## Commentary and Analysis

### Wheat

#### Platts European Wheat Daily Commentary

- Milling wheat prices fall on weak demand
- New crop supply pressures market lower in Egypt
- France harvest progresses unevenly by region

The milling wheat market is down 50 cents to \$231.75/metric ton on June 26.

A trade was reported for July at \$232.5/mt FOB NOVO on June 26.

"The demand is still weak, which pushes the prices further down," a Russia-based trader said.

"There are a lot of offers for August, but buyers are silent now," a second trader said.

For CIF Marmara, a trade was reported at \$232/mt. "The market is going down now, as the new crop is in the market, which is pushing the prices to go down," a third trader based in Turkey said.

French wheat prices lost further ground on June 26, after a rally during the week, with both FOB and CPT levels easing by about Eur4/mt. A France-based broker confirmed that the CPT Rouen bid level was about Eur3/mt over MU for July/August/September and about Eur3/mt over MZ for October/November/December.

Meanwhile, France's 2026 wheat harvest is progressing unevenly across regions. Collection is at an advanced stage in Aquitaine in southern France, with rates ranging from 55% to 65%, while progress is much slower in areas such as Orléans and Pays de la Loire, where collection remains around 10% to 15%, according to harvest data shared by a broker.

#### Platts Asia Wheat Daily Commentary

- Australian wheat prices weaken
- Slow demand weighs on prices

Australian Premium White and Australian Standard White with no protein guarantee both fell \$3/mt on the day June 26 to \$272/mt and \$267/mt, respectively, partially tracking softer value indications and soft demand, alongside weakness in the Australian dollar.

"The market [is] under a lot more pressure," said an Australian grains broker, who added that wheat values could be \$5-\$10/mt lower from June 29 in some areas.

The Australian dollar was trading at 68.9 US cents at 0830 GMT, down 0.22% from the previous close and 1.59% week over week.

More rain is in store for Australia's wheat belt over the coming eight days, with areas in Victoria, New South Wales, and Western Australia slated to receive as much as 25 mm of precipitation, based

on Australia Bureau of Meteorology's latest rainfall forecast June 26.

In Thailand, feed buyers continue to await updates on quota allocations for the import of US corn at zero tariffs, said a Bangkok-based trade participant.

While the timeline remains uncertain, the same trade participant said feed millers were unlikely to enter the market in the near-term for more feed wheat imports. "For poultry, they [feed mills] prefer using corn. Thailand covered wheat till August shipment already, they still have time for the next position decision," said the same source.

A Philippine feed buyer passed on all offers of feed wheat for late-September arrival in a buy tender closing June 26, according to Asian grains traders.

#### Platts Canada Wheat Daily Commentary

- Futures down 33.25 cents/bu since June 22
- CWRS basis holds despite futures losses

Unchanged but firm market sentiment persisted in the Canadian wheat market June 26 as futures continued to tumble, falling 33.25 cents/bushel since the start of the week.

The September (U) MIAX Hard Red Spring Wheat futures contract closed at 605.25 cents/bu, while the December (Z) contract closed at 630.25 cents/bu.

Platts assessed Canada Western Red Spring Wheat 13.5% FOB Vancouver 30-45 days forward at \$263.18/metric ton on June 26, \$3.58/mt lower day over day. CWRS basis premiums were heard unchanged despite the futures losses amid subdued market activity ahead of the weekend.

Futures declines were driven by rains across the US Plains and Corn Belt as well as traders squared away positions ahead of the US Department of Agriculture's acreage report on June 30.

August activity for CWRS was subdued throughout the week as the window neared and many participants were covered for the period. Interest for later, new crop loading periods were strong, though bids and offers were heard as wide.

A Latin American trader said it was "crazy" how wide the bid-offer range was for October, November, and December.

Earlier in the week, offers for the months were heard ranging between 100-115 cents/bu over Z, with no firm bids heard.

A trade for 5,000 mt of CWRS wheat was heard June 25 for immediate loading to finish a ship at U plus 110 cents/bu, with offers heard at U plus 110 cents/bu.

Platts is part of S&P Global Energy.

## Corn

### Platts Asia Corn Daily Commentary

- Asian corn prices rise on CBOT gains
- South Korea buys two cargoes at \$257.91/mt CFR
- US PNW basis falls, gains competitiveness

Asian corn prices rose day over day June 26, tracking higher Chicago Board of Trade futures and amid several tenders for feed corn from South Korea and the Philippines.

Platts assessed feed quality corn CFR Northeast Asia up 50 cents/mt at \$260.5/mt for cargoes arriving over Sept. 24 to Oct. 24.

In South Korea, two feed milling groups opened tenders for a total of four Panamax cargoes for Nov. 8, Nov. 10, Nov. 16, and Nov. 20 arrival positions.

Only one of the feed milling groups accepted deals, with both

## Platts Latin America Corn Daily Commentary

- Lower prices in Latin America
- Corn harvest reaches 51.2% in Argentina

Platts, part of S&P Global Energy, assessed Latin America FOB corn prices lower June 26, as Chicago Board of Trade futures decreased.

Argentina FOB Up River premiums for August loading and the Brazilian FOB Santos premiums for August loading continued steady during the day.

The Buenos Aires Grain Exchange reported on June 25 that the 2025-26 corn harvest in Argentina reached 51.2% as of June 24, up 3.80% from the previous week but lower than the previous season at the same time.

BAGE reported that corn harvest continues to advance at a moderate to slow pace, largely driven by high moisture levels in both the grain and the fields. This mainly limits the harvesting of remaining early-planted crops in central and southern Buenos Aires.

The US dollar to Brazilian real exchange rate stood at Real 5.1856/\$1 as of 5:30 pm Brasilia time, down 0.16% day over day.

In Brazil's domestic market, prices dropped in the Sorriso and Rio Verde regions amid stability in Maringá region.

According to a buyer, some buyers were out of the market on Paraná state, waiting for the advance of the winter corn harvest, and expecting a decrease in prices.

## Platts US Corn Daily Commentary

- Corn yield CERA forecast drops to 185.5 bu/acre
- USDA report on June 30 drives market focus
- Fertilizer costs and weather raise concerns on yields

The US corn market began looking for the next United States Department of Agriculture stocks and acreage report, which will be released on June 30.

S&P Global CERA analysts lowered their corn yield projection by 0.5 bushel/acre to 185.5 bu/ac for marketing year 2026-27 (September-August) to account for fertilizer and other input costs.

Also, based on analysis of the information reported in the recent S&P Global Energy survey and on evaluations of crop development by early June, CERA updated the US corn planted area forecast to 96.0 million acres.

"Although it is still early in the growing season, the elevated price of fertilizers this marketing year has raised concern over application rates in the US," said CERA Analytics, which noted that weather in July and August remains the primary determinant of final yields.

During the business day, sources in the domestic market said that farmer movement was starting to tick higher amid the potential for a more meaningful market move due to the next USDA releases.

“Weather and stocks and acres could provide a catalyst for a move higher, and trade is bracing,” a broker said.

Platts, part of S&P Global Energy, assessed on June 25 the outright price for July shipments to New Orleans in the incoterm CIF at \$198.35/metric ton and for August shipments at \$203.05/mt. Platts assessed FOB Gulf for September at \$208.56/mt.

## Platts European Corn Daily Commentary

- POC corn holds at \$224/mt
- CVB corn drops \$2 to \$229/mt
- South American supplies dominate Egypt market

Platts, part of S&P Global Energy, assessed Ukrainian corn unchanged at \$224/metric ton FOB POC on June 26, while Romanian and Bulgarian corn was assessed down \$2/mt at \$229/mt FOB CVB.

Market activity in the FOB POC market remained slow, with July offers heard at \$228/mt amid a lack of active bids. Exporters remained uncompetitive in destination markets such as Egypt, where cheaper South American supplies continue to dominate import interest.

Ongoing alternative crop loadings at Ukrainian ports continued to restrict the availability of berths for corn, thereby limiting spot trading activity.

In the CVB market, old-crop prices fell as supply was virtually exhausted and the market shifted to winter barley. A spot coaster cargo was traded out of Constanta at Eur196/mt FOB, at a steep discount, as a multinational seller cleared silo space for incoming barley.

Traders said the CVB-POC spread should be \$3-\$5/mt. Remaining old-crop CVB offers at \$245/mt are considered disconnected from the market and are further pressured by reported quality issues.

## Oilseeds

### Platts Asia Soybean Daily Commentary

- China prices rise \$4.41/mt for month-one Aug shipment
- Market sees about 10 Panamax cargo deals overnight
- Strong crush margins drive buyer activity

CFR China soybean month-one August shipment was up \$4.41/mt on the day at \$497.42/mt June 26, while the basis was up 2 cents/bu at 223 cents/bu over Aug (Q) Chicago Board of Trade (CBOT) futures.

Market activity for CFR China soybeans remained steady overnight, with market participants estimating the total number of deals at around 10 Panamax cargoes, while the week's total

| <b>Latin America</b>                            |         |         |        |        |
| Brazil soybean crush spread FOB Paranagua (Jul) | \$/mt   | ABSCA00 | 36.73  | +0.70  |

was estimated at less than 20 cargoes.

“The CFR China market was very active last night, and so was the domestic market,” said a Chinese broker, who attributed the activity to “buyers not having secured enough inventories, and the soybean crush margins are fine now.”

A second Chinese broker mentioned a possible FOB US soybeans deal conducted by a Chinese buyer, although other traders could not verify this information.

Meanwhile, Brazil-origin CFR China deals were heard at 200-205 cents/bu over November (X) CBOT for August shipment cargoes, similar to the previous day.

Meanwhile, August-September straddle shipment was heard traded at 210-215 cents/bu over November (X) CBOT, while April 2027 cargoes were heard to have been transacted at 100 cents/bu over May (K) CBOT.

Platts is part of S&P Global Energy.

## Platts Brazil Soybean Daily Commentary

- No trades heard in Paranaguá
- CBOT futures decline on favorable US weather, oil losses

Platts assessed the SOYBEX FOB Santos soybean contract for August loading at \$456.19/metric ton on June 26, down 19 cents/mt from the previous assessment.

CBOT soybean futures were steady to marginally lower, primarily driven by favorable US Midwest crop weather and continuous spillover pressure from declining crude oil and soybean oil prices, analysts said.

The 2025-26 soybean harvest in Argentina has reached 98% of the expected area as of June 24, up 0.8 percentage point from the previous week, according to the Buenos Aires Grain Exchange.

Fieldwork still needs to advance, particularly in the central and southern regions of Buenos Aires province, where poor soil conditions continue to limit access for machinery.

The national average yield is estimated at 3.16 mt per hectare, while the production forecast remains unchanged at 50.1 million mt, broadly in line with the 2024/25 season, when Argentina harvested a soybean crop of 50.0 million mt, the exchange said.

Trading activity remained tepid in the Brazilian FOB market, with no trades heard on the day.

A source in the Paranaguá paper market said that “when soybean origination isn’t moving, interest declines considerably in this market.”

The US dollar versus the Brazilian real settled at Real 5.1698/\$1 at 4:30 pm Brasilia time. Domestic soybean prices were lower in the main producing regions.

Platts is part of S&P Global Energy.

## Platts US Soybeans Daily Commentary

- Interior soybean markets remain firm
- CERA forecast 54 million bushels per acre for MY 2026-27

US soybeans market sources reported June 26 that the interior market remains very firm, with trades for July shipments at 90 cents/bushel over July (N) future contracts.

“The discrepancy between the processor market and the export market is on full display, but the export market affects the delivery economics and spreads the most,” a broker source said.

During the week to June 26, sources said it was heard that China purchased two Panamax cargoes, although no confirmation was reported or released by the US Department of Agriculture.

The latest China purchase was the 132,000 mt announced by the US Department of Agriculture in daily sales last week.

On May 17, the White House released a fact sheet on the US-China talks, stating in part that “China will purchase at least \$17 billion per year of US agricultural products in 2026 (prorated), 2027, and 2028, in addition to the soybean purchase commitments that it made in October 2025.”

S&P Global Energy CERA expects that China’s purchase of the full 25 million mt from the US has an over 95% probability.

Related to the next USDA stocks and acreage report, which will be released June 30, CERA left the new crop export forecast unchanged at 54 million bushels per acre for the marketing year 2026-27 (September-August).

Platts SOYBEX FOB New Orleans for August shipment was assessed at \$455.07/metric ton on June 26, down 18 cents from June 25, and the CIF New Orleans basis for July shipment was assessed at 90 cents/bu over the July (N) soybeans futures contract.

## Animal Feed

### Platts Latin America Soybean Meal Daily Commentary

- FOB prices slide amid lower CBOT futures
- Wage talks paused in Argentina after no deal
- Argentina's soy harvest hits 98% completion: BAGE

South American soybean meal FOB prices decreased June 26 amid lower Chicago Board of Trade futures and slow market activity.

Nearby premiums strengthened in Brazil's FOB Paranaguá, as traders adjusted basis indications to the CBOT's losses. Price discussions for August shipments were last seen at \$2-\$4/short over the future benchmarks, with no trades confirmed.

Regarding Argentina, the FOB Up River cargo market was mostly quiet, with traders' attention on strike threats.

According to sources and media reports, Argentine oil workers and exporters agreed to a recess until June 29, extending a weekslong wage dispute marked by stalled negotiations. Despite signs of a breakthrough, the government requested more time for talks under a mandatory conciliation.

The Argentine soybean harvest for the current 2025-26 season was 98% complete by June 24, the Buenos Aires Grain Exchange said in a weekly report issued June 25.

"Work is still ongoing [...] mainly in central and southern Buenos Aires, where the lack of firm soil continues to make it difficult for the machinery to enter, delaying the completion of the campaign," BAGE said, keeping its output estimate for the season at 50.10 million mt.

The CBOT August (Q) contract settled at \$304.20/short ton, down \$1.80/st.

### Platts European Animal Feed Daily Commentary

- Dutch feed prices remain stable June 26
- Spanish soymeal premiums rise

#### Northern Europe

The Dutch market remained active, with prices stable on June 26.

A trader said that physical availability from the origin is now influencing prices across Europe.

Another Dutch trader observed that "August-September prices are lower compared to spot markets."

#### Southern Europe

The Spanish soymeal and corn markets were unchanged during the day.

A Spanish soybean meal trader said, "Premium prices have increased by around Eur4 (from Eur28 to Eur32), and the CBOT has also rebounded from approximately \$300," which has driven prices higher.

Another trader noted that "the market continues to delay its structure, with cheaper offers available for the August-September

### Platts US Distiller Grains DDGS Daily Commentary

- Summer values continue to drift
- Competition feeds DDGS pressure

The US dried distillers grains with solubles market remained quiet June 26, with participants reporting continued pressure on summer values as buyers delayed purchases ahead of the July Fourth holiday.

Platts assessed CIF New Orleans dried distillers grains with solubles barges for the July shipment period at \$181/short ton June 26, the Chicago DDGS truck market for the July delivery period at \$162/st, and the South California rail market for the July delivery period at \$209/st.

One trader said market conditions were largely unchanged.

"I don't see anything different today ... super quiet," the trader said.

A broker said nearby values continued to soften.

"Values drifting for certain out here for the summer," the broker said.

The broker added that few buyers had stepped in to replace coverage.

The broker added that declining prices for competing feed ingredients continued to pressure DDGS.

“Soybean meal basis has been drifting south, and canola meal has fell off as well,

the source said. “Other co-products also falling.”

While plants were trying to stimulate demand, “many already made other commitments,” and inventories are beginning to build, the broker said. “Warehouses are starting to fill up too.”

The broker added that market participants were also watching discussions around potential year-round E15 availability, which could encourage ethanol plants to maintain higher operating rates if adopted.

Market participation remained subdued.

“Pretty quiet today, much of the same as yesterday,” the broker said.

The broker said many end-users remained in wait-and-see mode ahead of next week’s holiday.

A trader in Mexico also described a softer market.

“Everything is moving lower,” the trader said.

The trader added that sales volumes remained healthy.

## Vegetable Oils

### Platts Asia Palm Oil Daily Commentary

- Asian palm oil prices rise
- Malaysia production up 16.92% in June

The Asian palm oil market rose on June 26, as palm oil futures on Bursa Malaysia rebounded, following a rise in US soybean oil and other rival vegetable oils on Dalian Commodity Exchange.

B50 Indonesia’s energy minister announced that, with the B50 biodiesel mandate set to be implemented on July 1, it will include a three-month transition period where retailers can clear their existing inventories.

Meanwhile, Malaysia’s Southern Peninsular Palm Oil Millers Association reported, on June 26, an increase in palm oil production for June 1-25 compared to the same period last month. Yield increased 16.34%, oil extraction rose 0.11%, and overall production surged 16.92%.

The benchmark palm oil contract for September delivery on the Bursa Malaysia commodity exchange rose MR8/mt to MR4566/mt on June 26.

The Indian market is quiet with no trades heard, with buyers waiting for more favorable prices.

“Buyers are not chasing the market when the price increasing as they don’t aggressive on buying and waiting for a lower price,” an India-based trader said.

Platts assessed CPO CFR WC India price at \$1,320/mt June 26 for July loading, up \$10/mt from June 25, while August shipment was \$7.50/mt higher than July.

## Platts Latin America Soybean Oil Daily Commentary

- South American soy oil stays firm amid CBOT drop
- FOB basis recovery offsets futures weakness
- Argentine labor talks extended to avoid strikes

South American soybean oil markets remained resilient during the week ended June 26 despite continued volatility in Chicago Board of Trade soybean oil futures, as recovering FOB basis levels and stable physical demand largely offset weakness in US

futures. CBOT August soybean oil futures traded in a relatively wide range during the period, settling at 69.82 cents/lb June 26 after falling to a weekly low of 68.25 cents/lb June 24 before recovering during the final two sessions. Market participants said futures continued to face pressure from favorable US crop conditions, expectations for abundant global soybean supplies and ongoing speculative fund liquidation following the rally to multiyear highs earlier in June. However, South American FOB soybean oil markets remained comparatively firm. Argentine FOB Up River August values finished the week at \$1,162.28/mt, while Brazilian FOB Paranaguá August values settled at \$1,173.30/mt. Although basis levels softened modestly late in the week as CBOT futures recovered, they remained substantially stronger than the record discounts observed in early June, allowing physical export values to remain relatively stable despite the correction in futures.

The divergence between futures and physical markets remained the dominant market theme throughout the week. Traders said recovering basis levels continued to offset much of the weakness in CBOT soybean oil futures, reflecting steady export demand rather than any meaningful tightening in South American soybean oil supplies. Buyers in key destination markets, particularly in Asia and parts of the Middle East, were reported to be actively covering near-term requirements, taking advantage of the recent dip in outright prices while remaining cautious about longer-term commitments. This steady demand helped underpin FOB values even as futures markets fluctuated.

Record soybean production and crush forecasts in Brazil continued to provide a comfortable supply backdrop, with Conab maintaining its 2025-26 soybean crop estimate at 180.13 million mt and Abiove projecting Brazilian soybean processing at a record 62.5 million mt. The robust crush outlook implies ample availability of soybean oil for export, reinforcing expectations that South America will remain a key supplier to global markets in the coming months. At the same time, logistical conditions in Brazil were reported to be generally smooth, with port lineups manageable and freight rates relatively stable, further supporting export flows.

Meanwhile, the latest CFTC Commitments of Traders report reinforced the view that much of June's correction has been driven by speculative positioning rather than deteriorating physical fundamentals. Managed Money continued reducing bullish soybean oil exposure through June 23, extending the sharp liquidation that has accompanied the roughly 9% decline in CBOT soybean oil futures since the end of May. Market participants noted that while speculative selling has weighed on futures, it has not translated into a corresponding drop in physical demand, highlighting the disconnect between paper and physical markets.

Attention also remained focused on Argentina's oilseed wage negotiations throughout the week. Trading activity was initially subdued by uncertainty surrounding a possible strike in the Rosario Up River export corridor, while liquidity was also reduced June 22 during Argentina's FIFA World Cup match against Austria.

After a 12-hour negotiating session concluded without a wage agreement early June 26, unions and exporters agreed, at the request of Argentina's Labor Ministry, to extend negotiations until June 29 while maintaining social peace and avoiding immediate strike action. Although the earlier strike threat prompted some export terminals to temporarily restrict truck delivery quotas, reducing arrivals into port, no disruptions to soybean crushing or soybean oil export flows were reported.

Market participants said attention has now shifted to the June 29 meeting, while emphasizing that the Rosario Up River corridor remains Argentina's principal hub for soybean crushing, soybean meal exports and soybean oil shipments, making labor negotiations a key market risk to monitor. Any escalation in labor tensions could quickly tighten nearby supply availability and support FOB premiums, particularly given Argentina's central role in global soybean oil trade.

Looking ahead, traders expect soybean oil markets to remain sensitive to developments in US weather, macroeconomic sentiment and currency movements, particularly the Brazilian real and Argentine peso. Continued volatility in CBOT futures is likely, but as long as export demand remains steady and logistical flows are uninterrupted, South American FOB markets are expected to maintain relative firmness. The interplay between speculative activity and underlying physical demand will remain a critical factor shaping price direction in the weeks ahead.

## Platts Europe Vegetable Oil Daily Commentary

- Prompt rapeseed market remains broadly balanced
- New-crop sunflower outlook remains broadly favourable
- Harvest conditions remain under close market scrutiny

European vegetable oil markets were mixed, with nearby rapeseed oil holding steady while deferred positions were mixed and sunflower oil remained unchanged. FOB Black Sea sunflower oil held at \$1,379/mt, reflecting continued stability in the Black Sea market. RSO FOB Dutch Mills front-month remained unchanged at Eur1,157/mt, while the second position increased Eur 3/mt to Eur1,155/mt. Third position was unchanged at Eur1,138/mt, and fourth position gained Eur/mt 2 to Eur1,137/mt. The relatively stable forward curve suggests that participants remain balanced between current supply conditions and expectations for the upcoming harvest.

The stability in prompt rapeseed oil indicates that nearby supply and demand remain broadly balanced. Buyers appear adequately covered for prompt requirements, while modest strength in deferred positions suggests that market participants remain cautious about new-crop availability, despite improving crop conditions across Europe and the Black Sea region.

Fresh market commentary from a source based in Ukraine indicates that new-crop sunflower prospects remain broadly favorable. The source stated they are "monitoring" conditions and that "so far no major concerns" have emerged, adding that "over 13 million mt sunflower seeds expected." This suggests

current production expectations remain intact, with the market continuing to anticipate a sunflower seed crop exceeding 13 million mt in Ukraine. While this outlook limits upside potential for new-crop values, participants remain focused on weather developments during the critical growing period before fully pricing in larger supplies.

In Europe, the market is shifting from old-crop tightness to monitoring new-crop fundamentals. Stable sunflower oil prices continue to reflect limited nearby availability, while the absence of significant production concerns is preventing a stronger weather premium from developing. The firmness in deferred rapeseed oil positions indicates that participants are maintaining some harvest risk premium despite broadly favorable crop expectations, leaving the market well supported but lacking a strong directional catalyst.

## News

### GLOBAL ANIMAL FEED WEEKLY: Argentina strike threat weighs on South American meal market

- Brazil crushes 5.60 million mt of soybeans in April
- US DDGS export demand remains weak

#### South American soybean meal

South American soybean meal export prices had mixed movements over the past week, as market activity slowed amid concerns over a potential strike in Argentina.

Platts assessed the Argentine soybean meal FOB Up River for August shipment at \$334.22/metric ton on June 26, down 0.2% week on week. The Brazilian FOB Paranaguá for the same delivery period, in turn, increased 1.3% to \$338.63/mt.

Traders in recent days have monitored negotiations between unions and Argentina's soybean-crushing industry over wage demands. Workers had threatened strike action in late May, but a mandatory conciliation order imposed by the government allowed operations to continue normally since then.

That conciliation period expired on June 25, and according to sources and media reports, Argentine oil workers and grain exporters agreed to a recess until June 29, extending a weeks-long wage dispute marked by stalled negotiations.

In other news, traders also followed the pace of soybean crushing in Brazil.

According to the Brazilian Association of Vegetable Oil Industries, Abiove, Brazil crushed 5.60 million metric tons of soybeans in April, in line with S&P Global Energy CERA analysts' expectations.

"Crush margins continue to show profitability, supported by resilient soybean meal and oil prices driven by firm demand from both domestic markets and exports," the analysts said.

For 2026, Abiove forecasts that Brazil will produce and

export 48.60 million mt and 24.95 million mt of soybean meal, respectively.

#### EU soybean meal

The European soybean meal firmed during the week ending June 26.

Platts assessed FOB Netherlands at Eur348.5/mt up by Eur4.5/mt and EXW Spain at Eur345/mt up by Eur1/mt on June 26, week over week.

A Spanish trader said that soymeal prices for the June–July period have moved higher over the past 2–3 days, driven by a combination of euro-dollar exchange-rate movements, higher futures, and the market becoming tight again. Despite the firmer price tone, he said demand in the Spanish market remains quiet.

Another trader confirmed this, saying the bidding levels have increased to Eur345-350/mt.

A Netherlands based trader said that, "prices are increasing now amid tight supply from origin, and the spread between July and August is about Eur1-2/mt".

#### US DDGS

The US dried distillers grains with solubles market remained under pressure during the week of June 22-26, with participants reporting weak export demand, subdued domestic buying and continued price declines as summer market conditions weighed on sentiment.

Platts assessed CIF New Orleans dried distillers grains with solubles barges for the July shipment period at \$181/short ton on June 26, the Chicago DDGS truck market for the July delivery period was assessed at \$162/st and the South California rail market for the July delivery period was assessed at \$209/st.

Participants described a quiet trading environment throughout the week, with nearby values continuing to soften after the sharp correction seen since the start of June.

"June seems quiet to me right now," one trader said early in the week adding that CIF indications were "closer to bid."

A broker said the market continued to weaken in nearby positions. "Looks like we have dropped a bit more last week too out there for the summer," the broker said, attributing much of the weakness to seasonal demand. "Need export demand badly."

"Exports are not good. Very quiet there," another broker said midweek, adding that domestic buyers are aware of the lack of international support. Another trader added that low liquidity was further limiting transactions. "The liquidity being so low won't allow for much trade."

Beyond seasonal demand weakness, a third broker argued that DDGS is also losing competitiveness against alternative feed ingredients. "Demand has moved away from DDGS," the broker said. "Soymeal and corn are king again."

The broker also said concerns over DDGS quality consistency, pricing and execution have reduced buyer confidence worldwide, particularly among large livestock feeders accustomed to purchasing several months forward. According to the source,

uncertainty surrounding production decisions linked to the 45Z tax credit has made some producers reluctant to commit to longer-term volumes, complicating end-user procurement.

While nearby demand remained weak, some support emerged further forward. "New crop offers firmed a touch with the board firmer," the second broker said, although the source added that "summertime [is] still weak."

Platts is part of S&P Global Energy.

## Argentina oilseed wage talks extend to June 29 as strike risk eases

- Twelve-hour meeting ends without an agreement
- Strike risk eases as parties maintain social peace
- Port operations resume after terminals restrict trucks

Negotiations between Argentine oilseed workers and grain and byproduct exporters were extended to June 29 after a 12-hour meeting ended without a wage agreement, although unions and exporters agreed to maintain social peace and avoid immediate strike action.

The meeting ended at about 2 am local time June 26 without a final agreement. At the request of Argentina's Labor Ministry, the parties moved to an intermediate recess until June 29 at 1:30 pm local time, according to a statement from the Union of Oil Workers and Employees of the San Lorenzo Department (SOEA) and the Federation of Workers of the Oilseed Industrial Complex.

The unions said they remain committed to reaching a salary agreement that meets the needs of workers, while export sources also confirmed that negotiations would continue June 29.

The dispute centers on wage negotiations that have lasted several weeks and previously led to a brief strike and mandatory conciliation. Unions had recently warned that they could reactivate strike action if no progress was made.

Market participants said no strike had been confirmed as of June 26, and the immediate risk of labor action appeared to have eased after both sides agreed to continue negotiations.

But the earlier threat of an imminent strike had already affected operations at some export terminals. Market sources said some terminals restricted the issuance of truck delivery quotas amid concerns of a possible labor action, reducing port arrivals. With strike action now avoided for the moment, participants said port admissions are expected to increase gradually in the coming hours.

Agricultural markets are closely watching Argentina's oilseed wage negotiations because the Rosario Up River export corridor is the country's main hub for soybean crushing, soybean meal exports, and soybean oil shipments. Any disruption to operations in the region could affect grain processing, port activity, and by-product exports.

For now, traders said the focus has shifted to the June 29 meeting, when unions and exporters are expected to resume

negotiations to reach a wage agreement and avoid renewed strike risk.

Platts is part of S&P Global Energy.

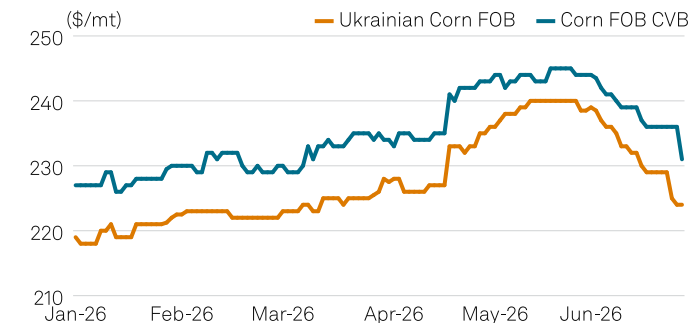

## Black Sea corn weakens as Ukrainian exports lose competitiveness

- Black Sea corn prices fall on weak demand
- Ukrainian exports lose edge to South America
- Egypt, Turkey reduce purchases through August

Black Sea corn prices declined in the week to June 26 as Ukrainian exporters faced mounting challenges competing with South American origins in key destination markets, amid limited port access and weakening demand from major buyers, which constrained trading activity.

Platts, part of S&P Global Energy, assessed Ukrainian corn at \$224/mt FOB POC on July 25, while Romanian and Bulgarian corn was assessed at \$231/mt FOB CVB for July 23-August 6 loading periods for Handysize cargoes.

### Platts Black Sea Corn Assessments

Source: S&P Global Energy

Prices are under pressure from ongoing shipments of alternative crops at Ukrainian ports, which have limited the number of available loading berths for corn, restricted immediate spot trading activity and created logistical bottlenecks for exporters. This infrastructure constraint has coincided with Ukrainian corn remaining overpriced compared to South American origins, making it less attractive to international buyers seeking competitive pricing.

Traders across Europe said that while the regional corn market is currently illiquid, the barley market remains active, highlighting the seasonal shift in grain trading patterns.

### Market dynamics

Egyptian buyers, traditionally a key destination for Black Sea corn, are well covered through August with South American cargoes and have shifted their focus to new-crop shipments in the next market year. This shift in procurement strategy has removed a significant source of near-term demand for Ukrainian and regional corn supplies.

In Turkey, another important Black Sea corn market, demand

has wound down ahead of the July 31 import quota deadline. Port storage constraints in Turkish facilities are limiting new corn trades, further reducing immediate buying interest from this key regional market.

The CVB corn market has lacked liquidity as old-crop supplies were effectively exhausted, according to market participants. Romanian sellers have prioritized clearing remaining warehouse stocks to prepare storage facilities for the incoming winter barley and rapeseed harvests, indicating the transition period between crop seasons.

## US 2026 corn crop off to good start as farmers weigh fertilizer costs, diesel prices

- Farmers face high fertilizer, fuel costs
- July-August weather to determine yields
- 68% of US corn rated good-to-excellent

US corn farmers say the 2026 crop is off to a generally good start despite a planting season disrupted by cold snaps, rain delays and wind, along with machinery problems and elevated input costs, including fertilizers, nitrogen and fuel.

Fertilizer decisions are one of the key questions for this year's crop. With prices high, many farmers are adjusting application rates—especially cutting back on nutrients where the risk is seen as more manageable in the short term.

Nick Petterson, secretary of the Minnesota Corn Growers Association Board of Directors, and a farmer in Clear Lake, Minnesota, said some farmers made acreage changes before planting, mostly shifting some corn ground to soybeans because of fertilizer and other input costs.

"Farmers changed their minds and put some more soybean acres in," Petterson said to Platts.

He estimated acreage shifts in his area may have reached around 10%. On his own farm, he said only one field, around 5% of the acres, moved from corn to soybeans.

"I hear something similar talking to various people in the market," said a trader source from Kentucky.

Platts assessed Ammonia CFR USGC at \$725/mt on June 24, an increase of 74% compared to the same day prior year, \$417/mt.

In central Illinois, Mark Bunselmeyer, president of the Illinois Corn Growers Association and a farmer in Maroa, said the planting window was fairly typical, though bouts of helpful and unhelpful rain caused delays and led some acres to be replanted, with wind adding another challenge.

"Excessive wind caused sprayers to be parked," he said.

Bunselmeyer said machinery breakdowns also added stress, but planting was completed successfully. Unlike some farmers who shifted acres in response to high fertilizer costs, he said his farm kept its original crop plan.

"Our fertilizer was purchased and applied last fall," he said.

Bunselmeyer said his farm used variable-rate applications to focus fertilizer where it was most needed and reduce some costs.

Fuel prices have also weighed on this planting season.

According to farmers and the National Corn Growers Association, fuel prices rose sharply in the middle of the planting season, when the average farm diesel price reached a record high \$5.41 per gallon in May.

"Current diesel prices are nearly double a year ago, while corn prices are slightly lower, worsening the diesel-to-corn exchange rate," NCGA said in a statement.

## Corn quality

The latest USDA Crop Progress report showed 68% of the US corn crop rated in good-to-excellent condition for the week ended June 21, unchanged from the previous week. However, the rating remains below the 70% good-to-excellent rating reported during the same week last year. The gap has narrowed from the prior week, when the comparison stood at 68% this year versus 72% a year earlier.

Mindy McMurtry, senior analyst at S&P Global Energy CERA, said current condition ratings should be treated cautiously because it is still early in the season, but the overall signal is positive.

CERA's fertilizer survey also points to limited yield damage from fertilizer adjustments. McMurtry said the firm lowered its corn yield projection by only 0.5 bushel per acre to account for the risk, to 185.5 bu/ac for marketing year 2026-27 (September-August).

According to McMurtry, weather and not fertilizer application "should be the major factor" this season.

She said some parts of the Eastern Corn Belt are too wet, while areas of the Western Corn Belt are beginning to dry out, adding that the broader condition rating points to a good start.

That is also how farmers are viewing the season. Bunselmeyer said his crop looks good after a dry stretch following planting and recent rains, though cooler temperatures may slow growth. He also noted that some areas were hit by wind and hail.

Farmers and S&P Global Energy CERA analysts say the biggest test is still ahead, with July and August weather likely to determine whether early optimism turns into strong yields.

"The key weeks for the crop are still ahead," McMurtry said, referring to July and August.

Petterson said some farmers may have reduced nitrogen modestly, but he does not believe widespread cuts were large enough to meaningfully damage corn quality at this stage. The farmer also said that the cold spell came while much of the crop was already planted, delaying emergence.

"There were some freezes while a lot of the crop was in the ground," he said. "That just kind of delayed the crop."

Even so, he said the crop now appears to be in decent shape.

Platts, assessed on June 24 the outright price for July shipments of yellow corn to New Orleans CIF at \$196.05/mt and for August shipments at \$199.90/mt, while FOB Gulf for September was assessed at \$205.41/mt.

## Assessment Rationale

### Grains

#### Platts Ags EMEA Wheat Daily Rationale

Platts assessed the Milling Wheat Marker at \$231.75/metric ton June 26, down 50 cents/mt from the previous assessment.

Russian 12.5% handysize wheat, assessed at \$231.75/mt, was the most competitive wheat out of the three components of the Milling Wheat Marker, which also includes Ukraine 11.5%, normalized to the nearest 25 cents of \$235.5/mt when adding wheat quality normalization of \$6.15/mt, to account for its lower protein content, and CVB 12.5% wheat assessed at \$239/mt on the day. This reflects the Platts assessment window from July 24-Aug. 7.

Platts assessed Black Sea wheat (Russian deepsea, 12.5% protein) down 50 cents/mt at \$231.75/mt June 26, in parallel with a trade happened on the day at \$232.5/mt for July and at \$231/mt for August, above the bid at \$230/mt for July and August and below the offer at \$232/mt for August. The market is in a backwardation of \$1.5/mt and was assessed between H2 July and H1 August. This reflects the Platts assessment window from July 24-Aug. 7.

Platts assessed Black Sea wheat (Ukraine deepsea, 11.5% protein) unchanged at \$229/mt June 26, in parallel with a tradable level at \$229/mt, below an offer at \$232/mt. This reflects the Platts assessment window from July 24-Aug. 7.

Exclusions: No market data was excluded from the June 26 Black Sea wheat assessments.

Platts is part of S&P Global Energy.

This rationale applies to symbol (s) <BSMWM00>, <WRBSD00>, <WUBSA00>

#### Platts Asia Wheat Daily Assessment Rationale

Platts assessed Australian Premium White wheat down \$3/mt at \$272/mt FOB Kwinana June 26 for cargoes loading between

Aug. 25 and Sept. 24, partially tracking lower indicative value and a weak Australian dollar.

Platts assessed Australian Standard White wheat with no protein guarantee down \$3/mt at \$267/mt for cargoes loading over the same period, partially tracking lower indicative value.

This maintains a \$5/mt spread between Australian Premium White and Australian Standard White with no protein guarantee.

Platts is part of S&P Global Energy.

Asia wheat assessments can be found on <PAA2440>

Market commentary can be found on <PAA2699>

This rationale applies to symbol(s) <WAUSA00>

### Platts Canada Wheat Daily Rationale

Platts assessed Canada Western Red Spring Wheat 13.5% FOB Vancouver 30-45 days forward at \$263.18/metric tons on June 26, \$3.58/mt lower than June 25.

CWRS Wheat 13.5% FOB Vancouver basis 30-45 days forward, spanning July 26-Aug. 10 was assessed unchanged at MIAH Hard Red Spring Wheat September (U) futures plus 111 cents/bushel.

CWRS Wheat 13.5% FOB Vancouver basis 45-60 days forward, spanning Aug. 10-25 was assessed unchanged at U plus 111 cents/bushel.

CWRS Wheat 13.5% FOB Vancouver basis 60-75 days forward, spanning Aug. 25-Sept. 9 was assessed unchanged at U plus 105 cents/bushel.

The assessments considered stable basis sentiment.

Exclusions: No data was excluded in the assessments.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <AWHCA00> <AWHCB00> <AWHCC00> <AWHCD00> <AWHCE00> <AWHCF00>.

### Platts Asia Corn Daily Rationale

Platts assessed corn CFR Northeast Asia up 50 cents/metric ton day over day at \$260.5/mt CFR June 26 for feed-quality corn arriving over Sept. 24 to Oct. 24 into Pyeongtaek, below a normalized indicative offer at \$260.68/mt CFR.

Platts is part of S&P Global Energy.

Asia corn assessments can be found on <PAA2440>

Market commentary can be found on <PAA2688>

This rationale applies to symbol(s) <WCINV00>

### Platts Argentina Corn FOB Up River Daily Rationale

Platts assessed corn FOB Up River for loading in August at \$203.84/metric ton on June 26, 98 cents/mt lower from the previous assessment.

The assessment considered the FOB premium for Up River August-loading unchanged at plus 96 cents/bu to Chicago Board of Trade September (U) corn futures, based on higher offers heard at U plus 100 cents/bu and higher bids heard at U plus 95 cents/bu at the market close. The higher bid level did not disprove the previous price assessment.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <ARGCA00> <ARGCB00>

### Platts Brazil Corn Daily Rationale

Platts assessed the Brazilian corn FOB Santos price for August loading at \$214.46/metric ton on June 26, 98 cents/mt lower from the previous assessment.

The assessment considered the FOB Santos basis for August loading cargoes unchanged at plus 123 cents/bu to the Chicago Board of Trade September (U) contract, based on steady offers for August H1 loading at U plus 130 cents/bu and no bids heard at the market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <ABCSA00> <ABCSB00>

### Platts US Corn Daily Assessment Rationale

Platts assessed the US Yellow Corn No. 2 CIF New Orleans barge basis for July shipment at 91 cents/bu over the Chicago Board of Trade July (N) corn futures contract on June 25, up 3 cents from the previous assessment. This was based on a trade heard at 91 cents/bu. In the session, a competitive bid was heard at 90 cents/bu, and a competitive offer at 92 cents/bu.

Platts assessed the US Yellow Corn No. 2 CIF New Orleans barge basis for August shipment at 94 cents/bushel over the CBOT September (U) corn futures contract on June 26, up 2 cents in comparison with the previous business day. This was based on a competitive bid heard at 93 cents/bu, and offers at 95 cents/bu.

Platts assessed the US Yellow Corn No. 2 FOB Gulf basis for September shipments at 106 cents/bu over the CBOT September (U) corn futures contracts on June 26. This was based on offers heard at 115 cents/bu for the first half of September, and 122 cents/bu for the second half of the month.

No information was excluded.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <WCNOE00> <WCNOU00>

### Platts FOB Black Sea Corn Daily Assessment Rationale

Platts assessed Ukrainian corn unchanged at \$224/metric ton FOB POC June 26, below an offer for July loading heard at \$228/mt. There were no bids heard in the market within the assessment window. The structure between the second half of July and the first half of August was assessed flat. This reflects the Platts assessment window from July 24 to Aug. 7.

Exclusions: No market data was excluded from the June 26 Black Sea corn assessment.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <CUBSU00>

### Oilseeds.

### Platts Asia Soybeans Daily Rationale

Platts assessed CFR China first-month soybeans up \$4.41/mt day over day at \$497.42/mt, while the basis was up 2 cents/bu at 223 cents/bu over Aug (Q) CBOT June 26, below the sharpest offer at 228 cents/bu over Aug (Q), and tracking higher normalized indicative values at 219-225 cents/bu over August (Q) for Brazil August shipment.

Platts assessed CFR China second-month soybeans up \$4.68/mt day over day at \$505.13/mt, while the basis was up 2 cents/bu at 225 cents/bu over Nov (X) CBOT, below the sharpest offer at 230 cents/bu over November (X), and tracking indicative values at 225 cents/bu over November (X), for Brazil September shipment.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYBAB00> <SYBAA00> <SYBAF00> <SYBAD00> <SYBAC00> <SYBAE00>

### Platts Brazil Soybean Daily Assessment Rationale & Exclusions

Platts assessed the SOYBEX FOB Santos soybean contract for August loading at \$456.19/metric ton on June 26, down 19 cents/mt from the previous assessment.

The FOB Santos basis for August loading was unchanged at plus 105 cents/bushel to the Chicago Board of Trade August (Q) contract, based on a spread to the Paranaguá paper market last heard at parity. No bids or offers were heard for the full August loading of FOB Santos cargo on the day.

The FOB Paranaguá basis for August loading was unchanged at plus 105 cents/bu to the CBOT (Q) contract, based on steady bids at Q plus 100 cents/bu and lower offers at Q plus 107 cents/bu at the market close. The lower offer did not disprove the previous assessment.

Platts assessed the SOYBEX FOB Santos soybean contract for March loading at \$430.10/mt on June 26, unchanged from the previous assessment.

The FOB Santos basis for March loading was unchanged at minus 5 cents/bu to the CBOT March (H) contract, based on a spread to the Paranaguá paper market last heard at parity. No bids or offers were heard for the full March loading of FOB Santos cargo on the day.

The new crop FOB Paranaguá basis for March loading was unchanged at minus 5 cents/bu to the CBOT March (H) contract, based on steady bids at H minus 10 cents/bu and higher offers at H plus 2 cents/bu at market close.

Exclusions: No data was excluded.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYBBC00> <SYBBF00> <SYBBD00> <SYBBH00> <SYBBA00> <SYBBE00> <SYBBB00> <SYBBG00>

### Platts US Soybeans Daily Rationale

Platts SOYBEX FOB New Orleans for August shipment was assessed at \$455.07/metric ton on June 26, down \$0.18 from June 25. The FOB Gulf basis for August shipment was assessed at 102 cents/bushel over the Chicago Board of Trade August (Q) soybeans contract on the day, unchanged from the previous business day. No bids or offers were heard.

The CIF New Orleans basis for July shipment was assessed at 90 cents/bu over the July (N) soybeans futures contract on the day. This was based on a trade heard at 90 cents/bu, followed by competitive bids heard at the same value, 90 cents/bu, and offers at 93 cents/bu.

No information was excluded.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYBBI00> <SYBBL00> <SYBBK00> <SYBBJ00>

### Animal Feed and Protein

#### Platts Argentina Soybean Meal Daily Rationale

Platts assessed the Argentine soybean meal FOB Up River price for August loading on June 26 at \$334.22/metric ton, \$1.98/mt lower than the previous assessment.

The basis for August loading in the Up River cargo market was unchanged at minus \$1/st to the August (Q) futures at the Chicago Board of Trade. The assessment considered steady offers at par and steady bids at minus \$2/st to the CBOT Q contract at market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYMAA00> <SYMAB00>.

#### Platts Brazil Soybean Meal Daily Rationale

Platts assessed the Brazilian soybean meal FOB Paranaguá price for August loading on June 26 at \$338.63/metric ton, 88 cents/mt lower than the previous assessment.

The basis for August loading in the Paranaguá paper market was assessed \$1/short ton higher at plus \$3/st to the August (Q) futures at the Chicago Board of Trade. The assessment considered an indicative value heard at that level, higher bids at plus \$2/st, and higher offers at plus \$4/st to the CBOT Q contract at market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYMBA00> and <SYMBB00>.

### Platts US Dried Distiller Grains DDGS Daily Assessment Rationale

Platts assessed CIF New Orleans dried distillers grains with solubles barges for the July shipment period at \$181/short ton on June 26, based on a bid heard at \$180/st and an offer heard at \$185/st.

The Chicago DDGS truck market for the July delivery period was assessed at \$162/st, unchanged from June 25, amid no disproving information.

The South California rail market for the July delivery period was assessed at \$209/st, based on a bid heard at \$206/st and an offer heard at \$212/st.

Platts is part of S&P Global Energy.

This rationale applies to symbols <ACDDG00> <AADDG00>.

### Vegetable Oils.

#### Platts Asia Palm Oil Daily Rationale

Platts assessed CPO CFR WC India price at \$1,230/mt June 26 for July loading, up \$10/mt from June 25, below an offer and above a bid.

CPO offer was heard at \$1,232.5/mt and a bid at \$1,227.50/mt on a CFR WC India basis, shipping in July.

August shipment of CPO CFR WC India was at \$1,237.50/mt June 26, up \$7.5/mt from June 25, considering a \$7.50/mt carry between July and August.

Platts assessed CPO FOB Indonesia price at \$1,195/mt June 26 for July loading, up \$7.50/mt from June 25, below an offer and above a bid.

CPO offer was heard at \$1,205/mt and an indicative bid at \$1185/mt on a FOB Dumai basis, shipping in July.

August shipment of CPO FOB Dumai was at \$1,202.50/mt June 26, up \$5/mt from June 25, considering a \$7.50/mt carry between July and August.

Platts assessed the RBDPS FOB Indonesia price at \$1,060/mt June 26 for July loading, up \$10/mt from June 25, below an offer and above a bid.

RBDPS offer was heard at \$1,080/mt and an indicative bid at \$1,040/mt on a FOB Dumai basis, shipping in July.

August shipment of RBDPS FOB Dumai was at \$1,067.5/mt June 26, up \$7.50/mt from June 24, considering a \$7.50/mt carry between July and August.

Platts assessed the PFAD FOB Indonesia price at \$997.50/mt June 26 for July loading, up \$2.50/mt from June 25, below an offer and above a bid.

PFAD offer was heard at \$1,015/mt and an indicative bid at \$970/mt on a FOB Dumai basis, shipping in July.

August shipment of PFAD FOB Dumai was at \$1,005/mt June 26, unchanged from June 25, considering a \$7.50/mt carry between July and August.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <ACPOA00> <ACPOB00> <APFAD00> <ARBSA00>

### Platts Argentina Soybean Oil Daily Rationale

Platts assessed the Argentine soybean oil FOB Up River price for August loading at \$1,162.28/mt June 26, up \$3.97 from June 25. The basis for August loading in the Up River paper market was assessed 10 points lower at minus 1,710 points to August (Q) futures at the Chicago Board of Trade. The assessment

considered an indicative value last heard at that level, bids at minus 1,780 points and offers at minus 1,590 points to the CBOT Q contract at the market close. No trades were confirmed before the market close for August loading in the FOB Up River paper market June 26.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYOAA00> <SYOAB00>

### Platts Brazil Soybean Oil Daily Rationale

Platts assessed the Brazilian soybean oil FOB Paranagua price for August loading at \$1,173.30/mt June 26, up \$6.17 from June 25. The basis for August loading in the Paranagua paper market was unchanged at minus 1,660 points to the August (Q) futures at the Chicago Board of Trade. The assessment considered an indicative value last heard at that level, offers at minus 1,640 points and bids at minus 1,680 points to the CBOT Q contract at the market close. No trades were confirmed before the market close for August loading in the FOB Paranaguá paper market June 26.

Platts assessed the Brazilian soybean oil FOB Paranagua price for September loading at \$1,162.72/mt June 26, up \$3.53 from June 25. The basis for September loading in the Paranagua paper market was unchanged at minus 1,600 points to the September (U) futures at the Chicago Board of Trade. The assessment considered an indicative value last heard at that level, offers at minus 1,570 points and bids at minus 1,700 points to the CBOT U contract at the market close. No trades were confirmed before the market close for September loading in the FOB Paranaguá paper market June 26.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYOBB00> and <SYOBA00>.

### Platts Europe Sunflower Oil Daily Rationale

Platts assessed sunflower oil FOB Black Sea Ukraine for August unchanged on June 26 at \$1,379/mt, below an offer heard at \$1,380/mt.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SFWBL00>
