Commentary and Analysis

Wheat

Platts European Wheat Daily Commentary

- Russian, Egypt wheat prices fall slightly
- Bangladesh tenders for 50,000 mt wheat June 24

The Russian market fell marginally on June 11, with some sellers seen offering at lower levels for H1 July.

Meanwhile, sellers also noted that demand was slightly picking up, with Asian and Middle Eastern buyers showing interest.

In line with the Russian market, the CIF Egypt market also declined slightly, with offers gradually easing. An offer for a handymax ship size was heard at \$257/metric ton for CIF Egypt for June-July shipment.

The Ukrainian wheat market remained stable. However, sellers expected steady demand in the coming days. "There's been a bit more demand over the last couple of days, but it's still slow," a Ukraine-based seller said.

Furthermore, the Bangladesh Directorate of Food Products (DGF) has announced an international tender for the purchase of 50,000 mt of milling wheat on a CIF liner-out basis, scheduled for June 24, according to traders.

Sellers from both Russia and Ukraine expect demand to pick up after the tender and look forward to the origins being counted in. "I think Russian wheat will count in," a Russia-based seller said.

"It will depend on the shipment period—on relatively spot terms, Ukraine is competitive. If it's for August, one can sell Russian cheaper," a Ukraine-based seller said.

The CVB market also remained stable day over day amid weaker demand. Market participants also noted that the Russian and CVB 12.5% wheat markets are nearing parity, as the spread is narrowing. Meanwhile, sellers said that new crop prospects look good so far in Romania. "So far, except for the west side of Romania, everything is excellent," a trader at the origin in Romania said.

Platts Asia Wheat Daily Commentary

- Australian wheat prices decrease
- Philippines passes on feed wheat offers

Australian Premium White wheat and Australian Standard White wheat with no protein guarantee both eased \$1/mt day over day June 11 to \$279/mt and \$272/mt, respectively, under sharper offer indications and tracking ongoing weakness in the Australian dollar.

At the time of writing, the Australian dollar had fallen below 70 US Cents for the first time since April, and was trading at 69.9 US Cents at 1630 SGT (0830 GMT).

Several Asian trade sources said they continued to observe

weakness in Australian wheat indications, with Australian Standard White generally trending softer compared with mid-protein milling grades.

A Philippine feed buyer passed on all offers for October arrival of feed wheat in an international buy tender June 10, according to a Manila- and a Singapore-based trade source. The same buyer bought two cargoes of feed corn for October arrival instead, in a separate tender on the same day.

Competitive feed corn prices have also continued to weigh on feed wheat appetite in Vietnam, where the bid-offer gap for the most competitive feed wheat origin, the Black Sea, remains close to \$10/mt CFR, said several Asian grains traders and a local feed grains trader.

Platts is part of S&P Global Energy.

Platts Canada Wheat Daily Commentary

- Canadian wheat prices rise on tight capacity
- Futures steady after USDA's WASDE release

Platts assessed Canadian Western Red Spring Wheat 13.5% FOB Vancouver 30-45 days forward at \$272.46/metric ton

on June 11, \$3.31/mt higher than June 10 as nearby capacity constraints boosted basis premiums.

The wheat futures markets showed minimal reaction to the US Department of Agriculture's June World Agricultural Supply and Demand Estimates report, with the September (U) MIAH Hard Red Spring wheat futures contract closing 2 cents higher to 644.75 cents/bushel.

The WADE report lowered its all-wheat production forecast for 2026-27 to 1,543 million bushels, 18 million bushels lower than the May forecast, mostly due to lower hard red winter wheat production. Global wheat production and supply forecasts were raised due to higher output in Russia, Turkey and Ukraine, while Australia and Pakistan saw lower output.

Despite minimal futures volatility, basis premiums strengthened significantly on the day following the June 11 Japanese Ministry of Agriculture, Forestry and Fisheries wheat tender.

Two cargoes of 34,000 mt each of No. 1 grade CWRS Wheat 13.8% protein were traded at U plus 110 cents/bu according to market participants, with other offers ranging between U 110-145 cents/bu amid tight August capacity.

Basis premiums for No. 2 grade CRWS 13.5% protein strengthened for the same reason as low farmer sales limited old crop supplies, with August offers heard ranging between U plus 110-120 cents/bu, compared to the U plus 90-110 cents/bu range heard earlier in the week.

"Basis continues to climb for old crop due to limited farmer selling," a trader said. "Remains fairly flat for new crop."

Offers for October/November were heard at 95 cents/bu over the December MIAH HRS contract.

Other participants, however, found prices harder to pinpoint amid slowed market activity.

"Hard to define Canadian basis now as [it's] all over the place," a buyer said, noting that he also saw capacity tightening.

The Asian corn market was quiet June 11, with buyers staying on the sidelines after several import windows closed earlier in the week.

Platts assessed feed-quality corn CFR Northeast Asia at \$258/metric ton on June 11, up \$2/mt day over day, for cargoes arriving over Sept. 9-Oct. 9 in Pyeongtaek.

South Korean buyers concluded all October-arrival cargo positions following tender deals on June 9, with no further buying interest heard on June 11, local trade agents said.

Vietnamese buyers purchased a trader's entire June shipment cargoes of South American corn, with the trader saying June 11, "Demand [for July shipment] is quite slow."

Feed millers in Vietnam continued to bid at \$257-\$258/mt CFR

for partial corn cargoes, while offers were heard at \$259/mt CFR for August and September shipments.

Meanwhile, US Pacific Northwest corn basis offer indications for September shipment were heard at 145 cents/bushel over September (U) Chicago Board of Trade futures, while tradable levels were said to be at 140 cents/bu.

Platts is part of S&P Global Energy.

Platts Latin America Corn Daily Commentary

- South American corn prices fall with CBOT
- Argentine harvest reaches 43.6% completion
- Brazil domestic market remains stable

South American FOB corn prices decreased June 11, tracking lower Chicago Board of Trade futures.

Argentine FOB Up River premiums for July loading and Brazilian FOB Santos premiums for August loading remained steady day over day.

The US dollar to Brazilian real exchange rate stood at Real 5.1153/\$1 as of 5:30 pm Brasilia time, down 1.40% day over day.

In Brazil's domestic market, prices remained steady in the Sorriso, Rio Verde, and Maringá regions.

"The market remains stable," a buyer in the Rio Verde region said.

The Buenos Aires Grain Exchange reported on June 11 that the

2025-26 corn harvest in Argentina reached 43.6% as of June 10, up 3 percentage points from the previous week.

According to BAGE, the national production forecast remains unchanged at 64 million metric tons.

Platts is part of S&P Global Energy.

Platts US Corn Daily Commentary

- USDA projects 2025-26 stocks at 2.145 bil bu
- Ethanol use cut 25 mil bu, exports rise 25 mil bu: WASDE

US corn Platts outright prices decreased on June 11, tracking the Chicago Board of Trade July (N) futures, which lost 7.25 cents during the session, settling at \$4.1175/bu, while September (U) closed at \$4.200/bu, down 7.75 cents in the same period.

"The corn market showed little reaction shortly following USDA's June [World Agricultural Supply and Demand Estimates report] release, with only minor changes featured in the agency's US balance table," said Mary Kate Scruggs, principal corn analyst at S&P Global Energy CERA.

On June 11, the US Department of Agriculture released its WASDE report, where US corn ending stock for marketing year 2025-26 (September-August) was projected at 2.145 billion bushels, a bit over the previous 2.142 billion.

In line with CERA expectations, USDA's June WASDE report featured a 25 million-bushel reduction to the agency's MY 2025-26 US corn used for ethanol forecast to 5.575 billion bushels; the reduction was offset by a 25 million-bushel increase to the agency's export forecast, now seen at 3.325 billion bushels, slightly below CERA's 3.375 billion-bushel forecast.

Despite the reduction in ethanol use, CERA sees further

downside as grain crushing data consistently reflect a strong conversion rate of corn into ethanol.

Trader sources said that the market was not aligned with WASDE numbers.

Platts assessed on June 11 the outright price for June shipments to New Orleans in the incoterm CIF at \$193.20/mt and for July shipments at \$196.75/mt. And FOB Gulf for August was assessed at \$203.54/mt.

Platts is part of S&P Global Energy.

Platts European Corn Daily Commentary

- Italian buyers find South America more competitive
- Romanian sellers await July heat impact on crops

The Black Sea corn market fell marginally on June 11 amid slow demand.

In the FOB market, the competitive offer for July loading was at \$233/metric ton. Sellers were also seen at \$234-\$238/mt for the July shipment. Meanwhile, the market continued to lack firm buyers.

In the CIF market, offers were heard for Italy, Turkey, and ARAG, but demand remained muted. A market participant said corn was traded to Tunisia earlier in the week, and the market has been quiet overall.

An importer in Italy said demand for feed and corn remained bearish. Furthermore, offers from South America were heard to be more competitive than those from Ukraine in the Italian market.

"The Ukrainians are starting to slow down, but unfortunately, demand is zero," an Italy-based importer said. "Traders will try to arrive at the new South American crops before covering."

Meanwhile, the CVB market remained quiet amid low liquidity. According to market participants, there was only one seller of the old crop for the June shipment. However, demand also remained low, as seen with Ukrainian corn.

For the new crop, sellers said it is too early to judge production prospects, but so far they look good, with July likely to be the deciding month. "Corn is too early, but at this moment, it looks good," a Romania-based seller said. "In the last three years, the most important factor was the July heat wave."

Cargoes for August and September shipments were heard to have been traded. Chinese soybean traders said that the August tradable value would be around 210s cents/bu over July (N) CBOT and September at 225 cents/bu over November (X) CBOT, basis CFR China.

As of June 9, 82% of the total open demand for the July shipment, at 9.8 million mt, has been covered, according to a Chinese soybean trader.

Meanwhile, 55% of the total open demand for the August shipment, at 8 million mt, has been covered.

For the September shipment, open demand fell to about 6.5 million mt, while open demand for the October shipment stands at 8.9 million mt.

China imported 11.79 million metric tons of soybeans in May, up 39.1% month over month and 15.3% year over year, according to preliminary data released June 9 by the General Administration of Customs.

The increase reflects stronger Brazilian new-crop arrivals and improved port logistics, China-based trade sources said.

Platts is part of S&P Global Energy.

Platts Brazil Soybean Daily Commentary

- Paranaguá sees trades for August and March shipments
- CBOT futures decline as USDA lifts Argentina output, oil weakness

Platts assessed the SOYBEX FOB Santos soybean contract for July loading at \$441.68/metric ton on June 11, unchanged from the previous assessment.

CBOT soybean futures extended losses after the US Department of Agriculture released its monthly World Agricultural Supply and Demand Estimates report, boosting Argentine supply estimates for the 2025-26 crop. Simultaneously, reports of a potential US–Iran diplomatic agreement impacted crude oil prices, pressuring the soybean oil market, analysts said.

Brazilian agricultural agency Conab released its ninth survey for the 2025-26 crop season, reinforcing soybeans as the cornerstone of the country's record grain harvest, with output projected at 180.25 million mt.

This represents an increase of 8.8 million mt compared with the 171.48 million harvested in 2024/25, equivalent to a 5.1% year-over-year gain. The expansion is driven primarily by an increase in planted area, supported by incremental productivity gains as producers continue to adopt enhanced genetics, refine crop management practices and expand the use of precision agriculture technologies.

Weather conditions played a key role in sustaining yields, particularly across the Center-West and northern regions of Brazil, where rainfall distribution remained largely favorable throughout the growing season, despite some localized irregularities. These conditions helped limit significant yield losses and allowed growers to capitalize on technological gains, Conab said.

Trading activity remained moderate in the FOB Paranaguá paper market, with trades heard for August and March shipments on the day.

While China continues to purchase Brazilian soybeans for July–September shipments, rumors suggest it has also begun inquiring about US supplies, sources said.

The US dollar versus the Brazilian real settled at Real 5.0921/\$1 at 4:30 pm Brasilia time. Domestic soybean prices were lower in the main producing regions.

Platts US Soybeans Daily Commentary

- Outright prices fall on day
- USDA's WASDE didn't feed the market, wasn't bullish: sources

The US soybean market saw outright prices fall on June 11 after the US Department of Agriculture published a steady World Agricultural Supply and Demand Estimates report and amid a lack of US-China soybean export news.

Platts, part of S&P Global Energy, assessed SOYBEX FOB New Orleans for July shipment \$2.94/metric ton, down from \$446.44/mt on June 10. Platts assessed basis for FOB Gulf for July shipment remained steady day over day at 100 cents/bushel over the July (N) soybeans futures contract.

Platts assessed the outright price for CIF New Orleans for June shipment also at \$2.94/mt, down from the previous business day at \$438.72/mt. Platts assessed basis for CIF New Orleans for June shipment remained steady day over day at 79 cents/bu over the July (N) soybeans futures contract.

CBOT July (N) futures fell 8 cents on June 11 to 1,115 cents/bu.

The USDA published its monthly WASDE report on the day, showing no changes to supply and demand estimates for the new crop, but old crop changes were in line with S&P Global Energy expectations, analysts said.

“USDA left old and new crop carryout unchanged as we expected,” crop principal analyst at S&P Global Energy Aaron Gerdtz said. “USDA raised crush and lowered exports in an offsetting 20-million-bushel move, slightly larger than the 10-million-bushel move we expected.”

“Adjustments to the soybean oil balance table were in line with our expectations,” Gerdtz said.

“Looking at soybean meal, adjustments were mostly in line with expectations. Domestic usage increased more than we expected, but this was mostly due to higher production than we anticipated. It’s possible that it could come down a little with stocks rising,” Gerdtz noted.

“The report didn’t feed the market,” a trader in the FOB Gulf market said. “It didn’t provide anything bullish.”

The USDA also published its weekly US Export Sales report on June 11, showing that 211,300 mt of US soybeans were sold during the period May 29-June 4.

The amount was “down 24% from the previous week and 18% from the prior 4-week average,” the document said. The total was also in line with market expectations of 150,000-400,000 mt.

About 67,600 mt were bought by Egypt, 56,400 mt by Japan, and 15,200 mt by Mexico.

Animal Feed

Platts Latin America Soybean Meal Daily Commentary

- Premiums rise in Latin America
- Market sees higher prices

Latin American FOB soybean meal prices rose June 11 even as Chicago Board of Trade futures eased.

Argentine FOB Up River premiums for July loading continued to rise on higher bids and offers.

In its Global Soybean Complex short-term outlook published June 5, CERA analysts raised Argentina’s 2025-26 soybean production by 0.5 million metric tons to 51 million mt on higher yields, more than offsetting a smaller harvested area. It also lifted Argentina’s 2026-27 exports by 1 million mt, citing lower production and exports from Brazil.

Brazilian FOB Paranaguá premiums for July loading firmed during the day.

Negotiations remain slow in Brazil.

The Chicago Board of Trade July (N) soybean meal contract settled at \$301.70/short ton, down \$0.20/st.

Northern Europe

The Dutch soybean meal market was stable June 11.

Local media in Argentina reported June 11 that the Port of Concepción del Uruguay (Entre Ríos) is setting up a new logistics corridor to export non-GMO soybean meal to Denmark, sourced from a processor in Gualaguaychú. The meal will be trucked to the port, stored and then shipped in bulk ships, with first shipments expected between June and July.

Southern Europe

The Spanish meal and grain market was quiet June 11 as traders and buyers were away attending the International Congress of Animal Nutrition during June 11-12 in Zaragoza. A broker said it is one of the biggest events in the Spanish market.

Brazil’s National Supply Company, or Conab, raised its Brazil soybean meal production forecast for marketing year 2025-26 (October-September) to 47.3 million metric tons, up from 46.6 million mt in the prior month and 7.1% higher year over year. Conab also lifted its soybean meal export estimate to 24.7 million mt, up 6.1% year over year, and increased its ending stocks estimate to 5.8 million mt, up 52.6% year over year.

Platts US Distiller Grains DDGS Daily Commentary

- Market remains under pressure
- Export demand weakness drives prices lower
- Buyers await lower values

The US dried distillers grains with solubles market remained under pressure June 11, with participants reporting lower values across domestic and export channels as demand struggles to keep pace with available supply.

Platts assessed CIF New Orleans dried distillers grains with solubles barges for the June shipment period at \$202/short ton on June 11, the Chicago DDGS truck market for the June delivery period was assessed at \$179/st, and the South California rail market for the June delivery period was assessed at \$226/st.

One broker described broad weakness across feed markets. "Quiet markets so far. Weaker tone on everything, not just DDGS," the broker said, adding that the correction was overdue. "Long overdue for a break."

The broker added that lower soybean meal basis and futures values are improving the competitiveness of alternative feed ingredients. "Flat price more enticing for users," the source said, adding that some end users have started pricing futures positions.

Export markets continued to weaken. "Wow. Big time drop," the broker said regarding CIF values. Lower grain futures also added pressure. "Corn down 7," the source said, noting that some plants now have nearby railcars available. "CIF looking ugly for returns. Domestic end users smell blood in the water."

A buyer reported that lower futures have finally translated into softer truck values in some regions. "With the corn board down last week, we did see a break in prices finally in CNE for trucks," the buyer said, while noting that the latest USDA report could influence market direction.

Another trader described conditions as extremely quiet. "Very quiet still. Lower values," the trader said. The source added that the lack of international demand remains the key issue. "There is no international demand right now. I think values will need to move lower before buyers purchase anything."

The trader said the market ultimately needs demand to return. "We have to find demand," the source added.

The USDA's WASDE report released June 11, projected 5.6 billion bushels of corn use for ethanol and by-products in the June 2026/2027 projection, unchanged from the May projection.

Platts Latin America Soybean Oil Daily Commentary

- CBOT soybean oil futures fall 1.17%
- Argentine FOB basis recovers from June lows
- Brazil maintains record 180 mil mt crop estimate

Brazilian and Argentine soybean oil FOB markets were mixed June 11, as Chicago Board of Trade soybean oil futures declined following the release of the US Department of Agriculture's June World Agricultural Supply and Demand Estimates report, while South American FOB basis levels continued recovering from the record discounts seen earlier this month.

CBOT July soybean oil futures fell 1.17% day over day to settle at 74.45 cents/pound. Market participants said trading activity was influenced by the WASDE report, which contained few major surprises for global soybean markets and reinforced expectations for abundant soybean supplies in South America.

The USDA maintained its estimate for Brazil's 2025-26 soybean crop at a record 180 million metric tons, while raising its estimate for Argentina's soybean production to 50 million mt from 48 million mt previously. The report also left US soybean ending stocks unchanged and made only limited adjustments to broader global soybean supply and demand balances.

Traders said the largely neutral report encouraged some additional selling pressure following the recent rally in soybean oil futures.

Market participants continued to monitor developments in US renewable diesel demand and biofuel policy, which have remained key sources of support for soybean oil futures throughout 2026. However, traders said favorable US crop development and expectations for ample global soybean supplies continued limiting upside momentum across oilseed markets.

In Argentina, Platts assessed the soybean oil FOB Up River price for July loading at \$1,169.55/mt, down \$10.59/mt day over day. The basis for July loading in the Up River paper market was assessed 40 points higher at minus 2,140 points to the July (N) futures at the Chicago Board of Trade.

In Brazil, Platts assessed the soybean oil FOB Paranaguá price for July loading at \$1,189.39/mt, up \$2.64/mt. The basis for July loading in the Paranaguá paper market was assessed 100 points higher at minus 2,050 points to the July (N) futures at the Chicago Board of Trade.

Platts assessed the soybean oil FOB Paranaguá price for August loading at \$1,164.04/mt, up \$4.41/mt. The basis for August loading in the Paranaguá paper market was assessed 100 points higher at minus 2,040 points to the August (Q) futures at the Chicago Board of Trade.

Market participants said the continued recovery in South

American basis levels reflected the moderation in CBOT soybean oil futures over the past week rather than a significant improvement in underlying export demand conditions.

Traders noted that FOB soybean oil values in Brazil and Argentina have remained relatively resilient despite recent volatility in futures markets, supported by steady export demand and firm global vegetable oil values.

At the same time, record soybean production and crushing activity in South America continued weighing on export premiums. Brazil's National Supply Co. continues to project a record soybean harvest of 180.13 million mt, while the Brazilian Association of Vegetable Oil Industries forecasts soybean processing at a record 62.5 million mt in 2026.

Demand into Asia remained broadly steady, although market participants said elevated freight costs and competition from palm oil continued to constrain delivered arbitrage opportunities for South American soybean oil exports.

Platts is part of S&P Global Energy.

Platts Europe Vegetable Oil Daily Commentary

- Low offers continue supporting vegetable oil prices
- Tight seed stocks reinforce supply concerns
- Market rises despite limited underlying demand

European vegetable oil markets strengthened, with gains across both the sunflower oil and rapeseed oil complexes despite continued reports of subdued demand.

FOB Black Sea sunflower oil rose \$7/mt to \$1,381/mt, while RSO FOB Dutch Mills front-month held steady at Eur1,181/mt. Further along the curve, rapeseed oil posted substantial gains, with second position rising Eur12/mt to Eur1,176/mt, third position increasing Eur13/mt to Eur1,156/mt, and fourth position gaining Eur18/mt to Eur1,156/mt. The strength in deferred positions suggests growing concern around future availability rather than any immediate surge in consumption.

Supply-side constraints remain the dominant driver of the market. A source based in Ukraine cited a "lack of offers," alongside "sunflower seed stocks low" and "crush coverage low." These factors point to increasingly tight feedstock availability across the Black Sea region, with processors and traders holding limited inventories and remaining reluctant to offer additional volumes. The resulting scarcity of physical material is continuing to support prices despite otherwise unremarkable demand conditions.

Demand, however, remains far from robust. The same source highlighted "limited demand," indicating that buyers are not actively chasing the market higher. Nevertheless, the absence of significant selling interest is outweighing weak consumption signals. This imbalance between constrained supply and modest demand is allowing prices to rise even without a meaningful improvement in downstream buying activity.

For Europe, the market is becoming increasingly supply-driven. Tight sunflower seed availability and low crush coverage

are reinforcing concerns about nearby and forward vegetable oil availability, particularly as processors prepare for seasonal transitions and new-crop uncertainty persists. The sharp gains in deferred rapeseed oil values suggest that market participants are increasingly pricing in longer-term supply risks, while stable-to-firmer sunflower oil values reflect the continuing shortage of available offers from the Black Sea region.

Weak monsoon fears driven by El Niño to push India's soybean imports to four-year high

- India soybean imports surge to 700,000 mt
- Domestic meal prices jump 60% above US rates
- Weak monsoon fears drive African supply deals

India is set to import 700,000 mt of soybeans in marketing year 2025-26, up 500,000 mt from the previous forecast, as surging domestic soybean meal prices and concerns over a weak monsoon impacting the upcoming kharif crop drive demand for crushing material to support animal feed and vegetable oil consumption, according to a US Department of Agriculture report released June 11.

The sharp upward revision marks a dramatic shift for India, which imported negligible quantities in 2024-25 on the back of a record soybean crop and substantial use of dried distillers grains in feed rations, the USDA Foreign Agricultural Service said. The implementation of India's expanded ethanol mandate and record soybean production in 2024-25 provided ample protein sources for feed rations, eliminating the need for soybean imports.

Price premium widens

Indian soybean meal prices reached nearly a 60% premium compared to US origin over the past month, the USDA said.

Indian traders have canceled contracts to export around 25,000 mt of soybean meal amid a sharp increase in domestic soybean prices, marking the first time since 2021 that Indian soybean meal exporters have canceled export orders, according to previous Platts reporting.

India-based trade sources said that due to the surge in local prices, FOB soybean meal export prices for shipments to be loaded in June jumped to about \$695/mt from about \$475/mt a month ago, according to the earlier Platts report.

Soybean meal prices in Mumbai climbed from around \$400/mt in October 2025 to approximately \$700/mt in May 2026, according to data from the International Grains Council cited in the USDA report. By comparison, US Gulf 48% soybean meal prices remained relatively stable at around \$350/mt over the same period.

The kharif soybean crop, India's primary soybean harvest, is being planted this month, the USDA said. Trade of African soybeans to India will likely continue until harvest, the report added.

India does not purchase substantial volumes of soybeans from the major exporters — the US, Brazil and Argentina — due

to import restrictions on genetically engineered soybeans and soybean meal, the USDA said.

Instead, Indian traders have booked over 80,000 mt of soybeans from African suppliers amid a jump in domestic soybean prices. "African exporters are also getting an opportunity to sell this oilseed at a much higher premium than the global benchmark prices," a trader with a US-based multinational agricultural trading firm said in the earlier report.

For 2026-27, India soybean production is forecast higher, with the soybean import forecast expected to fall to 200,000 mt, the USDA said. India's soybean imports have fluctuated significantly in recent years, ranging from a peak of 800,000 mt in 2020-21 to a low of 200,000 mt in 2024-25, according to USDA data.

Platts, part of S&P Global Energy, assessed the SOYBEX FOB Santos soybean contract for July loading at \$441.68/metric ton June 10, \$3.03/mt higher on day.

Black Sea MY 2026-27 wheat output forecast up; corn outlook steady: USDA

- Russia's wheat output forecast at 88 million mt
- Ukraine's wheat export estimate up 500,000 mt
- Ukraine's corn production forecast at 30 million mt

The US Department of Agriculture has increased its wheat production forecasts for the Black Sea region for the marketing year 2026-27 (July-June) by up to 2 million metric tons from May, according to the World Agricultural Supply and Demand Estimates report released June 11.

Russia's wheat production is now estimated at 88 million mt, while exports remained unchanged at 47 million mt.

Ukraine's wheat output is projected at 23.5 million mt, up 500,000 mt from the previous forecast. Exports were also revised higher by 1 million mt to 14 million mt.

Meanwhile, the EU's wheat outlook remains steady, with production at 136 million mt and exports at 31 million mt.

According to the USDA, global wheat production is expected to be 820.06 million mt in MY 2026-27, up 1 million mt from the previous forecast.

For MY 2025-26, Russia's and Ukraine's wheat output is expected to remain unchanged at 90.3 million mt and 24.1 million mt, respectively, while export projections increased to 48 million mt and 14 million mt. The EU's wheat output also remained unchanged at 145.11 million mt, while the export forecast increased to 31 million mt.

Platts, part of S&P Global Energy, assessed the Milling Wheat Marker at \$240/mt on June 11, unchanged day over day.

Corn outlook

The USDA projected Ukraine's corn production at 30 million mt and exports at 23 million mt for MY 2026-27, both unchanged from May.

The EU's corn outlook was also steady for MY 2026-27, with production at 57.5 million mt, imports at 19.5 million mt and

exports at 1.9 million mt.

Russia's corn production and exports for MY 2026-27 remained unchanged at 15.8 million mt and 4 million mt, respectively.

The USDA projected global corn production at 1.3 billion mt for MY 2026-27, up 5 million mt from the previous forecast.

The USDA's corn projections for Ukraine and the EU in MY 2025-26 remained unchanged, with production at 30.9 million mt and 56.8 million mt, respectively. Ukraine's corn exports were projected at 22 million mt and the EU's corn imports were at 18.5 million mt.

Platts assessed Ukraine corn FOB Black Sea at \$232/mt on June 11, down \$1/mt day over day.

USDA maintains US corn output forecast for MY 2026-27 at 406.29 million mt

- South America's 2026-27 corn outlook unchanged
- Brazilian 2025-26 corn output forecast at 138 mil mt
- Argentine 2025-26 corn output seen at 61 mil mt

The US Department of Agriculture has maintained its US corn outlook for the marketing year 2026-27 (September-August) unchanged at 406.29 million metric tons, according to its World Agricultural Supply and Demand Estimates report released June 11.

The projected corn reserves for MY 2026-27 are likely to increase marginally, driven by offsetting shifts in domestic use and international trade during the prior season, it said.

The 2026-27 season-average farm price received by producers is unchanged at \$4.40 per bushel, the report said.

US corn exports in MY 2026-27 are projected at 80 million mt, unchanged from May.

For MY 2025-26, US corn production forecast is seen unchanged at 432.34 million mt, while exports have been revised up by 640,000 mt.

Platts, part of S&P Global Energy, assessed US corn CIF New Orleans at \$199.60/mt Mo02 June 10, down 60 cents/mt day over day.

South America outlook steady

The USDA has kept its corn production estimates for South America unchanged for MY 2026-27 (March-February).

Brazil's corn production is forecast at 139 million mt for MY 2026-27, with exports 44 million mt.

Argentina's corn output is projected at 55 million mt for MY 2026-27, with exports seen at 38 million mt.

The USDA has raised corn production estimates for both countries for MY 2025-26. Brazil's output is now seen at 138 million mt, up 3 million mt from May, on expectations of increased production for the first and second crops. Meanwhile, Argentina's output is now projected at 61 million mt, up 2 million mt from the previous forecast, on the back of higher area and yield expectations.

Platts assessed Brazil corn FOB Santos at \$213.67/mt on June 10, down 10 cents/mt day over day, while Argentine corn FOB Up River was assessed at \$199.61/mt, down 19 cents/mt day over day.

Conab raises Brazil's MY 2025-26 corn output forecast to 140.46 million mt

- Second-crop corn output drops 4.8% on dry weather
- First-crop harvest 87.7% complete as of early June
- Corn exports seen up 11.7% to 46.5 million mt

Conab, Brazil's food supply and statistics agency, raised its corn production forecast for the marketing year 2025-2026 (March-February) to 140.46 million metric tons, up from its previous estimate of 140.17 million mt, according to its June 11 report.

Production remains 0.8% lower year over year.

Conab lowered its MY 2025-26 second-crop corn production forecast to 107.86 million mt, down 4.8% year over year. Planted area maintained at 17.8 million hectares, up 2% from last season.

The main drag comes from May's reduced rainfall across Central Brazil, which particularly hurt fields planted outside the ideal window in Goiás and Minas Gerais, both already facing unfavorable water conditions since mid-April. Losses were also reported in Paraná from winds and hail and in Mato Grosso due to drier conditions in late-planted areas.

Harvest is underway in Mato Grosso, Pará, and Tocantins, and despite recent weather setbacks, estimated yields remain close to last season in most states.

The first-crop corn production forecast for MY 2025-26 was increased to 29.3 million mt, up 17.7% year over year. Planted area was seen at 4.13 million hectares, up 9.2% from the previous season.

The first-crop corn harvest has reached 87.7% of the planted area by the first week of June, according to Conab. Harvest is still underway in Matopiba, while it is close to completion in Minas Gerais and Goiás. Lower rainfall in May helped the kernels dry down faster, supporting smoother and faster harvesting progress.

The third-crop corn planting for MY 2025-26 is nearing completion, and production is expected to reach 3.3 million mt, the report said.

Conab maintained domestic consumption for MY 2025-26 month over month at 94.88 million mt in June, up 4.6% from the previous season, driven by higher demand from the ethanol industry.

Brazil's corn ending stocks for MY 2025-26 were also revised up to 13.25 million mt in June from the previous estimate of 12.97 million mt. The stocks were 6.2% higher year over year.

Conab maintained its estimate for Brazil's corn exports for MY 2025-26 at 46.5 million mt, up 11.7% year over year, supported by solid production performance.

Platts, part of S&P Global Energy, assessed corn FOB Santos at \$213.67/mt June 10, up \$0.1 day over day.

Philippines reviews adding corn to bioethanol feedstock amid fuel crisis

- Philippines reviews corn for bioethanol use
- Livestock sector warns of feed shortages
- E20 blend could cut fuel prices by P5/liter

The Philippine Department of Agriculture (DA) is reviewing a proposal to allow corn as a feedstock for bioethanol production alongside sugarcane and molasses, a move aimed at reducing fuel prices but raising concerns among livestock and poultry producers over feed supply, the department said June 10.

The proposed amendment would lift government restrictions on corn and officially add the crop to sugarcane and molasses as approved bioethanol feedstock, DA Assistant Secretary U-Nichols Manalo said in a statement following a meeting with the National Sectoral Committees on Corn and on Livestock and Poultry. The government currently mandates the primary use of molasses in bioethanol production.

Food versus fuel

"We are holding this consultation to gather your inputs and address your anxieties because, then again, the elephant in the room is the food-versus-fuel debate," Manalo said, adding that the ongoing oil crisis could be a primary driver behind the policy review.

The proposed amendment will still need the final approval of the National Biofuels Board, a government body responsible for monitoring the implementation of the country's biofuel program.

Stakeholders called for a balance on the feed and fuel uses for local corn as most of the local production could not meet demand, according to the local media reports. Livestock and poultry stakeholders said that current corn production can meet only 62.7% of local demand, with the crop accounting for half of all animal feed formulations.

Local broiler raisers warned that diverting local corn to fuel production could force producers to rely more on imported corn, according to the statement.

The United Broiler Raisers Association cautioned that diverting local corn to fuel production could force meat producers to depend more on imported feed ingredients.

The hog industry is still recovering from African swine fever, with the Philippines recording its first ASF outbreak in 2019, industry groups said.

A study from the University of the Philippines Los Banos proposed using excess yellow corn for ethanol production, particularly during the wet season, when drying facilities are limited and farm-gate prices decrease, according to the Philippine Council for Agriculture and Fisheries.

The Department of Energy said that raising blend levels, such as E20 — 20% bioethanol and 80% gasoline — could reduce pump prices by about P5 per liter (\$0.09/liter) compared with the current E10 blend, according to the DA statement.

DDGS alternative

In the same meeting, the Department of Agrarian Reform and the National Commission on Indigenous Peoples proposed to utilize idle landholdings and ancestral domains to expand corn production, according to the statement.

Stakeholders called for the government to update studies on distillers dried grains with solubles, a nutrient-dense byproduct of corn ethanol production, amid a proposal from feed millers to include it in feed mixes to offset the lack of corn supply.

The Philippine Association of Feed Millers expressed its openness to incorporating DDGS into animal feed mixes to help offset supply pressures, according to a social media statement. However, livestock groups claimed that DDGS would not fully offset a reduction in direct corn supply.

Stakeholders also urged strengthening direct market linkages between farmers and end users, according to the statement.

Assessment Rationale

Grains

Platts Ags EMEA Wheat Daily Rationale

Platts assessed the Milling Wheat Marker at \$240/metric ton on June 11, unchanged from the previous assessment. CVB 12.5% Handysize wheat, assessed at \$240/mt, was the most competitive wheat out of the three components of the Milling Wheat Marker, Ukraine 11.5%, normalized to the nearest 25 cents

of \$240.25/mt when adding May's quality normalization of \$6.15/mt, to account for its lower protein content, assessed at \$234/mt, and Russian 12.5% wheat assessed at \$241/mt on the day. This reflects the Platts assessment window of July 9-23.

Platts assessed Black Sea wheat (Russian deepsea, 12.5% protein) down \$1/mt at \$241/mt on June 11, below the offer at \$242/mt for July loading. The structure between the first and second halves of July was assessed flat. This reflects the Platts assessment window from July 9 -23.

Platts assessed Black Sea wheat (Ukraine deepsea, 11.5% protein) unchanged at \$234/mt on June 11, below an offer for July at \$235/mt and above a bid at \$232/mt. The structure between the first and second halves of July was assessed flat. This reflects the Platts assessment window from July 9-23.

Exclusions: No market data was excluded from the June 11 Black Sea wheat assessments.

Platts is part of S&P Global Energy.

This rationale applies to symbol (s) <BSMWM00> , <WRBSD00> , <WUBSA00>.

Platts Asia Wheat Daily Assessment Rationale

Platts assessed Australian Premium White wheat down \$1/mt at \$279/mt FOB Kwinana June 11 for cargoes loading between Aug. 10 and Sept. 9, partially tracking a weaker Australian dollar and under an indicative offer at \$282/mt.

Platts assessed Australian Standard White wheat with no protein guarantee down \$1/mt at \$272/mt for cargoes loading over the same period, under a lower indicative offer at \$273/mt. This maintains the spread between Australian Premium White and Australian Standard White with no protein guarantee at \$7/mt.

Platts is part of S&P Global Energy.

Asia wheat assessments can be found on <PAA2440>

Market commentary can be found on <PAA2699>

Platts Canada Wheat Daily Rationale

Platts assessed Canada Western Red Spring Wheat 13.5% FOB Vancouver 30-45 days forward at \$272.46/metric ton on June 11, \$3.31/mt higher than June 10.

CWRS Wheat 13.5% FOB Vancouver basis 30-45 days forward, spanning July 11-26 was assessed 7 cents higher at MIAX Hard Red Spring Wheat September (U) futures plus 96 cents/bushel based on a bid indicated at U plus 95 cents/bu and an offer indicated at U plus 110 cents/bu.

CWRS Wheat 13.5% FOB Vancouver basis 45-60 days forward, spanning July 26-Aug. 10 was assessed 7 cents higher at U plus 96 cents/bushel based on a bid indicated at U plus 95 cents/bu and an offer indicated at U plus 110 cents/bu.

CWRS Wheat 13.5% FOB Vancouver basis 60-75 days forward, spanning Aug. 10-25 was assessed 7 cents higher at U plus 96 cents/bushel based on a bid indicated at U plus 95 cents/bu and an offer indicated at U plus 110 cents/bu.

Exclusions: No data was excluded in the assessments.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <AWHCA00> <AWHCB00> <AWHCC00> <AWHCD00> <AWHCE00> <AWHCF00>.

Platts Asia Corn Daily Rationale

Platts assessed corn CFR Northeast Asia up \$2/metric ton day over day at \$258/mt CFR June 11 for feed-quality corn arriving over Sept. 9 to Oct. 9 into Pyeongtaek, below a normalized indicative offer at \$261/mt CFR.

Platts is part of S&P Global Energy.

Asia corn assessments can be found on <PAA2440>

Market commentary can be found on <PAA2688>

This rationale applies to symbol(s) <WCINV00>

Platts Argentina Corn FOB Up River Daily Rationale

Platts assessed corn FOB Up River for loading in July at \$196.75/metric ton on June 11, down \$2.86/mt from the previous assessment.

The assessment considered the FOB premium for Up River July-loading unchanged at plus 88 cents/bushel to Chicago Board of Trade July (N) corn futures, based on steady offers heard at N plus 90 cents/bu, and higher bids heard at N plus 85 cents/bu earlier day over day. No bids or offers heard at the market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <ARGCA00> and <ARGCB00>.

Platts Brazil Corn Daily Rationale

Platts assessed the Brazilian corn FOB Santos price for August loading at \$210.62/metric ton on June 11, down \$3.05/mt from the previous assessment.

The assessment considered the FOB Santos basis for August loading cargoes unchanged at plus 115 cents/bushel to the Chicago Board of Trade September (U) contract, based on offers for August H1 loading at U plus 125 cents/bu and no bids heard at the market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <ABCSA00> <ABCSB00>.

Platts US Corn Daily Assessment Rationale

Platts assessed the US Yellow Corn No. 2 CIF New Orleans barge basis for June shipment at 79 cents/bushel over the CBOT July (N) corn futures contract on June 11, unchanged from the previous business day. No bids or offers were heard to disprove the assessment.

Platts assessed the US Yellow Corn No. 2 CIF New Orleans barge basis for July shipment at 88 cents/bu over the Chicago Board of Trade July (N) corn futures contract on June 11, unchanged from the previous assessment. This was based on a bid heard at 87 cents/bu, an offer at 90 cents/bu. After the Platts Market on Close assessment process on June 10, a trade was heard at 88 cents/bu.

Platts assessed the US Yellow Corn No. 2 FOB Gulf basis for August shipments at 97 cents/bu over the CBOT September (U)

corn futures contracts on June 11. Offers were heard at 98 cents/bu for the first half of August, and 101 cents/bu for the second half of the month.

No information was excluded.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <WCNOE00> and <WCNOU00>.

Platts FOB Black Sea Corn Daily Assessment Rationale

Platts assessed Ukrainian corn down \$1/mt at \$232/metric ton on June 11, below an offer at \$233/mt for June-July loading. The structure between the first and second halves of July was assessed flat. This reflects the Platts assessment window from July 9-23

Platts is part of S&P Global Energy.

Exclusions: No market data was excluded from the June 11 Black Sea corn assessment.

This rationale applies to symbol(s) <CUBSU00>

Oilseeds.

Platts Asia Soybeans Daily Rationale

Platts assessed CFR China first-month soybeans down \$1.10/mt on the day at \$487.41/mt, while basis was down 5 cents/bu at 205 cents/bu over July (N) CBOT June 11, under the offer at 210 cents/bu over July (N), for Brazil July shipment.

Platts assessed CFR China second-month soybeans down \$1.10/mt on the day at \$492.55/mt, while basis was down 5 cents/bu at 219 cents/bu over July (N) CBOT, tracking indicative value at 219 cents/bu and below the sharpest offer at 221 cents/bu over July (N) for Brazil August shipment.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYBAB00> <SYBAA00> <SYBAF00> <SYBAD00> <SYBAC00> <SYBAE00>

Platts Brazil Soybean Daily Assessment Rationale & Exclusions

Platts assessed the SOYBEX FOB Santos soybean contract for July loading at \$441.68/metric ton on June 11, unchanged from the previous assessment.

The FOB Santos basis for July loading was assessed 8 cents/bu higher at plus 87 cents/bu to the CBOT July (N) contract, based on a spread to the Paranagua paper market heard at plus 5 cents/bu. No bids or offers were heard for the full July loading of FOB Santos cargo.

A bid for FOB Santos H2 July was heard at N plus 85 cents/bu earlier on the day, with offers at N plus 90 cents/bu.

The FOB Paranagua basis for July loading was assessed 7 cents/bu higher at plus 82 cents/bu to the CBOT July (N) contract, based on an indicative value heard at that level, higher bids at N plus 80 cents/bu and higher offers at N plus 93 cents/bu at market close.

Exclusions: No data was excluded.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYBBC00> <SYBBF00> <SYBBD00> <SYBBH00> <SYBBA00> <SYBBE00> <SYBBB00> <SYBBG00>

Platts US Soybeans Daily Rationale

Platts SOYBEX FOB New Orleans for July shipment was assessed at \$446.44/metric ton on June 11, \$2.94 down from June 10. The FOB Gulf basis for July shipment was assessed at 100 cents/bushel over the Chicago Board of Trade July (N) soybeans contract day over day, unchanged from the previous business day. This was based on a value indication heard at 100 cents/bu, and an offer at 106 cents/bu.

The CIF New Orleans basis for June shipment was assessed at 79 cents/bu over the July (N) soybeans futures contract day over day, unchanged from the previous business day. This was based on a bid heard at 75 cents/bu, and an offer heard at 80 cents/bu.

No information was excluded.

Animal Feed and Protein

Platts Argentina Soybean Meal Daily Rationale

Platts assessed Argentine soybean meal FOB Up River for July loading at \$333.67/metric ton June 11, \$1.99/mt higher than the previous assessment.

The basis for July loading in the Up River cargo market was assessed \$2/short ton higher at \$1/st to July (N) futures at the Chicago Board of Trade. The assessment considered an indicative value heard at \$0/st earlier in the day, followed by higher bids at \$0/st and higher offers at \$4/st to the CBOT N contract at the market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYMAA00> <SYMAB00>.

Platts Brazil Soybean Meal Daily Rationale

Platts assessed the Brazilian soybean meal FOB Paranagua price for July loading at \$331.46/metric ton on June 11, up \$1.98/mt from the previous assessment.

The basis for July loading in the Paranagua paper market was assessed \$2/short ton higher at minus \$1/st to the July (N) futures at the Chicago Board of Trade. The assessment considered an indicative value heard at that level, higher bids at minus \$2/st and higher offers at \$2/st to the CBOT N contract at the market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYMBA00> and <SYMBB00>.

Platts US Dried Distiller Grains DDGS Daily Assessment Rationale

Platts assessed CIF New Orleans dried distillers grains with solubles barges for the June shipment period at \$202/st on June

11, down \$5/st from the previous session based on a bid heard at \$196/st and an offer heard at \$203/st.

A bid heard at \$204/st and offer heard at \$209/st were discounted due to lower values reported later in the session and softer market sentiment.

The Chicago DDGS truck market for the June delivery period was assessed at \$179/st, \$2/st down from the previous session, based on a bid heard at \$176/st and an offer heard at \$180/st.

A bid heard at \$175/st and an offer heard at \$188/st were discounted due to lower offer levels heard later in the session.

The South California rail market for the June delivery period was assessed at \$226/st, \$2/st down from the previous session, based on a bid heard at \$219/st and an offer heard at \$227/st.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <ACDDG00> <AADDG00>.

Vegetable Oils.

Platts Asia Palm Oil Daily Rationale

Platts assessed CPO CFR WC India price at \$1,232.5/mt June 11 for June loading, up \$2.5/mt from June 10, below an offer and above a bid.

CPO offer was heard at \$1,240/mt and an indicative bid at \$1,225/mt on a CFR WC India basis, shipping in June.

July shipment of CPO CFR WC India was at \$1,237.5/mt June 11, up \$2.5/mt from June 10, considering a \$5/mt carry between June and July.

Platts assessed CPO FOB Indonesia price at \$1,192.5/mt June 11 for June loading, up \$2.5/mt from June 10, below an offer and above a bid.

CPO offer was heard at \$1,197.5/mt and an indicative bid at \$1,182.5/mt on a FOB Dumai basis, shipping in June.

July shipment of CPO FOB Dumai was at \$1,197.5/mt June 11, up \$2.5/mt from June 10, considering a \$5/mt carry between June and July.

Platts assessed the RBDPS FOB Indonesia price at \$1,060/mt June 11 for June loading, up \$7.5/mt from June 10, below an offer and above a bid.

RBDPS offer was heard at \$1,075/mt and an indicative bid at \$1,045/mt on a FOB Dumai basis, shipping in June.

July shipment of RBDPS FOB Dumai was at \$1,065/mt June 11, up \$7.5/mt from June 10, considering a \$5/mt carry between June and July.

Platts assessed the PFAD FOB Indonesia price at \$972.5/mt June 11 for June loading, up \$2.5/mt from June 10, below an offer and above a bid.

PFAD offer was heard at \$987.5/mt and an indicative bid at \$957.5/mt on a FOB Dumai basis, shipping in June.

July shipment of PFAD FOB Dumai was at \$977.5/mt June 11, up \$2.5/mt from June 10, considering a \$5/mt carry between June and July.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <ACPOA00> <ACPOB00> <APFAD00> <ARBSA00>

Platts Argentina Soybean Oil Daily Rationale

Platts assessed the Argentine soybean oil FOB Up River price for July loading at \$1,169.55/metric ton June 11, down \$10.59/mt from June 10. The basis for July loading in the Up River paper market was assessed 40 points higher at minus 2,140 points to the July (N) futures at the Chicago Board of Trade. The assessment considered an indicative value last heard at that level, offers at minus 2,050 points, and bids at minus 2,200 points to the CBOT N contract at the market close. No trades were confirmed before the market close for July loading in the FOB Up River paper market June 11.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYOAA00> <SYOAB00>.

Platts Brazil Soybean Oil Daily Rationale

Platts assessed the Brazilian soybean oil FOB Paranaguá price for July loading at \$1,189.39/metric ton June 11, up \$2.64/mt from June 10. The basis for July loading in the Paranaguá paper market was assessed 100 points higher at minus 2,050 points to the July (N) futures at the Chicago Board of Trade. The assessment considered an indicative value last heard at that level, offers at minus 2,000 points, and bids at minus 2,150 points to the CBOT

N contract at the market close. No trades were confirmed before the market close for July loading in the FOB Up River paper market June 11.

Platts assessed the Brazilian soybean oil FOB Paranaguá price for August loading at \$1,164.04/mt June 11, up \$4.41/mt from June 10. The basis for August loading in the Paranaguá paper market was assessed 100 points higher at minus 2,040 points to the August (Q) futures at the Chicago Board of Trade. The assessment considered an indicative value last heard at that level. No bids, offers, or trades were confirmed before the market close for August loading in the FOB Paranaguá paper market June 11.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYOBB00> and <SYOBA00>.

Platts Europe Sunflower Oil Daily Rationale

Platts assessed sunflower oil FOB Black Sea Ukraine for July-loading up \$7 on June 11 at \$1,381/mt, above a bid heard at \$1,380/mt.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SFWBL00>
