Commentary and Analysis

Wheat

Platts European Wheat Daily Commentary

- Russian wheat sellers offer at \$228-\$229/mt
- French wheat prices rise amid hot weather

The Black Sea wheat market was rangebound July 7 amid weak demand and strong early-harvest yields. Sellers of Russian wheat offered at \$228-\$229/metric ton, compared to bids at a \$2/mt discount.

The starting yield from Russia was at 4.2 mt/hectare, up about 30% year over year, though the harvest was a few weeks behind. Sellers preferred selling CPT at Rb15,000/mt as a better option to avoid the risk of currency fluctuation, as the ruble has depreciated over the past few weeks.

Margins remained low, when adding fobbing costs at Rb1,900/mt and the export tax (Rb370/mt), a Russia-based trader said. The CIF Egypt market saw few bids in the low \$240s/mt, with the most competitive offer at \$245/mt.

In Ukraine, wheat yields reached 4.13 mt/hectare, up 59% year over year. Sellers lowered their offers to \$224/mt amid declining bids at \$222/mt. The CVB market saw a spread at \$5/mt between the 12.5% and 11.5% protein, with the former valued at \$235/mt, traders in Romania said.

The French wheat market rose marginally amid the impact of hot weather on the harvest. The FOB market remained silent amid low demand; however, demand in the CPT market rose early in the week.

On the destination side, the Moroccan government has approved new rules for purchasing soft wheat used in subsidized flour production, while also updating requirements for flour production, packaging, distribution and pricing for marketing year 2026-27, according to local media reports July 7.

Platts Asia Wheat Daily Commentary

- Australian wheat stable
- Australian bulk, container offers thin

Australian wheat prices were stable day over day July 7.

Several Asian trade sources said that Australian wheat offers — both in bulk and in containers — were subdued to start the week, as regional appetite remained focused on the upcoming Black Sea crop.

One of the sources said container offers from the East Coast were also muted compared to several weeks ago, likely because exporters had traded sufficient quantities to keep their packing sites running. “Seems they [exporters] are trying to get better bids in local [market] so they can square off losses in low-value CFR deals,” said the same source.

A Vietnamese feed trader said Black Sea feed wheat was now

being offered as low as \$252/metric ton CFR in containers, but that interest was thin as buyers required a \$5-\$10/mt discount against bulk feed corn to account for higher container logistics costs. Feed corn offers to Vietnam are being quoted at mid \$250s/mt CFR.

Platts is part of S&P Global Energy.

Platts Canada Wheat Daily Commentary

- Canada wheat basis falls with firmer futures
- Japan seeks 60,000 mt wheat in July 9 tender

Platts assessed Canada Western Red Spring Wheat 13.5% FOB Vancouver 30-45 days forward at \$288.16/metric tons on July 7, \$2.12/mt lower than July 6 as futures rebounded from the previous sessions and basis levels held steady.

The December (Z) MIAX Hard Red Spring Wheat futures contract continued to climb on July 6, up 4.25 cents/bushel on the day to 655.25 cents/bu, borrowing strength from the broader grains market amid talk of Chinese purchases, sources said.

Canadian wheat basis premiums were heard weaker on the day amid the futures rally, with September offers heard at Z plus 115 cents/bu after the market close on July 6 and falling to Z plus 110 cents/bu by July 7.

"Futures were stronger in the past few sessions, but the market was a little cooler on the basis front," one trader said.

Wheat basis premiums were assessed 10 cents/bu lower day over day across the three Platts assessment periods as the market reacted to the firmer futures.

Overall activity, however, was subdued, with farmer selling remaining low.

US Northern Spring wheat was heard offered in the 140-170 cents/bu range over the MIAH Hard Red Spring September (U) contract, with traders noting offers more on the upper end of the range.

The upcoming Japanese Ministry of Agriculture, Forestry and Fisheries tender on July 9 reportedly seeks two cargoes totaling 60,000 mt of No. 1 CWRS wheat with 13.8% protein for September shipment. Amid subdued trade activity, the tender may provide clarity to a recently opaque market.

Platts is part of S&P Global Energy.

Corn

Platts Asia Corn Daily Commentary

- Asian corn prices surge \$4.50/mt on China news
- South Korea seeks sub-\$260/mt Nov cargos

Asian corn prices surged July 7 amid a spillover of bullish sentiment from news of China's purchase of US soybeans.

Platts assessed feed quality corn CFR Northeast Asia up \$4.50/metric ton at \$264.50/mt for cargoes arriving Oct. 5 to Nov. 4.

Market participants observed a significant increase in both physical cargo prices and Chicago Board of Trade futures prices.

"[China-US soybean deals] pretty much pulling up the whole grains complex up to the meal level," explained a Singapore-based grains broker, but also cautioned that "if the actual tonnage ends up lower in the export sale then market will fall again."

In Vietnam, the most recent South American-origin corn offers were reported at \$259/mt CFR Vietnam for partial cargos with

September shipment, up \$4.50/mt day over day.

"Futures are too firm while flat prices become expensive.

There are more Argentina farmer selling as the CBOT rose but the decrease in basis is much slower than the rise in CBOT," said a Singapore trader that had offered to Vietnam.

Meanwhile, South Korean buyers continued to cite sub-\$260/mt CFR as an acceptable level for November arrival cargos, although a poll of three traders showed offers at \$265 to the high \$260s/mt CFR for South American-origin corn.

No US Pacific Northwest corn was heard available as September shipments were "depleted," according to a South Korean trader.

Platts Latin America Corn Daily Commentary

- Steady premiums in LatAm
- Higher FOB prices amid steady domestic prices

Latin America FOB corn prices increased July 7, tracking Chicago Board of Trade futures prices.

Argentine FOB Up River premiums for August loading and the Brazilian FOB Santos premiums for August loading were unchanged.

The US dollar to Brazilian real exchange rate stood at Real 5.1689/\$1 as of 5:30 pm Brasilia time, up 0.41% day over day.

In Brazil's domestic market, prices were steady in the Sorriso, Rio Verde, and Maringá regions. No trades were reported.

According to buyers, corn spot deals in the domestic market are slow amid the advance of the winter corn harvest.

In Mato Grosso, warehouses are already stocked, and there is interest in business for deliveries and payments in November 2026.

The winter corn harvest reached 28.5% nationwide as of July 3, up from 27.7% in 2024-25 over the same period, according to data published by the Brazilian agricultural agency, CONAB, on July 6.

CONAB reported that in Mato Grosso state, harvest has passed the halfway point for the cultivated area, and yields are continuing to exceed initial estimates.

In Paraná, the harvest is advancing more slowly due to frequent rains and high grain moisture.

In Goiás, the harvest has advanced in the south-central region and has already begun in the south, with average yields confirming estimates of a crop shortfall.

Platts is part of S&P Global Energy.

Platts US Corn Daily Commentary

- China buying boosts grain market sentiment
- Corn silking reaches 16%, above 5-year average

US corn prices increased on July 7, tracking the Chicago Board of Trade September (U) future contracts, which jumped 5.50 cents to \$4.4375/bushel.

During the session, market sentiment was positive, led by China buying soybeans.

"Yes, China is back in some today, I'm hearing as well," a trader said.

A second trader said the market is expecting strong demand from China in the last quarter of 2026, which is also pushing corn prices to 20 cents/bu due to elevated costs in the Gulf.

"Stay tuned for demand from China," the second trader said.

In the domestic market, a broker said that in the West corn belt, commercial facilities feel that selling potential remains high, with growers still sitting on a lot of farms yet to move, and that the fear of a large tranche of ownership transition is a concern given a relatively limited calendar before harvest.

The US Department of Agriculture confirmed that corn silking was at 16%, above the five-year average of 14%.

Sixteen of the 18 major states reported progress, with 11 states

running ahead of average, led by Kentucky, Tennessee, North Carolina, Kansas, and Missouri, according to an analysis by S&P Global Energy CERA.

Platts European Corn Daily Commentary

- New crop offers rise on weather concerns
- Ukraine corn competitive in Spanish market

The Black Sea corn market remained stable on July 7, with no firm buyers for the August shipment.

Market participants said the market was more active for the spot and July shipments. Buying ideas were seen for the July shipments at \$219-\$224/metric ton day over day.

Meanwhile, offers for the new crop rose day over day amid uncertainties about production due to hot weather in Ukraine. Buyers for the new crop were seen from Italy for CIF East Coast Italy at \$240/mt.

Traders in the origination market said that the heatwaves so far have not affected the corn crop. However, if the hot weather continues during the pollination phase, which occurs in mid-to-late July, it could affect production.

"It is not a big problem at the moment, but if we have an additional wave of hot weather, it can become a problem," a Ukraine-based seller said.

In destination, Ukrainian corn has become competitive in Spain. An importer from Spain said Ukraine is now competitive — about the same price as US and Brazilian corn. However, no strong buying interest was heard from the Spanish market during the day.

Meanwhile, the CVB market continued to follow the Ukraine trend. Traders said the old crop is finished in Romania, with no active sellers left in the market. Traders have begun focusing on the new crop. Similar to Ukraine, no impact was assessed on the new-crop corn in Romania.

"For the moment, the new crop is fine. We had some rain." The producer added, "We need to see over the next two to three weeks how pollination is going," a Romania-based corn producer said.

Oilseeds

Platts Asia Soybean Daily Commentary

- China buys USG and US PNW soybeans
- Brazilian soybeans remains more competitive

CFR China soybean month-one August shipment was up \$4.68/metric ton day over day at \$514.41/mt July 7, while basis was down 9 cents/bu at 213 cents/bu over Aug (Q) Chicago Board of Trade (CBOT) futures.

Overnight, CBOT futures surged during the US trading session following renewed Chinese demand for US-origin soybeans.

China purchased at least six-seven cargoes of US soybeans

Brazil soybean crush spread FOB Paranagua (Jul)	\$/mt	ABSCA00	20.41	-6.57

on July 6, equivalent to about 330,000 mt, according to multiple traders, buyers, sellers and analysts based in Asia.

The purchases were for shipments from September to November to both the US Gulf Coast (USG) and Pacific Northwest (PNW) ports. A Chinese soybean buyer estimated that around five cargoes were booked from USG and two from the PNW.

USG and 2 PNW-origin soybeans for October shipments were heard transacted at 278-280 cents/bu and 270 cents/bu, respectively, over November (X) CBOT, basis CFR China, according to two Chinese soybean traders.

Brazilian soybeans were also heard traded overnight, Chinese trade sources shared.

September, October and November shipments were heard traded at around 215-218 cents/bu, 227 cents/bu and 245 cents/bu, respectively, over Nov (X) CBOT, basis CFR China.

April shipment was also heard transacted around 94 cents/bu over May (K) CBOT, basis CFR China.

Brazilian soybeans remain more competitive for commercial buyers, as Chinese importers are still subject to an additional 10% tariff on US soybean imports.

The reported USG soybean trades were equivalent to 291-293 cents/bu over Nov (X), basis CFR China, normalized for equivalent quality and shipment specifications to Brazilian soybeans, accounting for a quality spread of 13 cents/bu.

By comparison, Brazilian basis premiums for October shipments were offered at 233 cents/bu over Nov (X) CBOT, basis CFR China as of July 6.

Platts is part of S&P Global Energy.

Platts Brazil Soybean Daily Commentary

- FOB soybean prices rise amid higher CBOT
- FOB Paranaguá basis strengthens for August

Brazilian FOB soybean spot prices continued to march higher July 7, tracking gains in Chicago Board of Trade futures.

The CBOT August (Q) contract increased 9.75 cents/bushel to settle at \$11.9375/bu. Besides unfavorable weather conditions across the US producing areas, there have been signs of improving Chinese demand, market analysts said.

Stronger premiums also supported FOB spot prices in the Brazilian market. Parcels for FOB Paranaguá August loading were traded at plus 95 cents/bu and plus 100 cents/bu to the CBOT benchmarks, while a deal was heard for April 2027.

"It is said China bought around six vessels from the US, but they are buying from Brazil as well," a trader said, although no trades have been heard in the FOB Santos cargo market during the session.

Platts US Soybeans Daily Commentary

- Outright prices climb on day
- Unconfirmed reports of China buying

The US soybean market saw outright prices increase for the second day in a row amid unconfirmed reports of China buying US soybeans, pushing FOB Gulf and CIF New Orleans markets higher – the latter with the sharpest climb.

Platts, part of S&P Global Energy, assessed SOYBEX FOB New Orleans for August shipment at \$477.21/metric ton, up \$5.42/mt from July 6. Platts assessed basis for FOB Gulf for August shipment up 5 cents day over day to 105 cents/bushel over the August (Q) soybeans futures contract.

Platts assessed the outright price for CIF New Orleans for July shipment up \$8.36/mt from the previous business day at \$474.64/mt. Platts assessed basis for CIF NOLA for July shipment increased 13 cents day over day to 98 cents/bu over the August (Q) soybeans futures contract.

Sources attributed the sharp increase, especially in the CIF NOLA market, to unconfirmed reports of China buying in the US market, also heard among Chinese sources overnight, with some suggesting the purchase of six to seven cargoes, or about 330,000 mt.

"Soybean CIF is on fire again today," a trader in that market said.

"The physical soybean market reported additional movement after the recent trades, estimated in five to six cargoes from the US Gulf and the Pacific Northwest," a trader in the FOB Gulf market said. "New rumors pointed to another cargo from PNW. However, Brazil continues to be the most competitive origin and attracts most of the global demand."

CBOT August (Q) futures increased 9.75 cents on July 7 to 1,193.75 cents/bu, a moderate increase after the 47.75-cent climb on July 6.

“There were enough sales to keep the rally going,” a second trader in the FOB Gulf market said.

The US Department of Agriculture published its Crop Progress weekly report on July 6, showing that, as of July 5, 34% of the soybeans planted in the 18 main producing states were blooming, 5% more than the previous week and 4% more than the percentage reported on July 5 last year.

About 9% of soybeans were setting pods, data from that document shows, 4% more than the previous week, and 2% more than the same week of 2025.

About 54% of soybeans planted were reported in good condition, 27% in fair condition, 12% in excellent condition, and 5% and 2% in poor and very poor conditions, respectively.

Animal Feed

Platts Latin America Soybean Meal Daily Commentary

- FOB prices extend gains on higher CBOT futures
- Brazil's 2025-26 soybean farmer selling hits 71%

South American soybean meal FOB prices increased on July 7 as Chicago Board of Trade futures extended gains, with the August (Q) contract settling at \$316.20/short ton, up \$3.30/st.

Argentina's FOB Up River recorded subdued activity throughout the session, while nearby basis levels weakened amid higher CBOT references, sources said.

In Brazil, the FOB Paranaguá paper market also saw slightly lower spot port differentials, following August parcels that traded at a \$3/st discount to the CBOT benchmarks.

In the meantime, Brazilian farmers had negotiated 71% of this year's soybean crop by the end of June, up 7 percentage points month over month, amid robust crush and export demand, according to S&P Global Energy CERA data.

For the 2026-27 crop, whose planting begins in September, the pace of farmer sales has been more modest, with 13% sold in advance by the end of June, up 2 percentage points from the previous month.

“Uncertainties about area expansion and concerns over El Niño conditions for the 2026-27 season have limited farmers' forward sales, given tight margins and an unfavorable barter ratio,” CERA analysts said in the Global Soybean Complex Short-Term Outlook report released on June 26.

fields in the country.
A corn trader said that imported GMO corn from Brazil and the US is now more expensive than EU (France or Germany) corn.

Southern Europe

The Spanish corn and soybean meal market was unchanged on July 7.
“The market is completely quiet now, nobody is buying anything,” a second broker based in Madrid said.
A second trader confirmed this, saying that since autumn is the best season for pork production, the anticipated need must have been met by now.
The second trader noted that barley is currently offered at Eur217/metric ton for August delivery to Leida.

Platts US Distiller Grains DDGS Daily Commentary

- Prices strengthen on corn, soybean meal rally
- Wide bid-offer spreads limit price discovery

The US dried distillers grains with solubles market strengthened July 7, with participants citing stronger corn and soybean meal markets as the primary drivers despite limited

trading activity.

Platts assessed CIF New Orleans dried distillers grains with solubles barges for the July shipment period at \$191/short ton, the Chicago DDGS truck market for the July delivery period was assessed at \$173/st, and the South California rail market for the July delivery period was assessed at \$219/st.

One trader said the broader agricultural rally was providing support to DDGS. "Things do feel firmer," the trader said. "The board run-up and barge freight should elevate CIF a bit," adding that bid-side indications in the export market had strengthened. "I'm seeing these CIF values a bit stronger bid side."

The trader added that while the broader agricultural markets appear supportive, the DDGS fundamentals alone are less convincing. "This market feels bullish, but I'm not sure," the source said. "I wouldn't say there is a compelling case for DDG alone."

Another trader agreed that higher corn and soybean meal prices were lifting DDGS values. "Yesterday corn and soybean meal prices increased significantly, so DDGS prices in CIF and Chann moved higher too," the trader said, citing weather concerns in the US growing season as the main reason.

The trader added that international buyers remain cautious. "There are enough sales for July and August, but customers will probably wait to see if the rally stops," the source said, noting that some buyers are still seeking July and August cargoes. The trader also said "very wide" bid-offer spreads continue to limit price discovery.

A broker likewise pointed to futures markets as the main source of support. "The board ... will inherently push DDGS," the broker said, adding that the rail market remains "pretty wide and quiet," with many participants waiting for volatility to subside.

A sales manager also reported limited activity despite firmer values. "Haven't seen much trade," the manager said. "I think the rally is short-lived, but it's helping to support prices at the moment."

Vegetable Oils

Platts Latin America Soybean Oil Daily Commentary

- Brazilian, Argentine soybean oil FOB prices fall
- CBOT August futures rise 1.22% to 68.59 cents/lb
- Export basis weakens despite futures recovery

Brazilian and Argentine soybean oil FOB markets weakened July 7 as lower export basis values outweighed a recovery in Chicago Board of Trade soybean oil futures, extending the recent divergence between financial and physical soybean oil markets.

CBOT August soybean oil futures settled 1.22% higher at 68.59 cents/lb, extending the rebound from last week's post-USDA sell-off. Market participants said the recovery reflected short covering and bargain buying following the sharp correction triggered by the US Department of Agriculture's June Acreage and Grain Stocks reports. However, sentiment remained cautious as traders

continued assessing favorable US crop conditions, larger-than-expected soybean acreage and expectations for abundant global soybean supplies during the 2026-27 marketing year.

In Argentina, Platts assessed the soybean oil FOB Up River price for August loading at \$1,159.41/mt on July 7, down \$3.75/mt from July 6. The August Up River paper basis weakened 100 points to minus 1,600 points against the CBOT August (Q) soybean oil futures contract, reflecting softer export indications despite firmer futures.

In Brazil, Platts assessed the soybean oil FOB Paranaguá price for August loading at \$1,159.41/mt, down \$12.57/mt on the day. The August Paranaguá paper basis declined 140 points to minus 1,600 points against the CBOT August futures contract. Platts also assessed the FOB Paranaguá September loading price at \$1,149.93/mt, down 66 cents/mt, as the September paper basis weakened 80 points to minus 1,600 points against the CBOT September (U) futures contract.

Market participants said the decline in FOB basis values reflected continued repricing in export markets following the sharp correction in CBOT soybean oil futures over the past month. Even after the July 7 futures recovery, exporters continued adjusting basis levels as global supply expectations remained bearish and futures volatility persisted. Participants said that basis values had strengthened considerably during the

second half of June, cushioning the impact of weaker futures on outright export prices, and recent declines represent a partial retracement of that recovery rather than a collapse in underlying market fundamentals.

Participants added that underlying physical demand remained broadly unchanged. International buying interest and active commercial participation continued to support South American export values, preventing a sharper decline in outright FOB prices despite weaker basis indications. Brazil's record soybean crop and robust crush pace continue to provide ample soybean oil availability for export, while Argentina has remained competitively priced into key international destinations.

The session reinforced the market dynamic that has emerged since early June. While CBOT soybean oil futures continue to be driven primarily by evolving expectations for US and global soybean supplies, speculative positioning and macro sentiment, physical soybean oil markets in Brazil and Argentina have remained comparatively resilient. Traders said the market will continue monitoring whether export basis values stabilize following the recent adjustment or come under additional pressure should bearish global supply expectations continue to weigh on futures in the weeks ahead.

Platts Europe Vegetable Oil Daily Commentary

- Europe switches to alternative oils: trader
- SFO continues stable sentiment
- EU oilseeds output forecast to rise 3.1%

The Black Sea sunflower oil market maintained steady sentiment on July 7, as participants observed players focusing on short-covering demand by switching to alternative oils.

Sources observed that the key destinations, such as Europe, were switching from sunflower oil to rapeseed oil.

"Mostly covering shorts and switching to RSO," a trader said, adding that demand is likely to pick up in September/October during the new crop season.

In the Ukrainian rapeseed market, one producer source said plants have plans to start crushing rapeseed in the second half of July, adding that buyers in the DAP Poland market are likely to commence trading activity in the next one or two weeks.

Platts assessed FOB Black Sea sunflower oil at \$1,379/metric ton, flat on the day and unchanged since June 19, entering its third consecutive week of stability.

In the FOB Dutch Mill rapeseed oil market, gains were seen across the board on the day. The FDM RSO front run, August-September-October was assessed at Eur1,149/mt, up Eur3 day over day, while the second run, November-December-January jumped Eur6 to Eur1,148/mt. Meanwhile, the third run, February-March-April was assessed at Eur1,131/mt, up Eur4, and the fourth run, May-June-July gained Eur9 to Eur1,135/mt on the day.

In market news, the EU's agricultural sector is expected to maintain robust performance in 2026 despite growing challenges from disruptions due to the Middle East conflict and surging

input costs squeezing farm profit margins, according to the European Commission's summer short-term outlook report released July 3.

EU oilseeds production is forecast to gain 3.1% in 2026, buoyed by expanded sunflower seed area and higher yields, with oilseed meal production expected to reach record levels. Vegetable oil production is also forecast to increase while consumption remains stable, the report said.

Platts is a part of S&P Global Energy.

EU agriculture output resilient despite Middle East conflict impact

- Dairy, pigmeat, poultry production expected to grow in 2026
- Oilseeds production forecast to rise 3.1%
- Input costs squeeze margins to 2022 levels

The EU's agricultural sector is expected to maintain robust performance in 2026 despite mounting challenges from disruptions due to the Middle East conflict and surging input costs squeezing farm profit margins, according to the European Commission's summer short-term outlook report released July 3.

EU production is forecast to increase for oilseeds, dairy, pigmeat and poultry in 2026, while cereal output is expected to contract but remain close to the five-year average at 273.7 million metric tons, the Directorate-General for Agriculture and Rural Development said. The mixed production outlook comes as fertilizer affordability has fallen to levels last seen in 2022, putting pressure on margins across the farming sector.

The report highlights how geopolitical tensions in the Middle East are compounding pre-existing agricultural challenges, including weather-related risks, animal diseases and persistent trade tensions. Real GDP growth is forecast at just 1.1% for 2026, with inflation expected to rise to 3.1%, driven by energy costs, according to the EC's assessment.

Market dynamics

EU oilseeds production is forecast to rise 3.1% in 2026, driven by expanded sunflower seed area and higher yields, with oilseed meal production expected to reach record levels. Vegetable oil production is also forecast to increase while consumption remains stable, the report said.

Platts assessed FOB Black Sea sunoil flat on July 6 at \$1,379/mt as the sunflower oil markets saw muted activity with one trader noting a "silent market."

Cereal production in 2026-27 is forecast to return to average levels after exceptionally high yields in the previous season for wheat and barley. High beginning stocks are expected to allow for strong wheat exports while imports are forecast to increase only marginally, according to the EC.

Platts assessed the Milling Wheat Marker at \$227.50/mt July 6 amid a MATIF rally on the day with hot weather in France and ongoing harvest, while CVB 12.5% wheat was assessed at \$235/mt.

The dairy sector is expected to see milk supply growth driven by higher yields, though rising input costs continue to pressure farm margins despite price stabilization following late-2025 declines. Increased raw milk availability may boost production of butter, cheese, whey and skimmed milk powder, with exports remaining resilient despite weaker Middle East demand and trade disruptions.

The livestock sector presents a mixed picture, with beef production forecast to decline in 2026 and 2027 due to a declining cow herd, keeping prices elevated. Pigmeat production and consumption are expected to remain stable with resilient exports as prices fall.

Platts assessed the EU Pork Marker at Eur2,277/mt July 6, down Eur223/mt from the start of the previous week, following lower offers reported by the market.

Poultry production is set to grow in 2026, driven by strong demand and high prices, positioning the sector as a key beneficiary of current market conditions. However, EU poultry exports might decline while imports rise, suggesting the bloc's increased production will primarily serve domestic consumption amid trade disruptions from the Middle East conflict.

Platts heard offers of frozen single A-grade fillets without inner fillets, block-frozen, at Eur 4.30/kg ex-works Poland, down Eur50 cents from the previous week, according to market sources. Another trader reported struggling to sell frozen fillets in poly bags even at Eur 4.00/kg ex-works, while Ukrainian-origin fillets are being offered at Eur 3.50-3.60/kg ex-works EU, putting pressure on the market and leading to weaker demand.

Weather conditions are forecast to be generally favorable for 2026 EU crops, with winter crop yields expected above historical averages. However, spring and summer crops might suffer from heat and water shortages, particularly in drought-prone regions, the report said.

Managed Money shifts from long liquidation to fresh short selling as soybean oil correction deepens

- Funds shift to fresh short selling positions
- Net long position drops 11,357 contracts
- Commercials reduce shorts as prices fall

The latest CFTC Commitments of Traders report suggests the nature of June's correction in Chicago Board of Trade soybean oil futures evolved materially during the week ended June 30, with speculative funds transitioning from primarily liquidating bullish positions to actively establishing new bearish bets following bearish US Department of Agriculture supply data.

CBOT August soybean oil futures settled at 66.93 cents/lb on June 30, down 2.8% on the day after the USDA reported larger-than-expected quarterly soybean stocks and higher US planted acreage. The selloff was one of the largest single-session declines of the recent correction, with August futures

Managed money soybean oil positions

Source: CFTC

falling 12.6% from 77.53 cents/lb on June 1 to 67.76 cents/lb by July 6.

The latest COT data suggest speculative sentiment became increasingly bearish as Managed Money participants shifted from primarily liquidating long positions to establishing new short positions. Managed Money — which includes commodity trading advisors, hedge funds and other speculative investment managers — held 129,157 long contracts and 36,925 short contracts as of June 30, leaving the category net long 92,232 contracts, down from 103,589 contracts a week earlier.

During the latest reporting week, funds reduced long positions by 2,929 contracts while adding 8,428 new short positions, producing an 11,357-contract decline in net length. Unlike previous weeks, when declining net length was driven largely by long liquidation, the latest report points to growing conviction behind outright bearish positioning.

Since peaking at 156,433 net long contracts on June 2, Managed Money has reduced its net long position by 64,201 contracts (41%). Over that period, funds liquidated 30,223 long positions and added 33,978 short positions, underscoring a broad deterioration in speculative sentiment as expectations for larger US and global soybean supplies weighed on prices following the USDA's June Acreage and Grain Stocks reports.

Commercial participants moved in the opposite direction

The Producer/Merchant/Processor/User category — which includes crushers, exporters, processors and other physical market participants — remained heavily net short but reduced bearish exposure during the week.

Producer/Merchant longs declined by 6,213 contracts while short positions fell by 11,011 contracts, reducing the group's net short exposure by 4,798 contracts. Market participants said this positioning is consistent with commercial hedgers reducing forward hedge coverage as futures prices decline rather than increasing bearish exposure.

Swap Dealers also became more constructive during the reporting period.

Long positions increased by 4,190 contracts while short positions declined by 2,237 contracts, expanding the category's net long position to 80,643 contracts.

Meanwhile, Other Reportables adopted a modestly more bearish stance, reducing long positions by 3,136 contracts while trimming shorts by 1,869 contracts. Nonreportable traders reduced exposure on both sides of the market but remained modestly net long.

Taken together, the commercial categories suggest physical market participants were generally absorbing speculative selling rather than contributing to it, reinforcing the view that the sharp decline in futures was driven primarily by financial flows.

Futures correction contrasts with resilient physical soybean oil markets

CBOT soybean oil front month futures contract

Source: S&P Global Energy

The divergence between speculative futures positioning and commercial activity mirrors the broader disconnect that has developed between financial and physical soybean oil markets through June.

Since reaching multiyear highs in early June, CBOT soybean oil futures have corrected sharply as speculative funds reduced bullish exposure amid improving US crop prospects, bearish USDA supply data and expectations for record global soybean supplies.

Physical FOB soybean oil markets in Argentina and Brazil, however, have remained comparatively resilient.

Nearby export prices have continued trading within a relatively narrow range despite the sharp decline in futures, supported by a substantial recovery in FOB basis levels and steady international demand. Stronger basis values have offset much of the decline in CBOT futures, allowing South American export prices to remain relatively stable.

Market participants noted that the reduction in commercial net short exposure observed in the COT report is consistent with conditions seen in physical export markets, where crushers, exporters and end users have continued actively participating despite futures market weakness.

The latest COT report therefore reinforces a theme that increasingly defined the soybean oil market in June: while CBOT futures have been driven lower by speculative repositioning and changing macro sentiment, physical soybean oil fundamentals have remained considerably more resilient.

As long as export demand remains steady and South American logistics continue operating normally, traders said physical soybean oil markets are likely to remain supported even

if speculative positioning continues to generate elevated volatility in CBOT soybean oil futures.

Subscriber Notes

S&P Global Energy agriculture, proteins publishing schedule for July 9

Please note that S&P Global Energy's São Paulo office will be closed on July 9 for the Revolution of São Paulo Day holiday in Brazil.

Platts, part of S&P Global Energy, will not publish price assessments, rationales or market commentaries for Latin American soybeans, soybean oil, soybean meal, corn, proteins, as well as price assessments and market commentaries for US and South American rice on this day.

The Daily Grains, Protein Daily and Rice Daily reports will be published without Latin American assessments on July 9.

Normal publishing for Latin America agriculture and proteins will resume on Friday, July 10.

For full details of S&P Global Energy publishing schedule and services affected, refer to <https://www.spglobal.com/energy/en/pricing-benchmarks/our-methodology/holiday>.

For queries, please contact support@platts.com.

Assessment Rationale

Grains

Platts Ags EMEA Wheat Daily Rationale

Platts assessed the Milling Wheat Marker at \$227.5/metric ton on July 7, unchanged from the previous assessment. Russian 12.5% handysize wheat, assessed at \$227.5/mt, was the most competitive wheat out of the three components of the Milling Wheat Marker, which also includes Ukraine 11.5% at \$229.63/mt when adding June's quality normalization of \$6.63/mt, to account for its lower protein content, and CVB 12.5% wheat assessed at \$235/mt. The structure between the first and second halves of August was assessed as flat. This reflects the Platts assessment

window from Aug 4 - 18.

Platts assessed Black Sea wheat (Russian deepsea, 12.5% protein) unchanged at \$227.5/mt on July 7, below an H2 August offer at \$228/mt and above a bid at \$226.5/mt. The structure between the first and second halves of August was assessed as flat. This reflects the Platts assessment window from Aug. 4 - 18.

Platts assessed Black Sea wheat (Ukraine deepsea, 11.5% protein) down \$2/mt at \$223/mt on July 7, below an offer at \$224/mt and above a bid at \$222/mt. The structure between the first and second halves of August was assessed as flat. This reflects the Platts assessment window from Aug. 4 - 18.

Exclusions: No market data was excluded from the July 7 Black Sea wheat assessments.

Platts is part of S&P Global Energy.

This rationale applies to symbol (s) <BSMWM00> , <WRBSD00> , <WUBSA00>

Platts Asia Wheat Daily Assessment Rationale

Platts assessed Australian Premium White wheat unchanged at \$272/metric ton FOB Kwinana July 7 for cargoes loading between Sept. 5 and Oct. 5, with no disproving information.

Platts assessed Australian Standard White wheat with no protein guarantee unchanged at \$266/mt for cargoes loading over the same period, maintaining the spread between Australian Premium White and Australian Standard White with no protein guarantee at \$6/mt.

Platts is part of S&P Global Energy.

Asia wheat assessments can be found on <PAA2440>

Market commentary can be found on <PAA2699>

This rationale applies to symbol(s) <WAUSA00>

Platts Canada Wheat Daily Rationale

Platts assessed Canada Western Red Spring Wheat 13.5% FOB Vancouver 30-45 days forward at \$288.16/metric ton on July 7, \$2.12/mt lower than July 6.

CWRS Wheat 13.5% FOB Vancouver basis 30-45 days forward, spanning August 6-21 was assessed 10 cents lower at MIAX Hard Red Spring Wheat December (Z) futures plus 129 cents/bushel.

CWRS Wheat 13.5% FOB Vancouver basis 45-60 days forward, spanning Aug 21-Sept 5 was assessed 10 cents lower at Z plus 109 cents/bu.

CWRS Wheat 13.5% FOB Vancouver basis 60-75 days forward, spanning September 5-20 was assessed 10 cents lower at Z plus 109 cents/bu based on a September offer heard at Z plus 110 cents/bu.

The assessments maintained the previous market structure.

Platts is part of S&P Global Energy.

Exclusions: No data was excluded in the assessments.

This rationale applies to symbol(s) <AWHCA00> <AWHCB00> <AWHCC00> <AWHCD00> <AWHCE00> and <AWHCF00>.

Platts Asia Corn Daily Rationale

Platts assessed corn CFR Northeast Asia up \$4.50/mt day over day at \$264.50/mt CFR July 7 for feed-quality corn arriving over Oct. 5 to Nov. 4 into Pyeongtaek, below an offer at \$265/mt CFR and tracking higher futures.

Platts is part of S&P Global Energy.

Asia corn assessments can be found on <PAA2440>

Market commentary can be found on <PAA2688>

This rationale applies to symbol(s) <WCINV00>

Platts Argentina Corn FOB Up River Daily Rationale

Platts assessed corn FOB Up River for loading in August at \$206.59/metric ton on July 7, \$2.16/mt higher from the previous assessment.

The assessment considered the FOB premium for Up River August-loading cargoes unchanged at plus 81 cents/bushel to Chicago Board of Trade September (U) corn futures, based on steady offers heard at U plus 85 cents/bu and steady bids heard at U plus 75 cents/bu at the market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <ARGCA00> <ARGCB00>.

Platts Brazil Corn Daily Rationale

Platts assessed the Brazilian corn FOB Santos price for August loading at \$219.97/metric ton on July 7, \$2.17/mt higher from the previous assessment.

The assessment considered the FOB Santos basis for August loading cargoes unchanged at plus 115 cents/bushel to the Chicago Board of Trade September (U) contract, based steady offers for August H1 and H2 loading heard at U plus 120 cents/bu and no bids heard at the market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <ABCSA00> <ABCSB00>.

Platts US Corn Daily Assessment Rationale

Platts assessed the US Yellow Corn No. 2 CIF New Orleans barge basis for July shipment at 95 cents/bushel over the Chicago Board of Trade September (U) corn futures contract on July 7, up 2 cents from the previous assessment. Bids were heard at 94 cents/bu and an offer at 96 cents/bu.

Platts assessed the US Yellow Corn No. 2 CIF New Orleans barge basis for August shipment at 99 cents/bu over the CBOT September (U) corn futures contract on July 7, increasing one cent from the previous business day. This was based on bids heard at 98 cents/bu, and an offer at 106 cents/bu.

Platts assessed the US Yellow Corn No. 2 FOB Gulf basis for September shipments at 112 cents/bu over the CBOT September (U) corn futures contracts on July 7. No bids or offers were heard during the session that disproved the assessment.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <WCNOE00> and <WCNOU00>.

Platts FOB Black Sea Corn Daily Assessment Rationale

Platts assessed Ukrainian corn unchanged at \$223/metric ton on July 7, below the offer at \$226/mt for August loading. The structure between the first and second halves of August was assessed flat. This reflects the Platts assessment window from Aug. 4-18.

Platts is part of S&P Global Energy.

Exclusions: No market data was excluded from the July 7 Black Sea corn assessment.

This rationale applies to symbol(s) <CUBSU00>

Oilseeds.

Platts Asia Soybeans Daily Rationale

Platts assessed CFR China first-month soybeans up \$4.68/metric ton day over day at \$514.41/mt, while basis was down 9 cents/bu at 213 cents/bu over Aug (Q) CBOT July 7, tracking normalized indicative value at 213 cents/bu and below the normalized offer at 228 cents/bu over Aug (Q), for Brazil August shipment.

Platts assessed CFR China second-month soybeans up \$2.93/mt day over day at \$519/mt, while basis was down 10 cents/bu at 217 cents/bu over Nov (X) CBOT, considering overnight trade at 217 cents/bu and below the sharpest offer at 220 cents/bu over Nov (X), for Brazil September shipment.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYBAB00> <SYBAA00> <SYBAF00> <SYBAD00> <SYBAC00> <SYBAE00>

Platts Brazil Soybean Daily Assessment Rationale & Exclusions

Platts assessed the SOYBEX FOB Santos soybean contract for August loading on July 7 at \$479.07/metric ton, \$7.63/mt higher from the previous assessment.

The FOB Santos basis for August loading was assessed 11 cents/bushel higher at plus 110 cents/bu to the Chicago Board of Trade August (Q) contract. The assessment considered an FOB Santos port spread heard at plus 10 cents/bu to the FOB Paranaguá paper market, as there were neither offers nor bids heard for FOB Santos August-loading cargoes during the day.

The FOB Paranaguá basis for August loading was assessed 8 cents/bu higher at plus 100 cents/bu to the CBOT Q contract, taking into consideration a trade last heard at that level, higher bids at plus 95 cents/bu to the CBOT Q contract, and no offers at market close.

Platts assessed the SOYBEX FOB Santos soybean contract for March loading on July 7 at \$444.25/mt, \$2.02/mt higher from the previous assessment.

The FOB Santos basis for March loading was unchanged at minus 4 cents/bu to the CBOT March (H) contract, based on a spread to the FOB Paranaguá paper market heard at plus 7 cents/bu. There were no offers and bids heard for FOB Santos March-loading cargoes during the day.

The new crop FOB Paranaguá basis for March loading was unchanged at minus 11 cents/bu to the CBOT H contract, considering an indicative value heard at that level, steady offers at minus 10 cents/bu, and lower bids at minus 25 cents/bu to the CBOT H contract at market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYBBC00> <SYBBF00> <SYBBD00> <SYBBH00> <SYBBA00> <SYBBE00> <SYBBB00> <SYBBG00>.

Exclusions: No data was excluded.

Platts US Soybeans Daily Rationale

Platts SOYBEX FOB New Orleans for August shipment was assessed at \$477.21/metric ton on July 7, \$5.42/mt up from July 6. The FOB Gulf basis for August shipment was assessed at 105 cents/bushel over the Chicago Board of Trade August (Q) soybeans contract on the day, 5 cents up from the previous business day, based on a value indication heard at 105 cents/bu for August, and offer indications heard at 115 cents/bu, and 118 cents/bu for August H1 and August H2 respectively.

The CIF New Orleans basis for July shipment was assessed at 98 cents/bu over the August (Q) soybeans futures contract on the day, 13 cents up from the previous assessment. This was based on bids heard at 97 cents/bu and offers heard at 103 cents/bu. A bid heard at 80 cents/bu and an offer heard at 90 cents/bu were heard earlier in the day but were discounted as bid/offer values increased throughout the session.

No information was excluded.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYBBI00> <SYBBL00> <SYBBK00> <SYBBJ00>

Animal Feed and Protein

Platts Argentina Soybean Meal Daily Rationale

Platts assessed the Argentine soybean meal FOB Up River price for August loading on July 7 at \$340.28/metric ton, \$2.54/mt higher than the previous assessment.

The basis for August loading in the Up River cargo market was assessed \$1/short ton lower at minus \$7.50/st to the August (Q) futures at the Chicago Board of Trade. The assessment considered lower offers at minus \$7/st and lower bids at minus \$8/st to the CBOT Q contract at market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYMAA00> <SYMAB00>.

Platts Brazil Soybean Meal Daily Rationale

Platts assessed the Brazilian soybean meal FOB Paranaguá price for August loading on July 7 at \$345.79/metric ton, \$3.08/mt higher than the previous assessment.

The basis for August loading in the Paranaguá paper market was assessed 50 cents/short ton lower at minus \$2.50/st to the August (Q) futures at the Chicago Board of Trade. The assessment

considered a trade heard at minus \$3/st earlier on the day, followed by bids at minus \$3/st and lower offers at minus \$2/st to the CBOT Q contract at market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYMBA00> and <SYMBB00>.

Platts US Dried Distiller Grains DDGS Daily Assessment Rationale

Platts assessed CIF New Orleans dried distillers grains with solubles barges for the July shipment period at \$191/short ton July 7, up \$9/st from the previous session, based on a bid heard at \$190/st and an offer heard at \$194/st.

A bid at \$184/st was discounted due to a higher bid received during the session.

The Chicago DDGS truck market for the July delivery period was assessed at \$173/st, up \$2/st from the previous session, based on a bid heard at \$173/st and an offer heard at \$183/st.

A bid heard at \$166/st was discounted due to a higher bid received during the session.

The South California rail market for the July delivery period was assessed at \$219/st, increasing \$1/st from the previous session, based on a bid heard at \$218/st and an offer heard at \$233/st.

A bid at \$216/st was discounted due to a higher bid received during the session.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <ACDDG00> <AADDG00>.

Vegetable Oils.

Platts Argentina Soybean Oil Daily Rationale

Platts assessed the Argentine soybean oil FOB Up River price for August loading at \$1,159.41/mt July 7, down \$3.75 from July 6. The basis for August loading in the Up River paper market was assessed 100 points lower at minus 1,600 points to August (Q) futures at the Chicago Board of Trade. The assessment considered an indicative value last heard at that level, offers at minus 1,560 points and bids at minus 1,730 points to the CBOT Q contract at the market close. No trades were confirmed before the market close for August loading in the FOB Up River paper market July 7.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYOAA00> <SYOAB00>

Platts Brazil Soybean Oil Daily Rationale

Platts assessed the Brazilian soybean oil FOB Paranaguá price for August loading at \$1,159.41/metric ton on July 7, down \$12.57 from July 6.

The basis for August loading in the Paranaguá paper market was assessed 140 points lower at minus 1,600 points to the August (Q) futures at the Chicago Board of Trade. The assessment considered a trade last heard at that level, offers at minus 1,570 points and bids at minus 1,620 points to the CBOT Q contract at the market close.

Platts assessed the Brazilian soybean oil FOB Paranagua price for September loading at \$1,149.93/mt July 7, down 66 cents/mt from July 6. The basis for September loading in the Paranagua paper market was assessed 80 points lower at minus 1,600 points to the September (U) futures at the Chicago Board of Trade. The assessment considered an indicative value last heard at that level, offers at minus 1,560 points and bids at minus 1,700 points to the CBOT U contract at the market close. No trades were confirmed before the market close for September loading in the FOB Paranaguá paper market on July 7.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYOBB00> and <SYOBA00>.

Platts Europe Sunflower Oil Daily Rationale

Platts assessed sunflower oil FOB Black Sea Ukraine for August-loading unchanged on July 7 at \$1,379/metric ton, below an offer heard at \$1,385/mt.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SFWBL00>
