Commentary and Analysis

Wheat

Platts European Wheat Daily Commentary

- Black Sea wheat trading stalls amid attacks
- Russian export tax set at Rb721.10/mt
- EU wheat prices rise, CVB hits \$260/mt bid

The Black Sea wheat market moved sideways Aug. 14, with minimal trading activity, as traders monitored terminal suspensions and further port attacks.

One of the ports where Russian flows were recently redirected to UstLuga on the Baltic Sea was hit in a new attack. "Today, the market is in total silence," a Russian seller said. One FOB Russian buyer sought August loadings for \$215/mt from the port of Tuapse.

CIF Egypt buyers asked for wheat at around \$270/mt, while sellers quoted above \$290/mt from the Baltic, with freight at \$48/mt.

The Russian agriculture ministry has set its variable export wheat tax at Rb721.10/mt over Aug. 19-25. The export duty is calculated as a percentage of the difference between a base price and the average export prices on an FOB basis during the 60 days preceding the day of calculation. For the latest calculation, that average is at \$231.20/mt.

The EU markets of CVB and French wheat strengthened day over day, with buyers for the 11.5% CVB at \$260/mt.

Platts Asia Wheat Daily Commentary

- Australian wheat stable DOD
- Philippine buyers likely to purchase feed wheat

Australian Premium White wheat was unchanged day over day at \$289/metric ton Aug. 14 while Australian Standard White with no-protein guarantee was also stable day over day at \$282/mt.

An Australian wheat trader said the market was volatile, with demand for September-October shipments active.

"However, many buyers seem hesitant to bite the bullet on Australian wheat as it is still too expensive," said the trader.

October-November shipments command a premium of \$3-\$5/mt over December-January shipments. APW offers were heard at about \$305/mt and ASW1/ASW9 offers were heard at a wider range of \$285-\$290/mt, basis FOB Kwinana, the same trader added.

"Australian wheat prices are high due to low farmer selling," a Singapore-based wheat trader said.

Philippine buyers are expected to return to the international feed wheat market Aug. 14, with demand estimated at about 100,000 metric tons, according to a Vietnam-based wheat trader.

Further interest could emerge shortly thereafter, with an additional 120,000 mt of feed wheat demand expected at the beginning of the week of Aug. 16, the trader added.

Platts Canada Wheat Daily Commentary

- December Minneapolis futures gain 10.50 cents
- October capacity constraints limit offers

Platts assessed Canada Western Red Spring Wheat 13.5% FOB Vancouver 30-45 days forward at \$304.70/metric tons on Aug. 14, \$3.86/mt higher than the last session, with basis indications heard around 120-125 cents/bu over the December Minneapolis wheat futures contract (MWZ), while limited October capacity continued to restrict offers.

The December Minneapolis Hard Red Spring wheat futures contract rose 10.50 cents/bu to settle at 704.25 cents/bu, reversing some of the recent weakness in the underlying market.

One Canadian trader said "basis has come up to about 120-125 MWZ," while another participant said current market indications looked reasonable.

Protein remained a key focus as participants continued to assess the quality of the approaching Canadian harvest. "I'm not surprised by the protein spread at the moment," the first

Canadian trader said. “Would expect a lot more lower protein this year, especially in Alberta with all the rain they received.” Expectations for greater supplies of lower-protein wheat have contributed to wider differentiation between protein grades in recent market indications.

Nearby availability also remained constrained. A third trader said, “There is no offer for October since October capacity is well sold,” adding that recently reported November values remained accurate.

Platts is part of S&P Global Energy.

Corn

Platts Asia Corn Daily Commentary

- Asian corn price edges lower
- Vietnam buyers show limited interest
- Argentina harvest lags due to rain delays

Asia corn prices edged lower Aug. 14, below an offer and partially tracking softer Chicago Board of Trade (CBOT) futures.

Platts assessed feed-quality corn CFR Northeast Asia at \$277/metric ton for cargoes arriving Nov. 12-Dec. 12, down 50 cents/mt day over day.

South Korean market activity remained subdued ahead of National Liberation Day on Aug. 15, with participants expected to return to the market on Aug. 18.

Vietnamese buyers showed limited interest, with a Singapore-based trader observing an “overbought situation” and estimating stocks near 2 million mt.

Only small volumes of corn were purchased for the October shipment, traded at \$272-\$273/mt CFR Vietnam, according to the same trader.

On the supply front, Argentina and Brazil reported ample crops. However, Argentina’s harvest pace lags previous years due to rain, resulting in spot-focused selling, the trader said.

Brazil’s farmer selling has improved on recent CBOT gains, but sellers remain cautious amid uncertainties in the EU and Black Sea regions, the trader added.

US Pacific Northwest corn basis offers for October shipment were higher, at 155 cents/bushel for December (Z) CBOT.

Platts Latin America Corn Daily Commentary

- Premiums remain steady
- Corn harvest reaches 73% in Argentina

Platts assessed Latin America FOB corn prices higher Aug. 14, tracking Chicago Board of Trade futures.

The FOB Up River premiums for September loading and the Brazilian FOB Santos premiums for September loading were unchanged during the day.

The Rosario Board of Trade released on Aug. 13 that the drier and colder conditions that started on Aug. 7 allowed fieldwork to speed up: a very intensive harvest was carried out, and the harvest reached 73% of the planted area.

The US dollar/Brazilian real exchange rate stood at 5.2200 reais/\$1 as of 5:30 pm Brasilia time, up 0.27% day over day.

In Brazil's domestic market, prices increased in the Sorriso and Rio Verde regions amid stability in the Maringá region.

Trades on the spot market were heard in Rio Verde and Paranaguá during the day.

According to buyers, market activity was intense this week and will remain intense next week.

Farmers from the state of Mato Grosso had committed 64.29% of the marketing year 2025-26 crop as of Aug. 10, higher than the 61.11% seen at the same time in 2025 but lower than the five-year average of 65.89% for the period, according to the Mato Grosso Agribusiness Institute, or IMEA.

Sales from MY 2026-27 reached 10.62%, lower than 11.01% in the same period in 2025 and below the five-year average of 12.85%.

Platts is part of S&P Global Energy.

Platts US Corn Daily Commentary

- US corn market lacks offers, CBOT rises
- Pro Farmer Crop Tour set for Aug. 17-20

The US corn market reported a lack of offers in the domestic market on Aug. 14, followed by an increase on the Chicago Board of Trade, which, according to sources, was in line with expectations from the Pro Farmer Crop Tour.

CBOT corn (Dec)	¢/bu	CBAAF02	483.25	+11.25

"Next week will be the Pro Farmers, and the market will start to be bullish," a broker said.

The Chicago Board of Trade September (U) futures contracts rose 11 cents on Aug. 14 to \$4.5900/bushel, while December (Z) gained 11.25 cents, reaching \$4.8325/bu.

The Pro Farmer Crop Tour covers nearly 70% of US corn and soybean acres, spanning Illinois, Indiana, Iowa, Minnesota, Nebraska, Ohio, and South Dakota, and will be held from Aug. 17 to 20. Conducted annually since 1993, it provides insights into potential corn and soybean production and crop quality as the harvest season approaches.

The World Agriculture Supply and Demand Estimates, updated on Aug. 12, raised the US corn yield forecast for the marketing year 2026-27 (September-August), increasing the harvested area by 1.2 million acres to 88.6 million acres, offsetting the yield reduction, pegged at 180.7 bu/acre, and resulting in a production forecast of 16.013 billion bushels, up 13 million bushels from previous estimates.

Platts, part of S&P Global Energy, assessed August CIF New Orleans corn at \$218.50/mt on Aug. 14 and September at \$224.80/mt, while October FOB Gulf was assessed at \$233.96/mt.

Platts European Corn Daily Commentary

- Ukraine prepares storage for new crop
- Argentine corn dominates Saudi imports

The Black Sea corn market moved sideways on Aug. 14, with market activity in Ukraine remaining limited amid escalating attacks.

On the FOB side, offers remained at \$225/mt for the August/September shipment, with no indication from the buying side. For the new crop, offers remained at \$233/mt for November shipment.

Unlike the Constanta-Varna-Burgas market, where the new crop is in backwardation to the old crop, new-crop offers in Ukraine were in contango to the old crop. Corn was heard traded at Eur229/mt on Aug. 13, for a coaster cargo FOB CVB for August shipment.

In Ukraine, traders said that, despite rising storage costs and storage facilities filling with other grains due to slow exports, corn producers and traders are not overly concerned about storing the new corn crop from October onward.

"Corn storage will be difficult, with limited capacity, but large holdings are being prepared by buying silo bags and clearing elevator space for corn," one seller from Ukraine said.

Another trader from Ukraine said, "I don't think we're going to have a storage problem, as farmers may use plastic bags or sleeves. They did so in 2022-23. In the worst case, they may leave corn in the fields until springtime."

In Saudi Arabia, an importer said that corn demand and imports into the country have remained stable across the main import routes, including the ports of Jeddah, Yanbu and Jizan, with Argentine corn remaining the most competitive origin.

"Demand is the same and very regular," the importer added. "We are all buying mostly South American corn."

Oilseeds

Platts Asia Soybean Daily Commentary

- Nearby Brazil soybean cargoes trade
- Meal inventories rise amid weak demand

The CFR China soybean month-one September shipment was assessed up \$2.48/metric ton day over day at \$538.39/mt Aug. 14, while the basis was unchanged at 275 cents/bu over November (X) Chicago Board of Trade (CBOT) futures.

Overnight, Brazil-origin soybeans were heard traded at 285 cents/bu over November (X) CBOT futures, according to multiple China-based soybean traders.

There was not much room for a discount anymore for October shipment, and the price would have to be close to the offer of 285 cents/bu over November (X) CBOT futures for a trade to happen, according to a China-based soybean trader.

Based on weather forecasts for the next two weeks, which call for rain, there is a higher chance of increased yields, causing the market to turn bearish, according to a China-based soybean trader.

Soybean meal inventories grew slightly amid weaker demand for spot soybean meal from the downstream market, according to a local trader. In the short term, crusher operating rates are expected to remain high, which may lead to further inventory accumulation and increase pressure on mills to accelerate deliveries. The market will have to continue monitoring crushing pace and inventory levels closely, the trader added.

Platts is part of S&P Global Energy.

Platts Brazil Soybean Daily Commentary

- Several trades reported in Paranaguá
- CBOT futures rise on export demand, record crush pace

Platts assessed the SOYBEX FOB Santos soybean contract for September loading at \$492.66/metric ton on Aug. 14, up \$3.58/mt from the previous assessment.

CBOT soybean futures settled higher, extending gains following this week's US Department of Agriculture supply and demand report. Prices were further supported by strong export demand, including recent Chinese purchases of US soybeans, as well as robust domestic crushing activity amid expectations of increased feedstock demand from expanding US biomass-based diesel mandates, analysts said.

According to the latest crop survey from Brazilian agricultural agency Conab, released on Aug. 13, Brazil's 2025-26 grain harvest was revised to a record 360.8 million mt, supported by a 2.1% increase in planted area and strong yields across major crops, particularly soybeans, corn and sorghum.

Soybeans remain the main driver of the record harvest, reflecting favorable growing conditions in several key producing regions and reinforcing Brazil's position as the world's leading soybean supplier.

For soybeans specifically, recent Conab estimates point to a crop of roughly 180.6 million mt, well above previous seasons and supported by a planted area of about 48.6 million hectares. Conab also projects strong soybean exports, exceeding 116 million mt, while domestic crushing continues to expand in response to growing demand from the feed and biofuels sectors.

Trading activity picked up in the Paranaguá FOB paper market, with several trades heard for both old and new crop 2027 shipments on the day.

The US dollar versus the Brazilian real settled at 5.2232 reais per dollar at 4:30 pm Brasilia time. Domestic soybean prices were higher in the main producing regions.

Platts is part of S&P Global Energy.

Platts US Soybeans Daily Commentary

- Outright prices increase on day amid rise in futures
- Soybean meal, soybean oil reportedly strong

Outright US soybeans prices rose Aug. 14, boosted by an increase in the Chicago Board of Trade futures market, amid steady bases, more demand from China, and strong soybean meal and soybean oil.

Platts, part of S&P Global Energy, assessed SOYBEX FOB New Orleans for September shipment up \$3.77/metric ton day over day at \$482.26/mt. Platts assessed the basis for FOB Gulf for September shipment unchanged day over day at 120 cents/bushel over the November (X) soybeans futures contract.

Platts assessed the outright price for CIF New Orleans for August shipment also up \$3.77/mt from the previous business day at \$475.65/mt. Platts assessed the basis for CIF NOLA for August shipment steady day over day at 102 cents/bu over the November (X) soybeans futures contract.

The November (X) soybeans futures contract increased 10.25 cents day over day to 1,192.5 cents/bu.

Sources in the CIF New Orleans market said the rise in futures was related to strength in the soybean meal and soybean oil futures markets, rather than the flash sales to China reported throughout the week.

A trader in the CIF New Orleans market said the increase was “just because of soybean meal. And soybean meal is higher because they’ve been selling soybean oil.”

In the morning of Aug. 14, the US Department of Agriculture confirmed the sale of 136,000 mt of US soybeans for delivery to China during the 2025-26 marketing year.

The total amount of US soybeans sold to China for delivery during that period rose to 5.198 million mt, according to S&P Global Energy CERA data.

The spread between SOYBEX FOB New Orleans and SOYBEX FOB Santos ended the week at \$10.40/mt, with the US price on the lower end.

“It makes sense seasonally,” Aaron Gerds, principal crop analyst at S&P Global Energy CERA, said. “The US is almost at its harvest season and will really try to push soybeans out from September to December. Brazil is getting toward its slow season, still far from harvest.”

Animal Feed

Platts Latin America Soybean Meal Daily Commentary

- Soybean meal FOB prices increase, post weekly gains
- Brazil's August meal exports to rise 11.8% on year: Anec

South American soybean meal FOB prices rose Aug. 14, closing a week of gains.

The Argentine FOB Up River outright price for September dates increased by 1% from Aug. 7-14, while the Brazilian FOB Paranaguá value for the same delivery period rose by 4%, according to Platts data.

The FOB Up River cargo market was quiet day over day, with no trades heard and nearby premiums weakening slightly.

A similar scenario was observed in the FOB Paranaguá paper market, with premium discussions for September dates narrowing to \$23-\$24/short ton over the CBOT benchmarks. There was a trade for October parcels, but overall activity was subdued amid a quiet physical market, a source said.

Over Aug. 7-14, the FOB Paranaguá basis for September loading jumped more than \$10/st, according to Platts, part of S&P Global Energy, with support from tight crush margins and domestic contract pricing, participants said.

In the meantime, Brazil is expected to export 2.53 million mt of soybean meal in August, slightly above 2.48 million mt predicted in the previous week and up 11.8% year over year, the country's grain exporters' association, Anec, predicted.

The volume, if realized, would bring the January-August total to 17.79 million mt, an increase of 15.3% from the same period in 2025.

The CBOT September (U) contract settled at \$310.20/short ton, up \$2.80/st.

Platts European Animal Feed Daily Commentary

- Dutch soybean meal prices rise on premiums
- Spain corn market quiet during holiday season

Northern Europe

Dutch soybean meal prices rose in the week to Aug. 14 amid higher premiums and futures.

The Rhine water level at Kaub has fallen to 7 cm, a historical low, according to the European Waterways Information Service update Aug. 14.

A local news agency reported Aug. 13 that freight rates have surged to record levels, though actual trade is very limited because few vessels can operate in such shallow conditions. Lower Rhine destinations such as Duisburg remain reachable, but only at sharply reduced barge capacity, and further declines could halt more traffic. Little near-term relief is expected without sustained, widespread rainfall.

Southern Europe

The Spanish corn market remained quiet in the week to Aug. 14.

A trader said the holiday season means most participants are away, so activity is expected to be limited until September. Meanwhile, rising Matif and CBOT futures led to increased offers, which in turn slightly boosted prices.

The soybean meal market in Spain is no different from the Netherlands; the prices are increasing amid higher premiums, according to a Spain-based trader.

Platts US Distiller Grains DDGS Daily Commentary

- Wide bid-offer spreads limit trade activity
- Buyers wait for Q4 prices to drop further

The US dried distillers grains with solubles market showed a firmer tone Aug. 14, supported by stronger corn and soybean meal markets, although wide bid-offer spreads and limited participation continued to restrict trade.

Platts assessed CIF New Orleans dried distillers grains with solubles barges for the August shipment period at \$204/short ton Aug. 14, the Chicago DDGS truck market for the August delivery period was assessed at \$188/st, and the South California rail market for the August delivery period was assessed at \$231/st.

One trader reported interest in fourth-quarter positions but said buyers remained reluctant to commit at current levels. "Many are looking for October-December, but they're waiting for prices to come down," the trader said. "I feel like it will remain firm for a while longer."

A broker said volatility following the USDA WASDE continued to keep participants cautious. "Roller coaster ride on futures I think, has many pondering," the broker said, adding that futures rallied sharply on report day, gave back part of those gains in the following session, and moved higher again on the day.

"Sometimes too volatile can slow trade," the broker said, adding that end users were not chasing DDGS or soybean meal despite showing more interest in corn. Similar conditions were reported in the eastern US, where buyers were bidding but at levels below those at which plants were willing to sell.

"Kind of like a game of chess. Each waiting," the broker said, although adding that trade was likely to emerge soon as buyers eventually need coverage.

The source described DDGS as having a "firmer tone," supported by corn futures rising more than 8 cents/bushel and soybean meal also moving higher, but said participation remained limited and bid-offer spreads were wide.

Platts is part of S&P Global Energy.

Vegetable Oils

Platts Asia Palm Oil Daily Commentary

- Asian palm oil market mixed
- India's edible oil imports rise 32.7% in July

The Asian palm oil market was mixed on Aug. 14, with palm oil futures on Bursa Malaysia little changed despite a rise in crude oil and other vegetable oil futures.

The benchmark palm oil contract for October delivery on the Bursa Malaysia commodity exchange fell 13 ringgit/metric ton to 4,711 ringgit/mt on Aug. 14.

The BMD rose for the first half of the trading day but showed weakness toward the end of the trading day as liquidity rolled over to the backend.

The benchmark RBD Palm Olein for September delivery on the Dalian Commodity Exchange rose 95yuan/mt to 9,549 yuan/mt on Aug. 14.

The benchmark Soybean Oil for September delivery on the Dalian Commodity Exchange rose 54 yuan/mt to 8,584 yuan/mt on Aug. 14.

The Indian market remained slow with no trades heard on the day.

India's edible oil imports rose to 15.25 million metric tons in July, their highest level in 10 months and 32.7% higher than the month before as the world's largest vegetable oil buyer replenished stocks of palm oil and soybean oil ahead of the festival season, trade body the Solvent Extractors' Association of India said Aug. 13.

Palm oil imports in July rose 49% from the previous month to 730,965 metric tons, the highest in five months, the SEA said.

Buying interest in palm oil remained, while the soybean oil premium to palm oil remained around the \$4-\$50 level.

Spot market prices could be shifting up due to the increase in the palm oil contract prices for October delivery on BMD exchange earlier in the trading day.

"With the BMD moving up earlier, sellers are likely to follow the price shift in the spot market, but buyers are likely to not make their moves until prices are favorable," a Singapore-based trader added.

Platts assessed CPO CFR WC India at \$1,240/metric ton on Aug. 14 for August loading, up \$2.50/mt from Aug. 13, while September shipment was \$5/mt higher than August.

The Indonesian market was also slow on Aug. 14.

A trade was reported for palm olein on a CIF China basis for September shipment, involving one vessel totaling around 7,000 mt, at \$1,180/mt.

Nearby olein stock was heard to be "healthy and still high" while demand is "not really moving," a Singapore-based trader said.

Platts assessed CPO FOB Indonesia at \$1,15/mt Aug. 14 for August loading, down \$2.50/mt from Aug. 13, while September shipment was \$5/mt higher than August.

Platts assessed RBDPS FOB Indonesia at \$1,075/mt Aug. 14 for July loading, up \$7.50/mt from Aug. 13, while September shipment was \$10/mt higher than August.

Platts assessed PFAD FOB Indonesia at \$1,002.50/mt Aug. 14 for July loading, up \$2.50/mt from Aug. 13, while September shipment was \$10/mt higher than August.

Platts Latin America Soybean Oil Daily Commentary

- South American soy oil prices stay stable
- CBOT futures rise 1.76% to 69.44 cents/lb
- Ample supplies shift focus to demand side

South American soybean oil FOB markets remained relatively stable during the week ended Aug. 14, despite continued fluctuations in Chicago Board of Trade soybean oil futures and export basis levels.

CBOT September soybean oil futures settled at 69.44 cents/pound Aug. 14, up 1.20 cents/lb, or 1.76%, from 68.24 cents/lb Aug. 7. Futures moved between gains and losses during the period as market participants balanced favorable US soybean production prospects and ample global supplies against demand from the biofuels and vegetable oil sectors.

US crop conditions remained broadly favorable. US Department of Agriculture data showed 93% of the soybean crop blooming and 74% setting pods as of Aug. 9, with pod development 5 percentage points ahead of the five-year average. Meanwhile, rainfall prospects across major growing regions continued to limit concerns over crop stress.

The USDA's Aug. 12 World Agricultural Supply and Demand Estimates report reinforced the comfortable supply outlook, raising 2026-27 US soybean production to 4.5 billion bushels, up 44 million bushels from July. The report did not introduce a major supply shock for Brazil or Argentina, leaving the South American soybean oil market increasingly focused on processing economics, export demand and biofuel consumption.

Physical values remain comparatively stable

Despite the weekly rise in CBOT futures, South American outright FOB prices showed relatively little net movement.

Platts, part of S&P Global Energy, assessed Argentine soybean oil FOB Up River for September loading at \$1,186.97/metric ton Aug. 14, down \$6.61/mt, or about 0.55%, from \$1,193.58/mt Aug. 7.

Brazilian soybean oil FOB Paranaguá for September loading was assessed at \$1,197.99/mt Aug. 14, unchanged from Aug. 7.

Basis movements absorbed much of the volatility in the underlying futures market. Argentina's September basis weakened from minus 1,410 points Aug. 7 to minus 1,560 points Aug. 14, while Brazil's moved from minus 1,390 points to minus 1,510 points.

During the week, basis values repeatedly moved inversely to CBOT futures. Differentials weakened sharply during the Aug. 10 futures rally, recovered as CBOT declined Aug. 11 and Aug. 13, and softened again as futures moved higher Aug. 12 and Aug. 14. The

adjustments helped keep outright FOB prices anchored near \$1,200/mt despite changes in the underlying futures market.

Brazil and Argentina traded at parity at \$1,200.86/mt Aug. 11 before diverging later in the week. By Aug. 14, Brazil carried an \$11.02/mt premium to Argentina, although the difference remained less than 1% of outright values, leaving the two origins relatively closely aligned.

Brazil's deferred market remained softer than nearby September. October FOB Paranaguá was assessed at \$1,192.48/mt Aug. 14, leaving September at a \$5.51/mt premium, while September and October basis levels were both assessed at minus 1,510 points.

Ample supplies keep demand in focus

Supply developments in both South America and the US reinforced expectations for abundant soybean availability.

Official Argentine data showed soybean processing remained elevated during the second quarter, maintaining ample soybean oil production for domestic and export markets. Market participants said strong processing could help keep Argentine soybean oil competitively priced, although international demand continued to absorb available supplies.

In Brazil, Conab's Aug. 13 crop survey maintained 2025-26 soybean production near a record 180.5 million mt, little changed from its July projection. The estimate reinforced expectations for substantial raw-material availability and a strong domestic crushing base.

The combination of strong South American soybean availability and a comfortable global supply outlook increasingly shifted attention toward the demand side of the balance. In Brazil, domestic biodiesel consumption remained an important structural outlet for soybean oil, while export demand continued to influence physical pricing in both origins.

By Aug. 14, Argentine soybean oil had become somewhat more competitive relative to Brazil as its export basis weakened more sharply. However, the relatively narrow difference between the two origins and the stability of outright FOB values throughout the week highlighted a physical market that remained considerably less volatile than CBOT futures.

Market participants said export absorption, crush economics and biofuel demand will remain central to determining whether South American soybean oil values can continue holding near current levels amid abundant regional and global soybean supplies.

Platts Europe Vegetable Oil Daily Commentary

- Rapeseed oil rises despite record crop outlook
- Black Sea disruptions delay European rapeseed supply
- Low river levels support physical EU prices

European vegetable oil markets strengthened on Aug. 14, with rapeseed oil rising across the forward curve while Black Sea sunflower oil remained unchanged. RSO FOB Dutch Mills front-month increased €2/mt to €1,193/mt, while the second, third and

fourth positions each gained €7/mt to €1,176/mt, €1,169/mt and €1,123/mt respectively. FOB Black Sea sunflower oil remained assessed at \$1,379/mt.

Rapeseed oil values continued to strengthen despite an increasingly well-supplied global production outlook. In its August report, the US Department of Agriculture raised its global rapeseed production forecast by 500,000 mt to a record 99.08 million mt, 3.4 million mt above 2025/26 and 13 million mt above 2024/25. Canada's canola production forecast was also increased by 500,000 mt to 22.5 million mt, reinforcing expectations of greater global availability.

However, improved supply expectations have yet to fully translate into the European physical market, where logistical constraints continue to provide support. Rapeseed deliveries from Ukraine are delayed due to restricted operations at Black Sea ports, while disruptions to Russian shipments, following the suspension of grain terminal operations in the region, are adding further pressure on trade flows.

Low water levels on the Danube and Rhine are also restricting inland transport and increasing transportation costs. The combination of Black Sea disruption and constrained European river logistics is therefore supporting physical rapeseed oil values despite the bearish global production outlook. This leaves the market increasingly divided between record prospective supply and the difficulty of moving that supply efficiently into the European market.

GLOBAL ANIMAL FEED WEEKLY: South American meal rises as tight crush margins concern

- Brazil August soybean meal exports to rise 12% on year
- European meal rises on higher premiums
- US DDGS market stays quiet amid volatility, WASDE report

South American soybean meal

South American soybean meal export prices rose during the week ended Aug. 14 as port differentials strengthened across the region amid persistently tight crush margins.

Platts, part of S&P Global Energy, assessed the Argentine FOB Up River soybean meal for September delivery at \$355.16/metric ton on Aug. 14, up 1% week on week. Meanwhile, the Brazilian soybean meal FOB Paranaguá rose 4% to \$367.84/mt.

During the same week, the September FOB basis firmed by \$2/short ton in Argentina and by \$11.50/st in Brazil, according to Platts.

Market participants have reported deteriorating crush margins due to elevated soybean prices. A potential reduction in crushing activity could tighten the supply of soybean byproducts, including meal, in the coming months.

"Margins are low, and the industry has been pushing to improve them," an Argentine broker said, adding that the situation has contributed to reduced liquidity in the FOB Up River cargo market.

In Brazil, the week was marked by reports of smaller crushers halting operations in the southern state of Paraná, bringing forward regular maintenance due to tighter margins. A trader in the state said exporting raw soybeans was about 10% more profitable than processing them.

Meanwhile, Brazil is expected to export 2.53 million mt of soybean meal in August, slightly above the 2.48 million mt forecast the previous week and up 11.8% year over year, the country's grain exporters' association, known as Anec, said.

The volume, if realized, would bring January-August exports to 17.79 million mt, up 15.3% from the same period in 2025.

European soybean meal

The European soybean meal market saw a bullish trend over the week amid higher premiums and rising futures.

Platts assessed FOB Soybean meal at €360/mt, up by €5/mt, and Spain EXW Terragona at €363/mt, up by €1/mt over the week.

In the Netherlands, the lower water level in the Rhine disrupted inland barge transportation, increasing freight rates, market participants said. A trader said that inland transportation is significantly affecting the rapeseed market; at the same time, soybean meal is reaching the ARAG ports via deep-water routes, so it is not currently much affected.

A broker said, not just the Rhine, all the waterways are dealing with the same thing, so currently cargoes are going through trucks and train, pushing the freight rates, but that is not directly increasing the FOB prices, because the impact of premiums and futures is greater than freight.

Another Dutch trader said that premiums from Brazil are higher now due to lower crush margins. "We have to watch in the coming months how much it will increase, which will directly impact the prices in Europe market too," they added.

US DDGS

The US dried distillers grains with solubles market remained largely quiet during the week ended Aug. 14, as wide bid-offer spreads and volatile grain futures kept buyers and sellers from committing to fresh business.

Platts assessed CIF New Orleans dried distillers grains with solubles barges for the August shipment period at \$204/short ton Aug. 14, the Chicago DDGS truck market for the August delivery period was assessed at \$188/st, and the South California rail market for the August delivery period was assessed at \$231/st.

The week opened with limited activity despite signs of export demand. One broker said Vietnam was "definitely in the hunt for DDGS," with several inquiries for containerized product, while some domestic Eastern business was reported for October-November-December. CIF New Orleans remained inactive, however, with one trader saying bids and offers continued to move without narrowing enough to generate trades.

Activity slowed further ahead of the Aug. 12 USDA's World Agricultural Supply and Demand Estimates report, with participants reluctant to establish positions in advance. The USDA lowered its 2026-27 corn yield forecast to 180.7 bu/acre,

while raising exports and cutting projected ending stocks to 1.7 billion bushels, triggering a sharp reaction in corn futures. Corn use for ethanol and byproducts was maintained at 5.6 billion bushels, up from 5.55 billion bushels estimated for 2025/26.

"Sometimes, too volatile can slow trade," the first broker said, describing the post-WASDE movement as a "roller coaster ride." Another broker said the market was "still very dead," while a third reported, "no interest from either side really."

By the end of the week, DDGS developed a firmer tone alongside recovering corn and soybean meal futures, but buyers remained hesitant. A second trader said, "Many are looking for October-December, but they're waiting for prices to come down," while expecting values to remain firm for a while longer.

GLOBAL SOYBEAN WEEKLY: US soybeans dominate China buying as Brazilian demand lags

- Sinograin reserve soybean auction attracts strong participation
- Around 641,000 mt of US soybeans sold to China on the week
- Corn selling outpaces soybeans as Brazilian farmers' focus shifts

US soybeans retain edge in China

CFR China soybean trading in the week ended Aug. 14 continued to be led by US-origin cargoes, while Chinese soybean traders said demand for Brazilian supplies stayed only weak.

Around 20 cargoes were heard sold to China during the week, with most demand concentrated on US-origin soybeans. About 14-15 cargoes were said to be of US origin, while the remainder were Brazilian cargoes, traders said.

Demand for Brazilian beans remained weak, mainly due to low crushing margins, sufficient inventories and continued state-led auction activity, according to a China-based trader.

China's Sinograin sold 461,213 mt of imported soybeans at a state reserve auction Aug. 12, accounting for 89.28% of the 516,613 mt offered, according to four China-based grain traders.

Following the release of the WASDE report on Aug. 12, the trading range did not change significantly as ending-stock estimates were largely in line with market expectations, one trader added.

Weather forecasts indicating rain over the next two weeks have raised expectations for stronger yields, which could make the market more bearish, according to a China-based soybean trader.

For October shipment, China's demand coverage currently stands at around 78%. US-origin soybeans account for 4.8 million mt, or 66%, of purchased volumes, making October the highest month so far this year for US soybean shipment volumes booked by China, another China-based trader said.

Platts assessed the soybean CFR China M1 basis at 275 cents/bushel, over the Chicago Board of Trade November (X) contract on Aug. 14. The soybean CFR China M1 flat price was assessed at \$538.39/mt, up \$4.96/mt week on week.

US export price rises but remains below Brazil's

SOYBEX FOB New Orleans increased during the week that ended on Aug. 14 but remained below Brazil's SOYBEX FOB Santos amid more demand from China for US soybeans.

On Aug. 14, SOYBEX FOB New Orleans was assessed by Platts, part of S&P Global Energy, at \$482.26/metric ton, about \$4.04/mt up from Aug. 10.

During the week, the US Department of Agriculture confirmed 641,000 mt in flash sales to China, bringing the total sold for delivery during 2026-27 to 5.198 million mt, according to S&P Global Energy CERA.

Prices could continue to be on the lower end compared to Brazil's due to seasonal factors, S&P Global Energy CERA's principal crop analyst Aaron Gerdts said.

"The US is almost at its harvest season," he said. "And will really try to push soybeans out from September to December. Brazil is getting toward its slow season still far from harvest."

Gerdts added that China demand might continue to focus on the US due to the price spread and an agreement to purchase 25 million mt annually until 2028.

Sources reported on Aug. 14 that the soybean meal and soybean oil futures markets influenced soybeans at the end of the week.

"[The increase] is just because of soybean meal," a trader in the CIF New Orleans market said. "And soybean meal is higher because they've been selling soybean oil."

Brazil FOB market quiet despite late-week pickup

Trading activity in the Brazilian FOB soybean market was limited for most of the week before gaining momentum on Aug. 14, with trades reported for nearby September and October shipments, as well as new-crop March 2027 parcels in the port of Parangá. Market sentiment continued to be shaped by shifting export competitiveness and weak Chinese demand for Brazilian soybeans.

Market participants said Chinese importers continued to favor US soybeans, as Gulf-origin supplies for forward shipment offered a more attractive alternative to Brazilian cargoes. Chinese demand for Brazilian beans was also weighed down by poor crushing economics, comfortable stock levels and continued auction activity.

Brazilian FOB premiums fluctuated sharply during the week, while new-crop 2027 premiums closed lower despite support from weaker CBOT futures and restrained farmer sales. Sources also noted that Brazilian farmers have recently been more active sellers of corn than soybeans, with this seasonal shift emerging earlier than is typically observed.

The Brazilian grain exporters' association, ANEC, updated its estimate of soybean exports in August to 10.88 million metric tons, setting a new monthly record.

The latest estimate is up from the previous week's forecast of 9.74 million mt and represents an 8.4% increase compared with ANEC's August 2025 data, the association said Aug. 11.

Brazil's soybean exports through the first eight months of 2026 are projected at 95.51 million mt, up 8.4% over the same period in 2025, according to ANEC.

Platts assessed the SOYBEX FOB Santos price for September delivery at \$492.66/mt on Aug. 14, up 1.1% week over week.

China secures 136,000 mt of US soybeans for MY 2026-27: USDA

- China's MY 2026-27 US soybean commitments reach 5.436 mil mt
- Tariffs weigh on US soybean competitiveness in China

US private exporters reported sales of 136,000 metric tons of soybeans to China for delivery in marketing year 2026-27 (September-August), the US Department of Agriculture's Foreign Agricultural Service said Aug. 14.

The latest purchase brings total known Chinese commitments to 5.436 million mt of US soybeans for MY 2026-27, according to Platts calculations, based on USDA data. Platts is part of S&P Global Energy.

Outstanding sales of US soybeans to China for MY 2026-27 totaled 4.557 million mt as of Aug. 6, USDA data released Aug. 13 showed. Additional flash sales to China reported by the USDA after Aug. 6 totaled 879,000 mt.

The purchases come amid improving US-China trade ties following the Beijing summit in May.

According to a White House fact sheet, China would purchase at least 25 million mt of US soybeans annually from 2026 to 2028 under the Busan agreement reached in October 2025. Based on USDA-reported sales, China has already covered more than one-fifth of that annual volume for MY 2026-27.

S&P Global Energy CERA expects US soybean exports to China to reach 25 million mt in MY 2026-27.

USDA forecasts total US soybean exports at 1.66 billion bushels for MY 2026-27, up 9.2% year over year. CERA projects exports slightly higher at 1.7 billion bushels, up 11.5% year over year.

"Price matters when it comes to China's purchases of US soybeans," a China-based trader said, adding that Brazil remains the preferred origin for most buyers.

US soybeans remain more expensive than Brazilian supplies for Chinese private crushers even without tariffs, according to an

Aug. 7 report from S&P Global Energy CERA. The additional 10% tariff further widens the price gap, the report said.

Platts assessed SOYBEX CFR China first month at \$538.39/mt on Aug. 14, up \$2.48/mt day over day.

Platts assessed SOYBEX FOB New Orleans at \$478.49/mt on Aug. 13, down 37 cents/mt day over day.

GIWA lowers Western Australia wheat forecast for MY 2026-27 to 9.03 mil mt

- Forecast cut by 5% from previous estimate
- Conditions have remained generally favorable
- Rainfall uncertainties limit nitrogen top ups

The Grain Industry Association of Western Australia (GIWA) lowered its forecast for Western Australian wheat production in the 2026-27 marketing year (October-September) to 9.03 million mt in its August crop report released Aug. 14, down 5% from its July estimate of 9.54 million mt.

GIWA said crop conditions remained generally favorable across most of Western Australia's growing regions, although rainfall distribution has been uneven and some areas recorded only light rainfall.

"The grain yield potential is there if a couple more well-timed rains arrive," GIWA said.

GIWA also noted that warm and sunny conditions in July accelerated wheat development, although crop growth has slowed more recently, which may help reduce frost risks.

In addition, GIWA noted that growers are now scrambling to get nitrogen top-ups completed across canola, wheat and barley before the next rain system forecast for early next week arrives.

"The uncertainty around the intensity of rainfall from the cold fronts has resulted in growers being cautious with expenditure on topping up with nitrogen. Consequently, crops are generally underdone which will limit top end grain yield potential if the rainfall totals increase from here on," added GIWA in its report.

Reacting to the latest forecast, one Perth-based wheat trader said they viewed GIWA's wheat production estimate as overly conservative.

GIWA Western Australia 2026-27 season crop production forecast (metric tons)

Crop	August report (Forecast)
Wheat	9,030,000
Barley	6,110,000
Canola	4,340,000
Oats	692,000
Lupins	720,000
Pulses	120,000
Total	21,012,000

Source: GIWA

Platts, part of S&P Global Energy, assessed Australian Premium White wheat stable day over day at \$289/mt Aug. 14. Australian Standard White with no protein guarantee was also unchanged day over day at \$282/mt Aug. 14.

Subscriber Notes

Aug. 17 publishing schedule for Argentine biodiesel and oilseeds price assessments

Please note that Platts, part of S&P Global Energy, will not publish Argentine biodiesel and Argentine soybean oil price assessments on Aug. 17 in observance of the “Paso a la Inmortalidad del General José de San Martín” holiday.

Specifically, the Argentine biodiesel assessment will not be published in Biofuelscan, while the Argentine soybean oil assessment will not be published in the Daily Grains report. Both publications will otherwise be issued as scheduled, including assessments for Brazil where applicable.

Argentina's regular publishing schedule will resume on Aug. 18.

For full details of the Platts publishing schedule and services affected, refer here.

For queries, please contact support@spglobal.com.

Assessment Rationale

Grains

Platts Ags EMEA Wheat Daily Rationale

Platts assessed the Milling Wheat Marker at \$221/metric ton Aug. 14, unchanged from the previous assessment. Russian 12.5% handysize wheat, assessed at \$221/mt, was the most competitive wheat out of the three components of the Milling Wheat Marker, which also includes Ukraine 11.5% at \$228.63/mt when adding July's quality normalization of \$8.63/mt, to account for its lower protein content, and CVB 12.5% wheat assessed at \$268.75/mt on the day.

The structure between the first half of September and the second half of September was assessed as flat. This reflects the Platts assessment window of Sept. 11-25.

Platts assessed Black Sea wheat (Russian deepsea, 12.5% protein) unchanged at \$221/mt Aug. 14. Market participants monitored suspended operations at Russian major KSK, NKHP, and NZT terminals amid port attacks. The structure between the first half of September and the second half of September was assessed as flat. This reflects the Platts assessment window of Sept. 11-25.

Platts assessed Black Sea wheat (Ukraine deepsea, 11.5% protein) unchanged at \$220/mt Aug. 14. Trading activity in Ukraine out of POC ports has significantly reduced due to strikes on port and export infrastructure. The structure between the first half of September and the second half of September was assessed as flat. This reflects the Platts assessment window of Sept. 11-25.

Exclusions: No market data was excluded from the Aug. 14 Black Sea wheat assessments.

Platts is part of S&P Global Energy.

This rationale applies to symbol (s) <BSMWM00>, <WRBSD00>, <WUBSA00>

Platts Asia Wheat Daily Assessment Rationale

Platts assessed Australian Premium White wheat unchanged day over day at \$289/metric ton FOB Kwinana Aug. 14 for cargoes loading between Oct. 13 and Nov. 12, below the sharpest offer at \$299/mt.

Platts assessed Australian Standard White wheat with no-protein guarantee unchanged at \$282/mt for cargoes loading over the same period, under the sharpest offer at \$285/mt, maintaining the spread between Australian Premium White and Australian Standard White with no-protein guarantee at \$7/mt.

Platts is part of S&P Global Energy.

Asia wheat assessments can be found on <PAA2440>

Market commentary can be found on <PAA2699>

This rationale applies to symbol(s) <WAUSA00>

Platts Canada Wheat Daily Rationale

Platts assessed Canada Western Red Spring Wheat 13.5% FOB Vancouver 30-45 days forward at \$304.70/metric tons on Aug. 14, \$3.86/mt higher than the last session.

CWRS Wheat 13.5% FOB Vancouver basis 30-45 days forward, spanning Sept. 13-28, was assessed unchanged at MIAH Hard Red Spring Wheat December (Z) futures plus 125 cents/bushel

CWRS Wheat 13.5% FOB Vancouver basis 45-60 days forward, spanning Sept. 28-Oct. 13, was assessed unchanged at Z plus 125 cents/bu.

Both assessments remained unchanged due to no disproving information.

CWRS Wheat 13.5% FOB Vancouver basis 60-75 days forward, spanning Oct. 13-28 was assessed unchanged at Z plus 119 cents/bu, based on an offer heard at Z plus 120 to 125 cents/bu.

No exclusions were made during the assessment.

This rationale applies to symbol(s) <AWHCA00> <AWHCB00> <AWHCC00> <AWHCD00> <AWHCE00> <AWHCF00>.

Platts Asia Corn Daily Rationale

Platts assessed corn CFR Northeast Asia down 50 cents/mt day over day at \$277/mt CFR Aug. 14 for feed-quality corn arriving over Nov. 12 to Dec. 12 into Pyeongtaek, below an offer at \$279/mt CFR, and partially tracking lower Chicago Board of Trade futures.

Platts is part of S&P Global Energy.

Asia corn assessments can be found on <PAA2440>

Market commentary can be found on <PAA2688>

This rationale applies to symbol(s) <WCINV00>

Platts Argentina Corn FOB Up River Daily Rationale

Platts assessed corn FOB Up River for loading in September at \$212.60/metric ton on Aug. 14, \$4.33/mt higher from the previous assessment.

The assessment considered the FOB premium for Up River September-loading cargoes unchanged at plus 81 cents/bushel to Chicago Board of Trade September (U) corn futures, based on lower offers heard at U plus 85 cents/bu and bids heard at U plus 80 cents/bu at the market close. The lower offer level did not disprove the previous price assessment.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <ARGCA00> <ARGCB00>.

Platts Brazil Corn Daily Rationale

Platts assessed the Brazilian corn FOB Santos price for September loading at \$227.94/metric ton on Aug. 14, \$4.33/mt higher from the previous assessment.

The assessment considered the FOB Santos basis for September loading unchanged at plus 120 cents/bushel to the Chicago Board of Trade September (U) contract, based on steady offers for September H2 at U plus 125 cents/bu and no bids heard at the market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <ABCSA00> <ABCSB00>.

Platts US Corn Daily Assessment Rationale

Platts assessed the US Yellow Corn No. 2 CIF New Orleans barge basis for August shipment at 96 cents/bu over the Chicago Board of Trade September (U) corn futures contract on Aug. 14, unchanged from the previous assessment. This was based on a bid heard at 93 cents/bu, and no offers were heard.

Platts assessed the US Yellow Corn No. 2 CIF New Orleans barge basis for September shipment at 112 cents/bushel over the CBOT September (U) corn futures contract on Aug. 14, unchanged from the previous business day. This was based on a bid heard at 105 cents/bu, and no offers were heard.

Platts assessed the US Yellow Corn No. 2 FOB Gulf basis for October shipments at 111 cents/bu over the CBOT December (Z) corn futures contracts on Aug. 14. This was based on offers heard at 122 cents/bu and 127 cents/bu for the first and second half of October, respectively.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <WCNOE00> <WCNOU00>

Platts FOB Black Sea Corn Daily Assessment Rationale

Platts assessed Ukrainian corn unchanged at \$221/metric ton on Aug. 14, below the offer for August- September loading at \$225/mt. Demand for Ukrainian corn remains limited. The structure between the first and second halves of September was assessed flat. This reflects the Platts assessment window from Sept. 11-25.

Platts is part of S&P Global Energy.

Exclusions: No market data was excluded from the Aug. 14 Black Sea corn assessment.

This rationale applies to symbol(s) <CUBSU00>.

Oilseeds.

Platts Asia Soybeans Daily Rationale

Platts assessed CFR China first-month soybeans up \$2.48/metric ton day over day at \$538.39/mt while basis remained unchanged at 275 cents/bushel over November (X) CBOT on Aug. 14, with no disproving information.

Platts assessed CFR China second-month soybeans up \$3.58/mt day over day at \$542.06/mt, while basis was up 3 cents/bu at 285 cents/bu over November (X) CBOT, tracking an overnight trade at 285 cents/bu over November (X) for Brazil October shipment.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYBAB00> <SYBAA00> <SYBAF00> <SYBAD00> <SYBAC00> <SYBAE00>

Platts Brazil Soybean Daily Assessment Rationale & Exclusions

Platts assessed the SOYBEX FOB Santos soybean contract for September loading at \$492.66/metric ton on Aug. 14, up \$3.58/mt from the previous assessment.

The FOB Santos basis for September loading was assessed 2 cents/bushel lower at plus 163 cents/bu to the Chicago Board of Trade September (U) contract, based on a spread to the Paranaguá paper market last heard at parity. No bids or offers were heard for the full September loading of FOB Santos cargo day over day.

The FOB Paranaguá basis for September loading was assessed 2 cents/bu lower at plus 163 cents/bu to the CBOT (U) contract, based on a trade heard at that level, higher bids at U plus 160 cents/bu and lower offers at U plus 165 cents/bu at market close.

Platts assessed the SOYBEX FOB Santos soybean contract for March loading at \$444.47/mt on Aug. 14, up \$1.56/mt from the previous assessment.

The FOB Santos basis for March loading was assessed 5 cents/bu lower at plus 3 cents/bu to the CBOT March (H) contract, based on a spread to the Paranaguá paper market last heard at plus 5 cents/bu. No bids or offers were heard for the full March loading of FOB Santos cargo day over day.

The new crop FOB Paranaguá basis for March loading was assessed 5 cents/bu lower at minus 2 cents/bu to the CBOT March (H) contract, based on a trade heard at that level, lower offers at H plus 1 cent/bu and lower bids at H minus 3 cents/bu at market close.

Platts is part of S&P Global Energy.

Exclusions: No data was excluded.

This rationale applies to symbol(s) <SYBBC00> <SYBBF00> <SYBBD00> <SYBBH00> <SYBBA00> <SYBBE00> <SYBBB00> and <SYBBG00>.

Platts US Soybeans Daily Rationale

Platts SOYBEX FOB New Orleans for September shipment was assessed at \$482.26/metric ton on Aug. 14, up \$3.77/mt from Aug. 13. The FOB Gulf basis for September shipment was assessed at 120 cents/bushel over the Chicago Board of Trade November (X) soybeans contract on the day, unchanged from Aug. 13. This was based on a value indication heard at 120 cents/bu, and an offer heard at 125 cents/bu for that shipment month.

The CIF New Orleans basis for August shipment was assessed at 102 cents/bu over the November (X) soybeans futures contract on the day, unchanged from Aug. 13 based on a bid heard at 101 cents/bu for that shipment month. No offers were heard during the day.

Platts is part of S&P Global Energy.

No information was excluded.

Animal Feed and Protein

Platts Argentina Soybean Meal Daily Rationale

Platts assessed the Argentine soybean meal FOB Up River price for September loading on Aug. 14 at \$355.16/metric ton, up \$1.98/mt from the previous assessment.

The basis for September loading in the Up River cargo market was assessed \$1/short ton lower at plus \$12/st to the September (U) futures at the Chicago Board of Trade. The assessment considered lower offers at plus \$13/st and lower bids at plus \$9/st to the CBOT U contract at market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYMAA00> and <SYMAB00>.

Platts Brazil Soybean Meal Daily Rationale

Platts assessed the Brazilian soybean meal FOB Paranaguá price for September loading on Aug. 14 at \$367.84/metric ton, up \$2.54/mt from the previous assessment.

The basis for September loading in the Paranaguá paper market was assessed 50 cents/short ton higher at plus \$23.50/st to the September (U) futures at the Chicago Board of Trade. The assessment considered lower offers at plus \$24/st and higher bids at plus \$23/st to the CBOT U contract at market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYMBA00> and <SYMBB00>.

Platts US Dried Distiller Grains DDGS Daily Assessment Rationale

Platts assessed CIF New Orleans dried distillers grains with solubles barges for the August shipment period at \$204/short ton Aug. 14, unchanged from the previous session based on a bid heard at \$201/st and an offer heard at \$210/st.

The Chicago DDGS truck market for the August delivery period was assessed at \$188/st, steady from the previous session, amid no disproving information.

The South California rail market for the August delivery period was assessed at \$231/st, holding steady from the previous session, based on a bid heard at \$229/st and an offer heard at \$238/st.

Platts is part of S&P Global Energy.

This rationale applies to symbols <ACDDG00> <AADDG00>.

Vegetable Oils.

Platts Asia Palm Oil Daily Rationale

Platts assessed CPO CFR WC India at \$1,240/metric ton Aug. 14 for August loading, up \$2.50/mt from Aug. 13, below an offer and above a bid.

A CPO offer was heard at \$1,247.5/mt and a bid at \$1,237.5/mt on a CFR WC India basis, shipping in August.

A September shipment of CPO CFR WC India was at \$1,245/mt Aug. 14, up \$2.50/mt from Aug. 13, considering a \$5/mt carry between August and September.

Platts assessed CPO FOB Indonesia at \$1,195/mt Aug. 14 for August loading, down \$2.50/mt from Aug. 13, below an offer and above a bid.

A CPO offer was heard at \$1,202.5/mt and an indicative bid at \$1,187.5/mt on an FOB Dumai basis, shipping in August.

A September shipment of CPO FOB Dumai was at \$1,200/mt Aug. 14, down \$5/mt from Aug. 13, considering a \$5/mt carry between August and September.

Platts assessed RBDPS FOB Indonesia at \$1,075/mt Aug. 14 for July loading, up \$7.50/mt from Aug. 13, below an offer and above a bid.

An RBDPS offer was heard at \$1,090/mt and an indicative bid at \$1,060/mt on an FOB Dumai basis, shipping in August.

A September shipment of RBDPS FOB Dumai was at \$1,085/mt Aug. 14, up \$5/mt from Aug. 13, considering a \$10/mt carry between August and September.

Platts assessed PFAD FOB Indonesia at \$1,002.5/mt Aug. 14 for July loading, up \$2.5/mt from Aug. 13, below an offer and above a bid.

A PFAD offer was heard at \$1,017.5/mt and an indicative bid at \$987.5/mt on an FOB Dumai basis, shipping in August.

A September shipment of PFAD FOB Dumai was at \$1,012.50/mt Aug. 14, up \$2.5/mt from Aug. 13, considering a \$10/mt carry between August and September.

Platts Argentina Soybean Oil Daily Rationale

Platts assessed the Argentine soybean oil FOB Up River price for September loading at \$1,186.97/metric ton Aug. 14, down \$5.51/

mt from Aug. 13. The basis for September loading in the Up River paper market was assessed 90 points lower at minus 1,560 points to the September (U) futures at the Chicago Board of Trade.

The assessment considered an indicative value last heard at that level, offers at minus 1,540 points and bids at minus 1,590 points to the CBOT U contract at the market close. No trades were confirmed before the market close for September loading in the FOB Up River paper market Aug. 14.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYOAA00> and <SYOAB00>.

Platts Brazil Soybean Oil Daily Rationale

Platts assessed the Brazilian soybean oil FOB Paranaguá price for September loading at \$1,197.99/mt Aug. 14, up \$1.10/mt from Aug. 13. The basis for September loading in the Paranaguá paper market was assessed 60 points lower at minus 1,510 points to September (U) futures at the Chicago Board of Trade. The assessment considered an indicative value last heard at that level, offers at minus 1,450 points and bids at minus 1,520 points to the CBOT U contract at the market close. No trades were confirmed before the market close for September loading in the FOB Paranaguá paper market Aug. 14.

Platts assessed the Brazilian soybean oil FOB Paranaguá price for October loading at \$1,192.48/mt Aug. 14, up 66 cents/mt from Aug. 13. The basis for October loading in the Paranaguá paper market was assessed 60 points lower at minus 1,510 points to the October (V) futures at the Chicago Board of Trade. The assessment considered an indicative value last heard at that level, offers at minus 1,430 points and bids at minus 1,540 points to the CBOT V contract at the market close. No trades were confirmed before the market close for October loading in the FOB Paranaguá paper market Aug. 14.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYOBB00> and <SYOBA00>.

Platts Europe Sunflower Oil Daily Rationale

Platts assessed sunflower oil FOB Black Sea Ukraine for September-loading unchanged on Aug. 14 at \$1,379/mt, with no data disproving the value.

This rationale applies to symbol(s) <SFWBL00>
