Commentary and Analysis

Wheat

Platts European Wheat Daily Commentary

- Russian wheat offers drop to \$218/mt
- Ukraine grain exports plunge 88% in August
- Baltic route freight costs reach \$48/mt

The Black Sea wheat market fell day over day as sellers offered at lower FOB prices amid weak demand due to further attacks in the region. FOB Russian sellers offered at \$218/mt, but there were no firm bids. Traders expected Russia to export less than 3 million mt of wheat in August.

Other sellers preferred to sell via the Baltics, offering in the low to mid-\$260s, and bids were at a \$10/mt discount on FOB. The freight market to Egypt was at \$48/mt from the Baltics; meanwhile, shipowners canceled voyages to Black Sea ports.

In Ukraine, only 75,200 mt of grain was transported through Odesa ports so far in August, down from 656,400 mt month over month. The harvest was 81% complete, with an average yield of 4.85 mt/hectare. The CIF Marmara market rose, with coaster bids at \$262/mt for Ukrainian wheat of 12.5% protein.

The CVB market was at bids of around \$260/mt versus \$265-\$275/mt offers for the 11.5% protein.

Platts Asia Wheat Daily Commentary

- Australian wheat up on day
- Philippine buyer purchases October shipment feed wheat

Australian Premium White was assessed up \$4/mt day over day at \$293/mt Aug. 17, while Australian Standard White with no protein guarantee was up \$4/mt on the day at \$286/mt.

In Australia, despite ongoing concerns surrounding El Niño, a grains analyst said they maintained a broadly optimistic outlook for the country's winter wheat crop.

The analyst said favorable rainfall across many growing regions has supported crop development and yield potential. However, some parts of Western Australia received below-average rainfall in June, which could weigh on production prospects in those areas.

"Australia can still produce a normal-sized crop, as crops in many regions are ahead of their usual development pace. And if they receive some rainfall in September, prospects for another large harvest should remain intact," the analyst added.

Meanwhile, one of the Philippine buyers was heard to have bought one cargo of Australian feed wheat for October shipment on Aug. 14, at the price in the mid-\$310/mt CFR, according to several Asian grains trade sources.

Platts Canada Wheat Daily Commentary

- October capacity remains tight
- Overseas demand supports basis

Platts assessed Canada Western Red Spring Wheat 13.5% FOB Vancouver 30-45 days forward at \$304.24/metric ton on Aug. 17, 46 cents lower than the previous session, amid strong overseas demand and increasingly limited nearby capacity supporting the basis despite a slight decline in futures.

The December Minneapolis Hard Red Spring wheat futures contract fell 1.25 cents/bushel to settle at 703 cents/bu.

Nearby availability remained particularly tight.

One trader said there was no offer for October, but indicated that 130 cents/bu over the December Minneapolis wheat futures contract would be the value if October were offered.

Another trader reported strong overseas demand, especially from Taiwan and China, adding that significant volumes had already been sold and that September-October capacity was beginning to fill, leaving more open positions from November onward.

The trader said buyers were still trying to time the market but warned that “those who wait too long might be left out of capacity.”

The trader added that the market was increasingly “more of a capacity game than buying at the right price,” as limited farmer selling and strong export interest kept prices elevated.

Black Sea disruptions were also influencing buyer behavior, according to the trader, as importers increasingly considered North American wheat an alternative for immediate requirements.

Recent disruptions to Russian and Ukrainian grain flows have heightened uncertainty about Black Sea availability, providing additional context for the shift toward alternative origins.

Corn

Platts Asia Corn Daily Commentary

- Asian corn prices rise, tracking CBOT gains
- Vietnam's Sept. imports to exceed 1.25 mil mt: source

Asian corn prices edged up Aug. 17, supported in part by firmer Chicago Board of Trade futures, although regional spot activity remained limited.

Platts assessed feed-quality corn CFR Northeast Asia at \$278/metric ton on Aug. 17 for cargoes arriving over Nov. 15-Dec. 15 in Pyeongtaek, up \$1/mt from Aug. 14.

South Korean market activity was limited as the country observed a substitute public holiday on Aug. 17 following National Liberation Day on Aug. 15.

In Vietnam, imported corn supply remained ample and stable, with September arrivals expected to exceed 1.25 million mt, slightly above August levels, which kept nearby demand subdued, a local trader said.

Domestic supply is expected to rise as the crop enters peak harvest in Vietnam, the trader added.

Meanwhile, Thailand is expected to return with additional tenders for US corn after the unsuccessful Aug. 14 tender for US containerized corn, as the deadline approaches for booking December-arrival cargoes.

US Pacific Northwest corn basis offers for November shipment were heard at 150 cents/bushel for December (Z) CBOT.

Platts Latin America Corn Daily Commentary

- Sluggish trading activity persists
- Corn harvest reaches 77% in Argentina

Corn trading activity in Latin America was quiet in Brazil and Argentina on Aug. 17, amid a rise in Chicago Board of Trade futures.

Trading activity in Argentina was muted for the October FOB Up River contract amid the Aug. 17 Paso a la Inmortalidad del General de San Martín holiday.

The Buenos Aires Grain Exchange reported on Aug. 13 that the 2025-26 corn harvest in Argentina reached 77% as of Aug. 12, up 3.3% from the previous week.

BAGE reported that persistent high ambient humidity continues to delay grain drying and affect harvest progress across sectors. During the last few days, strong winds were recorded in the province of Córdoba, causing isolated crop lodging events in corn fields.

The US dollar/Brazilian real exchange rate stood at 5.2020 reais/\$1 as of 5:30 pm Brasilia time, down 0.34% day over day.

In Brazil's domestic market, prices were steady in the Sorriso and Maringá regions amid a slow increase in the Rio Verde region.

A trade on the spot market was heard in Paranaguá. In the futures market, a trade was reported in the Sorriso region for loading and payment in October 2026.

In Mato Grosso, Brazil's largest corn-producing state, the winter corn harvest reached 99.94% of the planted area as of Aug. 14. In the same week in 2025, 99.71% had already been harvested in Mato Grosso, the state's Institute of Agricultural Economics reported on Aug. 14.

Americas				
CBOT corn (Sep)	¢/bu	CBAF00	465.00	+6.00
CBOT corn (Dec)	¢/bu	CBAF02	489.50	+6.25

September (U) contracts increased 6 cents during the session to \$4.6500/bu, while December (Z) settled at \$4.8950/bu, jumping 6.25 cents in the same period.

"Farmer selling of old crop corn remains decent," a broker source said, adding that this trend was likely to continue into the harvest, making it feel that there is farmer and commercial corn length that needs to be moved short-term.

The Pro Farmer Crop Tour, which covers nearly 70% of the US corn and soybean acres, runs Aug. 17 to 20, with the first day showing that high temperatures in some areas and excessive rainfall in others leading to deteriorating crop conditions.

Nebraska, Ohio and South Dakota had corn pollination issues, while Nebraska crops also saw dryness issues.

Meanwhile, Indiana and Illinois reported flooding, which is negative for the crop.

"Lot of storm damage and flooding for us in Central Illinois," a trader source said.

The World Agriculture Supply and Demand Estimates updated the US corn yield forecast Aug. 12 for marketing year 2026-27 (September-August), raising the harvested area by 1.2 million acres to 88.6 million acres, offsetting the yield reduction, pegged at 180.7 bushels per acre, and resulting in a production forecast of 16.013 billion bu, up 13 million bu from previous estimates.

The USDA confirmed 1.871 million mt of yellow corn was inspected for export in the week ended Aug. 13, up 8.7% from the prior week. The major destinations were Mexico, Japan, Spain and Colombia.

Cumulative inspections reported by the USDA reached 3.186 billion bu, which represents 94% of S&P Global Energy CERA's projection.

Platts assessed August CIF New Orleans corn at \$220.85/mt and September at \$225.60/mt Aug. 17, while October FOB Gulf was assessed at \$235.24/mt.

Platts European Corn Daily Commentary

- Black Sea corn prices hold steady Aug. 17
- Ukraine 2026-27 export forecast drops 2M mt
- Danube port attacks threaten grain shipments

The Black Sea corn market remained stable on Aug. 17, with low market activity in Ukraine amid logistical constraints.

The price indications from the market remained stable week over week, as no real buying interest has been seen on a FOB basis.

S&P Global Energy CERA lowered Ukraine's 2026-27 corn export forecast by 2 million metric tons to 24 million mt, citing growing infrastructure constraints and risks to Danube export flows. The export projections may be further reduced due to intensified strikes on logistics infrastructure, according to CERA's latest report.

The latest attack on the port of Izmail has raised further concerns about the reliability of grain shipments through the Danube, a vital export route for Ukrainian agricultural commodities. Izmail and Reni remain the principal hubs for this trade, but logistical operations are increasingly exposed, with storage capacity across the region already severely limited.

Pressure could intensify when the corn harvest begins in October, as higher volumes are expected to exacerbate existing bottlenecks. Uncertainty over the harvest and new-crop availability has slowed regional selling, leaving limited price indications. "We don't have any special strategy on the new corn trade, will decide on the spot," a corn seller said.

On the destination side, offers were heard from Brazilian sellers to Italy and Tunisia, which used to be among the primary destinations for Ukrainian corn. Though no firm buying interest was seen from these destinations, traders said this could weigh on the Ukrainian new crop unless a solution to the logistics constraint is found.

Chicago Board of Trade (CBOT) futures, according to multiple China-based soybean traders.

A Chinese soybean trader estimated the tradable value for September-shipment Brazilian soybeans at around 286 cents/bu over Nov (X) Chicago Board of Trade (CBOT) futures, while another Chinese trade source believed that fair value to be closer to 288-290 cents/bu over Nov (X) Chicago Board of Trade (CBOT) futures.

Farmer selling in Brazil has remained healthy and with offer levels around 288 cents/bu, differences in price expectations were not significant, according to a China-based soybean trader.

China's state-owned Sinograin will auction 360,000 mt of imported soybeans from state reserves Aug. 19, according to a notice published by the National Grain Trade Center Aug. 14.

The auction, scheduled for 1:30 pm Beijing time, will offer soybeans from the 2022, 2023 and 2025 crop years, including lots located in Hebei, Henan, Sichuan, Chongqing, Guangxi and Hunan, according to the notice.

Platts is part of S&P Global Energy.

Platts Brazil Soybean Daily Commentary

- Higher CBOT futures support FOB soybean prices
- FOB Paranagua posts active session for new crop

Higher Chicago Board of Trade futures supported Brazilian soybean FOB outright prices on Aug. 17, as Platts rolled its SOYBEX FOB Santos loading period to October from September.

The CBOT November (X) contract settled at \$12.16/bushel, up 2%.

According to analysts, renewed concerns over weather-related impacts on the US soybean crop supported futures, while traders remained attentive to developments in the Middle East and Chinese demand.

The FOB Santos cargo market was mostly quiet, with scarce premium levels reported.

The FOB Paranaguá paper market, in turn, recorded an active session, with several parcels negotiated for new crop loadings – March to May dates. Basis ideas weakened throughout the session amid CBOT's jump and reports of improving farmer sales.

Regarding fundamentals, preliminary data from Brazil's Foreign Trade Secretariat showed soybean exports of 2.70 million metric tons in the first five working days of August (out of 21 working days in total). The daily shipping pace was down 13% week over week and up 22% year over year.

"If this pace continues, total exports could reach nearly 11.40 million mt [in August], while the unofficial lineup indicates 10.70 million mt, compared with our expectations of 10 million mt," S&P Global Energy CERA analysts said in the Global Soybean Complex Short-Term Outlook report issued on Aug. 14.

Platts is part of S&P Global Energy.

Platts US Soybeans Daily Commentary

- Outright prices rally on day
- Weather, crush data boost futures market

A mix of elements including weather and the publication of monthly crush data saw values the US soybeans market rise on Aug. 17, with the futures market rallying and boosting outright prices.

Platts, part of S&P Global Energy, assessed SOYBEX FOB New Orleans for October shipment at \$490.90/metric ton. Platts assessed basis for FOB Gulf for October shipment was at 120 cents/bushel over the November (X) soybeans futures contract.

Platts assessed the outright price for CIF New Orleans for August shipment \$10.10/mt up from Aug. 14 at \$485.75/mt. Platts assessed basis for CIF NOLA for August shipment climbed 4 cents day over day to 106 cents/bu over the November (X) soybeans futures contract.

Weather issues were reported in the Eastern part of the Corn Belt, with some mentioning damage from flooding.

"Day 1 of the Pro Farmer Crop Tour, which the industry follows closely, started the morning talking about flooded fields in the East," a trader in the CIF NOLA market said. "Then I think soybean oil took off and helped carry it along higher."

"Fields are pretty bad," a trader in the FOB Gulf market said. "We will lose acreage/yield."

Chicago Board of Trade November (X) soybeans futures contract increased 38.25 cents on the day to 1216 cents/bu.

"China, weather, soybean oil, NOPA [monthly crush report], push the board up," the trader in the FOB Gulf market said. "Basically, there's no reason to be short at the moment (except some farmer selling)."

The National Oilseed Processors Association published its July crush numbers, showing 216.64 million bushels of soybeans crushed, below some market expectations.

“The crush was basically in line to slightly below what we had expected,” S&P Global Energy CERA’s crop principal analyst Aaron Gerdtz said. “However, oil stocks dropped further than expected. NOPA oil stocks at 1.360 billion pounds, down from last month. We expected steady to higher stocks.”

The US Department of Agriculture published its Grains Inspected and/or Weighed for Export weekly report on Aug. 17, showing that 270,201 mt of soybeans were inspected during the week that ended on Aug. 13.

This amount is 139,308 mt less than the previous week, and 93,309 mt less than the same week of 2025.

About 76,521 mt went to Japan, 57,710 mt went to Egypt, 52,390 mt went to Mexico, and 46,514 mt went to Indonesia.

Animal Feed

Platts Latin America Soybean Meal Daily Commentary

- Higher CBOT futures support FOB prices
- Holiday mutes Argentina’s market activity

Higher Chicago Board of Trade futures supported South American soybean meal FOB prices on Aug. 17.

The October (V) contract settled at \$314/short ton, up \$2.20/st. Concerns over the impact of unfavorable weather conditions on the 2026 US soybean crop set the bullish tone, analysts said.

In Argentina, the FOB Up River cargo market recorded an empty session amid a public holiday.

Brazil’s FOB Paranaguá, in turn, was more active. Parcels for October dates were negotiated at \$16/st over the CBOT V contract, and a trade for a combined November-December shipment was also reported.

According to a source, Brazilian crushers continued to face poor margins, with soybean coverage at about 45 days. He warned of a potential “short squeeze” in September if buyers with limited coverage were forced back into the market to retake their positions.

Platts European Animal Feed Daily Commentary

Northern Europe

Dutch soybean meal market was subdued Aug. 17. Platts assessed FOB Netherlands soybean meal at €361/mt, unchanged from the previous session.

Concerns about record low water levels on the Rhine have grown, with the water level at Kaub falling to 7 cm, according to local reports.

The water level has reduced actual trade to a low level because few vessels can operate in such shallow conditions, a market source said.

Southern Europe

The Spanish corn market remained quiet Aug. 17. A Spanish trader said there was no trading at the moment for soybean meal but noted a few inquiries for corn. The trader said the holiday season meant most participants were away, so activity was expected to be limited until September.

Indications for soybean meal September-December were seen at €368/mt, corn September-December at €236/mt, while spot wheat was at €239/mt.

Platts is part of S&P Global Energy.

Platts US Distiller Grains DDGS Daily Commentary

- Week begins with quiet activity
- Maintenance supports September offers

The US dried distillers grains with solubles market started the week quietly on Aug. 17, with values largely holding at late-week levels and only limited spot activity reported, although upcoming ethanol plant maintenance provided support to September offers in some regions.

Platts assessed CIF New Orleans dried distillers grains with solubles barges for the August shipment period at \$204/short ton on Aug. 17, the Chicago DDGS truck market for the August delivery period was assessed at \$188/st, and the South California rail market for the August delivery period was assessed at \$231/st.

One broker described said the market was dead, while a second broker reported seeing values largely unchanged from Aug. 14.

A third broker also reported limited activity.

"Quiet here, just a few spot loads traded FOB," the broker said, attributing the business largely to "logistics carryover from last week or over the weekend."

Meanwhile, a trader in Canada said the market was beginning to strengthen following softer conditions through July and August.

"For us, however, we are starting to really see some strength in the market," the trader said.

The trader added that several regional ethanol plants are scheduled to begin fall maintenance shutdowns in early September, raising expectations of tighter DDGS availability.

"This has caused September offers to be elevated in anticipation of the shortness of supply coming," the trader said.

Platts is part of S&P Global Energy.

Vegetable Oils

Platts Asia Palm Oil Daily Commentary

- Malaysia's August exports show mixed trends
- Indonesian market slows for Independence Day

The Asian palm oil market rose Aug. 17, with palm oil futures increasing on Bursa Malaysia amid gains in other vegetable oil futures.

The benchmark palm oil contract for November delivery on the Bursa Malaysia commodity exchange rose 108 ringgit/metric ton to 4,819 ringgit/mt on Aug. 17.

The benchmark RBD palm olein for January delivery on the Dalian Commodity Exchange rose 71 yuan/mt to 9,838 yuan/mt on Aug. 17.

The benchmark soybean oil for January delivery on the Dalian Commodity Exchange rose 61 yuan/mt to 8,561 yuan/mt on Aug. 17.

Malaysia's export data for Aug. 1-15 showed mixed results when compared with the same period in July; Intertek Testing Services (ITS) reported exports decreased 7.9% to 739,282 metric tons, while AmSpec reported exports increased 3.22% to 667,257 metric tons.

Malaysia's Southern Peninsular Palm Oil Millers Association (SPPOMA) reported a decrease in palm oil production for Aug. 1-15 compared with the same period last month. Yield decreased 4.49%, oil extraction rose 0.21%, and overall production decreased 3.38%.

The Indian market remained slow with no trades heard on the day.

"CPO action has been muted today, as inventory levels are healthy for now," an India-based trader said.

Platts assessed CPO CFR West Coast India at \$1,241/metric ton Aug. 17 for September loading, unchanged from Aug. 14, while the October shipment was assessed \$15/mt higher than September.

Platts Latin America Soybean Oil Daily Commentary

- Brazilian soybean oil FOB prices rise Aug. 17
- CBOT futures rally 2.88% to 71.44 cents/lb
- Argentine holiday limits regional price discovery

Brazilian soybean oil FOB prices increased on Aug. 17 as a sharp rally in Chicago Board of Trade soybean oil futures more than offset substantially weaker export basis levels.

Regional trading activity was subdued by a public holiday in Argentina.

CBOT September soybean oil futures settled at 71.44 cents/pound, up 2.00 cents/lb, or 2.88%, from Aug. 14, pushing the contract back above 70 cents/lb.

Market participants cited the latest National Oilseed Processors Association report as a factor supporting soybean oil futures. NOPA members crushed 216.647 million bushels of soybeans in July, below market expectations of about 221.5 million bushels.

The lower-than-expected processing volume supported soybean oil futures as participants reassessed near-term product availability, contributing to buying interest during the session.

Regional liquidity was relatively limited on Aug. 17 as Argentine markets were closed for the Paso a la Inmortalidad del General José de San Martín holiday. Platts, part of S&P Global Energy, did not publish Argentine soybean oil or biodiesel assessments for the day, and the regular Argentine assessment schedule was set to resume on Aug. 18.

Market participants said the absence of Argentine activity also reduced regional price discovery, leaving the Brazilian market without its usual neighboring-origin reference during a session marked by substantial CBOT volatility.

In Brazil, Platts assessed soybean oil FOB Paranaguá for September loading at \$1,200.20/mt on Aug. 17, up \$2.21/mt from Aug. 14.

The September Paranaguá paper basis weakened by 190 points to minus 1,700 points against the CBOT September soybean oil futures contract. The assessment considered an indicative value of minus 1,700 points, with offers at minus 1,650 points and bids at minus 1,720 points at the market close. No trades were confirmed before the close.

The substantial basis adjustment absorbed most of the futures rally, leaving the outright September FOB value only modestly higher and near the \$1,200/mt level that has characterized the Brazilian physical market in recent weeks.

Brazil's October market followed a similar pattern. Platts assessed soybean oil FOB Paranaguá for October loading at \$1,195.13/mt, up \$2.65/mt from Aug. 14.

The October Paranaguá paper basis also weakened 190 points to minus 1,700 points against the CBOT October soybean oil futures contract. Offers were heard at minus 1,650 points and bids at minus 1,780 points at the close, with no confirmed trades.

September maintained a \$5.07/mt premium over October, even though both loading periods were assessed at the same basis level, reflecting differences in the underlying CBOT futures contracts.

The Aug. 17 session provided another example of the inverse relationship between CBOT futures and South American export differentials seen in recent weeks. A 200-point increase in September futures was almost entirely offset by a 190-point weakening in the Brazilian basis, limiting movement in the outright FOB price.

Despite the sharp futures rally, Brazilian soybean oil remained anchored near \$1,200/mt. Market participants said fuller regional price discovery should return on Aug. 18 with the reopening of the Argentine market, providing a clearer indication of whether South American export differentials would maintain the sharp basis adjustment seen during Monday's futures rally.

Platts Europe Vegetable Oil Daily Commentary

- Black Sea sunflower oil availability remains tight
- Regional exports fall around 60% monthly
- Russian origin moves above Ukrainian values

European vegetable oil markets strengthened on Aug. 17, with rapeseed oil extending its recent recovery while Black Sea sunflower oil remained unchanged. RSO FOB Dutch Mills front-month increased €8/mt to €1,201/mt, while the second, third and fourth positions rose €1/mt, €3/mt and €5/mt to €1,177/mt, €1,172/mt and €1,128/mt respectively. FOB Black Sea sunflower oil remained assessed at \$1,379/mt.

Sunflower oil fundamentals remained firm despite the lack of movement in the FOB assessment. A trader based in India said offers from Ukraine remain limited, with only one Russian offer available. Initial export figures from both Ukraine and Russia were also reported to be about 60% lower month over month, reinforcing expectations that old-crop Black Sea sunflower oil shipments will decline sharply.

Continued attacks on Black Sea port infrastructure are adding to the disruption, prompting short covering of Russian-origin cargoes. Russian sunflower oil is consequently being reported at a premium to Ukrainian origin, while exporters are increasingly looking toward alternative ports and logistics routes. The trader said market participants are reassessing the viability of existing trading patterns as logistical constraints continue to restrict available supply.

The situation is particularly supportive for the Indian market, where sourcing Black Sea sunflower oil is becoming increasingly difficult. However, the upside remains constrained by competing vegetable oils, as cheaper soybean and palm oil limit the ability of domestic sunflower oil prices to rise. The resulting market remains characterized by a firm sunflower oil supply structure but weak price transmission, as Black Sea availability tightens while substitution from competing oils caps demand-side upside.

News

Delayed Brazil biodiesel mandate squeezes margins at soybean processor Três Tentos

- Policy delay cuts biodiesel profitability
- Industrial margins drop 41% year over year
- Soybean processing surges 81% to record high

A delay in Brazil's planned increase in biodiesel blending weighed heavily on Três Tentos Agroindustrial SA's industrial margins during the second quarter, highlighting the impact of policy uncertainty on one of the country's fastest-growing soybean processors.

Executives said during the company's Aug. 14 earnings call that profitability in its biodiesel operations deteriorated sharply after the expected increase in Brazil's mandatory biodiesel blend failed to materialize. The industry had anticipated a move from B15 to B16 earlier this year, which would have increased domestic biodiesel demand and supported producer margins.

"That increase did not happen, and that created pressure in the market, which was an important factor that led to a sharp drop," management said.

The company identified lower biodiesel profitability as the primary reason industrial margins contracted during the quarter despite record soybean origination and processing volumes. Executives said they expected conditions to improve once the mandate increase is implemented, but they acknowledged that margins remain below historical levels.

The industrial segment's adjusted gross profit fell 41.2% year over year to 244.8 million reais, while gross margin dropped to 12.2% from more than 21% a year earlier.

In addition to weaker biodiesel economics, higher methanol and hexane costs increased production expenses, while soybean meal prices fell roughly 12% year over year. Biodiesel prices also declined about 3%, further compressing margins.

The company said rising methanol and hexane costs alone reduced margins by about 0.75 percentage point during the quarter.

Record soybean throughput

The margin pressure came despite record soybean throughput. Três Tentos processed 947,300 mt of soybeans during the quarter, up 81% year over year, supported by Brazil's record harvest and expanded origination capabilities.

Management expressed confidence that biodiesel prices will recover once blending requirements are increased, noting that recent market indicators suggest the worst of the downturn may have passed.

"There is a tendency for recovery in the next quarter," executives said, referring to biodiesel pricing trends.

The company expects the B16 mandate to be implemented no later than March 2027 and views the current weakness in profitability as largely policy-driven rather than structural.

Brazil has closed its mandatory biodiesel market to imported supplies, formalizing a decision that gives domestic producers exclusive access to the country's B15 blending requirement and potentially reshaping South American biofuel trade flows.

Push for B16

The measure comes as Brazil's biodiesel sector is pushing for an immediate increase to B16 or higher while the Ministry of Mines and Energy conducts technical-feasibility tests for blends of up to B20. The testing program, which began in August, is expected to conclude by February 2027, with potential regulatory approval then, or by August 2027 if specification adjustments are required.

For Brazil's biodiesel market, the results underscore how sensitive crushing margins remain to blending policy decisions even amid strong agricultural fundamentals and growing feedstock availability.

Platts, part of S&P Global Energy, assessed Argentine soybean oil FOB Up River for September loading at \$1,186.97/metric ton Aug. 14, down \$6.61/mt, or about 0.55%, from \$1,193.58/mt Aug. 7.

Brazilian soybean oil FOB Paranaguá for September loading was assessed at \$1,197.99/mt Aug. 14, unchanged from Aug. 7.

Ukraine corn harvest to strain storage as exports stall

- Harvest intensifies storage capacity crunch
- Storage costs surge 45%-55% since conflict
- Farmers consider delaying harvest until spring

Ukraine's corn harvest is set to intensify pressure on grain storage, as slow exports, occupied elevators and higher storage costs push farmers toward temporary bags, risky facilities or delayed harvesting.

Ukraine could face a domestic grain storage shortfall of 8 million-11 million metric tons in November if exports remain slow, agrarian policy and food minister Taras Vysotsky said Aug. 14.

The corn harvest is expected to start by October, with wheat and rapeseed already occupying storage. Blocked port operations and slow export flows have reduced stock turnover.

About 90% of storage facilities were already booked or full, a Ukrainian broker said. Remaining capacity includes facilities close to the war zone, where users would face the risk of total loss and generally lack insurance cover for grain stored inland.

Storage costs have risen 45%-55% since the escalation of the Russia-Ukraine war and could rise by up to 70% by the autumn if logistics disruptions force grain from elevators to polymer bags, market participants said.

"It will be harsh, with not much spare capacity, but big holdings are preparing — buying silo bags and clearing elevator space for corn," a seller from Ukraine said.

Smaller producers may rely on on-farm warehouses, though limited capacity could delay harvesting.

"Smaller farmers already have warehouses on their farms, and I would not exclude them leaving corn in the fields until spring, as Ukraine did this season," the seller said.

Some traders were less concerned, noting the availability of emergency alternatives.

"I don't think we're going to have a storage problem, as farmers may use plastic bags or sleeves. They did so in 2022-23. In the worst case, they may leave corn in the fields until spring," another seller from Ukraine said.

Leaving corn unharvested through winter could lead to yield and quality losses, with each farmer weighing the risk, the second seller said.

Uncertainty over the harvest and new crop availability has slowed regional selling, leaving limited price indications.

"We don't have any special strategy on new corn trade, will decide on the spot," a corn seller said.

Platts, part of S&P Global Energy, assessed Ukraine corn FOB POC at \$221/mt on Aug. 14 for Sept. 11-25 loading.

China's Sinograin to auction 360,000 mt of imported soybeans Aug. 19

- Offers soybeans from 2022, 2023, 2025 crop years
- Previous auction clears 89.3% offered volume
- China's MY 2025-26 reserve soybean sales seen at 4 mil mt: CERA

China's state-owned Sinograin will auction 360,000 metric tons of imported soybeans from state reserves Aug. 19, according to a notice published by the National Grain Trade Center Aug. 14.

The auction, scheduled for 1:30 pm Beijing time, will offer soybeans from the 2022, 2023 and 2025 crop years, according to the notice.

The auction will include lots in Hebei, Henan, Sichuan, Chongqing, Guangxi and Hunan, according to the notice.

The previous auction held Aug. 12 cleared 89.3% of the 516,613 mt offered, according to China-based grain traders.

As of Aug. 12, China had auctioned about 3 million mt of imported soybeans in marketing year 2025-26 (October-September), according to an S&P Global Energy CERA report Aug. 14.

The volume remains below earlier market expectations of about 4 million mt for the season, the report stated.

CERA expects reserve soybean sales to continue, with a base-case projection of about 4 million mt, as state-owned crushers clear storage for incoming US new-crop cargoes.

Chinese state traders COFCO and Sinograin have been purchasing US soybeans to meet policy commitments following the Beijing summit in May.

Under the Busan trade agreement reached in October 2025, China committed to purchase at least 25 million mt of US soybeans annually from 2026 to 2028, according to a White House fact sheet issued Nov. 1, 2025.

As of Aug. 14, China's known US soybean commitments for MY 2026-27 (September-August) totaled 5.436 million mt, according to Platts calculations, based on US Department of Agriculture data. Platts is part of S&P Global Energy.

Platts assessed SOYBEX CFR China first month at \$538.39/mt on Aug. 14, up \$2.48/mt day over day.

EMEA AGRICULTURE: Key market indicators for Aug. 17-21

- Wheat prices drop \$2/mt amid logistics chaos
- Ukraine corn harvest faces storage delays
- Rapeseed oil rises despite bearish outlook

Wheat

- Platts wheat benchmark, the Milling Wheat Marker was assessed down \$2/mt week over week at \$221/metric ton Aug 14. Russian wheat fell by 0.90%, while Ukrainian wheat was unchanged. On the other hand, Romanian-Bulgarian wheat rose by 3.37%.
- Russian traders monitor logistics disruptions caused by strikes that halted grain terminal operations. Meanwhile, the Ukraine POC market remains largely halted, with exports redirected to the Danube due to low draft.
- Traders watch for alternative routes, such as the Baltics and Izmail, which also faced fresh attacks.
- Shipowners remain reluctant to call at Black Sea ports amid attacks, with safer ports in Romania and Bulgaria commanding higher premiums.

Corn

- Platts assessed FOB Ukraine corn down \$1/mt week over week at \$221/mt Aug. 14 for loading Sept. 11-25, and CVB corn was up \$4/mt at \$252/mt.
- Traders in Ukraine anticipate the new crop harvest will be delayed amid a lack of storage space and logistics constraints
- Market participants are closely monitoring the flow of grains from Ukraine to European destinations via railways, barges and trucks, and expect coasters to be the tradable volume.
- In the CVB market, traders are anticipating further trades in the new crop, as observed last year, amid continued uncertainty over supply from Ukraine.
- Traders are also watching the widening price spread between Ukraine and CVB corn.

Vegetable oil

- Platts assessed FOB Black Sea sunflower oil unchanged week over week at \$1,379/mt and FOB Dutch Mill rapeseed oil front run up €18 week over week at €1,193/mt on Aug. 14.
- Improved supply expectations have yet to fully translate into the European physical market, where logistical constraints continue to provide support.
- The combination of Black Sea disruption and constrained European river logistics is therefore supporting physical rapeseed oil values, despite the bearish global production outlook.

Subscriber Notes

Aug. 17 publishing schedule for Argentine biodiesel and oilseeds price assessments

Please note that Platts, part of S&P Global Energy, will not publish Argentine biodiesel and Argentine soybean oil price assessments on Aug. 17 in observance of the “Paso a la Inmortalidad del General José de San Martín” holiday.

Specifically, the Argentine biodiesel assessment will not be published in Biofuelscan, while the Argentine soybean oil assessment will not be published in the Daily Grains report. Both publications will otherwise be issued as scheduled, including assessments for Brazil where applicable.

Argentina's regular publishing schedule will resume on Aug. 18.

For full details of the Platts publishing schedule and services affected, refer here.

For queries, please contact support@spglobal.com.

Assessment Rationale

Grains

Platts Ags EMEA Wheat Daily Rationale

Platts assessed the Milling Wheat Marker at \$217/metric ton on Aug. 17, down \$4/mt from the previous assessment. Russian 12.5% Handysize wheat, assessed at \$218/mt, was the most competitive wheat out of the three components of the Milling Wheat Marker, which also includes Ukraine 11.5% at \$224.63/mt when adding July's quality normalization of \$8.63/mt, to account for its lower protein content, and CVB 12.5% wheat assessed at \$268.75/mt on the day. The structure between the first half of September and the second half of September was assessed as flat. This reflects the Platts assessment window from Sept. 14-28.

Platts assessed Black Sea wheat (Russian deepsea, 12.5% protein) down \$4/mt at \$217/mt on Aug. 17, below an offer at \$218/mt. Market participants said prices were weaker amid execution risk from deep-sea ports. The structure between the first half of September and the second half of September was assessed as flat. This reflects the Platts assessment window from Sept. 14-28.

Platts assessed Black Sea wheat (Ukraine deepsea, 11.5% protein) down \$4/mt at \$216/mt on Aug. 17 amid decreases in other wheat markets. Trading activity in Ukraine out of POC ports remains limited amid strikes on port and export infrastructure. The structure between the first half of September and the second half of September was assessed as flat. This reflects the Platts assessment window from Sept. 14 - 28.

Exclusions: No market data was excluded from the Aug. 17 Black Sea wheat assessments.

Platts is part of S&P Global Energy.

Platts Asia Wheat Daily Assessment Rationale

Platts assessed Australian Premium White wheat up \$4/mt at \$293/mt FOB Kwinana Aug. 17 for cargoes loading between Oct. 16 and Nov. 15, below the sharpest offer at \$300/mt.

Platts assessed Australian Standard White wheat with no protein guarantee up \$4/mt at \$286/mt for cargoes loading over the same period, tracking indicative value at \$286/mt under the sharpest offer at \$287/mt, maintaining the spread between Australian Premium White and Australian Standard White with no protein guarantee at \$7/mt.

Platts is part of S&P Global Energy.

Asia wheat assessments can be found on <PAA2440>

Market commentary can be found on <PAA2699>

This rationale applies to symbol(s) <WAUSA00>

Platts Canada Wheat Daily Rationale

Platts assessed Canada Western Red Spring Wheat 13.5% FOB Vancouver 30-45 days forward at \$304.24/metric ton on Aug. 17, 46 cents lower than the last session.

CWRS Wheat 13.5% FOB Vancouver basis 30-45 days forward, spanning Sept. 16-Oct.1, was assessed unchanged at MIA Hard Red Spring Wheat December (Z) futures plus 125 cents/bushel, unchanged due to no disproving information.

CWRS Wheat 13.5% FOB Vancouver basis 45-60 days forward, spanning Oct. 1-Oct. 16, was assessed 6 cents/bu lower at Z plus 119 cents/bu, following the same market structure as the 60-75 days forward, since October is now being assessed, and an offer heard at Z plus 130 cents/bu.

CWRS Wheat 13.5% FOB Vancouver basis 60-75 days forward, spanning Oct. 16-31 was assessed unchanged at Z plus 119 cents/bu, based on offer heard at Z plus 130 cents/bu.

No exclusions were made during the assessment.

This rationale applies to symbol(s) <AWHCA00> <AWHCB00> <AWHCC00> <AWHCD00> <AWHCE00> <AWHCF00>.

Platts is part of S&P Global Energy.

Platts Asia Corn Daily Rationale

Platts assessed corn CFR Northeast Asia up \$1/mt day over day at \$278/mt CFR Aug. 17 for feed-quality corn arriving over Nov. 15 to Dec. 15 into Pyeongtaek, partially tracking firmer Chicago Board of Trade futures.

Platts is part of S&P Global Energy.

Asia corn assessments can be found on <PAA2440>

Market commentary can be found on <PAA2688>

This rationale applies to symbol(s) <WCINV00>

Platts Argentina Corn FOB Up River Daily Rationale

Platts assessed corn FOB Up River for loading in October at \$220.67/metric ton on Aug. 17, on the first day of assessment for October-loading cargoes.

The assessment considered the FOB premium for Up River October-loading cargoes at plus 71 cents/bushel to Chicago

Board of Trade October (Z) corn futures, based on indicative value heard at that level, as neither offers nor bids were heard at the market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <ARGCA00> <ARGCB00>.

Platts Brazil Corn Daily Rationale

Platts assessed the Brazilian corn FOB Santos price for October loading at \$232.07/metric ton on Aug. 17, on the first day of assessment for October-loading cargoes.

The assessment considered the FOB Santos basis for October loading at plus 100 cents/bushel to the Chicago Board of Trade October (Z) contract, based on indicative value heard at that level, offers for October H1 at U plus 104 cents/bu, offers for October H2 at U plus 106 cents/bu, bids for October H1 at U plus 96 cents/bu, and bids for October H2 at U plus 99 cents/bu heard at the market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <ABCSA00> <ABCSB00>.

Platts US Corn Daily Assessment Rationale

Platts assessed the US Yellow Corn No. 2 CIF New Orleans barge basis for August shipment at 96 cents/bushel over the Chicago Board of Trade September (U) corn futures contract on Aug. 17, unchanged from the previous assessment. This was based on a bid heard at 88 cents/bu and an offer at 97 cents/bu.

Platts assessed the US Yellow Corn No. 2 CIF New Orleans barge basis for September shipment at 108 cents/bu over the CBOT September (U) corn futures contract on Aug. 17, down 4 cents from the previous business day. This was based on a bid heard at 100 cents/bu, and an offer at 109 cents/bu.

Platts assessed the US Yellow Corn No. 2 FOB Gulf basis for October shipments at 108 cents/bu over the CBOT December (Z) corn futures contracts on Aug. 17. This was based on offers heard at 110 cents/bu and 114 cents/bu for the first and second half of October, respectively.

No information was excluded.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <WCNOE00> <WCNOU00>.

Platts FOB Black Sea Corn Daily Assessment Rationale

Platts assessed Ukrainian corn unchanged at \$221/metric ton on Aug. 17, below the offer for August-September loading at \$225/mt. The demand for Ukrainian corn remained limited. The structure between the first and the second halves of September was assessed flat. This reflects the Platts assessment window from Sept. 14-28.

Platts is part of S&P Global Energy.

Exclusions: No market data was excluded from the Aug. 17 Black Sea corn assessment.

This rationale applies to the symbol <CUBSU00>.

Oilseeds.

Platts Asia Soybeans Daily Rationale

Platts assessed CFR China first-month soybeans up \$6.15/mt day over day at \$544.54/mt while basis was up 10 cents/bu at 285 cents/bu over November (X) CBOT on Aug. 17, as S&P Global Energy rolled its M1 assessment from September to October, tracking an overnight trade at 285 cents/bu and below an offer at 295cents/bu over November (X) for Brazil October shipment.

Platts assessed CFR China second-month soybeans up \$5.05/mt day over day at \$547.11/mt, while basis was up 7 cents/bu at 292 cents/bu over November (X) CBOT on Aug 17, as S&P Global Energy rolled its M2 assessment from October to November, tracking tradeable value at 292 cents/bu and below the sharpest offer at 297 cents/bu over November (X) for Brazil November shipment.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYBAB00> <SYBAA00> <SYBAF00> <SYBAD00> <SYBAC00> <SYBAE00>

Platts Brazil Soybean Daily Assessment Rationale & Exclusions

Platts assessed the SOYBEX FOB Santos soybean contract at \$503.78/metric ton on Aug. 17, the first day of assessment of October 2026 loading.

The FOB Santos basis for October loading was assessed at plus 155 cents/bu to the Chicago Board of Trade November (X) contract. The assessment considered an FOB Santos port spread heard at parity to the FOB Paranaguá paper market, as neither offers nor bids were heard during the day.

The FOB Paranaguá basis for October loading was assessed at plus 155 cents/bu to the CBOT X contract, taking into consideration an indicative value heard at that level, offers at plus 160 cents/bu and bids at plus 150 cents/bu to the CBOT X contract at the market close.

Platts assessed the SOYBEX FOB Santos soybean contract for March 2027 loading on Aug. 17 at \$452.98/mt, up \$5.51/mt from the previous assessment.

The FOB Santos basis for March loading was assessed 6 cents/bu lower at minus 3 cents/bu to the CBOT March (H) contract, based on a spread to the FOB Paranaguá paper market last heard at plus 5 cents/bu. No offers and bids were heard on the day.

The FOB Paranaguá basis for March loading was assessed 6 cents/bu lower at minus 8 cents/bu to the CBOT H contract, considering a trade last heard at that level, lower offers at minus 5 cents/bu and lower bids at minus 15 cents/bu to the CBOT H contract at the market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYBBC00> <SYBBF00> <SYBBD00> <SYBBH00> <SYBBA00> <SYBBE00> <SYBBB00> <SYBBG00>

Exclusions: No data was excluded.

Platts US Soybeans Daily Rationale

Platts SOYBEX FOB New Orleans for October shipment was assessed at \$490.90/metric ton on Aug. 17. The FOB Gulf basis for October shipment was assessed at 120 cents/bushel over the Chicago Board of Trade November (X) soybeans contract on the day. This was based on a value indication heard at 120 cents/bu, and an offer heard at 125 cents/bu for that shipment month.

The CIF New Orleans basis for August shipment was assessed at 106 cents/bu over the November (X) soybeans futures contract on the day, 4 cents up from the previous assessment based on an indicative bid heard at 105 cents/bu, and an indicative offer heard at 110 cents/bu.

No information was excluded. Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYBBI00> <SYBBL00> <SYBBK00> <SYBBJ00>

Animal Feed and Protein

Platts Argentina Soybean Meal Daily Rationale

Platts assessed the Argentine soybean meal FOB Up River price at \$359.35/metric ton on Aug. 17, the first day of assessment for October 2026 loading.

The basis for October loading in the Up River cargo market was assessed at plus \$12/short ton to the October (V) futures at the Chicago Board of Trade. The assessment considered an indicative value heard at that level, offers last heard at plus \$15/st and bids last heard at plus \$10/st to the CBOT V contract at market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYMAA00> and <SYMAB00>.

Platts Brazil Soybean Meal Daily Rationale

Platts assessed the Brazilian soybean meal FOB Paranaguá price at \$363.76/metric ton on Aug. 17, the first day of assessment for October 2026 loading.

The basis for October loading in the Paranaguá paper market was assessed at plus \$16/short ton to the October (V) futures at the Chicago Board of Trade. The assessment considered an indicative value heard at that level, offers at plus \$18/st and bids at plus \$15/st to the CBOT V contract at the market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYMBA00> and <SYMBB00>.

Platts US Dried Distiller Grains DDGS Daily Assessment Rationale

Platts assessed CIF New Orleans dried distillers grains with solubles barges for the August shipment period at \$204/short ton on Aug. 17, unchanged from the previous session, based on a bid heard at \$202/st and an offer heard at \$206/st.

The Chicago DDGS truck market for the August delivery period was assessed at \$188/st, steady from the previous session, amid no disproving information.

The South California rail market for the August delivery period was assessed at \$231/st, holding steady from the previous session, based on a bid heard at \$229/st and an offer heard at \$238/st.

Platts is part of S&P Global Energy.

This rationale applies to symbols <ACDDG00> <AADDG00>.

Vegetable Oils.

Platts Asia Palm Oil Daily Rationale

Platts assessed crude palm oil CFR WC India at \$1,241/metric ton Aug. 17 for September loading, up \$1/mt from Aug. 14, below an offer and above a bid.

A CPO offer was heard at \$1,245/mt and a bid at \$1,237.50/mt on a CFR WC India basis, shipping in September.

An October shipment of CPO CFR WC India was at \$1,256/mt Aug. 17, up \$11/mt from Aug. 14, considering a \$15/mt carry between September and October.

Platts assessed CPO FOB Indonesia at \$1,200/mt Aug. 17 for September loading, up \$5/mt from Aug. 14, below an offer and above a bid.

A CPO offer was heard at \$1,207.5/mt and an indicative bid at \$1,192.5/mt on an FOB Dumai basis, shipping in September.

An October shipment of CPO FOB Dumai was at \$1,210/mt Aug. 17, up \$10/mt from Aug. 14, considering a \$10/mt carry between September and October.

Platts assessed RBDPS FOB Indonesia at \$1,085/mt Aug. 17 for September loading, up \$10/mt from Aug. 14, below an offer and above a bid.

An RBDPS offer was heard at \$1,100/mt and an indicative bid at \$1,070/mt on an FOB Dumai basis, shipping in September.

An October shipment of RBDPS FOB Dumai was at \$1,095/mt Aug. 17, up \$10/mt from Aug. 14, considering a \$10/mt carry between September and October.

Platts assessed PFAD FOB Indonesia at \$1,008/mt Aug. 17 for September loading, up \$5.5/mt from Aug. 14, below an offer and above a bid.

A PFAD offer was heard at \$1,027.5/mt and an indicative bid at \$990/mt on an FOB Dumai basis, shipping in September.

An October shipment of PFAD FOB Dumai was at \$1,018/mt Aug. 17, up \$5.5/mt from Aug. 14, considering a \$10/mt carry between September and October.

Platts is part of S&P Global Energy.

Platts Brazil Soybean Oil Daily Rationale

Platts assessed the Brazilian soybean oil FOB Paranaguá price for September loading at \$1,200.20/metric ton on Aug. 17, up \$2.21/mt from Aug. 14.

The basis for September loading in the Paranaguá paper market was assessed 190 points lower at minus 1,700 points to the September (U) futures at the Chicago Board of Trade. The assessment considered an indicative value last heard at that level, offers at minus 1,650 points and bids at minus 1,720 points to the CBOT U contract at the market close. No trades were confirmed before the market close for September loading in the FOB Paranaguá paper market on Aug. 17.

Platts assessed the Brazilian soybean oil FOB Paranaguá price for October loading at \$1,195.13/mt on Aug. 17, up \$2.65/mt from Aug. 14. The basis for October loading in the Paranaguá paper market was assessed 190 points lower at minus 1,700 points to the October (V) futures at the Chicago Board of Trade. The assessment considered an indicative value last heard at that level, offers at minus 1,650 points and bids at minus 1,780 points to the CBOT V contract at the market close. No trades were confirmed before the market close for October loading in the FOB Paranaguá paper market on Aug. 17.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYOBB00> and <SYOBA00>.

Platts Europe Sunflower Oil Daily Rationale

Platts assessed sunflower oil FOB Black Sea Ukraine for October-loading unchanged on Aug. 17 at \$1,379/mt, above a bid heard at \$1,370/mt.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SFWBL00>
