine, for July unchanged on June 11 at $1,381/metric ton, above a bid heard at $1,380/mt.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SFWBL00>.
