Commentary and Analysis

Wheat

Platts European Wheat Daily Commentary

- Russian wheat demand rises from Asia
- Jordan buys 60,000 mt wheat at \$275.20/mt

The Russian market was up slightly on June 10, with some demand visible from Asian destinations.

“The demand is a little bit better now. We have demand from Asia from Bangladesh, Vietnam, and Indonesia,” a Russia-based seller said.

In the CIF Egypt market, prices dropped marginally, with a few sellers seen offering at \$258/metric ton for the July-August shipment period. Buying interest was seen in Egypt for both Russian and Ukrainian wheat.

The Ukrainian wheat market remained stable day over day, with sellers staying at the same levels. In the internal market in Ukraine, buyers for DAP Chornomorsk were seen at \$217/mt.

Meanwhile, in the CVB market, traders said liquidity for wheat remained low, while active barley selling continued. Forward selling of wheat was also lower than that of barley.

“Barley has been traded more preharvest; wheat is traded far less. So no more wheat should come to the spot,” a Romania-based seller said.

In Jordan, the state grain buyer MIT purchased approximately 60,000 mt of milling wheat of optional origin in an international tender on June 9, according to local media and traders.

The trading house CHS reportedly won the tender at \$275.20/mt C&F. The wheat is scheduled to be shipped to the port of Aqaba between August 16 and August 31.

The French wheat prices strengthened day over day. Both FOB and CPT moved up by Eur2/mt. A French-based broker said that weather and crop prospects remained the dominant global market drivers.

The broker noted that improved rainfall in the EU has boosted confidence in 2026 crop potential, reducing the weather premium that had earlier supported prices.

Platts Asia Wheat Daily Commentary

- Australian wheat prices soften day over day
- East Coast liquidity weighs on container offers

Australian Premium White prices fell \$1/mt day over day to \$280/mt June 10, while Australian Standard White with no protein guarantee fell \$2/mt day over day to \$273/mt, tracking extended losses in the Australian dollar, softer offshore futures, and competition from higher old crop liquidity on the East Coast.

The Australian dollar was trading at 70.1 US Cents at 1630 SGT (0830 GMT), down 0.18% day over day and 0.36% week over week.

Delivered prices of Black Sea wheat to Southeast Asia also

eased week over week, with bulk and containerized offers of 11.5% wheat both reported at low-\$270s/mt CFR for July-August shipment, according to several Southeast Asian trade sources.

While delivered prices of APW and ASW have also fallen week over week, particularly for containerized offers out of the East Coast, offers are still \$20/mt CFR higher than the Black Sea, making it challenging to attract buyer demand, said an Indonesian flour miller.

A Philippines feed buyer invited offers for October arrival of feed wheat in an international buy tender June 10, according to several Southeast Asian trade sources. The results of the tender were not available at the time of writing.

Platts Canada Wheat Daily Commentary

- Tight supply as farmers hold back during planting
- Market awaits USDA report for futures impact

Platts assessed Canadian Western Red Spring Wheat 13.5% FOB Vancouver 30-45 days forward at \$269.15/metric tons on June 10, 9 cents/mt higher than June 9 as futures remained relatively unchanged ahead of the US Department of Agriculture's

June World Agricultural Supply and Demand Estimates report.

The September (U) MIAX Hard Red Spring wheat futures contract strengthened 25 cents/bushel to 643.50 cents/bu, tracking upward momentum in the energy market amid developments in the Middle East war.

Basis levels held unchanged as market fundamentals remained stable day over day, with July/Aug offers still heard in the U plus 90-110 cents/bu range. In Bangladesh, July/August CFR-Chittagong prices were also heard as generally unchanged, with bids at \$315/mt and offers heard \$2/mt firmer at \$318-319/mt.

Market slowdown persisted on June 10 as producers remained distanced from the market during the planting season and buyers continued to show minimal interest in CWSR.

"Capacity very tight and difficult to buy from producers," a trader said regarding July and August windows.

"Farmers are quiet and price expectations are much higher," a second trader said, noticing a similar sentiment from producers who wanted higher prices given the recent futures declines.

On the demand side, market activity remained quiet for July, with some interest shown for August and September shipments. New crop for September/October shipment was heard offered between 95-100 cents/bu over the December MIAX HRS futures contract.

"Market is quiet and seeing bits of demand July but mostly for [August] and [September], which is a tricky month to offer," the second trader said. August and September are a transitional period from new crop to old crop in the market, making pricing less clear given both crop available in the market at the same time.

The June USDA WASDE report is heavily anticipated by the market following the sharp cuts the USDA made in its May report.

"Let's see what tomorrow's USDA brings," the second trader said, adding, "We could sure use a lift on futures to excite farmers."

A South Korean feed milling group purchased two corn cargoes the previous day, while a deal for food corn was concluded June 10.

Platts assessed feed-quality corn CFR Northeast Asia up \$1/metric ton at \$256/mt for cargoes arriving over Sept. 8-Oct. 8.

A South Korean feed milling group concluded a tender June 10 by accepting two cargoes of feed corn at \$258.49/mt CFR for Oct. 22 arrival and at \$258.49/mt CFR for Oct. 30 arrival.

On June 10, another South Korean buyer purchased a cargo of food-grade corn for Oct. 31 arrival at \$265.65/mt CFR, a South Korean local trade agent reported.

"Flat price correction has prompted end-user movement and we should see more Korea coverage to follow," said a

grains trader.

US Pacific Northwest corn basis offer indications for September shipment were reported at 139 cents/bu to the low 140s cents/bu over September (U) CBOT futures.

In Taiwan, market participants noted that buyers had not completed the September arrival window coverage yet as of June 10, and no tender had been heard since April 29.

Pressure to import bulk cargoes of corn into Taiwan was balanced against "a lot of containers flooding the domestic market ... and the market has been very slow and too high for buyers. Demand has been pretty slow and there is not much interest for now," said a Singapore-based trader.

However, a Japan-based trader said he expected Taiwanese buyers to return to the market with a corn tender in the week ending June 19.

Brazilian FOB Santos premiums for August loading remained steady day over day.

The US dollar to Brazilian real exchange rate stood at Real 5.1877/\$1 as of 5:30 pm Brasilia time, down 0.07% day over day.

In Brazil's domestic market, prices remained steady in the Sorriso and Rio Verde regions, while they declined in the Maringá region.

Buying interest softened during the week in the Maringá region, while offer levels remained unchanged on the week, according to a broker based in the Maringá region.

"Spot deals have been trading closer to buyers' bids," the source said.

The Brazilian Grain Exporters Association, Anec, forecasts Brazil's June corn shipments at 645,801 mt, higher than last week's estimate and up from 568,668 mt a year earlier.

The association projects January-June corn exports at 6.40 million mt, up from 5.66 million mt in the same period of 2025.

Anec also expects 129,367 mt of corn to be shipped from the ports of Paranaguá and Santarém in the week ended June 13.

The monthly export volume rose due to the start of the winter harvest, and it is expected to continue increasing over the next few months, Anec said.

Platts US Corn Daily Commentary

- Farmers stay sidelined, limit freight interest
- Barge rates to New Orleans drop in Illinois, St. Louis

The US corn sources said farmers were sidelined in the market on June 10, which was limiting additional freight interest.

Barge freight rates to New Orleans for June shipments fell 3.5% week over week for barges loaded in Illinois and fell 2.4% for barges loaded in St. Louis, according to data from Platts and American Commercial Barge Line.

“Grain futures have been struggling to regain traction after last week’s sell off, but it looks like we have rebounded overnight,” one source said.

The Chicago Board of Trade July (N) future contracts fell 0.50 cents to \$4.1900/bushel on June 10, while September (U) settled at \$4.2775/bu, rising 0.25 cents.

“Corn looked frisky this morning, but the weakness in spread trade is too much for flat to endure,” despite general strength in the rest of the grain complex and energy markets, a broker said.

Platts assessed the outright price for June shipments to New Orleans in the incoterm CIF at \$196.05/metric ton and assessed July shipments at \$199.60/mt on July 10. FOB Gulf for August was assessed at \$206.59/mt.

Platts is part of S&P Global Energy.

Platts European Corn Daily Commentary

- Ukraine sellers cite bearish pressure, weak demand
- Egypt expects lower imports amid port oversupply

The Black Sea corn market remained stable June 10.

In the FOB market, the competitive offer for July loading remained at \$234/metric ton. Sellers were also seen at higher levels; however, firm buyers were absent.

Sellers in Ukraine expressed concerns that the market is bearish amid weak demand. “Corn has been under pressure,” a seller from Ukraine said.

In Egypt, traders anticipate lower corn imports in June amid oversupply at ports. “Local prices are still going down due to the lack of demand and a lot of offers everywhere,” an importer from Egypt said.

“Argentina and Brazil corn are at 13,600 FOT basis, which is equal to \$250/mt CIF for replacement. Ukrainian corn is 13,400 FOT, which is \$246/mt CIF. So, the international market is still ahead of the replacement cost,” the importer added.

Meanwhile, the CVB market remained muted amid low liquidity for the old crop. Participants said the market is focused on barley, which is more liquid.

“Old-crop corn is gone here, and for the new crop, we don’t really have a market,” a CVB broker said.

unchanged at 210 cents/bushel over July (N) Chicago Board of Trade (CBOT) futures.

Overnight, Chinese demand for Brazilian soybeans picked up, with multiple cargoes for nearby shipments traded, according to multiple Chinese soybean trade sources.

July shipments were heard traded at 210 cents/bu over July (N) CBOT, basis CFR China. The July-August straddle shipment was heard traded at 215-216 cents/bu over July (N) CBOT.

Multiple cargoes for August shipments were heard traded at 220-225 cents/bu over July (N) CBOT.

The new crop March 2027 shipment was also heard traded at 110 cents/bu over March (H) CBOT.

Additionally, a second-half July shipment was also heard traded at 80 cents/bu over July (N), basis FOB Santos.

In Southeast Asia, Thailand’s TFMA was seeking offers for soybeans from Brazil or Paraguay on June 10, for up to 71,500 mt of soybeans for October 2026 to February 2027 shipments, a Singapore-based trader said.

Platts is part of S&P Global Energy.

Platts Brazil Soybean Daily Commentary

- Old and new crop shipments traded in Paranaguá
- CBOT futures recover on technical buying, US crop conditions

Platts assessed the SOYBEX FOB Santos soybean contract for July loading at \$441.68/metric ton on June 10, \$3.03/mt higher than the previous assessment.

CBOT soybean futures rebounded on the day after eight

sessions of losses, which had previously dragged the commodity to a four-month low.

According to market analysts, the increase was mainly driven by technical buying and stronger crude oil prices. Additionally, an unexpected one-percentage-point drop in the US Department of Agriculture's weekly soybean condition ratings to 65% good-to-excellent supported the market.

Brazilian grain exporters' association Anec updated its estimate for soybean exports in June to 14.38 million metric tons, the highest volume recorded for the month, it said June 9.

The latest estimate represents an increase of about 2 million mt from the projection released the prior week and is 4.3% higher than Anec's June 2025 data, according to the association.

Brazil's soybean exports through the first six months of 2026 are projected at 72.89 million mt, up 7.1% over the same period in 2026, according to Anec.

The record soybean ship line-up at Brazilian ports in June is the result of strong demand from Chinese crushers over the past few weeks, market analysts said.

Trading activity was seen as moderate in the FOB Paranaguá paper market, with trades heard for both old and new crop shipments on the day.

The US dollar versus the Brazilian real settled at Real 5.1706/\$1 at 4:30 pm Brasilia time. Domestic soybean prices were higher in the main producing regions.

Platts is part of S&P Global Energy.

Platts US Soybeans Daily Commentary

- Outright prices climb on day
- War in the Middle East, unconfirmed China reports boost futures

After 7 days of outright price declines, the US soybean market saw increases in prices and futures on June 10, amid developments in the war in the Middle East and unconfirmed reports pointing to China enquiring about US soybeans.

Platts, part of S&P Global Energy, assessed SOYBEX FOB New Orleans for July shipment \$3.40/metric ton up from June 9 at \$449.38/mt. Platts assessed basis for FOB Gulf for July shipment remained unchanged at 100 cents/bushel over the July (N) soybeans futures contract.

Platts assessed the outright price for CIF New Orleans for June shipment \$3.40/mt up from the previous business day at \$441.66/mt. Platts assessed basis for CIF NOLA for June shipment remained unchanged at 79 cents/bu over the July (N) soybeans futures contract.

On June 10, US President Donald Trump announced that the US would start attacking Iran in response to the downing of a helicopter, pushing energy and agriculture markets up on the day.

Sources also reported that unconfirmed information pointing to China enquiring about US soybeans was circulating among market participants on June 10, which boosted the increase in

the futures market.

"Note that there are rumors that China is in the US market today," a trader in the FOB Gulf market said. "But I haven't seen anything to justify those rumors."

"Part of the [upward] movement in soybeans sparked rumors about possible Chinese interest," a second source said. "The problem is that the market can't find tangible confirmation [of this] while the additional 10% tariff on US soybeans remains in place."

The US Department of Agriculture is expected to release its World Agricultural Supply and Demand Estimates on June 11.

"We expect a quiet WASDE report from the USDA," crop principal analyst at S&P Global Energy, Aaron Gerdtz said. "With both old and new crop soybean ending stocks remaining unchanged. For the old crop, we anticipate offsetting changes: crush is projected to increase by 10 million bu, while exports are expected to decrease by 10 million bu. No changes are anticipated for the new crop balance sheet."

Animal Feed

Platts Latin America Soybean Meal Daily Commentary

- Latin American soybean meal prices move mixed
- Argentine demand remains firm with rising bids
- Brazil cuts 2026-27 soy output forecast 6M mt

Platts, part of S&P Global Energy, assessed Latin American FOB soybean meal prices mixed on June 10, with FOB Paranaguá prices decreasing and FOB Up River prices increasing.

Argentine FOB Up River premiums for July loading continued to rise due to higher bids.

According to a broker, demand in Argentina was firm, with buyers active in the market. However, no trade was reported.

The Brazilian FOB Paranaguá premiums for July loading dropped amid steady offers.

In Brazil, trading activity was slow, a second broker said.

In the Global Soybean Complex Short-Term Outlook report released on June 5, CERA analysts reduced Brazil's soybean production forecast, citing expectations of lower yields linked to El Niño. The forecast for Brazil's 2026-27 soybean production is 177 million metric tons, down 6 million mt from the initial outlook.

Brazilian grain exporters' association Anec estimated that Brazil will export 2.31 million mt of soybean meal in June, up from 1.67 million mt in the same month last year, it said on June 9.

If the current shipment-schedule-based forecast is confirmed, Brazil would record exports of 12.72 million mt in the first half of the year, compared with 11.27 million mt in the same period of 2025.

The Chicago Board of Trade July (N) contract settled at \$301.90/short ton, up \$0.80/st.

Platts European Animal Feed Daily Commentary

- EU feed prices fall amid CBOT decline
- Spanish corn market slows awaiting barley
- Soybean meal demand remains weak at Eur222/mt

Northern Europe

The FOB Netherlands market was bearish on June 10.

A trader based in the Netherlands said that the offer prices were falling amid the CBOT rally.

"CBOT has gone down a lot now, the buyers are not very active as the market is not stable," the trader said. The trader further added that the current offers are in the Eur345/metric ton range for the July period.

Southern Europe

The Spanish corn and soybean meal markets remained quiet day over day.

A broker noted that the corn market was very slow as buyers awaited barley, with offers at EUR 222/mt for June-July ex-works Tarragona.

A third trader noted that the soybean meal market isn't very active, even at lower prices, because "the most urgent needs [have] already been met."

Platts US Distiller Grains DDGS Daily Commentary

- Market values trend lower
- Heavier tone weight on market

The US dried distillers grains with solubles market moved lower June 10 as participants reported softer values in both export and rail channels, with recent selling activity pressuring sentiment.

Platts assessed CIF New Orleans DDGS barges for June at \$207/st on June 10; the Chicago DDGS truck market for June at \$181/st; and the Southern California rail market for June at \$228/st.

One trader said CIF values have continued to ease. "I think it's a little weaker now," the trader said, reflecting a softer tone in the Gulf market.

A broker also reported lower indications in the Union Pacific California rail market. "Lower here today starting out," the broker said.

Another broker said recent activity marked one of the busiest periods for DDGS trading in weeks but added that the pickup has come alongside increasing pressure on values. "It's heavy," the source said of the CIF market.

Trading picked up as buyers and sellers adjusted positions, resulting in lower indications across several channels. The recent flow helped firm up direction after weeks of limited participation and wide bid-ask spreads.

Weekly ethanol production averaged 1.108 million b/d in the week ended June 6, unchanged from the prior week, according to the US Energy Information Administration.

Vegetable Oils

Platts Asia Palm Oil Daily Commentary

- Asian palm oil futures rise on stronger exports
- Malaysia's May inventory climbs 5.2% MoM
- India demand expected to pick up as prices fall

The Asian palm oil market was mixed June 10, with palm oil futures on Bursa Malaysia Derivatives edged higher amid firmer exports, but gains were capped by higher inventory levels in Malaysia.

The benchmark palm oil contract for August delivery on the Bursa Malaysia commodity exchange rose MR11/metric ton to MR4,539/mt June 10.

Malaysia's palm oil stocks totaled 2.427 million mt in May, up 5.2% month over month, the Malaysian Palm Oil Board said June 10.

Malaysia's palm oil export data by cargo surveyor for June 1-10, compared with the same period last month, showed increases — Amspec reported 376,971 mt, up 4.9%, and Intertek Testing Services reported 427,255 mt, up 3.5%.

The Indian spot market remained slow, with no trades heard. However, two India-based traders said demand is picking up as the spread between palm oil and soybean oil widened, making palm oil more attractive to buyers willing to buy more palm oil than soybean oil.

Platts assessed CPO CFR WC India at \$1,230/mt June 10 for June loading, up \$7.50/mt from June 9, while the July shipment was \$5/mt higher than June.

"Although the market is slow, buying interest is present, as prices have fallen to a more favorable level," a Malaysia-based trader said.

Platts assessed CPO FOB Indonesia at \$1,190/mt June 10 for June loading, up \$5/mt from June 9, while the July shipment was \$5/mt higher than June.

Platts assessed the RBDPS FOB Indonesia price at \$1,052.50/mt June 10 for June loading, down \$7.50/mt from June 9, while the July shipment was \$5/mt higher than June.

"PFAD buying interest in Malaysia is strong, with June-loading cargoes sold out and limited availability for July-loading," the Malaysia-based trader said.

Platts assessed the PFAD FOB Indonesia price at \$970/mt June 10 for June loading, unchanged day over day, while the July shipment was \$5/mt higher than June.

Platts is part of S&P Global Energy.

Platts Latin America Soybean Oil Daily Commentary

- Brazilian, Argentine soybean oil prices rise
- CBOT futures gain ahead of USDA report release
- Record supply pressures South American exports

Brazilian and Argentine soybean oil FOB markets strengthened June 10, as Chicago Board of Trade soybean oil futures extended recent gains ahead of the US Department of Agriculture's June World Agricultural Supply and Demand Estimates report, scheduled for release June 11.

CBOT July soybean oil futures rose 0.56% day over day to settle at 75.33 cents/pound.

Market participants said soybean oil futures remained supported by renewable diesel demand expectations and broader biofuel market fundamentals, although trading activity was cautious ahead of the closely watched USDA report.

Participants said the June WASDE report could provide updated guidance on US soybean supply and demand balances, and global oilseed production prospects, following recent discussions about favorable US crop development and export demand.

In Argentina, Platts assessed the soybean oil FOB Up River price for July loading at \$1,180.14/mt June 10, up \$9.26/mt from June 9. The basis for July loading in the Up River paper market was unchanged at minus 2,180 points to the July (N) futures at the CBOT.

In Brazil, Platts assessed the soybean oil FOB Paranaguá price for July loading at \$1,186.75/mt June 10, up \$13.67/mt from June 9. The basis for July loading in the Paranaguá paper market was assessed 20 points higher at minus 2,150 points to the July (N) futures at the CBOT.

Platts also assessed the soybean oil FOB Paranaguá price for August loading at \$1,159.63/mt June 10, down \$2.43/mt from June 9. The basis for August loading in the Paranaguá paper market was assessed 50 points lower at minus 2,140 points to the August (Q) futures at the CBOT.

Market participants said FOB soybean oil prices in South America continued to reflect abundant regional supply availability following record soybean production and crush projections in Brazil and elevated export competition across the region.

Market participants said FOB basis levels remained historically weak despite recovering from the record discounts seen at the beginning of June. Traders noted that physical soybean oil values in South America have remained relatively stable in recent sessions, even as CBOT soybean oil futures experienced significant volatility.

Attention is increasingly focused on the USDA's June WASDE report, due June 11. While major changes to South American

production estimates were not widely expected, participants said updated US and global soybean balance sheets could influence broader oilseed market sentiment following the recent correction in soybean oil futures.

Traders also continued to monitor developments in Argentina following the recent oilseed worker labor dispute, although mandatory conciliation measures have reduced immediate concerns about disruptions to soybean oil and soybean meal export flows through the country's Rosario export corridor.

Platts is part of S&P Global Energy.

Platts Europe Vegetable Oil Daily Commentary

- Cheap soybean oil pressures sunflower oil demand
- Europe remains primary destination for Ukrainian exports
- Rapeseed oil outperforms amid stronger fundamentals

European vegetable oil markets strengthened June 10, led by significant gains in rapeseed oil, while sunflower oil remained unchanged. RSO FOB Dutch Mills front-month rose Eur17 to Eur1,181/mt, while third and fourth positions gained Eur 7 and Eur 5, respectively. In contrast, FOB Black Sea sunflower oil held steady at \$1,374/mt, highlighting a growing divergence between the rapeseed and sunflower oil complexes. The strength in rapeseed oil suggests that regional biodiesel demand and nearby supply considerations continue to outweigh broader bearish signals from global vegetable oil markets.

Sunflower oil fundamentals remain under pressure from abundant alternative supplies. A trader based in Ukraine said that "cheap soybean oil from Brazil and Argentina continues to dominate global markets," leading buyers to remain "quite cautious about buying large batches of expensive sunflower oil from Ukraine." The availability of competitively priced soybean oil is limiting demand for higher-priced sunflower oil, particularly in destinations outside Europe. This is helping explain why sunflower oil values have struggled to advance despite ongoing supply-side constraints in Ukraine.

Export flows for Ukrainian sunflower oil continue to become increasingly concentrated. According to the trader based in Ukraine, "Demand for Ukrainian sunflower oil remains mainly for container deliveries or shipments to the EU." Geopolitical risks continue to influence buyer behavior, with the source highlighting "constant risks of shelling of ports and ships." As a result, Europe remains the primary destination willing to absorb Ukrainian sunflower oil at current price levels, while demand in more distant destinations remains constrained by both pricing and logistical risks.

The processing sector is also facing additional uncertainty. The trader based in Ukraine said that "Russia again attacked the oil extraction plant in Chornomorsk with drones," adding that market participants are "not sure that its work will be restored in time for the start of the season." The source said that "the decrease in the number of processing plants remains the main reason for the decline in demand for sunseed." For

Europe, this creates a complex market environment where weaker global demand and cheaper competing oils are offset by reduced Ukrainian processing capacity and ongoing geopolitical disruptions. While sunflower oil remains stable, rapeseed oil continues to attract stronger support from regional fundamentals and biodiesel-linked demand.

Platts is part of S&P Global Energy.

CBOT soybean oil July/December spread reaches strongest inverse since 2022

- Renewable diesel demand tightens US supplies
- 45Z tax credit favors North American feedstocks
- July/December gap widens to 5-6 cents/lb

The Chicago Board of Trade soybean oil July/December futures spread widened to nearly 6 cents/lb in late April and remained deeply inverted through early June, approaching levels last seen during the global vegetable oil supply shock of 2022.

The spread, which reflects the premium of nearby July soybean oil futures over deferred December futures, climbed sharply throughout the first half of 2026 as market participants increasingly priced in tightening old-crop soybean oil supplies and stronger domestic biofuel demand in the US.

The July/December spread traded near 5-6 cents/lb during late May before easing modestly in early June, remaining well above levels observed during 2023, 2024 and 2025.

CBOT SBO July/December futures spreads 2020-2026

Source: CQG

Market participants said the widening inverse reflects a market increasingly focused on nearby feedstock availability as renewable diesel demand expands faster than domestic soybean oil supplies can respond.

Biofuel policy tightens nearby US soybean oil supplies

The rally in the July/December spread coincided with a broader surge in CBOT soybean oil futures, which climbed from around 48 cents/lb at the beginning of 2026 to nearly 80 cents/lb by early June.

Participants pointed to recently finalized US Environmental Protection Agency biomass-based diesel blending mandates for 2026 and 2027 as a key driver behind the move.

The mandates call for record renewable fuel blending volumes and are expected to increase demand for soybean oil as a feedstock for renewable diesel production.

At the same time, evolving 45Z clean fuel tax credit rules have increased market expectations that North American feedstocks will capture a larger share of future renewable fuel demand.

Market participants said the combination of stronger policy-driven demand and limited nearby soybean oil inventories created a timing mismatch in which old-crop supplies became increasingly valuable.

The July contract represents soybean oil available before the 2026 US soybean harvest, while the December contract reflects expectations for newly harvested soybean supplies and additional crushing capacity later in the year.

CBOT Soybean Oil July & December futures

Source: CQG

The resulting inverse structure discourages storage and encourages immediate movement of soybean oil into the domestic renewable diesel market.

Strong renewable diesel margins linked to elevated diesel prices and broader energy market strength further reinforced nearby demand during much of the period.

Global vegetable oil shock of 2022 still looms large

Although the current inverse has reached historically elevated levels, it remains below the extremes observed during 2022.

During April and May 2022, the July/December soybean oil spread traded above 9 cents/lb and briefly exceeded 10 cents/lb as global vegetable oil markets grappled with severe supply disruptions following Russia's invasion of Ukraine.

At the time, the market faced a combination of unprecedented supply shocks.

Ukraine accounted for roughly half of global sunflower oil exports before the war, while logistical disruptions across the Black Sea sharply reduced export availability from one of the world's largest vegetable oil-producing regions, said a Brazil-based trader.

The market was also dealing with Indonesia's temporary palm oil export restrictions, which further tightened global vegetable oil supplies and forced buyers to seek alternative feedstocks.

Simultaneously, renewable diesel production in North America was expanding rapidly, increasing competition for soybean oil

supplies.

The combination of disrupted sunflower oil exports, constrained palm oil availability and growing biofuel demand produced one of the most severe vegetable oil shortages in modern history and drove soybean oil futures and spreads to record or near-record levels.

By comparison, participants said the current market is being driven primarily by demand growth rather than a major global supply disruption.

South American export markets tell a different story

While CBOT soybean oil futures and nearby spreads have signaled tightening US market conditions, physical export markets in South America have reflected a markedly different fundamental picture.

Market participants noted that Brazil and Argentina continue to harvest record or near-record soybean crops, supporting elevated crushing activity and abundant soybean oil supplies.

Brazil's National Supply Company, or Conab, recently maintained its 2025-26 soybean production estimate at a record 180.13 million mt, while the Brazilian Association of Vegetable Oil Industries, or ABIOME, projected soybean processing at a record 62.5 million mt in 2026.

As a result, FOB soybean oil basis levels in Brazil and Argentina weakened to record discounts relative to CBOT soybean oil futures during late May and early June.

Brazil FOB Paranaguá and Argentina FOB Up River soybean oil basis values fell to around minus 2,530 points and minus 2,550 points, respectively, against CBOT July soybean oil futures June 1, the weakest levels recorded since S&P Global Energy launched the assessments.

Market participants said the divergence highlights the growing separation between the US domestic soybean oil market and global export markets.

Participants said South American soybean oil remains tied primarily to global vegetable oil fundamentals, including palm oil competition, Asian import demand, freight economics and export availability.

While the July/December inverse has retreated modestly from its recent highs, market participants said the spread remains historically elevated and continues to signal tight nearby US soybean oil balances despite abundant supplies elsewhere in the world.

Platts is part of S&P Global Energy.

Anec raises Brazil's June soybean export forecast, headed for monthly record

- June soybean exports expected at 14.38 million mt
- Higher June soybean meal export expectations
- Corn exports to reach 645,801 mt in June

Brazilian grain exporters' association Anec updated its estimate for soybean exports in June to 14.38 million metric tons,

the highest volume recorded for the month, it said June 9.

The latest estimate represents an increase of about 2 million metric tons from the projection released the prior week and is 4.3% higher than Anec's June 2025 data, according to the association.

Brazil's soybean exports through the first six months of 2026 are projected at 72.89 million mt, up 7.1% over the same period in 2026, according to Anec.

The record soybean ship line-up at Brazilian ports in June is the result of strong demand from Chinese crushers over the past few weeks, market analysts said.

Platts, part of S&P Global Energy, assessed the SOYBEX FOB Santos soybean contract for July loading at \$438.65/metric ton June 9, \$2.57/mt lower than the previous assessment.

Soybean meal

The association estimates that Brazil will export 2.31 million mt of soybean meal in June, higher from 1.67 million mt by the same month last year.

If the current shipment-schedule-based forecast is confirmed, Brazil will accumulate exports of 12.72 million mt in the first half of the year, compared with 11.27 million mt in the same period of 2025.

A broker said demand for soybean meal for exports is low this week.

Platts assessed the FOB Paranaguá soybean meal price for delivery in July at \$330.80/mt on June 9, down 66 cents/mt day over day.

Corn

Anec forecasts Brazil's June corn shipments at 645,801 mt, higher than last week's estimate and up from 568,668 mt a year earlier.

The association projects January-June corn exports at 6.40 million mt, up from 5.66 million mt in the same period of 2025.

Anec also expects 129,367 mt of corn to be shipped from the ports of Paranaguá and Santarém in the week ended June 13.

The monthly export volume rose due to the start of the winter harvest, and it is expected to continue increasing over the next few months, Anec said.

Platts assessed FOB Santos corn for August shipment at \$213.57/mt June 9, up \$3.94/mt day over day.

Anec said June projections remain subject to revision as the shipping schedule evolves.

Malaysia's May palm oil stocks beat forecast amid lower exports

- Palm oil stocks rise 5% MOM in May
- Output down 7% MOM; exports down 15%
- Weak demand drives inventory build

Malaysia's palm oil stocks totaled 2.427 million metric tons in May, up 5.2% month over month, the Malaysian Palm Oil Board

said June 10, surpassing the 2.36 million mt forecast by industry participants in a Platts survey.

Stocks rose in May as exports came in below expectations and offset lower production at the world's second-largest palm oil producer and exporter, according to MPOB data.

The country's palm oil production fell 7% month over month to 1.516 million mt in May, below industry expectations of 1.56 million mt, the data showed.

Malaysia's palm oil industry has entered a seasonally steady production phase. With demand currently weak, ending stocks are set to keep rising, Raymond Lee, a Kuala Lumpur-based palm oil analyst, told Platts.

The country's palm oil exports fell 14.5% month over month to 1.105 million mt in May, MPOB said, also coming in below the survey forecast of 1.23 million mt.

The benchmark palm oil contract for August delivery on the Bursa Malaysia derivatives exchange traded in a tight range May 10 and was up 0.24% day over day at MR4,539/mt (\$1,117.02) by the afternoon session at 1537 Singapore time.

India, a major palm oil buyer, is currently slightly understocked, and a potential stock refill is expected over the next two months, Anilkumar Bagani, head of research at India-based vegetable oil brokerage Sunvin Group, said in a note June 10.

Meanwhile, Indonesia's higher biodiesel mandate, which takes effect July 1, along with a greater likelihood of El Nino, could affect Asian oilseed production and tighten vegetable oil supplies, Bagani added.

Platts, part of S&P Global Energy, assessed crude palm oil FOB Indonesia at \$1,190/mt on June 9, down 0.2% day over day.

Subscriber Notes

Platts corrects Soybean meal FOB Netherlands assessment for June 9

Platts, part of S&P Global Energy, has corrected the assessment for the Soybean meal FOB Netherlands (EUPMQ00) for June 9.

The assessment should read as Eur357/mt. The correction has been updated in the Platts database under the code EUPMQ00.

The assessment appears in Platts Connect on fixed page PAA(0805) and in Platts Daily Grains.

Assessment Rationale

Grains

Platts Ags EMEA Wheat Daily Rationale

Platts assessed the Milling Wheat Marker at \$240/metric ton on June 10, down 25 cents from June 9. CVB 12.5% handysize wheat, assessed at \$240/mt, was the most competitive wheat out of the three components of the Milling Wheat Marker, Ukraine 11.5%, normalized to the nearest 25 cents of \$240.25/mt when adding May's quality normalization of \$6.15/mt, to account for its lower protein content, assessed at \$234/mt, and Russian 12.5% wheat assessed at \$242/mt on the day. This reflects the Platts assessment window from July 8-22.

Platts assessed Black Sea wheat (Russian deepsea, 12.5% protein) at \$242/mt on June 10, up \$1/mt, above a bid at \$241.50/mt for H2 July loading. The structure between the first and second halves of July was assessed flat. This reflects the Platts assessment window from July 8-22.

Platts assessed Black Sea wheat (Ukraine deepsea, 11.5% protein) unchanged at \$234/mt on June 10, below an offer for July at \$235/mt and above a bid at \$230/mt. The structure between the first and second halves of July was assessed flat. This reflects the Platts assessment window from July 8-22.

Exclusions: No market data was excluded from the June 10 Black Sea wheat assessments.

Platts is part of S&P Global Energy.

This rationale applies to symbols <BSMWM00>, <WRBSD00>, <WUBSA00>.

Platts Asia Wheat Daily Assessment Rationale

Platts assessed Australian Premium White wheat down \$1/mt at \$280/mt FOB Kwinana June 10 for cargoes loading between Aug. 9 and Sept. 8, partially tracking a weaker Australian dollar.

Platts assessed Australian Standard White wheat with no protein guarantee down \$2/mt at \$273/mt for cargoes loading over the same period, tracking a lower indicative value at \$273/mt. This widens the spread between Australian Premium White and Australian Standard White with no protein guarantee to \$7/mt.

Platts is part of S&P Global Energy.

Platts Canada Wheat Daily Rationale

Platts assessed Canada Western Red Spring Wheat 13.5% FOB Vancouver 30-45 days forward at \$269.15/metric tons on June 10, 9 cents/mt higher than June 9.

CWRS Wheat 13.5% FOB Vancouver basis 30-45 days forward, spanning July 10 – July 25, was assessed unchanged at MIAX Hard Red Spring Wheat September (U) futures plus 89 cents/bushel based on value indicated at that level.

CWRS Wheat 13.5% FOB Vancouver basis 45-60 days forward, spanning July 25 – Aug. 9, was assessed unchanged at U plus 89 cents/bu based on value indicated at that level.

CWRS Wheat 13.5% FOB Vancouver basis 60-75 days forward, spanning Aug. 9 – Aug. 24, was assessed unchanged at U plus 89 cents/bu based on value indicated at that level.

The assessments also considered July/Aug offers heard unchanged between U plus 90-110 cents/bu and stable market feedback.

Exclusions: No data was excluded from the assessments.

Platts is part of S&P Global Energy.

Platts Argentina Corn FOB Up River Daily Rationale

Platts assessed corn FOB Up River for loading in July at \$199.61/metric ton on June 10, down 0.19 cents/mt from the

previous assessment.

The assessment considered the FOB premium for Up River July-loading unchanged at plus 88 cents/bushel to Chicago Board of Trade July (N) corn futures, based on steady offers heard at N plus 90 cents/bu, and bids heard at N plus 80 cents/bu at the market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <ARGCA00> <ARGCB00>

Platts Brazil Corn Daily Rationale

Platts assessed the Brazilian corn FOB Santos price for August loading at \$213.67/metric ton on June 10, 0.10 cents/mt higher than the previous assessment.

The assessment considered the FOB Santos basis for August loading cargoes unchanged at plus 115 cents/bushel to the Chicago Board of Trade September (U) contract, based on an indicative value heard at that level, no offers or bids heard for full August loading at the market close.

An offer for first-half August loading at U plus 115 cents/bu was heard earlier on the day.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <ABCSA00> <ABCSB00>

Platts US Corn Daily Assessment Rationale

Platts assessed the US Yellow Corn No. 2 CIF New Orleans barge basis for June shipment at 79 cents/bushel over the CBOT July (N) corn futures contract on June 10, up one cent from the previous business day. This was based on a competitive bid heard at 78 cents/bu, and an offer heard at 84 cents/bu.

Platts assessed the US Yellow Corn No. 2 CIF New Orleans barge basis for July shipment at 88 cents/bu over the Chicago Board of Trade July (N) corn futures contract on June 10, increasing 2 cents from the previous assessment. This was based on a competitive bid heard at 87 cents/bu, and an offer heard at 89 cents/bu.

Platts assessed the US Yellow Corn No. 2 FOB Gulf basis for August shipments at 97 cents/bu over the CBOT September (U) corn futures contracts on June 10. Offers were heard at 98 cents/bu for the first half of August, and 101 cents/bu for the second half of the month.

No information was excluded.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <WCNOE00> <WCNOU00>

Platts FOB Black Sea Corn Daily Assessment Rationale

Platts assessed Ukrainian corn unchanged at \$233/metric ton on June 10, below an offer at \$234/mt for July loading. The structure between the first and second halves of July was assessed flat. This reflects the Platts assessment window from July 8-22.

Platts is part of S&P Global Energy.

Exclusions: No market data was excluded from the June 10

Black Sea corn assessment.

This rationale applies to symbol(s) <CUBSU00>

Oilseeds.

Platts Asia Soybeans Daily Rationale

Platts assessed CFR China first-month soybeans up \$2.21/metric ton day over day at \$488.51/mt, while basis was unchanged at 210 cents/bushel over July (N) CBOT June 10, considering an overnight trade at 210 cents/bu and under the offer at 215 cents/bu over July (N), for Brazil July shipment.

Platts assessed CFR China second-month soybeans up \$2.20/mt day over day at \$493.65/mt, while basis was unchanged at 224 cents/bu over July (N) CBOT, considering an overnight trade at 224 cents/bu and below the sharpest offer at 228 cents/bu over July (N) for Brazil August shipment.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYBAB00> <SYBAA00> <SYBAF00> <SYBAD00> <SYBAC00> <SYBAE00>

Platts Brazil Soybean Daily Assessment Rationale & Exclusions

Platts assessed the SOYBEX FOB Santos soybean contract for July loading at \$441.68/metric ton June 10, \$3.03/mt higher than the previous assessment.

The FOB Santos basis for July loading was assessed 1 cent/bushel lower at plus 79 cents/bu to the CBOT July (N) contract, based on a spread to the Paranagua paper market heard at plus 4 cents/bu. No bids or offers were heard for the full July loading of FOB Santos cargo.

An offer for FOB Santos H2 July was heard at N plus 85 cents/bu earlier on the day, with bids at N plus 75 cents/bu.

The FOB Paranagua basis for July loading was assessed 5 cents/bu lower at plus 75 cents/bu to the CBOT July (N) contract, based on a trade heard at that level, lower offers at N plus 85 cents/bu and lower bids at N plus 70 cents/bu at market close.

Exclusions: No data was excluded.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYBBC00> <SYBBF00> <SYBBD00> <SYBBH00> <SYBBA00> <SYBBE00> <SYBBB00> <SYBBG00>.

Platts US Soybeans Daily Rationale

Platts SOYBEX FOB New Orleans for July shipment was assessed at \$449.38/metric ton on June 10, \$3.40 up from June 9. The FOB Gulf basis for July shipment was assessed at 100 cents/bushel over the Chicago Board of Trade July (N) soybeans contract on the day, unchanged from the previous business day. This was based on a value indication heard at 100 cents/bu, and an offer at 106 cents/bu.

The CIF New Orleans basis for June shipment was assessed at 79 cents/bu over the July (N) soybeans futures contract on the day, unchanged from the previous business day. This was based

on a bid heard at 75 cents/bu, and an offer heard at 80 cents/bu.

No information was excluded.

This rationale applies to symbol(s) <SYBBI00> <SYBBL00> <SYBBK00> <SYBBJ00>

Animal Feed and Protein

Platts Argentina Soybean Meal Daily Rationale

Platts assessed the Argentine soybean meal FOB Up River price for July loading at \$331.68/metric ton on June 10, \$3.08/mt higher than the previous assessment.

The basis for July loading in the Up River cargo market was assessed \$2/short ton higher at minus \$1/st to the July (N) futures at the Chicago Board of Trade. The assessment considered an indicative value heard at that level, higher bids at minus \$3/st and steady offers at \$0/st to the CBOT N contract at the market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYMAA00> <SYMAB00>

Platts Brazil Soybean Meal Daily Rationale

Platts assessed the Brazilian soybean meal FOB Paranaguá price for July loading at \$329.48/metric ton on June 10, \$1.32/mt lower than the previous assessment.

The basis for July loading in the Paranaguá paper market was assessed \$2/short ton lower at minus \$3/st to the July (N) futures at the Chicago Board of Trade. The assessment considered an indicative value heard at that level, steady offers at \$0/st and lower bids at minus \$4/st to the CBOT N contract at the market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYMBA00> and <SYMBB00>.

Platts US Dried Distiller Grains DDGS Daily Assessment Rationale

Platts assessed CIF New Orleans dried distillers grains with solubles barges for the June shipment period at \$207/short ton on June 10, \$2/st down from the previous session based on a value indication at that level, a bid heard at \$205/st, and an offer heard at \$211/st.

The Chicago DDGS truck market for the June delivery period was assessed at \$181/st, \$5/st down from the previous session, based on a bid heard at \$178/st and an offer heard at \$182/st.

The South California rail market for the June delivery period was assessed at \$228/st, \$3/st down from the previous session, based on a trade heard at that level for June 9, and a bid heard at \$225/st and an offer heard at \$229/st.

An offer heard at \$179/st for Chicago trucks was discounted due to higher offer levels heard later in the session.

Platts is part of S&P Global Energy.

Vegetable Oils.

Platts Asia Palm Oil Daily Rationale

Platts assessed CPO CFR WC India at \$1,230/metric ton June 10 for June loading, up \$7.50/mt from June 9, below an offer and above a bid.

A CPO offer was heard at \$1,235/mt and an indicative bid at \$1,225/mt on a CFR WC India basis, shipping in June.

A July shipment of CPO CFR WC India was at \$1,235/mt June 10, up \$7.50/mt from June 9, considering a \$5/mt carry between June and July.

Platts assessed CPO FOB Indonesia at \$1,190/mt June 10 for June loading, up \$5/mt from June 9, below an offer and above a bid.

A CPO offer was heard at \$1,195/mt and an indicative bid at \$1,180/mt on a FOB Dumai basis, shipping in June.

A July shipment of CPO FOB Dumai was at \$1,195/mt June 10, up \$5/mt from June 9, considering a \$5/mt carry between June and July.

Platts assessed RBDPS FOB Indonesia at \$1,052.50/mt June 10 for June loading, down \$7.50/mt from June 9, below an offer and above a bid.

An RBDPS offer was heard at \$1,067.50/mt and an indicative bid at \$1,037.50/mt on a FOB Dumai basis, shipping in June.

A July shipment of RBDPS FOB Dumai was at \$1,057.50/mt June 10, down \$7.50/mt from June 9, considering a \$5/mt carry between June and July.

Platts assessed PFAD FOB Indonesia at \$970/mt June 10 for June loading, unchanged day over day, below an offer and above a bid.

A PFAD offer was heard at \$985/mt and an indicative bid at \$955/mt on a FOB Dumai basis, shipping in June.

A July shipment of PFAD FOB Dumai was at \$975/mt June 10, unchanged day over day, considering a \$5/mt carry between June and July.

Platts is part of S&P Global Energy.

Platts Argentina Soybean Oil Daily Rationale

Platts assessed the Argentine soybean oil FOB Up River price for July loading at \$1,180.14/metric ton June 10, up \$9.26/mt from June 9. The basis for July loading in the Up River paper market was unchanged at minus 2,180 points to the July (N) futures at the Chicago Board of Trade. The assessment considered an indicative value last heard at that level, offers at minus 2,100 points and bids at minus 2,380 points to the CBOT N contract at the market close. No trades were confirmed before the market close for July loading in the FOB Up River paper market on June 10.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYOAA00> and <SYOAB00>.

Platts Brazil Soybean Oil Daily Rationale

Platts assessed the Brazilian soybean oil FOB Paranaguá price for July loading at \$1,186.75/metric ton June 10, up \$13.67/mt from June 9. The basis for July loading in the Paranaguá paper market was assessed 20 points higher at minus 2,150 points to the July (N) futures at the Chicago Board of Trade. The assessment considered an indicative value last heard at that level, offers at minus 2,090 points and bids at minus 2,170 points to the CBOT N contract at the market close. No trades were confirmed before the market close for July loading in the FOB Up River paper market on June 10.

Platts assessed the Brazilian soybean oil FOB Paranaguá price for August loading at \$1,159.63/mt June 10, down \$2.43/mt from the last assessed price on June 9. The basis for August loading in the Paranaguá paper market was assessed 50 points lower

at minus 2,140 points to the August (Q) futures at the Chicago Board of Trade. The assessment considered an indicative value last heard at that level. No bids, offers or trades were confirmed before the market close for August loading in the FOB Paranaguá paper market on June 10.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYOBB00> and <SYOBA00>.

Platts Europe Sunflower Oil Daily Rationale

Platts assessed sunflower oil FOB Black Sea Ukraine for July loading unchanged June 10 at \$1,374/mt, above a bid heard at \$1,370/mt.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SFWBL00>.
