Commentary and Analysis

Wheat

Platts European Wheat Daily Commentary

- Black Sea wheat prices fall on weak demand
- Algeria buys 800,000 mt wheat at \$264-\$265/mt
- Egyptian pound strengthens after US-Iran deal

The Black Sea wheat market fell on June 18 amid limited buying.

Sellers continued to lower their prices, with Russian wheat offers for July at \$237/metric ton, and the August market at \$236/mt.

The best bid in the market for August was heard at \$232/mt, traders said. The market declined with the arrival of the new crop harvest.

"There is no real bid in the market," one Russian seller said.

Meanwhile, the Egyptian pound strengthened back to March lows amid the signing of the US-Iran peace deal on June 18, after weakening significantly following the start of the war on Feb 28.

CIF new crop sellers were offered at \$255/mt, while demand was mostly spot at the same price.

Elsewhere in Algeria, the country bought 800,000 mt of wheat likely from the Black Sea in a tender on June 17 at \$264-\$265/mt, market participants said. The price was FOB equivalent to 11.5% CVB \$235-\$236/mt.

The 12.5% market saw offers at \$240/mt.

"I don't see bids, but I expect them to be lower," one Romanian seller said.

The best bid was heard at \$239/mt for the first half of August.

The French wheat market was subdued on the day. Both FOB and CPT prices remained unchanged.

A broker said that traders are balancing global production prospects against weather risks and shifting geopolitical developments.

Meanwhile, soft wheat millers in Morocco have reaffirmed plans to collect 15 million-20 million quintals (1.5 million-2 million mt) of domestic soft wheat during the June-July 2026 harvest, targeting at least 80% of that volume by July 15, according to a member of the grain and legume traders.

Platts Asia Wheat Daily Commentary

- Australian wheat steady
- South Korea buys two feed wheat cargoes June 17

Australian wheat prices were unchanged day over day June 18.

Several Asian trade participants said they continued to observe weakness in Australian old-crop wheat indications, but offers resisted further declines amid thin regional buying interest for Australian wheat.

Two Southeast Asian trade participants said flour millers in

Vietnam were looking to cover some demand through September shipments, but buying remained largely hand-to-mouth across much of the region.

Two cargoes of feed wheat were traded to South Korea late June 17, according to several Asian grains traders. Both cargoes traded at about \$277/mt CFR for October arrival, and both are likely to be delivered from European or Black Sea ports instead of the US Pacific Northwest, three Singapore-based grains traders said.

Two of the traders said US soft white prices had firmed a lot after the overnight rally on the Chicago Board of Trade futures, with FOB prices of US soft white now in the high \$250s/metric ton FOB.

Platts is part of S&P Global Energy.

Platts Canada Wheat Daily Commentary

- CWRS wheat FOB Vancouver weakens 19 cents
- Japan tender trades at 110 cents over U

Subdued cash market activity persisted on June 18, with Platts-assessed Canada Western Red Spring Wheat 13.5% FOB

Vancouver 30-45 days forward weakening 19 cents/metric ton to \$273.28/mt amid slightly weaker futures.

The June 17 wheat futures rally was short-lived, with the September (U) MIAX Hard Red Spring Wheat futures contract closing 0.50 cents/bushel lower day over day at 647.74 cents/bu.

Basis premiums for CWRS remained unchanged day over day amid minimal activity. August bids were unchanged at 90-95 cents/bu over U, while offers were about 5 cents weaker week over week, at 105-115 cents/bu over U, compared with the 110-120 cents/bu over U range heard throughout the week ended June 12, narrowing the bid-offer spread.

The Japanese Ministry of Agriculture, Forestry and Fisheries issued a tender for 2 cargoes of 17,000 mt each of No. 1 grade CWRS wheat at 13.8% protein.

On June 18, the wheat traded at 110 cents/bu over U, according to multiple market participants, similar to the previous tender from the week ended June 12. Offers were heard between 110-135 cents/bu over U, about 10 cents narrower than the previous tender's offer range.

Demand was heard as low, with a buyer saying, "We haven't traded in the past 2 weeks since the basis moved higher."

A Canadian trader said that although they did not see any fresh activity beyond the MAFF tender, there could be some demand in Bangladesh. Earlier in the week, a Bangladeshi buyer reported that the market was "not so active" at the time.

Weather dynamics continued to influence market sentiment. Dry conditions across the US Northern Plains raised concerns about the US wheat market. "Need rains soon," a US trader said, adding that Canada was faring much better, with ample rain across most of the Canadian Prairies.

US soybeans that could reduce elevation capacity for corn.

Platts assessed feed-quality corn CFR Northeast Asia up \$1.50/metric ton at \$260.50/mt for cargoes arriving over Sept. 16-Oct. 16.

Market participants said there were few offers for old-crop August and September shipments of US Pacific Northwest corn, while futures and basis premiums had both increased.

US Pacific Northwest corn basis offer indications for September shipment were reported at 144 cents/bu over September (U) Chicago Board of Trade futures contract, up 2 cents/bu day over day.

Overnight, the CBOT (N) contract was up 7.25 cents/bu at 421 cents/bu, and the September (U) contract was down 7 cents/bu

to 429.5 cents/bu.

Market chatter about a possible purchase of US soybeans by China pulled corn prices along, with a Singapore-based broker saying that “Pacific Northwest is focusing on beans now with talks of Chinese [soybeans] purchases.”

Meanwhile, Brazilian corn was seen as highly likely to replace US Pacific Northwest corn as the most competitive origin for the Asian import market.

“Seems to be [that Brazil corn is the most competitive], because US corn new crop is still not marketed yet, at least not to us,” a Singapore trader said.

“There is a chance to swing back to Brazil,” a second Singapore trader said.

Platts Corn Arbitrage Price Matrix showed replacement values on a CFR Northeast Asia basis to be at \$263.54/mt for Brazilian August shipment corn, \$263.50/mt for Argentina August shipment corn and \$263.38/mt CFR for US Pacific Northwest September shipment corn.

Vietnamese and South Korean feed millers toed the sidelines once again on June 18, as import corn prices showed no decline, traders and local trade agents said.

Market participants discussed the possibility of an extension to Thailand’s Form D tariff-free import window for ASEAN-origin corn from June to August, although no official news was heard.

Platts Latin America Corn Daily Commentary

- South American FOB corn prices fall with CBOT
- Brazil domestic prices hold steady
- Argentina corn harvest reaches 48.2% completion

South American FOB corn prices decreased June 18, tracking lower Chicago Board of Trade futures.

Argentine FOB Up River premiums for August loading and Brazilian FOB Santos premiums for August loading remained steady day over day.

The US dollar to Brazilian real exchange rate stood at Real 5.1854/\$1 as of 5:30 pm Brasilia time, up 1.08% day over day.

In Brazil’s domestic market, prices remained steady in the Sorriso, Rio Verde, and Maringá regions.

“The market participants remain focused on the progress of the second-crop corn harvest,” said a broker based in the Maringá region.

The Buenos Aires Grain Exchange reported on June 18 that the 2025-26 corn harvest in Argentina reached 48,2% as of June 17, up 4.6 percentage points from the previous week.

In the northern part of the agricultural belt, harvesting has started to pick up pace, showing better progress in the fields. In contrast, in central and southern Buenos Aires province, work remains affected by high grain moisture, which continues to limit combine performance and slow overall harvest progress.

According to BAGE, the national production forecast remains unchanged at 64 million metric tons.

Platts US Corn Daily Commentary

- Farmer sales remain exceptionally light overall: sources
- USDA confirms 285,775 mt Mexico corn export sale

US corn Platts outright prices fell on June 18, tracking the Chicago Board of Trade futures, which also followed a decrease in the energy prices.

On June 18 the CBOT July (N) corn futures settled at \$4.1750/bushel, decreasing 3.50 cents in the day, while September (U) went down to 4.25 cents in the same period, closing at \$4.2525/bu.

Sources said that farmer sales have been exceptionally light, leaving buyers dependent on basis strength.

Adding that, as end users and elevators push coverage into mid- and late-July slots, nearby urgency has eased somewhat, causing select bids to stagnate rather than continue higher.

In the export market, the US Department of Agriculture confirmed on June 18 private export sales of 285,775 metric tons of corn for delivery to Mexico during the marketing year 2026-27 (September-August).

Related to rumors that China is asking for US corn in the global market, sources said the bigger impact will be at Pacific Northwest ports and prices, with a jump of about 5 cents.

Platts assessed on June 18 the outright price for June shipments to New Orleans in the incoterm CIF at \$196.25/mt and for July shipments at \$199.40/mt. And FOB Gulf for August was assessed at \$206.00/mt.

Platts is part of S&P Global Energy.

Platts European Corn Daily Commentary

- Brazilian corn outcompetes Ukrainian supply
- Egyptian pound recovery pressures corn prices

The Black Sea corn market remained stable on June 18, with poor market activity amid slow demand. In the FOB market, the competitive offer for July loading remained at \$230/mt. In the CIF market, offers for CIF Marmara remained unchanged, with limited buying interest.

"Demand seems very limited in Turkey and too much corn in Ukraine," a broker from Turkey said.

Meanwhile, a spot trade was heard to have happened during the week for CIF Marmara at \$240/mt for a handy vessel.

In the destination market, the CIF offer was also heard in the Netherlands for July loading. However, a corn buyer from a feed mill in the Netherlands said that GM corn remains competitive in the market. The corn buyer said, "There are Ukrainian offers, but the GM corn (Brazilian) is calculating much better."

"The preference for non-GMO crops depends on prices. At the same price or a Eur3/mt difference, the market will take non-GMO," the buyer said.

In Egypt, traders said the main impact of the peace deal in Iran would be on the Egyptian pound's exchange rate, which could influence the local corn market. "The market in Egypt is

now under very high pressure as the Egyptian pound is recovering after the war ends," an Egyptian trader said. "That is not a very good scenario for selling corn, as local prices keep going down," the trader added.

Oilseeds

Platts Asia Soybean Daily Commentary

- Nearby shipment traded
- Chinese traders bullish on soybean prices

CFR China soybean month-one August shipment was down \$3.22/metric ton day over day at \$496.04/mt June 18, while basis was down 5 cents/bu at 215 cents/bu over July (N) Chicago Board of Trade (CBOT) futures.

Overnight, multiple cargoes were heard traded for Brazil August shipments at around 220-225 cents/bu over July (N) CBOT, basis CFR China, according to multiple Chinese trade sources.

"Demand for August shipments is stronger because market participants are bullish on Brazilian soybean prices," according to a Chinese soybean trader.

Another Chinese soybean trader also noted that Brazilian soybean prices are too high heading into Q4 2026, and buyers are buying more August shipments.

According to a Chinese soybean trader, as of June 16, 89% of the total open demand, at 9.8 million mt of the July shipment, has been covered.

Meanwhile, 61% of the total open demand, at 8 million mt, for

August shipment has been covered.

For the September shipment, open demand decreased to about 6.3 million mt, while open demand for the October shipment stands at 8.6 million mt.

Platts is part of S&P Global Energy.

Platts Brazil Soybean Daily Commentary

- August shipment traded in Paranaguá
- CBOT futures fall on dollar strength, soybean oil losses

Platts assessed the SOYBEX FOB Santos soybean contract for August loading at \$451.69/metric ton on June 18, down \$2.02/mt from the previous assessment.

CBOT soybean futures were lower, pressured by a stronger U.S. dollar and falling soybean oil prices, despite the U.S. Department of Agriculture reporting a flash export sale of 372,000 metric tons to unknown destinations, widely rumored to be China, analysts said.

According to data from the Department of Rural Economy of Paraná, exports of the state's soybean complex, which comprises soybeans, soybean meal and soybean oil, showed strong performance, with exports reaching 6.72 million mt in the first five months of 2026, an 8% increase compared to the same period in 2025.

This robust export pace accelerated soybean commercialization, helping to free up storage space for the upcoming corn crop. In value terms, the sector contributed about \$2.94 billion to Paraná's trade balance, up 18% year-over-year from about \$2.50 billion in 2025.

Trading activity remained slow in the Paranaguá FOB premiums market, with only one trade reported for an August 2026 shipment during the day.

According to market sources, Brazilian CFR soybean prices for shipment to China are under pressure, with 2026 basis levels declining amid weaker demand and increased competition. A key factor is China shifting some purchases back to the US, supported by recent cargo deals and lower freight costs.

The US dollar versus the Brazilian real settled at Real 5.1760/\$1 at 4:30 pm Brasilia time. Domestic soybean prices were lower in the main producing regions.

Platts is part of S&P Global Energy.

Platts US Soybeans Daily Commentary

- US soybean export prices fall on June 18
- China buying reports fade, basis drops back
- USDA reports 425K mt weekly export sales rise

The US soybeans market saw its outright export price fall on June 18 amid no more reports of China potentially buying US soybeans and entities liquidating positions in the soybean oil market, sources say.

Platts, part of S&P Global Energy, assessed SOYBEX FOB New Orleans for August shipment \$3.86/metric ton, down from June

17 at \$451.30/mt. Platts assessed basis for FOB Gulf for August shipment fell 2 cents day over day to 100 cents/bushel over the August (Q) soybeans futures contract.

Platts assessed the outright price for CIF New Orleans for June shipment at \$442.30/mt, up about \$1.56/mt from the previous business day. Platts assessed basis for CIF NOLA for June shipment increased 5 cents day over day to 81 cents/bu over the July (N) soybeans futures contract.

The FOB Gulf basis level fell back to the level it had at the start of the week, before reports on June 16 of China buying US soybeans were heard.

Meanwhile, the CIF NOLA basis increased, but only in response to lower futures and a firmer Brazilian basis, sources say.

"Nearby values feel pressured or weak," a trader said.

CBOT July (N) futures fell 9.25 cents on June 16 to 1,122.75 cents/bu, while the August (Q) contract decreased 8.5 cents to 1,128.25 cents/bu.

On June 18, the US Department of Agriculture reported 120,000 mt of soybeans sold for delivery to unknown destinations, as well as 132,000 mt of soybeans for delivery to China during the 2026-27 marketing year.

Apart from this report, sources said, no other official confirmation of sales to China has been heard.

"I just [heard] the flash sale from yesterday," a second trader in the export market said. "I don't believe they are buying today. Sellers are starting to show better numbers in hopes of getting something done, along with oil prices lowering freight."

Some traders also reported selling in the soybean oil futures market, pressuring it and the rest of the soybean complex.

"They're liquidating soybean oil now," a third trader in the CIF NOLA market said. "Combined with energies lower, everything is taking the hit."

The USDA published its weekly US Export Sales report, showing that 424,900 mt of soybeans were sold during the period of June 5-11. The report says this amount was "up noticeably from the previous week and up 49% from the prior 4-week average."

About 177,800 mt were purchased by Egypt, and Mexico and Indonesia each bought 55,100 mt.

Animal Feed

Platts Latin America Soybean Meal Daily Commentary

- Higher premiums in Latin America
- Active Brazilian market

Latin America FOB soybean meal prices fell on June 18, tracking Chicago Board of Trade futures.

Argentine FOB Up River premiums for July loading increased during the day.

The Buenos Aires Grain Exchange reported June 18 that the 2025-26 soybean harvest in Argentina reached 97.2% as of June 17, up 2.0% from the previous week and higher than the previous season at the same time.

BAGE reported that harvesting is concentrated in the

southern part of the agricultural area, where some of the remaining acreage still needs to be collected, and the recorded yields continue to fall. In contrast, much of the central and northern agricultural area has already completed the harvest, with yields above the historical average.

Brazilian FOB Paranaguá premiums for August loading saw a bid-offer gap of 0/short ton and plus 4/st, relative to the CBOT August (Q) contract.

A trade was reported at FOB Paranaguá premiums for August loading at plus \$2.00/st.

The Chicago Board of Trade August (Q) soybean meal contract settled at \$301.30/st, down \$3.7/st.

Platts is part of S&P Global Energy.

Platts European Animal Feed Daily Commentary

- Dutch pig production drops 5.4% in Q1 2026
- Spanish corn prices firm on CBOT, currency moves
- Spain boosts pork output by 3.5%, eyes exports

Northern Europe

The Dutch market was quiet June 18, with prices unchanged.

Platts assessed FOB Netherlands at Eur345/mt for the July

loading period, with a trade reported at Eur345/mt on day.

The Netherlands saw the sharpest contraction among the top seven producers, with Q1 2026 pig production down 5.4% year over year to 3.51 million head (from 3.75 million), Platts reported June 18.

The decline was spread across the quarter—January (-4.9%), February (-11%) and March (-2.9%). The reduction is linked to continued efforts to cut livestock numbers under environmental nitrogen policies, which may tighten Dutch pork supplies in Northwest Europe and help support regional prices.

Southern Europe

The Spanish corn firmed marginally on day.

A broker stated that the CBOT has increased, the euro-dollar exchange rate has declined and freight rates have risen by roughly \$1/mt, which has contributed to higher prices.

Soybean meal prices were unchanged on day, with trade at Eur344/mt.

Spain remained the EU's top pork producer in Q1 2026, with output up 3.5% year on year to 15.08 million head (from 14.51 million), Platts reported previously. While January fell 2%, production rose in February (+5.8%) and March (+8.4%).

The growth should strengthen Spain's export capacity to major Asian markets such as China, where European pork demand is closely tied to local supply and African swine fever conditions.

Platts is part of S&P Global Energy.

Platts US Distiller Grains DDGS Daily Commentary

- Participation slows ahead of holiday
- Market remains weak

The US dried distillers grains with solubles market continued to weaken June 18, with participants describing limited activity and ongoing downward pressure on values.

Platts assessed CIF New Orleans dried distillers grains with solubles barges for the June shipment period at \$194/st on June 17, the Chicago DDGS truck market for the June delivery period was assessed at \$169/st and the South California rail market for the June delivery period was assessed at \$220/st.

One trader agreed that the market remains in decline. "Market is in a free fall," the trader said.

A broker said that participation has slowed further ahead of the upcoming long holiday weekend. "Feels that way," the broker said when asked whether fewer market participants were active before the Juneteenth holiday on June 19.

Another broker also described quiet conditions. "So quiet now," the source said.

Platts is part of S&P Global Energy.

The Asian palm oil market surged on June 18, with palm oil futures on Bursa Malaysia Derivatives relatively stable despite weaker vegetable oil futures and energy prices. Losses were capped by the confirmation of B50 implementation in Indonesia and a stronger US dollar against the Malaysian ringgit.

According to media reports, Indonesia confirmed plans to increase its biodiesel mandate to 50%, originally scheduled for July 1, after positive results from fuel tests, Indonesian Energy Minister Arifin Tasrif said on June 18.

The benchmark palm oil contract for September delivery on the Bursa Malaysia commodity exchange declined MR1/mt to MR4,573/mt on June 18.

The Indian market slowed amid low buying interest, and no trades were heard as buyers monitored the market following Indonesia's confirmation of the B50 implementation.

"The market is supported by Indonesia's B50 implementation," a Malaysia-based trader said.

Platts assessed CPO CFR WC India price at \$1,232.5/mt June 18 for July loading, down \$2.5/mt from June 16, while August shipment was \$7.5/mt higher than July.

The Indonesian market was supported by the upcoming B50 implementation and higher local CPO tender prices.

"The current Indonesian palm oil prices are higher than Malaysian prices, so buyers are likely to prefer purchasing more from Malaysia," the Malaysia-based trader said.

Platts assessed CPO FOB Indonesia price at \$1,190/mt June 18 for July loading, up \$5/mt from June 16, while August shipment was \$10/mt higher than July.

Platts assessed the RBDPS FOB Indonesia price at \$1,070/mt June 18 for July loading, up \$10/mt from June 16, while August shipment was \$10/mt higher than July.

Platts assessed the PFAD FOB Indonesia price at \$995/mt June 18 for July loading, up \$5/mt from June 16, while August shipment was \$10/mt higher than July.

Platts is part of S&P Global Energy.

Platts Latin America Soybean Oil Daily Commentary

- CBOT soy oil futures drop 2.59% to 69.69 cents/lb
- Argentine, Brazilian FOB prices rise \$1.10/mt
- CBOT volatility limits South American trading

Brazilian and Argentine soybean oil FOB markets were mixed June 18, as Chicago Board of Trade soybean oil futures extended recent losses and market participants across South America remained cautious amid limited liquidity, continued uncertainty surrounding a potential labor strike in Argentina, and heightened volatility in soybean oil futures.

CBOT July soybean oil futures fell 2.59% day over day to settle at 69.69 cents/pound. Trading activity was highly volatile throughout the session, with the July contract falling nearly 5% intraday before recovering part of its losses late in the session.

Market participants said continued liquidation by speculative funds, favorable US crop conditions, and expectations for ample global soybean supplies weighed on soybean oil futures.

Trading activity in both Argentina and Brazil remained notably subdued. Market participants said liquidity continued to be affected by Argentina's June 16 holiday in observance of the Paso a la Inmortalidad del General Martín Miguel de Güemes, while domestic soybean oil activity in Brazil was also reported as slow.

Participants added that uncertainty surrounding a possible labor strike by oilseed workers in Argentina continued to encourage a cautious approach among buyers and sellers, contributing to limited activity in both the FOB Up River and FOB Paranaguá markets.

In Argentina, Platts assessed the soybean oil FOB Up River price for July loading at \$1,168.23/metric ton June 18, up \$1.10/mt from June 17. The basis for July loading in the Up River paper market was assessed 190 points higher at minus 1,670 points to the July (N) futures at the Chicago Board of Trade.

In Brazil, Platts assessed the soybean oil FOB Paranaguá price for July loading at \$1,192.48/mt June 18, up \$1.10/mt from June 17. The basis for July loading in the Paranaguá paper market was assessed 190 points higher at minus 1,560 points to the July (N) futures at the Chicago Board of Trade.

Platts assessed the soybean oil FOB Paranaguá price for August loading unchanged at \$1,166.91/mt June 18. The basis for August loading in the Paranaguá paper market was assessed 170 points higher at minus 1,550 points to the August (Q) futures at

the Chicago Board of Trade.

Market participants said FOB basis levels in South America continued to strengthen sharply as weaker CBOT soybean oil futures allowed export premiums to recover further from the historically discounted levels observed in late May and early June. Traders noted that basis levels in both Argentina and Brazil have now recovered substantially from the record discounts reached earlier this month, despite limited changes in underlying physical market conditions.

Participants said the continued recovery in basis values reflected the growing divergence between US soybean oil futures and South American physical markets. While CBOT soybean oil futures remained heavily influenced by fund positioning, renewable diesel demand expectations and broader macroeconomic sentiment, physical export markets in South America continued to be supported by steady export demand and relatively stable global vegetable oil values.

At the same time, traders continued monitoring developments surrounding labor negotiations in Argentina. Although no significant disruptions to export flows had been reported, market participants said uncertainty surrounding potential strike action in the Rosario export corridor remained a source of caution and continued to limit commercial activity.

Platts is part of S&P Global Energy.

Platts Europe Vegetable Oil Daily Commentary

- Soybean stocks sufficient before rapeseed campaign begins
- Processors shifting focus toward incoming rapeseed supplies
- Weak export demand limiting broader oilseed strength

European vegetable oil markets edged slightly lower June 18, with rapeseed oil weakening modestly while sunflower oil remained stable.

RSO FOB Dutch Mills front-month declined Eur 2 to Eur 1,155/mt, while the third position also fell Eur 2 to Eur 1,141/mt. The second and fourth positions were unchanged at Eur 1,154/mt and Eur 1,139/mt, respectively.

FOB Black Sea sunflower oil held steady at \$1,381/mt, reflecting continued tightness in the sunflower oil complex despite softer sentiment elsewhere in the oilseed sector.

The slight weakness in rapeseed oil comes as attention increasingly shifts toward the approaching rapeseed processing campaign in Ukraine. According to a trader based in Ukraine, soybean exports have reached 1.85 million mt since the start of the 2025/26 season, while remaining soybean stocks stand at 1.12 million mt. The source noted that these inventories are sufficient to satisfy domestic crushing requirements before factories transition toward active rapeseed processing.

Market participants are increasingly viewing the soybean market as entering a period of stability. The trader based in Ukraine stated that "given the lack of significant export demand and the approaching rapeseed processing season, the soybean market may enter a stabilization phase."

This suggests that processors have little incentive to aggressively compete for remaining soybean supplies as operational focus begins shifting toward rapeseed. The resulting reduction in demand pressure could weigh modestly on oilseed values across the broader complex.

The same source added that “with the start of rapeseed arrivals at factories, there may even be a slight decrease in domestic soybean prices.”

For Europe, the implications are largely indirect but important. The transition toward rapeseed processing is expected to increase crushing activity and support rapeseed oil production, while reduced competition for soybeans could soften feedstock markets.

As a result, the rapeseed complex remains supported by upcoming processing demand, although the absence of strong export demand and comfortable soybean inventories are limiting upside momentum.

El Niño to drive volatility in bearish Ecuador shrimp market

- Logistics disruptions may cause volatility
- Weak demand caps upside

An expected El Niño weather event in late 2026 may introduce fresh volatility into the global shrimp market, with the phenomenon likely to alter Ecuador’s availability across sizes and disrupt logistics, creating uneven price movements amid oversupply, participants said.

Ecuador shrimp exports volume & value

Note: Data from latest monthly report. Shaded areas indicating El Niño periods according to NOAA: Sep-14 to Jun-16; Sep-18 to Jun-19; May-23 to May-24.

Source: CNA Ecuador

In the near term, Ecuadorean shrimp prices remain under pressure from high availability and low demand. Platts, part of S&P Global Energy, assessed head-on, shell-on 30-40 count shrimp at \$4,300/metric ton free carrier at Guayaquil June 12, before rebounding to \$4,450/mt June 15.

That uptick, however, reflected reduced availability in specific size segments rather than a broader market recovery, participants said. They cited limited availability of larger shrimp as seasonal conditions and below-normal rainfall constrain growth into higher counts. This has supported prices for larger sizes even as overall supply remains high.

“Prices are rising due to low availability of larger sizes, mainly 20-30,” an Ecuadorean producer said.

This pattern is not isolated. Similar constraints have been observed in other main origins, like India, where weather conditions and harvesting dynamics have reduced the share of larger shrimp in the market.

“Normally, the farmers tend to grow for bigger sizes, but this time, due to excess heat, mortality has been a serious problem,” said an Indian producer.

El Niño shifts supply mix

At present, prices of larger shrimp sizes are supported by limited availability. The climate event forecast for 2026 is expected to alter this dynamic.

Warmer water temperatures associated with El Niño typically accelerate shrimp growth rates and improve survival in certain production zones of Ecuador, leading to a higher share of larger size categories in the harvest.

“Rain is good for shrimp ... it grows faster, and there will be availability of larger sizes in months when there usually aren’t,” the Ecuadorean producer said.

However, the same conditions that support faster growth also introduce asymmetrical risks that cap any bullish interpretation.

El Niño is unlikely to tighten supply in aggregate. Instead, it is expected to shift the composition and timing of availability, a distinction that is critical for price formation in a highly segmented market. A higher share of larger shrimp sizes would directly pressure levels in the 20-30 and 30-40 count segments, redistributing value along the size curve rather than lifting the market as a whole, according to market participants.

The price support is not demand-driven, but structural, tied to temporary scarcity in specific sizes. As that scarcity eases, the support underpinning recent price gains weakens.

Disruption risks rise

The probability of El Niño occurring is unusually high, even if its intensity remains uncertain. NOAA projects an 82% chance of development by mid-2026 and a 96% probability of persistence into the 2026-27 winter, while the IRI places the likelihood even higher. Yet no intensity scenario dominates forecasts, meaning the market faces high certainty of disruption, but low clarity on magnitude.

Ecuador’s shrimp sector is structurally exposed to climate variability. Historically, El Niño brings above-average rainfall, flooding and infrastructure damage along the coast. In practical terms, this shifts the risk from production to logistics.

“If roads and access routes are not improved, flooding will create serious supply chain problems,” another producer said.

Shipment delays can tighten prompt availability in destination markets, supporting prices temporarily even in the presence of ample supply.

Costs add another layer of constraint. El Niño typically disrupts anchoveta fisheries in Peru, one of the world’s main sources of fishmeal used in aquaculture feed, tightening global supply and raising feed costs. In a market already characterized by weak demand and compressed margins, higher input costs may limit producers’ willingness to fully capitalize on improved growing conditions.

Demand caps upside

Global shrimp markets face structural oversupply and cautious buying behavior. There has been resistance from importers even amid tighter raw material availability in key origins, underscoring limited demand elasticity. Without a recovery in consumption, any supply-side tightening, whether from logistics or costs, is unlikely to translate into sustained price gains, the participants added.

For buyers and sellers, the implication is a shift in risk management rather than outright positioning.

China books 132,000 mt of US soybeans for MY 2026-27: USDA

- First US soybean sale to China for MY 2026-27
- MY 2026-27 US soybean exports to China estimated at 25 mil mt: CERA
- US soybean exports to China hinge on tariff removal: CERA

The US Department of Agriculture’s Foreign Agricultural Service on June 18 reported new export sales of 132,000 metric tons of US soybeans to China for delivery in the marketing year 2026-27 (September-August).

This marks the first reported US soybean export sale to China for MY 2026-27.

USDA currently forecasts US soybean exports at 1.63 billion bushels in MY 2026-27, up 7.9% year over year. S&P Global Energy CERA projects exports slightly higher at 1.68 billion bushels, up 11.3% year over year.

CERA expects US soybean exports to China to reach 25 million mt in MY 2026-27.

However, meeting this forecast would require China to remove the existing 10% tariff on US soybeans, which remains in place, CERA said in a June 12 report.

“China will need to purchase some soybeans from the US, as total exports from South America are likely to decrease due to lower Brazilian production,” the report added.

China has booked more than 11.95 million mt of US soybeans in MY 2025-26, remaining the top buyer. This compares with imports of 22.65 million mt in MY 2024-25, according to US Census Bureau trade data.

Platts, part of S&P Global Energy, assessed the CFR China first-month soybeans at \$496.04/mt on June 18, down \$3.22/mt from the previous day.

Platts assessed SOYBEX FOB New Orleans at \$455.16/mt June 17, up \$1.56/mt day over day.

US DATA: Net corn sales rise 16% on week to 1.16 mil mt

- Spain, Mexico, Japan lead purchases for week
- MY 2025-26 export commitments rise 25.6% YOY
- Mexico leads as top buyer of US corn in MY 2025-26

US net corn sales totaled 1.16 million metric tons for the week ended June 11, up 16% from the previous week, Department of Agriculture data showed June 18.

During the week, Spain, Mexico, Japan, Colombia and Taiwan booked the largest quantities of corn, data showed.

Through the week ended June 11, total US corn export commitments for marketing year 2025-26 (September-August) were 25.6% higher year over year at 83.92 million mt, data showed.

So far in MY 2025-26, Mexico, Japan, South Korea, Colombia and Spain have been the top buyers of US corn.

The US Department of Agriculture forecast corn exports at 84.46 million mt in MY 2025-26, up 16.3% year over year, in its World Agricultural Supply and Demand Estimates report released June 11.

The US is expected to harvest 432.34 million mt of corn in MY 2025-26, 14.3% higher year over year, the USDA said.

Platts, part of S&P Global Energy, assessed US corn CIF New Orleans at \$196.85/mt on June 17, up \$2.85/mt day over day.

Top export destinations for US corn (mt)

Location	Volume
Week ended June 11	
Spain	262,900
Mexico	259,800
Japan	249,900
Colombia	169,100
Taiwan	72,000
In MY 2025-26 as of June 11	
Mexico	23,806,000
Japan	15,095,200
South Korea	8,519,900
Colombia	7,854,900
Spain	4,094,200

Assessment Rationale

Grains

Platts Ags EMEA Wheat Daily Rationale

Platts assessed the Milling Wheat Marker at \$236/metric ton on June 18, down 1.50/mt from the previous assessment. Russian

12.5% handysize wheat, assessed at \$236/mt, was the most competitive wheat out of the three components of the Milling Wheat Marker, which also includes Ukraine 11.5%, normalized to the nearest 25 cents of \$239.65/mt when adding May's quality normalization of \$6.15/mt, to account for its lower protein content, and CVB 12.5% wheat assessed at \$239/mt. This reflects the Platts assessment window from July 16-30.

Platts assessed Black Sea wheat (Russian deepsea, 12.5% protein) down 1.50/mt at \$236/mt on June 18, below an offer at \$237/mt. This reflects the Platts assessment window from July 16-30.

Platts assessed Black Sea wheat (Ukraine deepsea, 11.5% protein) down 50 cents at \$233.50/mt on June 18, amid low demand, and below an offer at \$237/mt. This reflects the Platts assessment window from July 16-30.

Exclusions: No market data was excluded from the June 18 Black Sea wheat assessments.

Platts is part of S&P Global Energy.

Platts Asia Wheat Daily Assessment Rationale

Platts assessed Australian Premium White wheat unchanged at \$276/metric ton FOB Kwinana June 18 for cargoes loading between Aug. 17 and Sept. 16, tracking the indicative value at \$276/mt and under the lowest indicative offer of \$277/mt.

Platts assessed Australian Standard White wheat with no protein guarantee unchanged at \$271/mt for cargoes loading over the same period, tracking indicative values at \$271/mt. This maintains a \$5/mt spread between Australian Premium White and Australian Standard White with no protein.

Platts is part of S&P Global Energy.

Platts Canada Wheat Daily Rationale

Platts assessed Canada Western Red Spring Wheat 13.5% FOB Vancouver 30-45 days forward at \$273.28/metric ton June 18, 19 cents/mt lower than June 17.

CWRS Wheat 13.5% FOB Vancouver basis 30-45 days forward, spanning July 18-Aug. 2 was assessed unchanged at MIAX Hard Red Spring Wheat September (U) futures plus 96 cents/bushel.

CWRS Wheat 13.5% FOB Vancouver basis 45-60 days forward, spanning Aug. 2-Aug. 17 was assessed unchanged at U plus 96 cents/bu.

CWRS Wheat 13.5% FOB Vancouver basis 60-75 days forward, spanning Aug. 17-Sept. 1 was assessed unchanged at U plus 96 cents/bu.

The assessments were based on August bids indicated in a range of U plus 90-95 cents/bu and August offers indicated between U plus 105-115 cents/bu.

Exclusions: No data was excluded in the assessments.

Platts is part of S&P Global Energy.

Platts Asia Corn Daily Rationale

Platts assessed corn CFR Northeast Asia up \$1.50/metric ton day over day at \$260.50/mt CFR June 18 for feed-quality corn arriving over Sept. 16 to Oct. 16 into Pyeongtaek, below an offer at \$261/mt CFR, and tracking tradable value above \$258/mt CFR.

Platts is part of S&P Global Energy.

Asia corn assessments can be found on <PAA2440>

Market commentary can be found on <PAA2688>

This rationale applies to symbol(s) <WCINV00>

Platts Argentina Corn FOB Up River Daily Rationale

Platts assessed corn FOB Up River for loading in August at \$200.89/metric ton on June 18, down \$1.67/mt from the previous assessment.

The assessment considered the FOB premium for Up River August-loading cargoes unchanged at plus 85 cents/bu to Chicago Board of Trade September (U) corn futures, based on steady offers heard at U plus 90 cents/bu, and lower bids heard at U plus 82 cents/bu at the market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <ARGCA00> <ARGCB00>

Platts Brazil Corn Daily Rationale

Platts assessed the Brazilian corn FOB Santos price for August loading at \$213.87/metric ton on June 18, \$1.67/mt lower than the previous assessment.

The assessment considered the FOB Santos basis for August loading cargoes unchanged at plus 118 cents/bushel to the Chicago Board of Trade September (U) contract, based on offers for second-half August loading at U plus 127 cents/bu, and no bids heard at the market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <ABCSA00> <ABCSB00>

Platts US Corn Daily Assessment Rationale

Platts assessed the US Yellow Corn No. 2 CIF New Orleans barge basis for June shipment at 81 cents/bushel over the CBOT July (N) corn futures contract on June 18, up 2 cents from the previous business day. Based on bids heard later in the session at 80 cents/bu, and offers heard at 85 cents/bu.

Platts assessed the US Yellow Corn No. 2 CIF New Orleans barge basis for July shipment at 89 cents/bu over the Chicago Board of Trade July (N) corn futures contract on June 18, down one cent from the previous assessment. This was based on a bid heard at 87 cents/bu later in the day, and an offer heard at 90 cents/bu. A bid was heard earlier in the day at 89 cents/bu, but buyers later decreased bids by 2 cents.

Platts assessed the US Yellow Corn No. 2 FOB Gulf basis for August shipments at 98 cents/bu over the CBOT September (U) corn futures contracts on June 18, unchanged from the previous session. Offers were heard at 100 cents/bu for the first half of

August, and 105 cents/bu for the second half of the month.

No information was excluded.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <WCNOE00> and <WCNOU00>.

Platts FOB Black Sea Corn Daily Assessment Rationale

Platts assessed Ukrainian corn unchanged at \$229/metric ton on June 18, below an offer at \$230/mt for July loading. The competitive bid for the day was heard for CIF Marmara at \$243/mt for July loading, normalized to \$227/mt, reflecting the freight rate of \$16/mt from Ukraine ports to Marmara port. This reflects the Platts assessment window from July 16-30.

Exclusions: No market data was excluded from the June 18 Black Sea corn assessment.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <CUBSU00>.

Oilseeds.

Platts Asia Soybeans Daily Rationale

Platts assessed CFR China first-month soybeans down \$3.22/mt day over day at \$496.04/mt, while basis was down 5 cents/bu at 215 cents/bu over August (Q) CBOT June 18. Considering a normalized overnight trade at 215 cents/bu and below the sharpest normalized offer at 218 cents/bu over August (Q), for Brazil August shipment.

Platts assessed CFR China second-month soybeans down \$4.77/mt day over day at \$503.85/mt, while basis was down 10 cents/bu at 223 cents/bu over Nov (X) CBOT, tracking indicative value at 223 cents/bu. This is below the sharpest offer at 226 cents/bu and above the bid at 220 cents/bu over Nov (X), for Brazil September shipment.

Platts is part of S&P Global Energy.

Platts Brazil Soybean Daily Assessment Rationale & Exclusions

Platts assessed the SOYBEX FOB Santos soybean contract for August loading at \$451.69/metric ton on June 18, down \$2.02/mt from the previous assessment.

The FOB Santos basis for August loading was assessed 3 cents/bushel higher at plus 101 cents/bushel to the Chicago Board of Trade August (Q) contract, based on a spread to the Paranaguá paper market heard at plus 2 cents/bu. No bids or offers were heard for the full August loading of FOB Santos cargo on the day.

An offer for FOB Santos first-half August 2026 loading was heard at Q plus 100 cents/bu earlier on the day.

An offer for FOB Santos last-half August 2026 loading was heard at X plus 100 cents/bu at market close.

The FOB Paranaguá basis for August loading was assessed 1 cent/bu higher at plus 99 cents/bu to the CBOT (Q) contract, based on a trade heard at Q plus 100 cents/bu earlier on the day,

followed by offers at Q plus 100 cents/bu and higher bids at Q plus 96 cents/bu at the market close.

Platts assessed the SOYBEX FOB Santos soybean contract for March loading at \$427.44/mt on June 18, down \$1.29/mt from the previous assessment.

The FOB Santos basis for March loading was assessed 3 cents/bu higher at parity to the CBOT March (H) contract, based on a spread to the Paranaguá paper market heard at parity. No bids or offers were heard for the full March loading of FOB Santos cargo on the day.

A bid for FOB Santos first-half March 2027 loading was heard at H minus 5 cents/bu earlier on the day, with offers at H plus 2 cents/bu.

The new crop FOB Paranaguá basis for March loading was assessed 3 cents/bu higher at parity to the CBOT March (H) contract, based on an indicative value heard at that level, higher bids at H minus 5 cents/bu, and steady offers at H plus 2 cents/bu at market close.

Exclusions: No data was excluded.

Animal Feed and Protein

Platts Argentina Soybean Meal Daily Rationale

Platts assessed the Argentine soybean meal FOB Up River price for August loading at \$334.88/metric ton on June 18, \$1.32/mt lower than the previous assessment.

The basis for August loading in the Up River cargo market was assessed \$2.50/short ton higher at \$2.50/short ton to the August (Q) futures at the Chicago Board of Trade. The assessment considered an indicative value heard at that level, higher bids at plus \$1/st and steady offers at plus \$4/st to the CBOT Q contract at the market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYMAA00> <SYMAB00>.

Platts Brazil Soybean Meal Daily Rationale

Platts assessed the Brazilian soybean meal FOB Paranaguá price for August loading at \$334.33/metric ton on June 18, \$3.52/mt lower than the previous assessment.

The basis for August loading in the Paranaguá paper market was assessed \$0.50/short ton higher at \$2.00/st to the August (Q) futures at the Chicago Board of Trade. The assessment considered a trade heard at that level, higher bids at \$0/st and higher offers at plus \$4/st to the CBOT Q contract at the market close.

Platts is part of S&P Global Energy.

Vegetable Oils.

Platts Asia Palm Oil Daily Rationale

Platts assessed CPO CFR WC India price at \$1,232.5/mt June 18 for July loading, down \$2.5/mt from June 16, below an offer and above a bid.

CPO offer was heard at \$1,237.5/mt and a bid at \$1,227.5/mt on a CFR WC India basis, shipping in July.

August shipment of CPO CFR WC India was unchanged at \$1,242.5/mt June 18, considering a \$10/mt carry between July and August.

Platts assessed CPO FOB Indonesia price at \$1,190/mt June 18 for July loading, up \$5/mt from June 16, below an offer and above a bid.

CPO offer was heard at \$1,200/mt and an indicative bid at \$1,180/mt on a FOB Dumai basis, shipping in July.

August shipment of CPO FOB Dumai was at \$1,200/mt June 18, up \$5/mt from June 16, considering a \$10/mt carry between July and August.

Platts assessed the RBDPS FOB Indonesia price at \$1,070/mt June 18 for July loading, up \$10/mt from June 16, below an offer and above a bid.

RBDPS offer was heard at \$1,085/mt and an indicative bid at \$1,055/mt on a FOB Dumai basis, shipping in July.

August shipment of RBDPS FOB Dumai was at \$1,080/mt June 18, up \$10/mt from June 16, considering a \$10/mt carry between July and August.

Platts assessed the PFAD FOB Indonesia price at \$995/mt June 18 for July loading, up \$5/mt from June 16, below an offer and above a bid.

PFAD offer was heard at \$1,010/mt and an indicative bid at \$980/mt on a FOB Dumai basis, shipping in July.

August shipment of PFAD FOB Dumai was at \$1,005/mt June 18, up \$5/mt from June 16, considering a \$10/mt carry between July and August.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <ACPOA00> <ACPOB00> <APFAD00> <ARBSA00>

Platts Argentina Soybean Oil Daily Rationale

Platts assessed the Argentine soybean oil FOB Up River price for July loading at \$1,168.23/metric ton June 18, up \$1.10/mt from June 17. The basis for July loading in the Up River paper market was assessed 190 points higher at minus 1,670 points to the July (N) futures at the Chicago Board of Trade. The assessment considered an indicative value last heard at that level and offers at minus 1,520 points to the CBOT N contract at the market close. No bids or trades were confirmed before the market close for July loading in the FOB Up River paper market June 18.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYOAA00> <SYOAB00>.

Platts Brazil Soybean Oil Daily Rationale

Platts assessed the Brazilian soybean oil FOB Paranaguá price for July loading at \$1,192.48/metric ton June 18, up \$1.10/mt from June 17. The basis for July loading in the Paranaguá paper market was assessed 190 points higher at minus 1,560 points to the July (N) futures at the Chicago Board of Trade. The assessment considered an indicative value last heard at that level and offers at minus 1,450 points to the CBOT N contract at the market close. No bids or trades were confirmed before the market close for July loading in the FOB Paranaguá paper market June 18.

Platts assessed the Brazilian soybean oil FOB Paranaguá price for August loading at \$1,166.91/mt June 18, unchanged from June 17. The basis for August loading in the Paranaguá paper market was assessed 170 points higher at minus 1,550 points to the August (Q) futures at the Chicago Board of Trade. The assessment considered an indicative value last heard at that level. No bids, offers, or trades were confirmed before the market close for August loading in the FOB Paranaguá paper market June 18.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYOBB00> and <SYOBA00>.

Platts Europe Sunflower Oil Daily Rationale

Platts assessed sunflower oil FOB Black Sea Ukraine for July unchanged on June 18 at \$1,381/metric ton, above a bid heard at \$1,370/mt and below an offer heard at \$1,385/mt.

This rationale applies to symbol(s) <SFWBL00>.

Platts is part of S&P Global Energy.
