Commentary and Analysis

Wheat

Platts European Wheat Daily Commentary

- Milling wheat marker falls on weak demand
- French wheat strengthens amid European heat wave
- Harvest delays in Russia push July premiums over August

The Milling wheat marker was bearish on the day, amid lower demand, traders said.

Platts assessed the Milling Wheat Marker at \$236.25/metric ton on June 22, down 25 cents from the previous assessment.

According to a trader based in Russia, “the market is actually falling now, amid lower demand.”

The trader added that the July offers are at a premium to those in August, as the harvest is being delayed.

Another trader said the August offers are at \$234/mt.

The French wheat market strengthened with both FOB and CPT up Eur8-7/mt, as an intensifying heat wave in Europe raised concerns about crop damage.

“The impact in France on wheat isn’t that obvious, but for Germany and Poland it could be pretty unfavorable,” a trader said.

Meanwhile, French crop ratings are still trending down gradually, with wheat down 1% to 76% in good/excellent condition, according to FranceAgriMer. A broker said wheat harvest is underway in southern and Atlantic coastal regions, with winter barley moving north of the Seine.

“Winter grain harvest has already begun, offering some buffer for wheat and barley, but spring barley and corn remain highly vulnerable,” the broker said.

Platts is part of S&P Global Energy.

Platts Asia Wheat Daily Commentary

- APW offers above \$275/mt FOB WA while few offers for ASW
- ASW not competitive against other origins

Platts assessed Australian Premium White unchanged day over day at \$275/metric ton June 22, while Australian Standard White with no protein guarantee was also unchanged at \$270/mt.

Traders offered APW in the high \$270s/mt FOB Western Australia, while the same quality was offered in the range of \$270-275/mt, although the latter was “drawing zero demand,” according to an Australian trader.

ASW offers were also few and far between, according to several wheat traders in Singapore and Australia, as the prices were not competitive into the CFR Southeast Asian region, excluding the Philippines, against other origins such as the Black Sea.

“Recent precipitation in Russia might produce more feed wheat. [It is mostly] CVB and Black Sea wheat [coming to Southeast Asia],” a Singapore-based trader said.

Platts is part of S&P Global Energy.

Platts Canada Wheat Daily Commentary

- Farmer selling slows after futures drop
- Buyers wait for basis to soften further

Platts, part of S&P Global Energy, assessed Canadian Western Red Spring Wheat 13.5% FOB Vancouver 30-45 days forward at \$269.88/metric ton on June 22, down \$3.40/mt from June 18.

MIAX Hard Red Spring Wheat September futures closed 9.25 cents/bushel lower at 638 cents/bu, while basis premiums remained stable at 96 cents/bu over U.

The market remained thin, with no firm bids, offers, or trades reported before the market close. However, an August trade was heard at 105 cents/bushel over U from the week ended June 19.

Farmer engagement remained light following the recent futures collapse, with trade sources noting that farmer selling had slowed considerably, supporting basis premiums at current levels. Buyer activity was also subdued after a recent boost in basis levels following futures declines.

“Most buyers now focused on new crop but appear to be waiting for basis to soften again, for the war to get settled and oil/freight to come down further,” a Canada-based trader said.

In the US, the recent futures sell-off spurred some demand, but interest has since cooled, according to a second trader based in the US. Crop conditions for spring wheat in the region were described as “off to a good start,” though some concern emerged over cool, wet weather in key growing regions that could affect development.

Corn

Platts Asia Corn Daily Commentary

- Asian corn prices stable at \$259/mt
- US PNW basis steady at 154 cents/bu premium

Asian corn prices were stable June 22 amid a lack of pricing direction, while the Chicago Board of Trade futures market was closed.

Platts assessed feed-quality corn CFR Northeast Asia unchanged day over day at \$259/metric ton for cargoes arriving over Sept. 20-Oct. 20.

US Pacific Northwest corn basis offer indications for September shipment were stable at 154 cents/bushel over the September (U) CBOT futures contract.

A Singapore-based trader said no US PNW October shipment indications were available, and only South American corn could be offered in the mid-\$260s/mt CFR South Korea.

Meanwhile, a second trader did not offer to Vietnam as the CBOT futures market was closed.

Platts is part of S&P Global Energy.

Platts Latin America Corn Daily Commentary

- Higher premiums in Brazil
- Winter harvest 20.86% in Mato Grosso

Platts Latin American corn assessments were mixed June 22, with FOB Santos prices higher and FOB Up River prices decreasing, following a drop in Chicago Board of Trade futures.

Argentine FOB Up River premiums for August loading were steady amid no buyer interest.

The Brazilian FOB Santos premiums for August loading rose amid an absence of clear offers.

The US dollar to Brazilian real exchange rate stood at Real

5.1590/\$1 as of 5:30 pm Brasilia time, up 0.09% day over day.

In Brazil's domestic market, prices remained steady in the Sorriso and Rio Verde regions but dropped Real 1.00 in the Maringa region.

In the spot market, a trade was heard in Rio Verde at Real 52.80 with payment in 15 days. Another trade was reported in Maringa at Real 59.00 with loading and payment in July 2026.

According to a broker, prices are falling as the winter corn harvest progresses and are expected to continue to decline throughout July.

The harvest is still at an early stage in Brazil, so there is little corn available. However, because it is expected to be a good crop, pressure on prices is expected to let up as the harvest progresses, a buyer said.

In Mato Grosso, Brazil's largest corn-producing state, the winter corn harvest reached 20.86% of the planted area as of June 19. In the same week in 2025, 14.08% had already been harvested in Mato Grosso, the state's Institute of Agricultural Economics reported June 19.

Platts US Corn Daily Commentary

- June corn remains quiet as July-August sees action
- Farmer planting keeps basis values firming
- Corn exports drop 12.1% in weekly inspections

The US corn market was quiet for June shipments on June 22, while activity is concentrated on July and August deals.

"June corn is very quiet. Agree July/Aug has more activity," a trader said.

A broker said that the firm and quiet market is related to farmers being busy with planting and caring for emerging crops.

"With the lack of farmers selling over the past month, amid strong demand, is keeping basis values firming," the broker said.

Sources said that end users, such as crushers and feedstocks, are generally covered by the July (N) futures contracts, and coverage needs are concentrated in the September (U) futures contracts.

"We have since seen the old crop firm up to take the carry out and incentivize commercial movement," the broker said.

CBOT corn (Jul)	¢/bu	CBAAF00	411.50	-6.00
CBOT corn (Sep)	¢/bu	CBAAF02	419.75	-5.50

In the export market, a second trader said that during the session, the market was unclear, with "everything's going up, but I don't see any firm offers."

While a third trader source said, "Corn pricing is based on making room for soybean trades."

US yellow corn inspected for export totaled 1.378 million metric tons in the week ended June 18, down 12.1% from the prior week. Cumulative inspections totaled 2,640 million bushels, the USDA weekly Federal Grain Inspection Service report, released June 22, showed.

Major destinations included Mexico, South Korea, Japan, and Colombia.

Platts, part of S&P Global Energy, reported that outright prices decreased on June 22, tracking the Chicago Board of Trade, where July (N) futures contracts lost 6 cents during the business day, closing at \$4.1150/bu, while September (U) futures lost 5.50 cents in the same period, settling at \$4.1975/bu.

Platts assessed the outright price for June shipments to New Orleans under the CIF incoterm at \$193.90/mt and for July shipments at \$197.85/mt. FOB Gulf for August was assessed at \$204.63/mt.

Platts European Corn Daily Commentary

- Black Sea corn prices hold steady at \$229/mt
- CVB old-crop offers are absent as new harvest nears

The Black Sea corn market was unchanged on June 22, amid a quiet start to the week with steady bids and offers.

Platts, part of S&P Global Energy, assessed Ukrainian corn unchanged at \$229/metric ton FOB POC, below a \$230/mt offer

for July loading and above a competitive bid for July loading heard for CIF Marmara at \$240/mt, normalized to \$224/mt.

In the FOB POC market, old-crop offers for end-June and July loading held steady at \$230/mt. For the new crop, November-December positions were offered at \$229-\$230/mt, while bids were at \$225/mt. Market participants were also monitoring recent attacks on Ukrainian ports, which traders noted could lead to higher freight rates.

Platts assessed the Romanian corn market at \$236/mt FOC CVB day over day, unchanged from the previous day's assessment.

In the CVB market, old-crop offers for H2 July and H1 August were absent due to very limited stocks. Traders say the lack of offers for July and August is typical for the season, as warehouses prepare for the new crop.

"Usually, corn gets out till end June-mid July as new-crop cargo is coming in soon," a Romania-based trader said, noting that sellers are clearing remaining inventory to make room for new-crop arrival in the coming months.

Oilseeds

Platts Asia Soybean Daily Commentary

- China soybean imports rise 39% MOM in May
- Brazilian soybeans to dominate Chinese demand

Platts assessed the CFR China soybean month-one August shipment up \$1.38/metric ton day over day at \$495.21/mt on June 22, while the basis was unchanged at 215 cents/bushel over August (Q) Chicago Board of Trade futures.

Overnight, the CFR China market saw limited offers available as CBOT was closed for the Juneteenth holiday in the US and Chinese market participants were also away.

China's soybean imports in May rose 39.1% month over month to 11.79 million mt, but fell 15.3% year over year, data from the General Administration of Customs showed June 20.

The monthly increase was driven by stronger arrivals of Brazil's new-crop soybeans and improved port logistics, China-based trade sources said.

Market participants expect Chinese demand to remain heavily skewed toward Brazilian soybeans in the near term as prices remain more competitive than those for US-origin supplies.

"Chinese buyers are still favoring Brazilian cargoes over US beans," an Asia-based soybean trader said, citing the price advantage of Brazilian supplies.

While the future buying of US soybeans remains uncertain, ample inventories in China and a steady crushing pace have reduced the need to switch origins in the near term.

"The soybean crushing rate in China has increased this week, leading to continued soybean meal inventory build-up and imports of soybeans remain dominated by Brazilian cargoes," a China-based soybean trader said.

Platts is part of S&P Global Energy.

Platts Brazil Soybean Daily Commentary

- Santos soybean price falls to \$449.58/mt
- Brazil plans record 49M hectare soy area
- June exports average 18% higher year over year

Platts, part of S&P Global Energy, assessed the SOYBEX FOB Santos soybean contract for August loading at \$449.58/metric ton on June 22, down \$2.11/mt from the previous assessment.

CBOT soybean futures were lower amid favorable weather forecasts for crop development in the US Midwest, which offset support from a surge in soybean oil prices and rumored Chinese export interest, analysts said.

Private consulting firm AgRural released its first estimate of soybean planting intentions for Brazil's 2026-27 crop, which will be sown between September and December. The initial outlook is for the country's soybean area to reach 49.006 million hectares, up 443,000 hectares from the previous season.

This early estimate represented a record area and marked the twentieth consecutive year of soybean acreage expansion in Brazil. However, the increase over last season is just 0.9%, the smallest gain during this period of continuous growth in oilseed planting.

Alongside expectations of tighter margins driven by rising production costs and relatively stable prices, factors such as higher debt levels, tighter and more costly credit, and concerns about El Niño, which may delay planting and reduce yields in some states, also constrained the scope for further acreage expansion, AgRural reported.

Preliminary figures from Brazil's Foreign Trade Secretariat showed soybean exports totaled 71 million mt over the first nine working days of June. The average daily shipment rate was up 1% week over week and 18% year over year.

Trading activity was slow to start the week in the Paranaguá FOB premiums market, with no trades heard day over day.

The US dollar versus the Brazilian real settled at Real 5.1457/\$1 at 4:30 pm Brasilia time. Domestic soybean prices were mixed in the main producing regions.

Platts US Soybeans Daily Commentary

- Outright prices fall on US-Iran peace
- Soybean oil leads complex on day

US soybean outright prices fell on June 22 amid developments in the war in the Middle East, a quiet export market and a low weekly amount of US soybeans inspected for export.

Platts, part of S&P Global Energy, assessed SOYBEX FOB New Orleans for August shipment down \$2.48/metric ton from June 18, at \$448.82/mt.

Platts assessed basis for FOB Gulf for August shipment fell 1 cent day over day to 99 cents/bushel over the August (Q) soybeans futures contract.

Platts assessed the outright price for CIF New Orleans for June shipment down \$2.20/mt from the previous business day to \$440.10/mt.

Platts assessed basis for CIF NOLA for June shipment increased by 1 cent day over day to 82 cents/bu over the July (N) soybeans futures contract.

Despite the absence of China in the US market on June 22, days after the US Department of Agriculture confirmed sales to China, some sources expect Chinese entities to resume purchases in the near future.

"I thought we would see China come in. I was wrong," a trader in the FOB Gulf market said. "But I would be surprised if they didn't [show up in the coming days]."

Negotiations between the US and Iran to reach a peace agreement to end the war in the Middle East have pressured the energy and oil markets on June 22.

While soybean futures received some support from bullish soybean oil on the morning of June 22, soybean futures finished the day with the July (N) contract down 7 cents day over day to 1115.75 cents/bu, while the August (Q) contract fell 5.75 cents day over day to 1122.5 cents/bu.

"Soybeans found some support from soybean oil," a trader in the CIF NOLA market said. "I can't quite figure out why [soybean oil] is up so much with energies lower. [Support later vanished] though oil stayed elevated."

A second trader in the CIF NOLA market noted ongoing weakness in CIF soybeans. The River market was described as challenging, compounded by a marketing year low for bean inspections. This situation does not seem favorable for the July futures contract, the trader added.

"This was a technical day for soybean oil," a source in the FOB Gulf market said. "Liquidation was paused, and some are buying to rearrange their books, biodiesel is solid and RINS continue to not be enough."

The USDA published its Grains Inspected and/or Weighed for Export weekly report showing that 241,045 mt of soybeans were inspected during the week that ended on June 18, down 292,393 mt from the previous week, but 38,654 mt higher than the same week of 2025.

Of the total, 72,877 mt went to Mexico, 69,508 mt went to China, and 27,399 mt went to Indonesia.

Animal Feed

Platts Latin America Soybean Meal Daily Commentary

- FOB prices decline on lower futures
- Subdued market activity reported

South American soybean meal FOB prices fell on June 22 amid lower Chicago Board of Trade futures and subdued market activity.

There were no trades heard in the region, as both Brazil's FOB Paranaguá and Argentina's FOB Up River markets saw relatively wide offer-bid gaps for nearby dates throughout the session.

In Argentina, traders remained cautious about a possible strike by an oilseed workers' union that could affect the Rosario export corridor. Industry activities have been running normally amid a mandatory conciliation that has been in effect since the strike began in late May and is likely to end on June 25.

"The market is still with an eye on what will happen with the strike as mandatory conciliation expires on Thursday," an Argentina-based broker said.

The CBOT August (Q) contract settled at \$299.90/short ton, down \$1.40/st.

Platts European Animal Feed Daily Commentary

- Dutch corn prices rise on low water risks
- Spanish corn firms as wheat prices climb
- Soybean meal holds steady at Eur344-345/mt

Northern Europe

The Dutch soybean meal market was unchanged on June 22. Platts, part of S&P Global Energy, assessed FOB Netherlands at Eur345/metric ton for the July-August loading period.

According to a corn trader, Dutch corn prices were increasing "because of low water risk on the inland waterways."

The trader noted that it would increase transportation costs, in turn increasing the corn price.

Southern Europe

The Spanish corn market firmed on June 22, as higher wheat prices put pressure on corn, traders and brokers said.

A broker explained that "buyers have paid a few euros more for corn due to the sharp increase in wheat prices on Matif."

The soybean meal prices remained unchanged in Spain at Eur344/mt, with offers at Eur345/mt for the June-July loading period.

Platts US Distiller Grains DDGS Daily Commentary

- Summer demand weakness drives prices lower
- October forward positions show premium

The US dried distillers grains with solubles market remained quiet June 22, with participants reporting limited activity and continued pressure on nearby summer positions.

Platts assessed CIF New Orleans dried distillers grains with solubles barges for the June shipment period at \$184/short ton on June 22, the Chicago DDGS truck market for the first July delivery period was assessed at \$165/st and the South California rail market for the June delivery period was assessed at \$212/st.

One trader described the CIF NOLA market as subdued. "June seems quiet to me right now," the trader said, adding that CIF NOLA indications were "closer to bid."

A broker said the market continued to soften last week. "Looks like we have dropped a bit more last week too out there for the summer at least," the broker said.

The broker pointed to weak seasonal demand and lower competing feed ingredient values as key drivers. "Summer doldrums. Need export demand badly," the source said. "Domestic will buy, but we need to be lower still." The broker added that declines in corn and soybean meal have also contributed to the weakness.

In the Union Pacific California market, the broker reported wider indications. "UP values are a little wide though," the source said.

Despite pressure on nearby positions, deferred markets continue to show support. "Oct forward a premium and by a good bit," the broker said, noting that the structure could help limit downside risk.

The broker added that several factors will determine whether values continue moving lower. "Have to watch corn, soybean meal, dollar, freight, export and demand," the source said. "Lower values should invite demand. However, it is summer. It is hot and animals tend to eat less."

Export demand was also highlighted as a key variable. "Needs to start happening soon," the broker said.

A plant manager also reported limited activity to start the week. "Slow start today," the source said.

Platts is part of S&P Global Energy.

Vegetable Oils

Platts Asia Palm Oil Daily Commentary

- Malaysia palm oil exports surge
- Indonesia B50 biodiesel mandate supports market
- India demand remains weak ahead of festivals

The Asian palm oil market was mixed June 22, with palm oil futures on Bursa Malaysia extending gains, supported by stronger exports from Malaysia and following strength in Chinese vegetable oil futures and Chicago soybean oil futures, while gains were capped by higher production.

The overall market was also supported by supply concerns surrounding Indonesia's B50 biodiesel mandate set to be implemented on July 1, as well as expectations of lower production due to the upcoming El Niño weather pattern.

Malaysia's palm oil exports data by cargo surveyor for June 1-20, compared with the same period last month, show increases: Amspec reported 862,436 mt, up 25%; Intertek Testing Services reported 907,067 mt, up 19.1%; and SGS reported 907,601 mt, up 78.53%.

Malaysia's Southern Peninsular Palm Oil Millers Association (SPPOMA) reported an increase in palm oil production for June 1-20 compared to last month. Yield increased 15.18%, oil extraction rose 0.14%, and overall production surged 15.92%.

Platts Latin America Soybean Oil Daily Commentary

- CBOT soy oil futures rise 1.65% to 69.56 cents/lb
- Argentina FOB assessed at \$1,147.73/mt August
- World Cup match limits South America trading

Brazilian and Argentine soybean oil FOB markets were quiet June 22 as Chicago Board of Trade soybean oil futures rebounded from recent lows, while trading activity across South America remained limited due to low liquidity and reduced market participation during the FIFA World Cup match between Argentina and Austria.

CBOT August soybean oil futures rose 1.65% day over day to settle at 69.56 cents/lb. Market participants said soybean oil futures recovered modestly after last week's sharp declines, although broader sentiment remained cautious amid favorable US crop conditions and expectations for ample global soybean supplies.

Trading activity in Argentina and Brazil was notably subdued throughout the session. Market participants said many commercial participants were focused on the Argentina-Austria World Cup match during the afternoon, contributing to lower liquidity and limited price discovery in the FOB Up River and FOB Paranaguá markets.

In Argentina, Platts assessed the soybean oil FOB Up River price for August loading at \$1,147.73/mt June 22, the first day of assessment for August 2026 loading. The basis for August loading in the Up River paper market was assessed at minus 1,750 points to August (Q) futures at the Chicago Board of Trade.

In Brazil, Platts assessed the soybean oil FOB Paranaguá price for August loading at \$1,169.77/mt June 22, up \$2.86/mt from June 19. The basis for August loading in the Paranaguá paper market was assessed 100 points lower at minus 1,650 points to August (Q) futures at the Chicago Board of Trade.

Platts also assessed the soybean oil FOB Paranaguá price for September loading at \$1,156.55/mt June 22, the first day of assessment for September 2026 loading. The basis for September loading in the Paranaguá paper market was assessed at minus 1,600 points to September (U) futures at the Chicago Board of Trade.

Market participants said FOB soybean oil basis levels in South America remained substantially stronger than the record discounts observed in early June, despite some weakening in the Brazilian August basis during the session. Traders noted that the recovery in basis values over recent weeks has largely reflected the sharp decline in CBOT soybean oil futures rather than a significant tightening in regional soybean oil supplies.

At the same time, physical soybean oil values continued to demonstrate relative stability compared with the volatility observed in US futures markets. Participants said South American export markets remained supported by steady international demand and relatively firm global vegetable oil values despite expectations for abundant soybean supplies in Brazil and Argentina.

Traders also continued monitoring developments surrounding labor negotiations in Argentina's oilseed sector. While no major disruptions to export flows had been reported, market participants said uncertainty surrounding a potential strike action in the Rosario export corridor remained a source of caution for commercial participants.

Meanwhile, Brazil's record soybean crop and crush outlook continued to provide a bearish backdrop to export markets. Brazilian agricultural agency Conab estimates Brazil's 2025-26 soybean crop at a record 180.13 million mt, while the Brazilian Association of Vegetable Oil Industries, or Abiove, projects Brazilian soybean processing at a record 62.5 million mt in 2026.

Platts is part of S&P Global Energy.

Platts Europe Vegetable Oil Daily Commentary

- Stable seed supply supports current market values
- Record global crop outlook limits bullish sentiment
- Processors continue underpinning Ukrainian sunflower demand

European vegetable oil markets were broadly stable, with sunflower oil unchanged and only marginal movement observed in deferred rapeseed oil positions. FOB Black Sea sunflower oil remained at \$1,379/mt, while RSO FOB Dutch Mills front-month and second position held at Eur 1,144/mt and Eur 1,142/mt respectively. Third position edged Eur1/mt higher to Eur 1,135/mt, while fourth position remained unchanged at Eur1,129/mt. The muted price action reflects a market balancing supportive nearby fundamentals against expectations of significantly larger global oilseed supplies in the upcoming season.

Despite increasingly bearish production forecasts, the Ukrainian sunflower seed market remains resilient. A trader based in Ukraine noted that "despite expectations of a record global sunseed production in the MY 2026-27 season, the domestic market of Ukraine has not yet shown a significant reaction." The source added that "purchase prices remain stable due to limited seed supply and sustained demand from processing enterprises." This suggests that local supply constraints and processor demand continue to outweigh the influence of forward-looking global production estimates.

Global sunflower seed production is expected to expand substantially in the coming season. According to a trader based in Ukraine, "the global sunseed harvest in the MY 2026-27 season may increase to 63.3 million mt," compared with 57.5 million mt in the previous season. The anticipated increase is driven by expanded planted area and yield recovery, particularly among Black Sea producers. High sunflower seed prices during the previous marketing year and comparatively lower fertilizer costs relative to grain crops have encouraged producers to increase oilseed acreage.

In Europe, the outlook remains balanced between supportive near-term fundamentals and potentially more comfortable future supplies. While expectations of record production

could eventually weigh on prices, the current market remains supported by limited seed availability and active processor demand. The stability of both sunflower oil and rapeseed oil values suggests that market participants are waiting for clearer evidence of crop development and harvest potential before pricing in the full impact of the expected production increase. Until then, regional supply constraints continue to provide support despite increasingly bearish long-term supply projections.

Platts is part of S&P Global Energy.

GLOBAL CORN WEEKLY: Prices expected to fall amid Middle East peace deal

- Asia corn prices climb on expectations of tighter export capacity in US Northwest
- Black Sea corn bearish amid slow demand
- Brazilian corn falls on rising supply outlook
- US corn prices rise on China buying interest

Asian destination corn prices rose week over week, tracking expectations of a tighter export capacity for US Pacific Northwest corn, while market participants expect Brazil-origin corn to be the most competitive supply moving into the August shipment window and a rising supply from the Safrinha harvest.

Asia

Asian corn prices climbed higher week over week, with Platts assessing CFR Northeast Asia corn up \$3/mt at \$259/mt June 19 amid expected tighter export capacity for Pacific Northwest corn following the return of US-China soybean trade flow.

South Korean and Vietnamese feed millers remain quiet week over week amid higher prices, though market participants expect a return to activity in the week ending June 26.

Brazilian and Argentine corn shipments for August overtook US Pacific Northwest corn in price competitiveness into Asia, with all eyes on Brazil's Safrinha crop export prices.

Regarding the Japanese feed market, a Singapore trader noted that Japanese buyers had purchased August/September shipments from US Pacific Northwest over the previous few weeks, but did not complete September shipments coverage.

Platts Corn Arbitrage Price Matrix also showed replacement values on a CFR Northeast Asia basis at \$261.82/mt for Argentina-origin corn, while US Pacific Northwest values were at \$264.4/mt CFR June 19.

Thailand is set to extend its tariff-free feed corn import period under the ASEAN Free Trade Area from Feb. 1-June 30 by two months until Aug. 31, according to the Thai Prime Minister's Office.

EMEA

The Black Sea corn market dropped over the week, with slow demand from Turkey. Traders are expecting prices to drop further, as sellers may lower their offers to capture demand from Turkey.

Market participants are also anticipating a spot-buying spree ahead of the quota's end in July. Traders from Saudi Arabia and Egypt are monitoring corn prices amid the peace deal between the US and Iran.

The Spanish corn had a mixed sentiment during the week ending June 19. A trader in Spain said the lower FOB US offers lowered the prices at the beginning of the week, but the prices were pressured with high cbot towards the end of the week. Currency exchange rates and higher freight rates have also contributed to higher corn offers and trade levels, according to brokers and buyers.

Platts assessed Ukrainian corn FOB POC at \$230/mt, and Romanian and Bulgarian corn FOB CVB at \$236/mt for July 17-31 loading for handy size and EXW Spain corn at Eur219/mt June 19, for the loading period June 19 to July 19.

Latin America

South American corn prices fluctuated amid volatility in Chicago Board of Trade futures throughout the week ended June 19.

Argentine FOB Up River premiums increased during the week, while Brazilian FOB Santos premiums decreased week over week.

In the Brazilian domestic market, prices ended the week lower, with spot prices in Rio Verde and Maringá declining amid weaker buyer bids.

Expectations of rising supply in the coming weeks are pressuring Brazilian corn prices despite limited early harvest progress, the Brazil Center for Advanced Studies on Applied Economics said. Buyers are retreating in anticipation of further declines, while sellers are easing offers and terms to move volumes at the start of the harvest.

Farmers in the Rio Verde region are seeking to sell available corn volumes to cooperatives and other market participants amid expectations of lower prices as harvests advance in other states, a cooperative said.

"Producers had expected that reduced yields in Goiás would support prices," the source said. "However, they now see this as unlikely in the short term."

Platts assessed spot corn in Sorriso, Mato Grosso, at Real 42.1/60 kilograms June 19, while prices in Rio Verde, Goiás, ended the week at Real 52.5/60 kg. Prices in Maringá, Parana, were at Real 60.9/60 kg.

North America

During the week June 15-18, the Platts outright prices increased, tracking the CBOT, which followed positive market sentiment after some China soybean purchases and US-Iran peace talks.

Platts assessed the outright price for June shipments to New Orleans in the incoterm CIF at \$196.25/mt June 18, increasing \$1.55 week over week. July shipments increased 40 cents to \$199.40/mt and FOB Gulf for August shipments was assessed at \$206.00/mt, up 98 cents from the same period.

Domestic farmer sales have been exceptionally light,

leaving buyers dependent on basis strength, and elevators push coverage into mid- and late-July slots, multiple market sources said.

In the export market, China was heard asking for US corn, and market sources said the bigger impact will be at Pacific Northwest ports and prices, but could also push prices in the US Gulf.

ASIA AGRICULTURE: Key market indicators for June 22-26

- Asian feed millers quiet amid rising corn prices
- Chinese buyers purchase 20 soybean cargoes
- South American corn beats US in price competition

China's soybean purchasing activity is expected to be focused on the near term amid progress in US-Iran peace talks and US weather developments, traders said.

South Korean and Vietnamese feed millers were quiet in the week ended June 20 due to firm corn prices, while Brazilian and Argentine August shipments grew more competitive into Asia than US Pacific Northwest supply.

Soybean

Platts, part of S&P Global Energy, assessed soybeans CFR China month-one July shipment price at \$493.38/metric ton June 19, up \$8.36/mt week over week, while the month-two August shipment price was assessed at \$501.55/mt, up \$9.18/mt week over week.

Chinese buyers bought up to 20 cargoes in the week to June 19, with trades scattered across Brazil's old and new crop shipments, as well as US October shipments.

Despite reports of the US-Iran peace deal, US weather and Chinese purchasing activity are likely to remain the key focus in near term, said multiple China-based soybean traders.

For the July shipment, open demand decreased to approximately 1 million metric tons, while open demand for August shipment stood at 3.1 million mt, according to a China-based soybean trader.

Corn

The Platts-assessed CFR Northeast Asia corn price was up \$3/mt week over week at \$259/mt June 19 on expected tighter export capacity following the return of US-China soybean trade flows.

South Korean and Vietnamese feed millers were quiet during the week to June 19 as prices rose, although market participants expected activity to resume June 22-26.

Brazilian and Argentine August shipment corn overtook US Pacific Northwest in price competitiveness into Asian destination markets.

Wheat

The Platts-assessed Australian Premium White wheat ended the week down \$4/mt at \$275/mt June 19, while Australian Standard White was down \$2/mt at \$270/mt.

Australia's Bureau of Meteorology has officially declared the onset of El Nino June 16, though recent rains and positive precipitation forecasts ahead remain supportive for new crop development in the near term, according to several Australian trade participants.

South Korean feed millers extended feed wheat coverage in the week to June 19, purchasing three cargoes at \$277-\$278/mt CFR, all likely to be delivered from European or Black Sea ports, said several Asian grains traders.

CHINA DATA: May corn imports rise on month, wheat shipments fall

- China's May corn imports rise 19.7% MOM
- Wheat imports plunge 55.5% from April
- Russia returns as top corn supplier to China

China's corn imports 19.7% rose month over month but fell 222.7% year over year to 58,431 metric tons in May, the latest General Administration of Customs data showed.

A total of 876,610 mt of corn has been imported since the start of 2026, although a China-based feed miller source indicated that about 4.5 million mt has been booked for delivery in the same year.

Russia returned as the top supplier to China while also being the most consistent, by maintaining exports for the last one year.

The domestic Chinese corn supply is considered "abundant," according to a China-based trader, leading to weak import demand.

However, "I strongly expect China to return to purchase US corn to fulfill its \$17 billion commitment this year and imports could be above 8 million mt. There could also be US sorghum and wheat exports to China, but the majority should be corn," a Singapore-based trader, who was optimistic about Chinese corn imports in 2026, said.

China's corn planting is expected to run ahead of schedule due to a dry outlook in the North China plains, allowing fieldwork to progress rapidly, S&P Global CERA said in its Global Corn and Minor Grains Short-Term Outlook report on June 18.

CERA estimated total production in China at 301.2 million mt for the marketing year 2025-26 (October-September) and 303.4 million mt for MY 2026-27.

Platts, part of S&P Global Energy, assessed corn CFR Northeast Asia down \$1.50/mt at \$259/mt for cargoes arriving over Sept. 17 to Oct. 17.

China's corn imports in April and May 2026 (mt)

Origin	Apr-26	May-26
Brazil	38,780	-
Myanmar	300	4,520
Russia	9,724	53,911
Total	48,804	58,431

Source: General Administration of Customs data

China's May wheat imports shrink by more than half

China imported 281,895 mt of wheat in May 2026, down 55.5% month over month and 93.3% year over year, according to the latest General Administration of Customs data.

March marked the first arrivals of Argentine wheat to China, following import approvals issued in January 2024.

Canadian shipments made up over half of China's imports in May, followed by the other major exporter Australia, while US-origin wheat was absent, data showed.

China's domestic wheat harvest campaign is nearing its end, with the harvest progress exceeding the 90% mark in the week ended June 19, according to China's Ministry of Agriculture and Rural Affairs.

Harvest in some provinces was disrupted by untimely rains and while yields are not significantly impacted, some quality concerns have emerged, which could encourage more milling wheat imports in 2026, according to several Asian trade sources.

"Persistent rumors of buying interest from China for US agriculture products, as well as heavy rains in SRW wheat growing areas and warm weather in western Europe, provided some support, leaving global wheat prices mostly steady," S&P Global CERA said in its Global Wheat Short-Term Outlook report released June 18.

CERA also forecast wheat crop production of 36 million mt for Australia's MY 2025-26 (December-November) and 28 million mt for MY 2026-27.

Platts assessed Australian Premium White wheat down \$1/mt on day at \$275/mt FOB Australia on June 19, while Australian Standard White wheat with no protein guarantee was assessed down \$1/mt at \$270/mt over the same period.

China's wheat imports in April and May 2026

Origin	Apr-26 (mt)	May-26 (mt)
Australia	123,528	110,774
Russia	-	4,619
Kazakhstan	6,316	6,050
Canada	234,743	160,451
United States	198,944	-
Argentina	69,400	-
Total	632,931	281,895

US DATA: Corn export inspections fall nearly 12% on week to 1.45 mil mt

- Mexico leads US corn destinations at 479,359 mt
- MY 2025-26 exports as of June 18 up 25.2% on year

US corn export inspections fell 11.9% week over week to 1.45 million metric tons over June 12-18, data from the US Department of Agriculture showed June 22.

Mexico was the top destination for US corn inspected for export at 479,359 mt, followed by Japan with 299,364 mt and South Korea with 289,029 mt, the data showed.

Corn export inspections through June 18 in marketing year 2025-26 (September-August) rose 25.2% year over year to 67.08 million mt, according to the USDA.

The USDA forecast corn exports at 84.46 million mt in MY 2025-26, up 16.3% year over year, in its World Agricultural Supply and Demand Estimates report released June 11.

The US is expected to harvest 432.34 million mt of corn in MY 2025-26, up 14.3% year over year, the USDA said.

Platts, part of S&P Global Energy, assessed US corn CIF New Orleans at \$196.25/mt on June 18, down 60 cents/mt day over day.

US corn export inspections (mt)

Commodity (mt)	Week ended Jun-18 - 26	Week ended Jun-11 - 26	Week ended June 19 - 25	Current MY to date	Previous MY to date
Corn	1,454,252	1,650,180	1,504,081	67,082,437	53,574,252

Assessment Rationale

Grains

Platts Ags EMEA Wheat Daily Rationale

Platts assessed the Milling Wheat Marker at \$236.25/metric ton on June 22, down 25 cents/mt from the previous assessment. Russian 12.5% handysize wheat, assessed at \$236.25/mt, was the most competitive wheat out of the three components of the Milling Wheat Marker, which also includes Ukraine 11.5%, normalized to the nearest 25 cents of \$239.75/mt when adding May's quality normalization of \$6.15/mt, to account for its lower protein content, and CVB 12.5% wheat assessed at \$239/mt. This reflects the Platts assessment window of July 20-Aug. 3.

Platts assessed Black Sea wheat (Russian deepsea, 12.5% protein) down 25 cents at \$236.25/mt on June 22, above a bid at \$236/mt and below an offer at \$237/mt for July and in parallel with a tradable level at \$233/mt and below an offer at \$234/mt for August. This reflects the Platts assessment window of July 20-Aug. 3.

Platts assessed Black Sea wheat (Ukraine deepsea, 11.5% protein) unchanged at \$233.50/mt on June 22, amid low demand,

market participants said, and below an offer at \$237/mt. This reflects the Platts assessment window of July 20-Aug. 3.

Exclusions: No market data was excluded from the June 22 Black Sea wheat assessments.

Platts is part of S&P Global Energy.

Platts Asia Wheat Daily Assessment Rationale

Platts assessed Australian Premium White wheat unchanged at \$275/mt FOB Kwinana June 22 for cargoes loading between Aug. 21 and Sept. 20, tracking indicative value at \$275/mt and below the lowest indicative offer at \$276/mt.

Platts assessed Australian Standard White wheat with no protein guarantee unchanged at \$270/mt for cargoes loading over the same period, tracking indicative value at \$270/mt. This maintains the spread between Australian Premium White and Australian Standard White, with no protein guarantee, at \$5/mt.

Platts is part of S&P Global Energy.

Market commentary can be found on <PAA2699>

This rationale applies to symbol(s) <WAUSA00>

Platts Canada Wheat Daily Rationale

Platts assessed Canada Western Red Spring Wheat 13.5% FOB Vancouver 30-45 days forward at \$269.88/metric tons on June 22, \$3.40/mt lower than June 18.

CWRS Wheat 13.5% FOB Vancouver basis 30-45 days forward, spanning July 22 – Aug. 6 was assessed unchanged at MIAX Hard Red Spring Wheat September (U) futures plus 96 cents/bushel.

CWRS Wheat 13.5% FOB Vancouver basis 45-60 days forward, spanning Aug. 6 – Aug. 21 was assessed unchanged at U plus 96 cents/bushel.

CWRS Wheat 13.5% FOB Vancouver basis 60-75 days forward, spanning Aug. 21 – Sept. 5 was assessed unchanged at U plus 96 cents/bushel.

No firm bids, offers, or trades were heard before the market close.

Exclusions: No data was excluded in the assessments.

Platts Argentina Corn FOB Up River Daily Rationale

Platts assessed corn FOB Up River for loading in August at \$202.26/metric ton on June 22, \$2.17/mt lower from the previous assessment.

The assessment considered the FOB premium for Up River August-loading cargoes unchanged at plus 94 cents/bu to Chicago Board of Trade September (U) corn futures, based on an indicative value heard at that level, steady offers heard at U plus 100 cents/bu and no bids heard at the market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <ARGCA00> <ARGCB00>

Platts Brazil Corn Daily Rationale

Platts assessed the Brazilian corn FOB Santos price for August loading at \$214.46/metric ton on June 22, 59 cents/mt higher from the previous assessment.

The assessment considered the FOB Santos basis for August loading cargoes 7 cents/bushel higher at plus 125 cents/bu to the Chicago Board of Trade September (U) contract, based on an indicative value heard at that level, bids for full August loading at U plus 120 cents/bu, bids for August H2 loading at U plus 120 cents/bu and no offers heard at the market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <ABCSA00> <ABCSB00>

Platts US Corn Daily Assessment Rationale

Platts assessed the US Yellow Corn No. 2 CIF New Orleans barge basis for June shipment at 81 cents/bushel over the CBOT July (N) corn futures contract on June 22, unchanged from the previous business day. This was based on a trade heard at 81 cents/bu. During the session, a bid was heard at 81 cents/bu for the second half of the month, and an offer indication at 81 cents/bu.

Platts assessed the US Yellow Corn No. 2 CIF New Orleans barge basis for July shipment at 91 cents/bu over the Chicago Board of Trade July (N) corn futures contract on June 22, up 2 cents from the previous assessment. This was based on firm sentiment, offers heard at 92 cents/bu, and bids at 89 cents/bu. A trade was reported after the MOC at 91 cents/bu, although it was not considered in the assessment.

Platts assessed the US Yellow Corn No. 2 FOB Gulf basis for August shipments at 98 cents/bu over the CBOT September (U) corn futures contracts on June 22, unchanged from the previous session. Offers were heard at 100 cents/bu for the first half of August, and 105 cents/bu for the second half of the month.

No information was excluded.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <WCNOE00> <WCNOU00>

Platts FOB Black Sea Corn Daily Assessment Rationale

Platts assessed Ukrainian corn unchanged at \$229/metric ton on June 22, below an offer at \$230/mt for July loading and above a competitive bid for July loading heard for CIF Marmara at \$240/mt, normalized to \$224/mt. The normalization reflects the freight

rate of \$16/mt from Ukraine ports to Marmara port. The structure between the second half of July and the first half of August was assessed flat. This reflects the Platts assessment window from July 20 to Aug. 3.

Exclusions: No market data was excluded from the June 22 Black Sea corn assessment.

Platts is part of S&P Global Energy.

Platts Brazil Soybean Daily Assessment Rationale & Exclusions

Platts assessed the SOYBEX FOB Santos soybean contract for August loading at \$449.58/metric ton on June 22, down \$2.11/mt from the previous assessment.

The FOB Santos basis for August loading was unchanged at plus 101 cents/bushel to the Chicago Board of Trade August (Q) contract, based on a spread to the Paranaguá paper market heard at plus 2 cents/bu. No bids or offers were heard for the full August loading of FOB Santos cargo on the day.

The FOB Paranaguá basis for August loading was unchanged at plus 99 cents/bu to the CBOT (Q) contract, based on an indicative value heard at Q plus 100 cents/bu earlier on the day, followed by offers at Q plus 100 cents/bu and bids at Q plus 96 cents/bu at the market close.

Platts assessed the SOYBEX FOB Santos soybean contract for March loading at \$427.35/mt on June 18, down 9 cents/mt from the previous assessment.

The FOB Santos basis for March loading was unchanged at parity to the CBOT March (H) contract, based on a spread to the Paranaguá paper market heard at parity. No bids or offers were heard for the full March loading of FOB Santos cargo on the day.

A bid for FOB Santos first-half March 2027 loading was heard at H minus 10 cents/bu earlier on the day.

The new crop FOB Paranaguá basis for March loading was unchanged at parity to the CBOT March (H) contract, based on an indicative value heard at that level, offers at H plus 5 cents/bu and bids at H minus 15 cents/bu at the market close.

Exclusions: No data was excluded.

Platts US Soybeans Daily Rationale

Platts SOYBEX FOB New Orleans for August shipment was assessed at \$448.82/metric ton June 22, \$2.48/mt down from June 18. The FOB Gulf basis for August shipment was assessed at 99 cents/bushel over the Chicago Board of Trade August (Q) soybeans contract day over day, down 1 cent from the previous business day. This was based on a value indication heard at 99 cents/bu and an offer at 102 cents/bu.

The CIF New Orleans basis for June shipment was assessed at 82 cents/bu over the July (N) soybeans futures contract day over day, up 1 cent from the previous business day. This was based on a value indication heard at 82 cents/bu, a bid heard at 80 cents/bu and an offer at 88 cents/bu.

No information was excluded.

Animal Feed and Protein

Platts Argentina Soybean Meal Daily Rationale

Platts assessed the Argentine soybean meal FOB Up River price for August loading on June 22 at \$333.34/metric ton, \$1.54/mt lower than the previous assessment.

The basis for August loading in the Up River cargo market was unchanged at minus \$2.50/st to the August (Q) futures at the Chicago Board of Trade. The assessment considered offers at plus \$5/st and bids at par to the CBOT Q contract at the market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYMAA00> <SYMAB00>

Platts Brazil Soybean Meal Daily Rationale

Platts assessed the Brazilian soybean meal FOB Paranaguá price for August loading on June 22 at \$332.78/metric ton, \$1.55/mt lower than the previous assessment.

The basis for August loading in the Paranaguá paper market was unchanged at plus \$2/short ton to the August (Q) futures at the Chicago Board of Trade. The assessment considered an indicative value heard at that level, offers at plus \$3/st and bids at plus \$1/st to the CBOT Q contract at the market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYMBA00> and <SYMBB00>.

Platts US Dried Distiller Grains DDGS Daily Assessment Rationale

Platts assessed CIF New Orleans dried distillers grains with solubles barges for the June shipment period at \$184/st on June

22, down \$7/st from the previous session based on a bid heard at \$180/st and an offer heard at \$185/st.

The Chicago DDGS truck market for the first July delivery period was assessed at \$165/st, based on a bid heard at \$159/st and an offer heard at \$166/st.

The South California rail market for the June delivery period was assessed at \$212/st, down \$3/st based on a value indication heard at that level, a bid heard at \$205/st and an offer heard at \$215/st.

Platts is part of S&P Global Energy.

Platts Argentina Soybean Oil Daily Rationale

Platts assessed the Argentine soybean oil FOB Up River price for August loading at \$1,147.73/mt June 22, on the first day

of assessment for August 2026 loading. The basis for August loading in the Up River paper market was assessed at minus 1,750 points to August (Q) futures at the Chicago Board of Trade. The assessment considered an indicative value last heard at that level, bids at minus 1,780 points and offers at minus 1,700 points to the CBOT Q contract at the market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYOAA00> <SYOAB00>.

Platts Brazil Soybean Oil Daily Rationale

Platts assessed the Brazilian soybean oil FOB Paranaguá price for August loading at \$1,169.77/mt June 22, up \$2.86 from June 19. Platts assessed the basis for August loading in the Paranaguá paper market 100 points lower at minus 1,650 points to the August (Q) futures at the Chicago Board of Trade. The assessment considered an indicative value last heard at that level, bids at minus 1,750 points and offers at minus 1,420 points to the CBOT Q contract at the market close. No trades were confirmed before the market close for August loading in the FOB Paranaguá paper market June 22.

Platts assessed the Brazilian soybean oil FOB Paranaguá price for September loading at \$1,156.55/mt June 22, the first day of assessment for September 2026 loading. Platts assessed the basis for September loading in the Paranaguá paper market at minus 1,600 points to the September (U) futures at the Chicago Board of Trade. The assessment considered an indicative value last heard at that level, bids at minus 1,700 points and offers at minus 1,400 points to the CBOT U contract at the market close. No trades were confirmed before the market close for September loading in the FOB Paranaguá paper market June 22.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYOBB00> and <SYOBA00>.

Platts Europe Sunflower Oil Daily Rationale

Platts assessed sunflower oil FOB Black Sea Ukraine for July unchanged on June 22 at \$1,379/mt, with no data disproving the value.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SFWBL00>
