Commentary and Analysis

Wheat

Platts European Wheat Daily Commentary

- Black Sea wheat prices drop on port issues
- Russian August exports to fall to 1.8 million mt
- Ukraine harvest reaches 94% completion rate

The Black Sea wheat market fell Aug. 19 amid limited vessel calls at Black Sea ports.

Russian traders valued the market at \$215/mt, while a few FOB offers were at \$217/mt. CIF Egypt buyers were seeking low \$270s/mt bids.

"Owners are asking \$70/mt freight to Egypt from deep-sea ports, which limits the business. I would rather not trade," one Russian seller said.

In August, the Russian analytical center Rusagrotrans lowered its wheat export forecast to 1.8 million mt, down from last year's 4.5 million mt. The last time August exports were this low was during the temporary ban on Russian exports in August 2010 due to a severe drought, when crop losses totaled 13.3 million hectares or 17% of the total sown area.

"I can sell from the deep sea, but the vessel will not come," another Russian seller said about the lack of vessel calls.

Ukraine's harvest is almost complete, with 94% of the planned area, or 23.8 million mt, harvested as of Aug. 1, and an average yield of 4.91 mt/ha. The coasters' business saw bids at \$274/mt to Egypt. As in Russia, traders said Ukraine won't be able to export 14 million mt if the attacks continue.

The Constanta-Varna-Burgas market rose as sellers added more premiums to their offers, with \$270/mt for the 11.5% and a \$10/mt premium on top of that for the 12.5% protein.

Platts Asia Wheat Daily Commentary

- Australian wheat prices rise amid demand
- Black Sea supply gaps boost liquidity
- Philippines tender seeks October, December arrival cargoes

Australian Premium White and Australian Standard White wheat with no protein guarantee continued to rise Aug. 19 amid increased liquidity.

Market participants observed higher offer levels, with a trader raising the ASW1 price to \$296/metric ton FOB Western Australia for October shipment. Meanwhile, another trader said the most competitive level remained at \$293/mt FOB.

In the Philippines, a feed miller group opened a tender for two cargoes of either feed wheat or corn for Oct. 5 and Dec. 5 arrival with two port discharges at Batangas and Bataan. The tender will conclude on the evening of Aug. 19.

"Liquidity is picking up [for Australian wheat] in August, as Russia and Ukraine cargoes are not able to make it out to destinations," an Australia-based trader said.

Australian wheat is currently seeing a flat spread between October, November and December shipments amid heightened demand to replace Black Sea wheat shipments, the trader said.

Platts is part of S&P Global Energy.

Platts Canada Wheat Daily Commentary

- October capacity supports basis
- Protein spreads shift demand
- MAFF tender expected to give market direction

Platts assessed Canada Western Red Spring Wheat 13.5% FOB Vancouver 30-45 days forward at \$310.58/metric tons on Aug. 19, up \$6.06/mt from the previous session, with tightening export capacity supporting basis as Minneapolis Spring wheat futures posted a sharp increase.

The December Minneapolis Hard Red Spring wheat futures contract rose 16.50 cents/bushel to settle at 720.25 cents/bu.

One trader said current CWRS indications remained reasonable, adding that the upcoming Japanese MAFF tender "will be interesting and insightful" for further price direction.

Another trader generally agreed with October-November indications but suggested raising the offer side by around 5 cents/bu.

“For valuations, I would tend to price ‘fair value’ closer to the offer side as we are seeing capacity run thin, especially for October, as other commodities are booking elevations ahead of wheat,” the trader said, citing canola and soybeans as competing for elevation space.

A Latin American trader reported October-November CWRS 13% offers around 105 cents/bu over the December Minneapolis wheat futures contract, with bids at 100 MWZ and below. The trader said buyers had recently shown less interest in 13.5% protein because of the wider protein spreads, adding that “13% is just as good for buyers and a little cheaper.”

Market indications remained mixed depending on destination, with another trader reporting lower container-basis offers into Southeast Asia. Currency movements were also influencing Canadian basis, according to the trader, as a stronger Canadian dollar increased pressure on exporters’ pricing. The trader said basis paid to growers may need to rise if producer selling remains limited, although stronger futures could offset some of that need.

“Futures are helping, so that could offset the basis increase, but that will be a factor moving forward,” the trader said, adding that a weaker US dollar was supportive for US export competitiveness.

Corn

Platts Asia Corn Daily Commentary

- South Korean buyers delay purchases amid high offers
- Vietnam demand weakens during Ghost Month

Asian corn prices eased Aug. 19, tracking a tradable value at a similar level.

Platts assessed feed-quality corn CFR Northeast Asia at \$277/mt for cargoes arriving Nov. 17-Dec. 17, down \$1/mt day over day.

In South Korea, market activity remained muted after prices surged in response to last week’s bullish US Department of Agriculture World Agriculture Supply and Demand Estimates report, which projected lower ending stocks.

A South Korean trader reported offers in the mid-\$280s/mt CFR, noting limited buyer interest at those levels. “They would like to wait further,” the trader said.

Similarly, Vietnamese buying interest was subdued, with a local trader citing three factors: weakening livestock demand during the Ghost Month fasting period weighing on farm prices and feed mill operations; buyers viewing recent CBOT rallies as unsustainable technical moves; and ample September supply—over 1.25 million mt in imports plus domestic and Cambodian harvest—collectively encouraging cautious, hand-to-mouth purchasing.

US Pacific Northwest corn basis offers for November shipment declined to 145 cents/bushel over the December CBOT contract.

Platts is part of S&P Global Energy.

Platts Latin America Corn Daily Commentary

- Premiums continue to decrease in Argentina
- Corn harvest reaches 73% in Paraná state

Latin America FOB corn prices rose on Aug. 19, tracking Chicago Board of Trade futures prices.

The FOB Up River premiums for October loading dropped amid an absence of buyer interest.

The Brazilian FOB Santos premiums for October loading were steady during the day.

The US dollar/Brazilian real exchange rate stood at 5.1785 reais/\$1 as of 5:30 pm Brasilia time, down 0.80% day over day.

In Brazil's domestic market, prices rose in the Sorriso and Rio Verde regions, while they fell 0.50 real in the Maringá region.

Brazil exported 2.122 million mt of corn in the two week of August, equivalent to 221,630 mt/day, lower than the 326,127 mt/day recorded in August 2025, according to Brazilian Foreign Trade Secretariat data released on Aug. 17.

The Paraná State Agribusiness Department reported on Aug. 18 that the winter corn harvest reached 73% of the state's area as of Aug. 17. Regarding crop conditions, 91% was rated as good, up 5% from the previous week.

DERAL reported that the winter corn harvest has advanced with the opening of dry weather windows, nearing completion in some regions while maintaining an accelerated pace in others.

Platts US Corn Daily Commentary

- Crop tour shows lower yield estimates
- Export price outlook soft

US basis pricing was heard lower Aug. 19 as traders continued to react to weather and crop progress updates.

Comments from the ongoing Pro Farmer Crop tour showed a lower Nebraska corn yield average of 163.61 bushels/acre, down 9% from the previous year and down 6% from the five-year average, according to the data released by Farm Journal.

Lower yield reports from the field helped to raise Chicago Board of Trade corn futures, with the September contract settling at \$4.73/bu, up a 9.75 cent/bu day over day.

The gain in futures was mostly offset by lower offer targets in the CIF New Orleans barge market, as offers for August barge shipments were heard 10 cents/bu lower.

Cargo prices saw less of a reaction for the US Gulf Coast, with offers heard 1-2 cents lower for new crop shipments. Price movement was limited as exporters waited for further market adjustments.

An exporter said there was no change to prices as "sellers are looking for bids, especially for the front end. The tone is unequivocally soft."

Platts European Corn Daily Commentary

- Danube water levels remain critically low
- Serbian drought threatens corn yield forecasts

The Black Sea corn market remained stable on Aug. 19, with low trading activity. Market participants said that the ships calling at Ukraine were only for spot shipments.

In Ukraine, according to data shared by a trader, railway exports accounted for 71% of corn movements during the first two weeks of August, compared with just 10% in July. Furthermore, corn accounted for 26% of total grain exports from Ukraine by rail during the same period, followed by wheat at 23%.

Moreover, exports through the Danube ports during the first two weeks of August accounted for about 33%, up from 4% in July, while exports through the ports of Odesa fell from 83% in July to 19% in the same period.

Meanwhile, traders said that only continued rainfalls, such as those received over the past day, would improve water levels on the Danube. "It mainly showered in the northern parts; it needs more time for normalization," a Ukraine-based seller said.

"The level of the Danube stayed still in the last days, and the forecast till the 26th of August is not positive," a second seller based in Romania said.

In Serbia, traders said the dry spell in August has raised concerns about the new crop, although July weather was favorable for crop growth and pollination. "We have had a very dry period since the start of August, so I am not very optimistic about corn production," a Serbia-based trader said. "I expect an average yield of no more than 5 t/ha."

Oilseeds

Platts Asia Soybean Daily Commentary

- Thin trading liquidity for CFR China soybeans
- Firm freight rates keep CFR China prices high

CFR China soybean prices for month-one October shipments fell \$1.11/metric ton day over day to \$554.55/mt on Aug. 19, while the basis was down 3 cents/bushel at 285 cents/bu over November (X) Chicago Board of Trade futures.

Overnight Aug. 18, trading liquidity for Brazilian soybeans remained subdued, despite some buying inquiries.

"The bid-offer spread for Brazilian soybeans stays wide, so I don't expect many trades to be concluded," a trader said, adding that despite higher CBOT soybean futures, Brazilian basis premiums were being supported as well.

Another Chinese soybean trader said Brazilian farmer selling remained relatively active overnight across both old-crop and new-crop soybeans, which helped attract some buying interest from destination markets.

"This may have allowed Brazilian prices to ease slightly, but ocean freight rates stay firm," the trader said.

Platts Brazil Soybean Daily Commentary

- Nearby shipment traded in Paranaguá
- CBOT futures surge as crop tour raises yield concerns

Soybean prices increased Aug. 19 as CBOT soybean futures settled sharply higher, with the market reacting to underwhelming early yield metrics from the Pro Farmer Midwest Crop Tour.

Platts assessed the SOYBEX FOB Santos soybean contract for October loading at \$513.43/metric ton, up \$10.84/mt from the previous assessment.

Scouts on the tour reported lower-than-expected pod counts in key production states such as Nebraska and Indiana, reinforcing supply concerns after the US Department of Agriculture recently trimmed its official yield forecasts, analysts said.

Brazil's 2026-27 soybean crop, with planting set to begin in mid-September, is forecast at 181.7 million metric ton, virtually

unchanged from the previous season's 181.5 million mt, according to private consulting group Hedgepoint Global Markets' first outlook for the new crop year, released Aug. 19.

The consultancy projects harvested area to expand to 49.2 million hectares, up from 48.8 million hectares in 2025-26.

Despite the expected increase in area, Hedgepoint forecasts a slight decline in average yields to 3.69 mt/hectare from 3.72 mt/hectare in the previous season.

Trading activity was seen as slow in the Paranaguá FOB paper market, despite trades for nearby September and May 2027 shipments.

The US dollar versus the Brazilian real settled at 5.1704 reais per US dollar at 4:30 pm Brasilia time. Domestic soybean prices were higher in the main producing regions.

Platts is part of S&P Global Energy.

Platts US Soybeans Daily Commentary

- Outright prices rise boosted by futures, despite bases dropping
- Participants in futures market trade weather, yield forecasts: sources

The US soybeans' outright prices increased on Aug. 19 due to a boost from the futures market amid more market talk of poor weather and yield reduction.

The increase happened despite FOB Gulf and CIF New Orleans basis dropping on the day, as participants discussed whether China would potentially not reach its target purchases of US soybeans and logistics issues on the Mississippi River for August shipments.

Platts assessed SOYBEX FOB New Orleans for October shipment at \$498.70/metric ton, up \$5.69/mt from Aug. 18. Platts-assessed basis for FOB Gulf for October shipment fell 5 cents day over day to 120 cents/bushel over the November (X) soybeans futures contract.

Platts assessed the outright price for CIF New Orleans for August shipment at \$491.36/mt, up \$5.33/mt from Aug. 18. Platts-assessed basis for CIF NOLA for August shipment fell 6 cents day over day to 100 cents/bu over the November (X) soybeans futures contract.

Sources in the export market attributed the drop in the FOB Gulf basis to market talk that China might not meet the target to purchase 25 million mt/year of US soybeans.

"Talk that China may not hit its purchasing goal is starting to make its way around the market," a trader in the FOB Gulf market said. "Just people talking."

"They might get to 15 million mt," a second trader in the FOB Gulf market said. "The market is saying that that was feasible, but 25 seems difficult to reach."

Meanwhile, the CIF New Orleans basis could have dropped due to logistics issues along the Mississippi River, according to sources.

"We thought maybe some boats would come early, and they aren't arriving until September," a trader in that CIF NOLA market said. "So August versus September carry is trying to lower a bit."

CBOT soybean board crush spread (Sep)	¢/bu	CBBCM01	NA	—
CBOT soybean board crush spread (Oct)	¢/bu	CBBCM02	NA	—

Nevertheless, prices rose due to a push from the futures market, with the Chicago Board of Trade November (X) soybeans futures contract increasing 20.50 cents to 1,237.25 cents/bushel. According to participants, this was due to worse weather and reduced yield forecasts shown during the Pro Farmer Crop Tour, which the market follows closely.

“I think it’s mostly because the Pro Farmer Tour going on right now is showing not-so-great yields,” a second trader in the CIF NOLA market said. “Managed money is just bullish on commodities right now, and there’s not much out there to cool it off.”

While some sources were doubtful about the forecasts shown during the Pro Farmer Crop Tour, others pointed out that the market was still trading based on that information.

“They don’t have a very strong track record of being accurate,” the second trader in the CIF NOLA market said. “But the market is trading it right now, and it’s not smart to try to stand in the way of that.”

Animal Feed

Platts Latin America Soybean Meal Daily Commentary

- Rising CBOT futures support FOB spot prices
- FOB Paranaguá trades higher amid tight margins

Rising Chicago Board of Trade futures sent South American soybean meal FOB prices higher on Aug. 19, with Brazil’s FOB Paranaguá further supported by stronger reported port differentials.

Several parcels for October dates were traded in the FOB Paranaguá paper market at successively higher levels during the session. According to sources, the context of slow farmer sales and compressing crush margins continued to boost local premiums.

“Soybean availability remains generally limited, and crushers will now need to cover their crushing requirements despite currently facing less-than-ideal margins,” a Brazilian trader said.

In Argentina, subdued activity was observed. Basis discussions for FOB Up River October-loading cargoes stood virtually steady, being last seen at \$9-\$12/short ton over the CBOT benchmarks.

According to the Ministry of Economy, Argentina’s 2025-26 soybean farmer sales advanced 7 percentage points in July, reaching 47% complete. The pace neared the five-year average of 46%, although it remained behind last year’s 51%.

“Soybean sales have progressed gradually, as market attention remains focused on corn, with the late harvest nearly complete and exports running strong,” S&P Global Energy CERA analysts said in the Global Soybean Complex Short-Term Outlook report released on Aug. 14.

The CBOT September (U) contract settled at \$321/short ton, up \$6.40/st, as traders remained cautious about this year’s US soybean crop potential, analysts said.

Platts European Animal Feed Daily Commentary

- Dutch soybean meal premiums rise
- EU shifts corn sourcing away from Ukraine
- Spanish corn importers face tighter supply from Ukraine

Northern Europe

Dutch soybean meal saw bullish sentiment amid higher premiums on Aug 19.

A Netherlands-based trader said weaker Brazilian crushing margins had lifted premiums and raised concerns over near-term supply.

“Corn is coming from Poland and Constanta, with only limited volumes arriving from Ukraine by rail,” a broker in the Netherlands corn market said.

A second trader based in Italy said that disrupted supply chains and global uncertainty were lifting corn prices. Traders in the Netherlands and Italy said Europe was sourcing more corn from outside Ukraine as Black Sea and Danube routes remained constrained.

Southern Europe

The Spanish ex-works corn price remained unchanged day over day, while soybean meal prices experienced a bullish trend.

A third trader based in Spain said Ukrainian corn importers had become harder to secure, thereby increasing the availability of Brazilian- and US-origin corn in Spain. The third trader added that with rising futures, bids and market value for corn were also rising.

European Commission data updated Aug. 11 showed EU corn imports from Ukraine fell 19.2% year over year to 8.87 million mt, while US imports climbed 50.7% to 6 million mt and imports from Brazil rose 86.8% to 3.04 million mt.

A fourth trader said that, even though soybean offers were rising, there were only a few higher bids; the general market sentiment was “wait and see”.

Platts US Distiller Grains DDGS Daily Commentary

- Futures guide DDGS values
- Forward bookings remain limited

The US dried distillers grains with solubles market remained subdued Aug. 19, with limited physical trading and participants continuing to take direction primarily from futures markets.

Platts assessed CIF New Orleans dried distillers grains with solubles barges for the August shipment period at \$204/short ton on Aug. 19, the Chicago DDGS truck market for the August delivery period was assessed at \$191/st, and the Southern California rail market for the August delivery period was assessed at \$235/st.

One broker said activity remained limited.

“Still remains pretty slow on the trade front,” the broker said, as buyers continued to show little urgency following recent strength in feed markets.

A second broker said DDGS values were largely tracking movements in the futures board rather than responding to fresh physical demand.

“Just following the board really is about it. That’s the only story at the moment I see,” the broker said.

The source also highlighted unusually limited forward coverage, reporting “record low forward bookings for both sides,” suggesting both buyers and sellers remain hesitant to establish longer-term positions amid uncertainty over market direction.

Weekly ethanol production for the week ending Aug. 14, was reported at 1.089 million barrels/day, a 2.51% decrease from the previous week, according to the US Energy Information Administration.

stronger Chinese vegetable oil futures. However, an overnight decline in Chicago soybean oil futures limited the upside.

The benchmark palm oil contract for November delivery on the Bursa Malaysia commodity exchange rose 33 ringgit/metric ton to 4,893 ringgit/mt on Aug. 19.

The benchmark RBD Palm Olein for January delivery on the Dalian Commodity Exchange (DCE) increased 98 yuan/mt to 9,994 yuan/mt on Aug. 19.

The benchmark Soybean Oil for January delivery on the DCE climbed 103 yuan/mt to 8,747 yuan/mt on Aug. 19.

A local Indonesian CPO tender was withdrawn despite the highest bid of 15,755 rupiah/kg, which was previously heard traded at 15,835 rupiah/kg on Aug. 18, an India-based trader said.

The Indian market was slow amid rising prices and sufficient inventory.

Futures moved higher, but the physical market remained weak amid demand, another India-based trader said.

In West Coast India, about 5,000-10,000 mt of CPO was traded at \$1,260/mt for September shipment before the midday close in palm oil futures. A washout was also heard at \$1,252.50/mt for August shipment in East Coast India.

On a CFR West Coast India basis, 20,000-25,000 mt of soybean oil traded at \$1,271-\$1,272/mt for November to March shipment.

Buying interest in India began to shift toward soybean oil as the forward spread between palm and soybean oil narrowed, with palm oil in contango while soybean oil remained in backwardation.

Platts assessed CPO CFR WC India at \$1,255/mt Aug. 19 for September loading, unchanged day over day, while October shipment was \$10/mt higher than September.

Platts assessed CPO FOB Indonesia at \$1,207.50/mt Aug. 19 for September loading, down \$3.50/mt from Aug. 18, while October shipment was \$15/mt higher than September.

Platts assessed RBDPS FOB Indonesia at \$1,090/mt on Aug. 19 for September loading, unchanged day over day, while October shipment was \$22.50/mt higher than September.

Platts assessed PFAD FOB Indonesia at \$1,017.50/mt Aug. 19 for September loading, up \$2.50/mt from Aug. 18, while October shipment was \$25/mt higher than September.

Platts is part of S&P Global Energy.

Platts Latin America Soybean Oil Daily Commentary

- South American soy oil FOB prices rise Aug. 19
- Argentine basis weakens 10 points to minus 1,610
- Brazil holds \$6.61/mt premium over Argentina

South American soybean oil FOB prices increased Aug. 19 as Chicago Board of Trade soybean oil futures edged higher, while basis movements were mixed across Argentina and Brazil.

The Aug. 19 session reflected a more balanced market after the sharp futures and basis adjustments seen earlier in the week. CBOT September soybean oil had fallen 2.45% Aug. 18 following the previous session's rally, prompting a substantial recovery in Brazilian export differentials. Wednesday's comparatively stable futures market resulted in much smaller basis adjustments.

CBOT September soybean oil futures settled at 69.86 cents/lb, up 0.17 cent/lb, or 0.24%, from Aug. 18. The relatively limited movement followed several sessions of sharper volatility, leaving regional physical-market differentials as an important driver of changes in outright South American values.

In Argentina, Platts, part of S&P Global Energy, assessed soybean oil FOB Up River for September loading at \$1,185.21/mt Aug. 19, up \$1.55/mt from Aug. 18.

The September Up River paper basis weakened 10 points to minus 1,610 points against the CBOT September soybean oil futures contract. The modest futures increase was sufficient to offset the slightly weaker basis, allowing the outright Argentine FOB assessment to move higher.

In Brazil, Platts assessed soybean oil FOB Paranaguá for September loading at \$1,191.82/mt, up \$5.95/mt from the previous session.

The September Paranaguá paper basis strengthened 10 points to minus 1,580 points against CBOT September futures. The combination of a firmer basis and slightly higher futures supported the larger increase in the Brazilian outright assessment.

Brazilian September soybean oil was assessed at a \$6.61/mt premium to the comparable Argentine value, while the Paranaguá basis stood 30 points stronger than the Up River basis. Despite the premium, the two origins remained closely aligned, with the price difference equivalent to roughly 0.6% of the outright FOB value.

Brazil's October market also moved higher. Platts assessed soybean oil FOB Paranaguá for October loading at \$1,186.53/mt, up \$2.87/mt from Aug. 18.

The October Paranaguá basis weakened 10 points to minus 1,610 points against the CBOT October soybean oil futures contract. September therefore maintained a \$5.29/mt premium to October in outright terms, while the nearby basis stood 30 points stronger than the deferred position.

Market participants continued to focus on South American export competitiveness as soybean oil trades against alternative vegetable oils in international markets. Argentina and Brazil remained closely priced against each other, while competitive soybean oil values relative to palm and sunflower oil continued to influence demand from major importing destinations.

With CBOT providing limited direction Aug. 19, regional basis movements again played the larger role in differentiating Argentine and Brazilian FOB values. The firmer Brazilian September differential supported a modest premium over Argentina, while deferred Brazilian pricing remained softer than the nearby market.

Platts Europe Vegetable Oil Daily Commentary

- No active FOB Black Sea sunflower market
- Spot buyers face limited nearby availability
- Sellers shift offers towards October onwards

European vegetable oil markets were broadly stable on Aug. 19, following gains earlier in the week. RSO FOB Dutch Mills front-month edged €2/mt higher to €1,209/mt, while the second, third and fourth positions were unchanged at €1,190/mt, €1,183/mt and €1,131/mt, respectively. FOB Black Sea sunflower oil remained unchanged at \$1,379/mt.

The Black Sea sunflower oil market remains largely illiquid, with a Ukraine-based trader reporting no FOB market activity. Buyers are trying to secure any spot material that becomes available, while sellers are focusing on offers on October loading onward, as there is currently little to no oil available for nearby shipment.

The lack of nearby supply reinforces the disconnect between the unchanged FOB assessment and the underlying physical market conditions. Recent disruptions to Black Sea logistics and weak exports from Ukraine and Russia have reduced old-crop availability, leaving buyers with few opportunities to secure prompt cargoes. The lack of transactions, therefore, appears to reflect a lack of executable supply rather than weak buying interest.

Attention is increasingly shifting toward the transition to new-crop availability. While improving sunflower seed production prospects in Ukraine and the EU point to greater supply later in the season, the immediate market remains constrained. With sellers already focusing on October onward, nearby sunflower oil values are likely to remain supported until new-crop crushing and export flows are sufficiently established to ease the current shortage.

News

South American soybean oil forward discount to palm boosts export competitiveness

- South American soybean oil expected to trade below palm
- India imports surge 31% amid festival demand
- Argentina and Brazil compete within \$2.21/mt

Argentine and Brazilian soybean oil is becoming increasingly competitive against palm oil in the forward physical market, with current FOB indications showing South American soybean oil priced below RBD palm olein across several deferred loading periods, according to an Argentina-based trader.

"Soybean oil had become increasingly discounted to RBD palm olein on an FOB-to-FOB basis," said a Sao-Paulo-based trader. "Forward indications provided by the source show the two vegetable oils relatively close for nearby loading before soybean oil moves progressively below RBD palm olein across deferred positions into early 2027."

The structure is notable because palm oil typically trades at a discount to soybean oil, providing price-sensitive importers with an incentive to substitute toward palm products. South American soybean oil has already traded below Asian palm benchmarks during periods in 2026, reversing that more conventional relationship.

The current forward structure reflects market valuations for future loading periods rather than a forecast of where physical prices will ultimately trade.

Indian demand provides relief

The relative pricing is particularly significant for Argentina and Brazil because India, the world's largest vegetable oil importer, is a major destination for South American soybean oil.

India's soybean oil imports are expected to rise to around 620,000 mt in August, while buyers have already booked nearly 1.4 million mt for September-December delivery, according to trade estimates from market participants and refiners, based on import program visibility and vessel line-ups. The increase reflects competitive soybean oil pricing and reduced availability of Black Sea sunflower oil, according to market sources.

Separately, India's soybean oil imports rose 31% month on month to 498,881 mt in July, while total edible oil imports climbed

to 1.48 million mt, the highest in 10 months, according to data from the Solvent Extractors' Association of India (SEA). The increase was driven by seasonal festival demand and relatively attractive import economics, according to SEA market data.

Market data provided by Sunvin Research also showed substantial soybean oil arrivals into India during the first half of August, alongside additional cargoes at berth, at anchorage and scheduled for later in the month.

South American origins remain closely aligned

Argentina and Brazil continued to compete closely for international soybean oil demand.

Platts, part of S&P Global Energy, assessed Argentine soybean oil FOB Up River for September loading at \$1,183.66/mt Aug. 18, while Brazilian soybean oil FOB Paranaguá was assessed at \$1,185.87/mt.

The two origins were separated by only \$2.21/mt, or less than 0.2%, leaving South American export values closely aligned.

Ample soybean availability and strong processing have maintained substantial soybean oil supplies in both countries. Brazil's domestic biodiesel industry provides an additional outlet for production, while Argentina remains more heavily oriented toward soybean product exports.

Palm oil fundamentals also remain relevant to the relative-value structure. The Malaysia Palm Oil Council has recently highlighted tighter Malaysian supply conditions as supportive to crude palm oil prices, with May production declining 6.9% month over month to 1.51 million mt.

Market participants said the current FOB-to-FOB relationship with palm has therefore become increasingly important for South American soybean oil. With Argentina and Brazil closely aligned against each other, their competitiveness against alternative vegetable oils could play a larger role in determining export demand and physical basis levels.

Europe soybean meal, corn prices rise as Black Sea risk shifts supply flows

- Black Sea tensions tighten EU grain supply
- Brazilian premiums lift soybean meal costs
- US corn imports to Europe rise 50.7% YOY

European feed grain and protein markets continued to strengthen amid rising futures, Black Sea supply disruptions and concerns over South American availability.

Platts assessed FOB Netherlands soybean meal at €361/metric tons on Aug. 18, up €6/mt week over week, while ex-works Tarragona soybean meal rose €2/mt to €364/mt. Spanish corn prices also increased, with EXW Corn Spain assessed at €235/mt, up €5/mt on the week.

Grains traders and brokers in Spain, the Netherlands and Italy pointed to higher grain futures and disruptions to Ukrainian exports as key drivers.

CBOT September corn futures rose to \$4.59/bushel as Black Sea tensions supported global grain markets, according to S&P Global Energy CERA's Corn & Minor Grains Short-Term Outlook published Aug. 14. Strong US export demand, weather concerns in key growing regions and mounting logistical challenges in Ukraine have tightened market sentiment.

An Italian trader said disrupted supply chains and global uncertainty were lifting corn prices. Traders in Spain and the Netherlands said Europe was sourcing more corn from outside Ukraine as Black Sea and Danube routes remain constrained.

"Corn is coming from Poland and Constanta, with only limited volumes arriving from Ukraine by rail," a Dutch broker said.

A Spanish trader said Ukrainian corn importers had become harder to secure, increasing Brazilian and US-origin availability in Spain. The Dutch broker added that lower wheat and barley production prospects in Europe after recent heat waves were also supporting feed grain prices.

Leading corn importers in Europe

Source: European Commission

European Commission data updated Aug. 11 showed EU corn imports from Ukraine fell 19.2% year over year to 8.87 million mt, while volumes from the US climbed 50.7% to 6 million mt and imports from Brazil rose 86.8% to 3.04 million mt.

Soybean meal prices drew support from rising Brazilian premiums and stronger futures, traders and brokers in Italy, the Netherlands and Spain said. A Dutch trader said weaker Brazilian crushing margins had lifted premiums and raised concerns over near-term supply.

A Spain-based trader described demand as "zero," but said bids and tradable values remained stable despite higher offers, suggesting supply concerns, not immediate consumption, were driving market support.

European Commission data showed Brazil remained the EU's largest soybean meal supplier at 10.71 million mt, or 53.1% of total imports, followed by Argentina with 6.32 million mt, or 31.3%.

INTERVIEW: US soybean group seeks diversification amid tariffs, farm challenges

- USSEC plans 'more concerted efforts' to promote US meal
- Aquaculture, poultry key industries for use of soybean meal
- Egypt, Mexico top list of targeted destinations

Amid market uncertainty and tariffs affecting the US relationship with the largest soybean buyer worldwide, the US Soybean Export Council is set to expand its promotion of US soybeans in non-China destinations and intensify efforts to promote US soybean meal.

USSEC Vice Chair Roberta Simpson-Dolbeare, an Illinois soybean farmer and a director at the American Soybean Association, serves on the association's Trade Policy & International Affairs Committee.

Platts, part of S&P Global Energy, spoke to Simpson-Dolbeare in Chicago during the USSEC's flagship Soy Connex event about the most promising destinations for its efforts and the struggles of US farmers. This interview has been edited for clarity.

Q: Where is USSEC focusing the promotion efforts aimed at diversification amid the complex situation with China?

A: I just recently had the opportunity to travel to Egypt. It has become a very good market for us, and it's good to see that they like the US soy. We were able to see a lot of the work they're doing with aquaculture and how important fish protein is becoming in diets.

We're always looking for ways to develop new markets around the globe, and our USSEC team is always seeking opportunities to expand the use of soy. I know that there's also a lot of focus on aquaculture and poultry within the Americas, and I think that's where the US is going to be in a position to have a lot of soybean meal to provide.

Q: Will some of the USSEC's efforts to promote US soybeans be transferred to US soybean meal?

A: I think there are a lot of countries that would want to buy whole beans because there are a lot of crushers around the globe, so they crush them themselves. But, if they're able to get the soybean meal ready to use, it could be an economic advantage for them. There will probably be a bit more concerted effort to let people know that that's available. We want to be able to provide however people prefer to receive US soy.

Q: Which destinations do you think are more receptive to US soybean meal?

A: We certainly think Mexico is an excellent market for us, and then we want to maintain the relationship with Egypt. They're now our No. 2 market. In Canada, we're all trying to think positively that the USMCA will be approved again.

Q: What alternative uses for soy are you exploring?

A: Just within the state of Illinois, their soybean association is doing a lot of research and working with other companies to try and develop new uses. I believe it's one of the key components of fire foam. I know that it's becoming a popular item because it's a safe product to use and it becomes more economical for fire departments.

Q: US soy and US soybean meal are a bit pricier than others. What do you think are the main advantages of US soy against other origins?

A: Our soybeans dry in the field, so they're naturally dried, not wood-burnt. Others are forced to dry their soybeans because they're trying to get that crop out earlier so they can get corn

planted. US soybeans are of higher quality, so the digestibility is stronger. They also sustain less damage and involve lower deforestation. I also think our infrastructure is still better as we can move our soybeans either down the river or via rail to the ports.

We are promoting a lot of biofuels in the US, and we're open to conversations across the Americas to see how we can provide them or how they can best utilize them.

Q: What about the plans for markets like Venezuela?

A: I think that if there's a way that we can work well within a country such as Venezuela, I think they certainly will be looking for those opportunities. There's ongoing work within Colombia as well, and trade with them seems very strong and really in tune with the situation in a variety of countries.

Q: What are the obstacles for promoting US soybean oil?

A: Part of it is just because there's such a big demand domestically for soybean oil. We're using it in Illinois with the B20 fuel for our tractors, and I heard the other day that tractor companies are looking into promoting that.

Q: How do you see the current situation for US farmers?

A: Farmers are resilient and positive. Our political climate is a little challenging at times, and just with the cost of production, the expenses that we incur on a yearly basis, our investment in our land, our equipment. It's a little staggering. It concerns me how the new generation will be able to come into farming if they don't have someone ahead of them to help them do that.

We're hoping that the farm bill gets passed this fall. We're hoping we can resolve this conflict with Iran so that supplies can start flowing a little more easily.

I think that some of the trade barriers hopefully will be on the decline, so that trade opens a little more freely.

Q: USSEC's CEO, Jim Sutter, said that exports to non-China destinations were up 9% compared to last year's. Would you say that USSEC efforts have been successful in that sense?

A: We know that the overall amount we're selling to China is down from what it was at its high, but we have the meeting between US President Donald Trump and Chinese President Xi Jinping. Hopefully they will be expanding their orders not only of US soy, but of other agricultural products.

Q: The situation with China has been challenging. How has USSEC navigated that environment?

A: I think realizing the challenges there makes you see the importance of all our markets. China has big potential, but there are other providers around the globe. I think that's why diversification is so important right now.

We don't want aid from our own government for farmers. We want to see fair trade opening and be able to work with these partners around the globe.

EU DATA: MY 2026-27 wheat exports plunge 49% YOY as of Aug. 16

- Romania, Lithuania, Bulgaria top exporters
- Wheat imports slide 30% YOY as of Aug. 16
- 2026-27 wheat exports forecast at 29.5 mil mt

The EU's wheat exports during marketing year 2026-27 (July-June) totaled 1.59 million metric tons as of Aug. 16, falling 49% year on year, EU Crop Observatory data showed Aug. 18.

Romania was the top exporter at 470,453 mt during the period, followed by Lithuania at 354,499 mt and Bulgaria at 242,803 mt. Meanwhile, the largest importers were Nigeria at 322,353 mt and Algeria at 168,298 mt.

In MY 2025-26, the EU exported 25 million mt of wheat, according to data.

Between July 1 and Aug. 16, the EU imported 605,797 mt of wheat, down 30% year over year, data showed.

Canada and Moldova were the top wheat suppliers to the EU with 223,970 mt and 87,162 mt, respectively. Italy stood as the largest importer at 360,828 mt, followed by Greece at 65,000 mt.

In MY 2025-26, the EU bought 6.3 million mt of wheat.

S&P Global Energy CERA estimated the EU's wheat exports at 29.5 million mt and imports at 7.5 million mt in MY 2026-27.

The European Commission's directorate-general for agriculture and rural development, in its July 30 update, estimated total wheat output at 132.69 million mt in MY 2026-27, down 8% year over year.

CERA estimated the EU's wheat output at 133.1 million mt in MY 2026-27.

Platts, part of S&P Global Energy, assessed EU 11.5% protein Romania wheat FOB CVB at \$265.5/mt Aug. 18, up \$2.5/mt day over day.

EU DATA: MY 2026-27 corn imports rise 43% YOY as of Aug. 16

- Corn exports fall 36% between July 1-Aug. 16
- 2026-27 corn import forecast at 23 million mt
- 2026-27 corn production seen at 51.1 million mt

The EU's corn imports during marketing year 2026-27 (July-June) totaled 2.12 million metric tons as of Aug. 16, up 43% year over year, EU Crop Observatory data showed Aug. 18.

Ukraine was the largest exporter at 1.02 million mt during the period, followed by the US at 811,323 mt, while the largest importers were Spain at 800,144 mt, the Netherlands at 270,386 mt, and Italy at 268,235 mt.

In MY 2025-26, the EU imported 18.5 million mt of corn, according to data.

During July 1-Aug. 16, the EU exported 72,418 mt of corn, falling 36% year over year, the data showed.

Lithuania was the largest corn importer into the EU, with 31,017 mt, followed by Poland at 16,233 mt and France at 11,758 mt. Turkey was the largest importer at 31,017 mt, followed by the UK at 20,385 mt.

In MY 2025-26, the bloc supplied 1.87 million mt of corn.

S&P Global Energy CERA forecast the EU's corn imports at 23 million mt and exports at 2 million mt in MY 2026-27.

The European Commission's Directorate-General for Agriculture and Rural Development, in its July 30 update, estimated total corn output at 52.1 million mt in MY 2026-27, down 14% year over year.

CERA has forecast EU corn production at 51.1 million mt in MY 2026-27.

Platts, part of S&P Global Energy, assessed corn FOB CVB basis Constanta at \$252/mt Aug. 18, unchanged day over day.

European soybean meal prices rise as Brazil crush margins fuel supply concerns

- EU soybean meal costs climb on higher premium
- Brazil's crush margins hit a nine-month low
- Paranaguá basis reaches its highest since October

European soybean meal prices moved higher as market participants voiced growing concern over the reliability of supply from Brazil — the EU's primary source of the protein feed.

Platts Brazil and European soybean meal prices

Platts, part of S&P Global Energy, assessed FOB Netherlands soybean meal at €361/metric ton Aug. 18, up €6/mt week over week, while ex-works Tarragona soybean meal was assessed at €364/mt, up €2/mt over the same period.

"Soybean meal offers have gone up from €366/mt to €370/mt over the past five days," a Dutch broker said, citing higher futures and firmer premiums as the main drivers.

A Dutch trader said weaker crush margins in Brazil had lifted premiums, adding to concerns over the potential impact on near-term availability.

A Spain-based trader described demand as "zero," but said bids and tradable values remained stable despite higher offers, underscoring that price support was being driven less by immediate consumption and more by supply-side risks linked to Brazil.

Brazil crush margins tighten

European importers' concerns over Brazilian supply are centered on the slow pace of farmer soybean sales and unattractive crush margins in the South American country.

A trader said some crushing plants in the southern state of Paraná had already brought forward maintenance due to difficulties processing soybeans. On an FOB basis, exporting raw soybeans is around 10% more profitable than crushing them, the trader said.

A second trader said European concerns "may be driven by the current scarcity of offers and cautious seller behavior" rather than an actual shortage. Still, the trader acknowledged that the scenario remains unfavorable for soybean crushing in Brazil.

Platts assessed the Brazil Soybean Crush Spread — a synthetic margin based on FOB soybean, soybean meal and soybean oil values — at \$13.76/mt Aug. 18, near to the lowest level since mid-October 2025.

Brazilian crushers have soybean coverage of around 45 days, according to a Brazil-based broker, who warned of a potential short squeeze in September if buyers with limited coverage are forced back into the market to rebuild positions.

Against this backdrop, the soybean meal FOB Paranaguá basis for September delivery reached a \$24/short ton premium to Chicago Board of Trade futures on Aug. 13, the highest level for a spot shipment since Oct. 15, 2024. On Aug. 18, it was assessed at plus \$17.50/st to the CBOT benchmarks.

For now, analysts at S&P Global Energy CERA estimate Brazil will crush 63.50 million mt of soybeans in 2026, with soybean meal exports projected at 27 million mt.

China's Sinograin sells 308,114 mt of imported soybeans at Aug. 19 auction

- Clears 85.2% of 361,728 mt offered
- Transaction price averages 4,132 yuan/mt

China's Sinograin sold 308,114 metric tons of imported soybeans, or 85.2% of the 361,728 mt offered, at a state reserve auction on Aug. 19, four China-based grain traders said.

The soybeans offered were from the 2022, 2023 and 2025 crop years and fetched an average price of 4,132 yuan/mt (\$619.8/mt), the traders said.

A China-based soybean trader said the prices were considered reasonable.

The previous auction on Aug. 12 saw 89.3% of the 516,613 mt of soybeans offered cleared, according to China-based grain traders.

As of Aug. 12, China had auctioned about 3 million mt of imported soybeans in marketing year 2025-26 (October-September), according to an S&P Global Energy CERA report Aug. 14.

The volume remains below earlier market expectations of about 4 million mt for the season, the report said.

CERA expects reserve soybean sales to continue, with a base-case projection of about 4 million mt, as state-owned crushers clear storage for incoming US new-crop cargoes.

Chinese state traders COFCO and Sinograin have been purchasing US soybeans to meet policy commitments following the Beijing summit in May.

As of Aug. 18, China's known US soybean commitments for MY 2026-27 (September-August) totaled 5.436 million mt, according to Platts calculations based on US Department of Agriculture data.

Under the Busan trade agreement reached in October 2025, China committed to purchase at least 25 million mt/year of US soybeans from 2026 to 2028, according to a White House fact sheet issued on Nov. 1, 2025.

Platts contacted the National Grain Trade Center — the auction operator — and Sinograin to verify the auction results, but had not received a response by the time of publication Aug. 19.

Platts, part of S&P Global Energy, assessed SOYBEX CFR China first month at \$554.55/mt on Aug. 19, down \$1.11/mt day over day.

Assessment Rationale

Grains

Platts Ags EMEA Wheat Daily Rationale

Platts assessed the Milling Wheat Marker at \$215/metric ton Aug. 19, down \$1/mt from the previous assessment. Russian 12.5% handysize wheat, assessed at \$215/mt, was the most competitive wheat out of the three components of the Milling Wheat Marker, which also includes Ukraine 11.5% at \$222.63/mt when adding July's quality normalization of \$8.63/mt, to account for its lower protein content, and CVB 12.5% wheat assessed at \$274.5/mt on the day. This reflects the Platts assessment window from Sept. 16-30.

Platts assessed Black Sea wheat (Russian deepsea, 12.5% protein) down \$1/mt at \$215/mt on Aug. 19, in line with an indicative value at \$215/mt. Market participants said prices were weaker amid execution risk from deep sea ports. This reflects the Platts assessment window from Sept. 16-30.

Platts assessed Black Sea wheat (Ukraine deepsea, 11.5% protein) down \$1/mt at \$214/mt on Aug. 19 amid falls in other wheat markets. Trading activity in Ukraine out of POC ports remain limited amid strikes on port and export infrastructure. This reflects the Platts assessment window from Sep 16 - 30.

Exclusions: No market data was excluded from the Aug 19 Black Sea wheat assessments.

Platts is part of S&P Global Energy.

This rationale applies to symbol (s) <BSMWM00> , <WRBSD00>, <WUBSA00>

Platts Asia Wheat Daily Assessment Rationale

Platts assessed Australian Premium White wheat up \$1/metric ton at \$295/mt FOB Kwinana Aug. 19 for cargoes loading between Oct. 18 and Nov. 17, below an indicative offer at \$300/mt.

Platts assessed Australian Standard White wheat with no protein guarantee up \$1/mt at \$288/mt for cargoes loading over the same period, under an offer at \$293/mt, maintaining the spread between Australian Premium White and Australian Standard White with no protein guarantee at \$7/mt.

Platts is part of S&P Global Energy.

Asia wheat assessments can be found on <PAA2440>

Market commentary can be found on <PAA2699>

This rationale applies to symbol(s) <WAUSA00>

Platts Canada Wheat Daily Rationale

Platts assessed Canada Western Red Spring Wheat 13.5% FOB Vancouver 30-45 days forward at \$310.58/metric ton on Aug. 19, up \$6.06/mt from the previous session.

CWRS Wheat 13.5% FOB Vancouver basis 30-45 days forward, spanning Sept. 18-Oct. 3, was assessed unchanged at MIAH Hard Red Spring Wheat December (Z) futures plus 125 cents/bushel, amid no disproving information.

CWRS Wheat 13.5% FOB Vancouver basis 45-60 days forward, spanning Oct. 3-18, was assessed unchanged at Z plus 119 cents/bu.

CWRS Wheat 13.5% FOB Vancouver basis 60-75 days forward, spanning Oct. 18-Nov. 2 was assessed unchanged at Z plus 119 cents/bu.

Both 45-60 and 60-75 days forward assessments were based on an October offer heard at Z plus 130 cents/bu.

Platts is part of S&P Global Energy.

No exclusions were made during the assessment.

This rationale applies to symbol(s) <AWHCA00> <AWHCB00> <AWHCC00><AWHCD00><AWHCE00 ><AWHCF00>.

Platts Asia Corn Daily Rationale

Platts assessed corn CFR Northeast Asia down \$1/mt day over day at \$277/mt CFR Aug. 19 for feed-quality corn arriving over Nov. 17 to Dec. 17 into Pyeongtaek, tracking a tradable value at \$277/mt CFR and below an indicative offer at \$285/mt CFR.

Platts is part of S&P Global Energy.

Asia corn assessments can be found on <PAA2440>

Market commentary can be found on <PAA2688>

This rationale applies to symbol(s) <WCINV00>

Platts Argentina Corn FOB Up River Daily Rationale

Platts assessed corn FOB Up River for loading in October at \$222.83/metric ton on Aug. 19, \$3.15/mt higher from the previous assessment.

The assessment considered the FOB premium for Up River October-loading cargoes 2 cents/bushel lower at plus 68 cents/bu to Chicago Board of Trade October (Z) corn futures, based on an indicative value heard at that level, lower offers heard at Z plus 70 cents/bu and no bids heard at the market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <ARGCA00> and <ARGCB00>.

Platts Brazil Corn Daily Rationale

Platts assessed the Brazilian corn FOB Santos price for October loading at \$235.42/metric ton on Aug. 19, \$3.94/mt higher from the previous assessment.

The assessment considered the FOB Santos basis for October loading unchanged at plus 100 cents/bushel to the Chicago Board of Trade October (Z) contract, based on an indicative

value heard at that level, lower offers for October H1 at Z plus 101 cents/bu, steady offers for October H2 at Z plus 105 cents/bu, lower bids for October H1 at Z plus 95 cents/bu and lower bids for October H2 at Z plus 97 cents/bu heard at the market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <ABCSA00> and <ABCSB00>.

Platts US Corn Daily Assessment Rationale

Platts assessed the US Yellow Corn No. 2 CIF New Orleans barge basis for August shipment at 91 cents/bushel over the Chicago Board of Trade September (U) corn futures contract on Aug. 19, down 5 cents from the previous assessment. This was based on a bid heard at 80 cents/bu, and an offer at 92 cents/bu.

Platts assessed the US Yellow Corn No. 2 CIF New Orleans barge basis for September shipment at 101 cents/bushel over the CBOT September (U) corn futures contract on Aug. 19, down 7 cents from the previous business day. This was based on a bid heard at 95 cents/bu, and an offer heard at 102 cents/bu.

Platts assessed the US Yellow Corn No. 2 FOB Gulf basis for October shipments at 107 cents/bu over the CBOT December (Z) corn futures contracts on Aug. 18. This was based on offers heard at 108 cents/bu and 113 cents/bu for the first and second half of October, respectively.

No information was excluded.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <WCNOE00> <WCNOU00>

Platts FOB Black Sea Corn Daily Assessment Rationale

Platts assessed Ukrainian corn unchanged at \$221/metric ton on Aug. 19, below the offer for August-September loading at \$225/mt. The demand for Ukrainian corn remains limited. The structure between the first and the second halves of September was assessed flat. This reflects the Platts assessment window from Sept. 16-30.

Platts is part of S&P Global Energy.

Exclusions: No market data was excluded from the Aug. 19 Black Sea corn assessment.

This rationale applies to symbol(s) <CUBSU00>.

Oilseeds.

Platts Asia Soybeans Daily Rationale

Platts assessed CFR China first-month soybeans down \$1.11/metric ton day over day at \$554.55/mt on Aug. 19, while the basis was down 3 cents/bushel at 285 cents/bu over November (X) Chicago Board of Trade, tracking an indicative value at 285 cents/bu and below an offer at 290 cents/bu over November (X) for Brazil October shipment.

Platts assessed CFR China second-month soybeans down \$1.47/mt day over day at \$557.86/mt on Aug. 19, while the basis was down 4 cents/bu at 294 cents/bu over November (X) CBOT, tracking an indicative value at 294 cents/bu and below the sharpest offer at 300 cents/bu over November (X) for Brazil November shipment.

Platts is part of S&P Global Energy.

This rationale applies to the symbols <SYBAB00>, <SYBAA00>, <SYBAF00>, <SYBAD00>, <SYBAC00> and <SYBAE00>.

Platts Brazil Soybean Daily Assessment Rationale & Exclusions

Platts assessed the SOYBEX FOB Santos soybean contract for October loading at \$513.43/metric ton on Aug. 19, up \$10.84/mt from the previous assessment.

The FOB Santos basis for October loading was assessed 9 cents/bushel higher at plus 160 cents/bu to the Chicago Board of Trade November (X) contract, based on a spread to the Paranaguá paper market last heard at parity. No bids or offers were heard for the full October loading of FOB Santos cargo on the day.

The FOB Paranaguá basis for October loading was assessed 9 cents/bu higher at plus 160 cents/bu to the CBOT November (X) contract, based on an indicative value heard at that level, higher bids at X plus 155 cents/bu, and higher offers at X plus 170 cents/bu at market close.

Platts assessed the SOYBEX FOB Santos soybean contract for March loading at \$459.50/mt on Aug. 19, up \$7.81/mt from the previous assessment.

The FOB Santos basis for March loading was assessed 4 cents/bu higher at minus 5 cents/bu to the CBOT March (H) contract, based on a spread to the Paranaguá paper market last heard at plus 5 cents/bu. No bids or offers were heard for the full March loading of FOB Santos cargo on the day.

The new crop FOB Paranaguá basis for March loading was assessed 4 cents/bu higher at minus 10 cents/bu to the CBOT March (H) contract, based on an indicative value heard at that level, higher offers at H minus 5 cents/bu and lower bids at H minus 20 cents/bu at market close.

Exclusions: No data was excluded.

Platts is part of S&P Global Energy.

Platts US Soybeans Daily Rationale

Platts SOYBEX FOB New Orleans for October shipment was assessed at \$498.70/metric ton on Aug. 19, up \$5.69/mt from Aug. 18.

The FOB Gulf basis for October shipment was assessed at 120 cents/bushel over the Chicago Board of Trade November (X) soybeans contract on Aug. 19, down 5 cents from Aug. 18. This was based on a value indication heard at 120 cents/bu, an offer heard at 120 cents/bu for that shipment month, and confirmation from other sources pointing to those values.

The CIF New Orleans basis for August shipment was assessed at 100 cents/bu over the November (X) soybeans futures contract on Aug. 19, down 6 cents from Aug. 18 based on a value indication

heard at 100 cents/bu, a trade last heard at the same level, a bid heard at 95 cents/bu, and an offer heard at 108 cents/bu.

Platts is part of S&P Global Energy.

No information was excluded.

Animal Feed and Protein

Platts Argentina Soybean Meal Daily Rationale

Platts assessed the Argentine soybean meal FOB Up River price for October loading on Aug. 19 at \$365.96/metric ton, \$7.05/mt higher than the previous assessment.

The basis for October loading in the Up River cargo market was unchanged at plus \$11/st to the October (V) futures at the Chicago Board of Trade. The assessment considered steady bids at plus \$9/st and lower offers at plus \$12/st to the CBOT V contract at market close. The lower offer level did not disprove the previous price assessment.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYMAA00> <SYMAB00>.

Platts Brazil Soybean Meal Daily Rationale

Platts assessed the Brazilian soybean meal FOB Paranaguá price for October loading at \$380.29/metric ton on Aug. 19, \$14.22/mt higher than the previous assessment.

The basis for October loading in the Paranaguá paper market was assessed \$6.50/short ton higher at plus \$24/st to the October (V) futures at the Chicago Board of Trade. The assessment considered a trade last heard at plus \$23/st, followed by bids at plus \$23/st to the CBOT V contract and no offers at the market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYMBA00> and <SYMBB00>.

Platts US Dried Distiller Grains DDGS Daily Assessment Rationale

Platts assessed CIF New Orleans dried distillers grains with solubles barges for the August shipment period at \$204/short ton on Aug. 19, unchanged from the previous session based on a bid heard at \$195/st and an offer heard at \$205/st.

The Chicago DDGS truck market for the August delivery period was assessed at \$191/st, up \$3/st from the previous session, based on a bid heard at \$190/st.

The Southern California rail market for the August delivery period was assessed at \$235/st, up \$4/st from the previous session, based on a bid heard at \$234/st and an offer heard at \$238/st.

No exclusions were made.

This rationale applies to symbols <ACDDG00> <AADDG00>.

Vegetable Oils.

Platts Asia Palm Oil Daily Rationale

Platts assessed CPO CFR WC India at \$1,255/metric ton Aug. 19 for September loading, unchanged day over day, below an offer and above a bid.

A CPO offer was heard at \$1,260/mt and a bid at \$1,250/mt on a CFR WC India basis, shipping in September.

An October shipment of CPO CFR WC India was at \$1,265/mt Aug. 19, down \$5/mt from Aug. 18, considering a \$10/mt carry between September and October.

Platts assessed CPO FOB Indonesia at \$1,207.50/mt Aug. 19 for September loading, down \$3.50/mt from Aug. 18, below an offer and above a bid.

A CPO offer was heard at \$1,212.50/mt and an indicative bid at \$1,197.50/mt on an FOB Dumai basis, shipping in September.

An October shipment of CPO FOB Dumai was at \$1,222.50/mt Aug. 19, down \$3.50/mt from Aug. 18, considering a \$15/mt carry between September and October.

Platts assessed RBDPS FOB Indonesia at \$1,090/mt on Aug. 19 for September loading, unchanged day over day, below an offer and above a bid.

An RBDPS offer was heard at \$1,105/mt and an indicative bid at \$1,075/mt on an FOB Dumai basis, shipping in September.

An October shipment of RBDPS FOB Dumai was at \$1,112.50/mt Aug. 19, unchanged day over day, considering a \$22.50/mt carry between September and October.

Platts assessed PFAD FOB Indonesia at \$1,017.50/mt Aug. 19 for September loading, up \$2.50/mt from Aug. 18, below an offer and above a bid.

A PFAD offer was heard at \$1,037.50/mt and an indicative bid at \$1,000/mt on an FOB Dumai basis, shipping in September.

An October shipment of PFAD FOB Dumai was at \$1,042.50/mt Aug. 19, up \$2.50/mt from Aug. 18, considering a \$25/mt carry between September and October.

Platts is part of S&P Global Energy.

Platts Argentina Soybean Oil Daily Rationale

Platts assessed the Argentine soybean oil FOB Up River price for September loading at \$1,185.21/metric ton Aug. 19, up \$1.55/

mt from Aug. 18. The basis for September loading in the Up River paper market was assessed 10 points lower at minus 1,610 points to the September (U) futures at the Chicago Board of Trade. The assessment considered an indicative value last heard at that level, offers at minus 1,600 points, and bids at minus 1,650 points to the CBOT U contract at the market close. No trades were confirmed before the market close for September loading in the FOB Up River paper market Aug. 19.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYOAA00> <SYOAB00>.

Platts Brazil Soybean Oil Daily Rationale

Platts assessed the Brazilian soybean oil FOB Paranaguá price for September loading at \$1,191.82/metric ton Aug. 19, up \$5.95/mt from Aug. 18. The basis for September loading in the Paranaguá paper market was assessed 10 points higher at minus 1,580 points to the September (U) futures at the Chicago Board of Trade. The assessment considered an indicative value last heard at that level, offers at minus 1,520 points, and bids at minus 1,610 points to the CBOT U contract at the market close. No trades were confirmed before the market close for September loading in the FOB Paranaguá paper market Aug. 19.

Platts assessed the Brazilian soybean oil FOB Paranaguá price for October loading at \$1,186.53/mt Aug. 19, up \$2.87/mt from Aug. 18. The basis for October loading in the Paranaguá paper market was assessed 10 points lower at minus 1,610 points to the October (V) futures at the Chicago Board of Trade. The assessment considered an indicative value last heard at that level, offers at minus 1,600 points, and bids at minus 1,680 points to the CBOT V contract at the market close. No trades were confirmed before the market close for October loading in the FOB Paranaguá paper market Aug. 19.

Platts is part of S&P Global Energy.
