Commentary and Analysis

Wheat

Platts European Wheat Daily Commentary

- Black Sea wheat drops to prewar levels
- Egypt, Turkey delay purchases amid weak demand
- French wheat strengthens on EU heat wave fears

The Black Sea wheat market continued to decline, at levels last seen before the war with Iran began, amid favorable new crop conditions and weak demand.

The Russian wheat new crop offers are at \$230/mt, compared to a single bid at \$226/mt. The Russian export tax remained at zero rubles for July 1-7, while the ruble remained weak at Ruble 77/mt.

The market is also monitoring fuel shortages amid Ukrainian drone attacks, which are already adding pressure to already low margins, traders said.

"We cannot take trucks due to the diesel shortage," one Russia-based trader said.

On demand, Egyptian buyers monitored the strength of the local pound and the slow depletion of large stocks in bonded warehouses. Sellers offered to the market at CIF \$250/mt with no firm bids.

The CIF Marmara market is also falling, with sellers lowering their offers to \$230/mt, while bids are at \$225/mt.

"Turkey won't buy much till the end of the harvest in late July and will likely see high protein wheat of 14.4%-15.3%," one local trader said.

The Constanta-Varna-Burgas market also fell amid offers and bids at a \$8-\$10/mt spread. The bids for the 12.5% and 11.5% were at \$228.5/mt and \$226/mt, respectively.

Similarly, Ukrainian wheat fell amid the first positive yield cuts for barley and a large carryover of wheat stocks amid weak demand.

Most of the Ukrainian wheat went to Algeria, Indonesia, Italy and Turkey in June, with 1.31 million mt exported, according to traders' lineups.

The French wheat market strengthened on the day with both CPT and FOB up by Eur0.25/mt.

A French broker said the main market discussion centers on the intensifying heat wave and its impact on developing crops, particularly spring barley and corn, alongside ongoing winter wheat harvest progress. Another heat wave is also forecast in the EU over the next 10 days.

Meanwhile, record temperatures across France and Western Europe have increased stress on crops, with FranceAgriMer reporting a decline in French soft wheat conditions to 74% good/excellent, down 2 percentage points from the previous week.

Platts Asia Wheat Daily Commentary

- Australian wheat closes mixed
- Australian wheat belt to receive more rain this week

The Platts-assessed Australian Premium White was at \$272/metric ton June 29, unchanged day over day, while Australian Standard White with no protein guarantee was down \$1/mt over the same period at \$266/mt, tracking lower value indications.

Slow regional demand for Australian wheat, alongside weakness in the currency, continued to lend some bearishness to wheat prices, several Australian trade sources said.

The Australian dollar was trading below 69 US cents at 1630 SGT (0830 GMT), keeping near a 12-week low.

More rain is in store for Australia over the coming week, with at least 25 mm expected over New South Wales and Victoria, and South Australia and Western Australia will also receive smaller falls across the week, based on the latest rainfall forecast by Australia's Bureau of Meteorology.

A Philippines feed buyer issued a re-tender for feed wheat over late-September arrival after passing on all offers in its initial buy tender closing June 26, according to several Asian grains traders.

Another Philippines feed buyer bought a cargo of Australian feed wheat for August shipment on late June 26, reportedly paying around \$290/mt CFR, several Singapore-based grains traders said.

Platts is part of S&P Global Energy.

Platts Canada Wheat Daily Commentary

- Heavy rains pressure futures
- CWRS basis premiums firm on futures

Canadian wheat market activity strengthened June 29 to counteract weakening futures.

Platts, part of S&P Global Energy, assessed Canada Western Red Spring Wheat 13.5% FOB Vancouver 30-45 days forward at \$280.91/metric ton, up \$17.73.

Regular rain across the US Plains in recent weeks continued to pressure wheat futures, with the MIAx December (Z) Hard Red Spring Wheat futures contract closing at 625.50 cents/bushel, down 4.75 cents.

"Most of CWRS and [Northern Spring wheat] regions got/are getting lots of rain the past several days and this week," a US trader said of recent futures declines. The weaker levels prompted firmer basis, with last-half August/first-half September offers heard at Z plus 120 cents/bu. A trader from June 26 was heard at Z plus 100 cents/bu, reflecting a price boost since the last trade day.

Early to mid-August activity remained low, with most participants covered for the period. Low farmer engagement and the nearing delivery period led to a significant 20-cent premium over later-loading periods.

"[August] is tough because farmers not engaged, so [August] is coming up very soon," a Canadian trader said.

"Not sure," a second Canadian trader said about August pricing. "Might just be no offer."

In the US, a Korean milling wheat tender is set to trade this week for 36,000 metric tons of US Northern Spring wheat for October/November delivery. Although no fresh price levels were heard for US NS day over day due to limited activity, basis premiums are likely to remain steady, according to the US trader.

"With lower futures, trade will try to maintain the basis, but with [the amount of] rain we are getting, the basis should collapse," he said. Although farmers may demand higher basis levels to sell at current lower futures prices, the need to empty storage for the new crop could force them to sell at lower levels, he added.

Corn

Platts Asia Corn Daily Commentary

- Asian corn stable
- Buyer expectations ease ahead of USDA acreage and stocks report

Asian corn prices were steady day over day June 29.

Platts assessed feed quality corn CFR Northeast Asia unchanged at \$260.50/metric ton for cargoes arriving over Sept. 27 to Oct. 27 at Pyeongtaek.

Despite a slow start to the week beginning June 29, South

Korean feed buyers are expected to continue extending demand coverage for November arrival cargoes later in the week, according to several South Korean corn traders.

"They might move before or after the USDA Acreage and Quarterly Grain Stocks report as CBOT [is] weakening," said one of the traders. The report will be published late 30 June. Analysts from S&P Global Energy CERA have projected US June 1 stocks at 5.354 billion bushels and 2026 planted area to corn at 96 million acres.

In Vietnam, buyer expectations have also moved lower, with bid indications now closer to \$250/mt CFR against offer indications around mid \$250s/mt CFR, a Southeast Asian grains trader said.

Platts is part of S&P Global Energy.

Platts Latin America Corn Daily Commentary

- Prices continued to decrease
- Corn harvest reaches 32.41% in Mato Grosso

Platts, part of S&P Global Energy, assessed Latin America FOB corn prices lower June 26, as Chicago Board of Trade futures decreased.

Argentine FOB Up River premiums for August loading rose amid no offers during the day.

Chicago Board of Trade futures have fallen sharply, and

producers are not interested in negotiating in Argentina, a broker said.

The Brazilian FOB Santos premiums for August loading were steady amid an absence of buyer interest.

The US dollar to Brazilian real exchange rate stood at Real 5.1872/\$1 as of 5:30 pm Brasilia time, up 0.03% day over day.

In Brazil's domestic market, prices were unchanged in the Sorriso, Rio Verde and Maringá regions.

According to a buyer, in Mato Grosso state, most warehouses in the BR-163 corridor are already full. As a result, spot-market negotiations are moving slowly, as market participants traded winter corn earlier.

In Mato Grosso, Brazil's largest corn-producing state, the winter corn harvest reached 32.41% of the planted area as of June 26. In the same week in 2025, 26.99% had already been harvested in Mato Grosso, the state's Institute of Agricultural Economics reported June 26.

Platts US Corn Daily Commentary

- US corn market firms on export demand
- July futures drop 10.75 cents to \$4.02/bu
- China seeks US crops amid high Brazil costs

The US corn market reported a firmer CIF and FOB value basis on June 29 due to export market demand and expectations for the next US Department of Agriculture stocks and acreage report, which will be published on June 30.

"Interior cash is firming as the board has totally reversed course from any of the warm fuzzies on Thursday," a broker said.

The Chicago Board of Trade showed a decrease of 10.75 cents in the July (N) future contracts on June 29, closing at \$4.0200/bushel. While September (U) futures lost 11.50 cents, settling at \$4.1025/bu.

"Demand has shifted to the US due to the high cost of Brazilian," a trader said.

Platts, part of S&P Global Energy, assessed the outright price for September shipment under the FOB Gulf incoterm at \$204.04/metric ton on June 29, while FOB Santos, Brazil, was assessed at \$209.93/mt.

Market sources reported that China was seeking US crops, while others remained skeptical.

For the upcoming USDA reports, S&P Global CERA analysts updated the US corn planted area forecast to 96.3 million acres for marketing year 2026-27 (September-August). For the MY 2025-26 carryout, CERA estimated 5.354 billion bushels, reflecting a lower feed and residual forecast.

Platts assessed the outright price for July shipments to New Orleans in the incoterm CIF at \$194.50/mt on June 29 and for August shipments at \$198.50/mt.

Platts European Corn Daily Commentary

- Black Sea corn market falls on low demand
- Turkey remains top buyer of Ukrainian corn

The Black Sea corn market was bearish day over day, with sellers dropping offers amid limited demand.

A seller from Ukraine said, "Demand depressed."

In the FOB market, the competitive offer for July loading was \$224/metric ton, while the August loading offer was \$228/mt. However, no structure for the two months was heard in the market, as buyers were limited and at the same level for both periods, according to market participants.

According to an analyst from S&P Global Energy CERA, Ukraine will face net drying for the next week to ten days, with warmer temperatures and limited precipitation. While soil moisture is currently adequate, it is expected to decrease, becoming short to very short by the second week of July. No production impacts are anticipated unless rain does not return later in July.

Furthermore, in Ukraine, according to the port line-up shared by a trader, corn loading from Ukrainian ports in June was much lower than in May. During June 1-21, about 1.2 million mt of corn were loaded from Ukrainian ports; during May 1-29, 2.17 million mt of corn were loaded from Ukrainian ports.

Turkey remained the major destination for Ukrainian corn in June, with about 468,698 mt destined for Turkey during the period. Italy, Spain, and the Netherlands were the other major destinations. Italy received 190,073 mt of corn from Ukraine, while Spain and the Netherlands received 163,000 mt and 118,724 mt, respectively.

Oilseeds

Platts Asia Soybean Daily Commentary

- Subdued trading activity
- Wide carry spread deters forward purchases

The Platts-assessed CFR China soybean month-one August shipment was at \$497.14/metric ton June 29, down \$0.28/mt day over day, while basis was up 2 cents/bushel at 223 cents/bu over Aug (Q) Chicago Board of Trade (CBOT) futures.

Overnight, trading activity for CFR China was largely muted. No trades were heard to have transpired, according to China-based soybean traders.

China's crush margins remain under pressure, while a relatively wide carry structure has dampened interest in forward soybean purchases, a Chinese soybean trader said, citing that buyers have "little interest in buying the back end of the carry."

"In addition, soybean meal trading activity has been fairly average," the same trader added.

Another Chinese soybean trader echoed similar sentiments, noting that Brazilian soybean prices remain too high for forward shipments.

"Crush margins now are not the main point, as the big multinationals have already finished buying their August and September shipments," the trader said.

Platts is part of S&P Global Energy.

Platts Brazil Soybean Daily Commentary

- Santos soybean price falls to \$453.53/mt
- Mato Grosso do Sul exports 43% raw soybeans
- Brazil soybean trading activity remains slow

Platts, part of S&P Global Energy, assessed the SOYBEX FOB Santos soybean contract for August loading at \$453.53/metric ton on June 29, down \$2.66/mt from the previous assessment.

CBOT soybean futures declined sharply day over day, tracking a broad set of commodities lower and reflecting trader positioning ahead of the June 30 US Department of Agriculture Acreage and Grain Stocks reports, according to market analysts.

The Brazilian state of Mato Grosso do Sul still exports about 43% of its soybean production without any industrial processing, selling it as a raw commodity despite ranking among Brazil's largest producers. A study by Aprosoja-MS, the Soybean Producers Association of Mato Grosso do Sul, found that a significant share of this volume could remain in the state to supply new crushing facilities.

In the 2024-25 season, Mato Grosso do Sul harvested 14.06 million mt of soybeans, with nearly half leaving the state as raw grain. Processing soybeans into soybean meal and oil not only increases product value but also helps shield the economy from volatility in global commodity markets.

According to Aprosoja-MS, this shift would add value to production, strengthen the local agro-industrial sector, and reduce dependence on unprocessed exports. The state currently operates six crushing plants, with a seventh under construction, for a total annual capacity of about 6.3 million mt, according to Aprosoja-MS.

Trading activity was slow to start the week in the Brazilian soybean FOB market, with few offer and bid indications heard day over day.

The US dollar versus the Brazilian real settled at Real 5.1663/\$1 at 4:30 pm Brasilia time. Domestic soybean prices were lower in the main producing regions.

Platts US Soybeans Daily Commentary

- Limited trading, falling outright prices seen June 29
- Market awaits publication of USDA's Acreage report

The US soybeans market saw a quiet session and falling outright prices June 29, ahead of the June 30 publication of the US Department of Agriculture's Acreage report, with analysts from S&P Global Energy CERA expecting no sharp movements and 85.3 million acres planted for 2026-27.

Platts, part of S&P Global Energy, assessed SOYBEX FOB New Orleans for August shipment at \$448.73/mt, down \$6.34 from June 26. Platts assessed basis for FOB Gulf for August shipment remained unchanged day over day at 102 cents/bushel over the August (Q) soybeans futures contract.

Platts assessed the outright price for a July shipment at

\$440.47/mt CIF NOLA, down \$6.43 from June 26. Platts assessed basis for CIF NOLA, July shipment, remained steady day over day at 90 cents/bu above the July (N) soybeans futures contract.

The USDA's Acreage report will forecast the area planted in 2026-27. The expectation contributed to the market's stillness June 29, sources said.

"It's a big [report]," a trader in the CIF NOLA market said. "So [we have a] combo of short holiday week, plus no business, and [the publication of] a report mid-week. We don't move markets the day before it."

"The report tomorrow [is a market driver]," said a trader in the FOB Gulf market. "And any change in export demand. I think crush is starting to normalize."

CERA's Principal crop analyst, Aaron Gerdt, said he expects no surprises, with CERA currently forecasting 85.3 million acres planted during the 2026-27 marketing year, while estimates for 2025-26 from the USDA and CERA were at 81.2 million acres.

"[There are] two main reasons [for the increase]: prices and crop rotations," he said. "First, the price relationship between soybeans and corn, and to a lesser extent, soybeans and other row crops, favored soybeans more this year than last year. Next, there are agronomic reasons to rotate crops between corn and soybeans in the US Corn Belt each year."

CBOT July (N) futures slid 17.5 cents to 1,108.75 cents/bu June 29, while August (Q) futures fell 17.25 cents to 1,119.25 cents/bu.

"Some aren't done selling yet," a second trader in the CIF NOLA market said. "The Western Belt got a little rain, and the heat isn't sticking around for so long in the more recent forecasts. It's also the month-end, so there are people needing to exit positions."

The USDA also released its Grains Inspected and/or Weighed for Export weekly report June 29, showing that 419,124 metric tons of soybeans were inspected for the week ended June 25.

This amount is 146,983 mt above the previous week, and 181,945 mt above the same week of 2025.

About 121,855 mt went to Mexico, 104,589 mt to Japan, and 65,389 mt went to China.

Paranaguá markets, without trades heard. Cash basis levels were considered virtually steady in Brazil from June 26, but weakened slightly in Argentina.

Argentina's oilseed export industry and labor unions reached a wage agreement covering all of 2026, ending a prolonged negotiation process and averting the threat of strike action in the global top exporter of soybean meal and oil. According to industry group CIARA-CEC, the deal provides for cumulative wage increases of 29.5%.

Platts European Animal Feed Daily Commentary

- Dutch soybean meal holds at \$409/mt July
- Danish pig farming drops to 6.3% by 2025
- Spanish corn trades at Eur221/mt June-July

Northern Europe

The Dutch soybean meal market remained unchanged on June 29.

According to the broker's price list for FOB Netherlands, July offers are at \$409/metric ton with no offers reported for August.

Pig feed volumes in Denmark were under structural pressure as production units declined, with stronger purchasing power and more sophisticated procurement, according to a trader.

The trader said pig farming collapsed from 17.4% to 6.3%, a decline of nearly two-thirds from 2005 to 2025.

Southern Europe

The Spanish corn market was unchanged, with slightly lower offers and similar trade levels.

A broker mentioned that offers for June-July ex-works Spain are at Eur222/mt, with a trade reported day over day at Eur221/mt.

The soybean meal market was unchanged day over day, with offers at EXW Spain at Eur350/mt for July-December and Eur353/mt for June-July, according to a broker's indication.

Platts US Distiller Grains DDGS Daily Commentary

- Sellers offer nearby product amid weak demand
- Quiet trade ahead of USDA report
- Summer demand weighs on market

The US dried distillers grains with solubles market remained quiet June 29, with participants reporting limited activity ahead of the USDA's upcoming acreage and grain stocks report, while lower grain futures continued to pressure sentiment.

Platts assessed CIF New Orleans dried distillers grains with solubles barges for the July shipment period at \$181/short ton on June 29, the Chicago DDGS truck market for the July delivery period was assessed at \$162/st, and the South California rail market for the July delivery period was assessed at \$210/st.

One broker said there was little activity in the export market. "No CIF," the broker said, adding that the Union Pacific California rail market appeared "a little firmer than I expected."

Another broker described a slow start to the week. "Very quiet start to this Monday," the broker said, adding that declining corn futures continued to weigh on market sentiment. "The board is taking a bit of a beating on corn."

The broker said that the market was largely driven by logistics, with sellers actively offering nearby product. "All offers at the moment," the source said, adding that some central Iowa plants were lowering nearby offers to keep product moving.

The broker also pointed to the absence of supportive market drivers. "Not seeing or hearing any bullish news," the source said, adding that seasonal summer demand continues to weigh on the market.

A third broker also described quiet conditions. "It's fairly quiet for the most part," the broker said, adding that many participants were waiting for the USDA report before becoming more active. "It's very tough to get values today."

Vegetable Oils

Platts Asia Palm Oil Daily Commentary

- Palm oil futures extend gains on Bursa Malaysia
- Malaysia pledges support for Nigeria's supply deficit
- IPOA reported Indonesia exports rose 28% in April

The Asian palm oil market was mixed on June 29, as palm oil futures on Bursa Malaysia extended gains, following a rise in other rival vegetable oils, but gains were capped amid a stronger ringgit against the dollar.

The Malaysian Palm Oil Council said June 29 that they would continue to support Nigeria through technical expertise, research collaboration and investment opportunities to help address the country's palm oil supply deficit. MPOC also said that Malaysia exported 300,000mt of palm oil and palm-based products to Nigeria last year and will continue to support Nigeria moving forward.

The benchmark palm oil contract for September delivery on the Bursa Malaysia commodity exchange rose MR23/mt to MR4589/mt on June 29.

The Indian market was quiet on June 29 with no trades heard.

"Buyers are not chasing the market right now, with the Indonesia B50 biodiesel mandate set to be implemented on July 1, the market is waiting to see what might happen," an Indonesia-based trader said.

Platts assessed CPO CFR WC India price at \$1,230/mt June 29 for July loading, unchanged from June 26, while August shipment was \$10/mt higher than July.

Meanwhile, Indonesian Palm Oil Association (IPOA) reported, on June 29, an increase in palm oil exports for April 2026. Exports increased 28.09% month over month to 2.78 million mt in April.

Indonesia's May 2026 palm oil exports was 1.48 million mt, down 26.41% from April, Intertek Testing Services reported June 29.

Platts assessed CPO FOB Indonesia at \$1,191.25/mt June 29 for July loading, down \$3.75/mt from June 26, while August shipment was \$10/mt higher than July.

Platts assessed RBDPS FOB Indonesia at \$1,061.25/mt June 29 for July loading, up \$1.25/mt from June 26, while August shipment was \$10/mt higher than July.

Platts assessed PFAD FOB Indonesia at \$1,000/mt June 29 for July loading, up \$2.50/mt from June 26, while August shipment was \$10/mt higher than July.

Platts is part of S&P Global Energy.

Platts Latin America Soybean Oil Daily Commentary

- CBOT August soybean oil futures dip 1.37% to 69.86 cents/lb
- Argentina oilseed wage agreement eases strike risk
- Brazil, Argentina FOB values weaken as futures decline

Brazilian and Argentine soybean oil FOB markets weakened June 29, tracking Chicago Board of Trade soybean oil futures, as market participants welcomed a wage agreement between Argentine oilseed unions and grain and by-product exporters that eased concerns over potential disruptions in the Rosario Up River export corridor.

CBOT August soybean oil futures fell 1.37% day over day to settle at 69.86 cents/pound. Market participants said soybean oil futures remained pressured by favorable US crop conditions, expectations of ample global oilseed supplies, and ongoing caution following the sharp correction from multiyear highs earlier in June.

In Argentina, Platts, part of S&P Global Energy, assessed the soybean oil FOB Up River price for August loading at \$1,152.14/metric ton June 29, down \$10.14 from June 26. The basis for August loading in the Up River paper market was assessed 50 points higher at minus 1,660 points to August (Q) futures at the Chicago Board of Trade.

In Brazil, Platts assessed the soybean oil FOB Paranaguá price for August loading at \$1,163.16/mt June 29, also down \$10.14 from June 26. The basis for August loading in the Paranaguá paper market was assessed 50 points higher at minus 1,610 points to the August (Q) futures at the Chicago Board of Trade.

Platts also assessed the soybean oil FOB Paranaguá price

for September loading at \$1,153.90/mt June 29, down \$8.82 from June 26. The basis for September loading in the Paranaguá paper market was assessed 30 points lower at minus 1,570 points to the September (U) futures at the Chicago Board of Trade.

Market participants said FOB soybean oil values fell in line with weaker CBOT futures, although nearby August basis levels in Argentina and Brazil strengthened, reflecting continued resilience in physical export premiums following the sharp futures correction earlier in June.

Attention in Argentina shifted to the wage agreement reached between oilseed unions and exporters. According to a statement from CIARA-CEC, the agreement covers the full year 2026 and is based on Argentina's INDEC consumer price index estimated through the REM monthly inflation expectations index. The accumulated adjustment totals 29.5%.

CIARA-CEC said the agreement ensures social peace throughout the year. Market participants said the deal removes an important short-term risk for soybean crushing, port activity, and soybean oil and soybean meal export flows through Argentina's Rosario Up River corridor.

The resolution followed several weeks of negotiations, a brief strike, mandatory conciliation, and concerns that unions could reactivate labor action if no agreement was reached. Traders said the removal of immediate strike risk should allow truck arrivals and terminal operations to normalize after some terminals had previously restricted delivery quotas amid concerns over possible labor disruptions.

Despite easing labor concerns in Argentina, participants said South American soybean oil markets remained influenced by abundant regional soybean supplies, steady export demand, and the broader divergence between volatile CBOT futures and comparatively resilient FOB physical values.

- Destinations await new crop pressure
- Rapeseed oil mostly flat across curve

The Black Sea sunflower oil market opened the week of June 29 extending its firm yet stable sentiment from the previous week, with market participants pointing to muted buying interest as they awaited pressure from the new crop.

Platts assessed FOB Black Sea Ukraine for August-loading flat on the day at \$1,379/metric ton, and unchanged from June 19.

"No open buyers," one trader said, referring to subdued demand amid firm prices, which were "not calculating."

A second trader concurred, observing quiet market activity as buyers awaited pressure on the new crop season.

Destinations were in a waiting mode, the second trader said. "Turkey will start their own sunflower seed crop harvesting in 30-40 days... India is 'playing' and waiting for some pressure on Black Sea sunoil market," the second trader said.

In other regions, a FOB-6-Ports offer for August-loading was heard at \$1,500/mt day over day.

Futures markets mirrored stable sentiment in the physical rapeseed oil market on the day. The front-month Euronext rapeseed futures market settled flat at Eur514.50/mt at the 4:30 pm London Platts Market on Close assessment process.

Echoing this, the FOB Dutch Mill rapeseed oil market was mostly steady across the curve, with the front run unchanged at Eur1,157/mt. The second run decreased Eur1 day over day to Eur1,154/mt, while both the third and fourth runs remained flat day over day at Eur1,138/mt and Eur1,137/mt, respectively.

Platts is part of S&P Global Energy.

EMEA AGRICULTURE: Key market indicators for June 29-July 3

- Wheat prices fall \$4.75/mt on weak demand
- Ukraine corn drops \$5/mt amid Turkey pressure
- Sunflower oil faces tight seed availability

Wheat

- Platts, part of S&P Global Energy, assessed the Milling Wheat Marker at \$231.75/metric ton June 26, down by \$4.75/mt week over week, on weak demand and new-crop arrival. A July trade for Russian 12.5% wheat was at \$232.50/mt in the week to June 26.
- French wheat moved to a three-month high, up \$6/mt week over week, Platts data showed, amid high temperatures above 40 degrees Celsius. The wheat condition ratings also declined due to heat damage, according to France-based traders.
- Barley harvest has started in the Black Sea region, with an optimistic yield outlook, which could signal favorable wheat yields as well, traders estimated.
- In destination markets, Egyptian buyers monitored the strength of the local pound and the depletion of stocks in bonded warehouses.

Corn

- Platts assessed FOB Ukraine corn at \$224/mt June 26, down \$5/mt week over week, for loading July 24-Aug. 7, and CVB corn was down \$7/mt over the same period at \$229/mt.
- Black Sea traders are monitoring demand in the Turkish market, which is pressuring Ukrainian corn prices.
- Market participants anticipate Ukrainian corn to begin flowing to European destinations amid a heat wave and an eventual drop in corn production in Europe.
- In the Egyptian market, importers do not anticipate Ukrainian corn to be competitive, as the discount with South American corn must be large enough to accept the quality this season.
- Ukraine will face net drying for the next week to 10 days, with

warmer temperatures and limited precipitation. No production impacts are anticipated unless rain does not return later in July.

Vegetable oil

- Platts assessed FOB Black Sea sunflower oil at \$1,379/mt June 26, unchanged week over week, and FOB Dutch Mill rapeseed oil front run was at Eur1,157/mt, up Eur13/mt over the same period.
- Rapeseed oil buyers remained cautious about future availability as the new crop campaign approaches.
- Sunflower oil market participants anticipate tight seed availability and low crush coverage in the coming weeks.

GLOBAL CORN WEEKLY: Market awaits upcoming US stocks, acreage report

- South Korea extends November demand coverage
- Black Sea corn bearish on slow demand, alternative crop loadings
- Focus on corn harvest in Latin America
- S&P Global CERA highlights weather as primary driver of US corn yields

US Pacific Northwest regained its spot as the most competitive corn origin to north Asia as Chinese purchases of US soybeans fell short of market expectations, while at origin, European corn prices rose over currency and heat wave concerns, and the Latin American market focused on the ongoing harvest.

Asia

Asian corn prices edged up week over week, with the Platts CFR Northeast Asia price assessment up \$1.50/metric ton at \$260.50/mt June 26, amid a slight increase in Chicago Board of Trade futures and several deals for corn to South Korea.

A South Korean feed milling group purchased two cargoes of worldwide optionality corn through a tender June 26 at \$257.91/mt CFR Pyeongtaek for both Nov. 8 and Nov. 16 arrival cargoes, while a separate group passed on all offers at a tender the same day.

US Pacific Northwest corn prices rose at the start of the week amid a lack of available September and October shipments as suppliers held back elevation capacity in preparation for soybean exports to China in the fourth quarter, leading to Brazilian corn becoming the most competitive to Asian destinations for several days.

The competitive Brazil corn led to a deal to South Korea for about the price of \$260/mt CFR on June 24. However, US PNW returned to competitiveness at the end of the week as September offers were released once again, with China failing to purchase US soybeans in significant quantities.

In China, domestic old crop corn was said to be "mainly

driven by port inventories with minor fluctuations and no clear trend. The focus is now on the new crop's yield, which appears to be relatively stable for now," according to a China-based grains broker.

EMEA

The Black Sea corn market declined in the week to June 27 as Ukrainian exporters struggled to compete in key destination markets. Ongoing loadings of alternative crops at Ukrainian ports limited available loading berths for corn, restricting immediate spot trading activity. Ukrainian corn remained overpriced compared to South American origins. Egyptian buyers are well covered through August with Argentine cargoes and have shifted their focus to September shipments of Brazilian new-crop corn.

In Turkey, demand wound down ahead of the July 31 import quota deadline, with port storage constraints limiting new corn trades. Romanian sellers prioritized clearing remaining warehouse stocks to prepare storage facilities for the incoming winter barley and rapeseed harvests. Traders noted that while the regional corn market is illiquid, the barley market is active.

European corn prices are rising across Spain, Italy and the Netherlands, supported by the euro-dollar exchange rate and concerns that a heat wave was damaging crops. In Spain, offers have remained mostly steady at about Eur222/mt, while bids have increased, according to traders and brokers. Traders said the price strength is not limited to Spain. An Italian trader said corn prices are also rising as hot weather affects the new crop. In the Netherlands, both bids and offers are rising, while low water levels in France are pushing up freight costs, according to a Dutch broker. He added that Dutch buyers are not panic-buying; they have covered nearby needs and are waiting for clearer results from the wheat, barley and corn harvests before making further purchases.

Platts assessed Ukrainian corn FOB POC at \$224/mt, Romanian and Bulgarian corn FOB CVB was assessed at \$231/mt for July 23-Aug. 6, loading for Handysize and EXW Spain corn at Eur223/mt on June 26, for the loading period June 26 to July 26.

Latin America

Corn prices rose in Argentina for Up River FOB and were steady in Brazil for Santos FOB during the week to June 26.

The Buenos Aires Grain Exchange said June 25 that the 2025-26 corn harvest in Argentina reached 51.2% as of June 24, up 3.8% from the previous week but lower than the previous season at the same time.

Brazil's domestic corn prices dropped in the Sorriso and Rio Verde regions and increased in the Maringá region.

Platts assessed spot corn in Sorriso, Mato Grosso, at Real 39.90/60 kilogram on June 26, while prices in Rio Verde, Goiás, ended the week at Real 52/60 kg. Prices in Maringa, Parana, were at Real 61.10/60 kg.

According to a buyer, some buyers were out of the market on Paraná state, waiting for the advance of the winter corn harvest, and expecting a decrease in prices.

A buyer in the Rio Verde region said producers are limiting spot corn availability, expecting that reduced yields in Goiás may support prices as the harvest advances. Meanwhile, the source said buyers have sufficient inventory coverage and are not looking to increase bids.

North America

The US corn Platts outright prices increased during the week of June 22-26, tracking the Chicago Board of Trade, as participants await the next USDA stocks and acreage report, which will be released June 30.

"Weather and stocks and acres could provide a catalyst for a move higher, and trade is bracing," a broker source said.

S&P Global CERA analysts updated the US corn planted area forecast to 96.3 million acres for marketing year 2026-27 (September-August).

"Although it is still early in the growing season, the elevated price of fertilizers this marketing year has raised concern over application rates in the US," said CERA, and noted that weather in July and August remains the primary determinant of final yields.

For the MY 2025-26 carryout, CERA estimated 5.354 billion bushels due to lower feed and residual forecast.

Regarding silking, which will be updated June 28 in the Crop Progress report, CERA estimated it at about 8% following a normal pace.

Platts assessed June 25 the outright price for July shipments to New Orleans in the incoterm CIF at \$198.35/mt and for August shipments at \$203.05/mt. FOB Gulf for September was assessed at \$208.56/mt.

US DATA: Corn export inspections rise 21.7% on week to 1.79 mil mt

- Japan leads US corn destinations at 358,881 mt
- MY 2025-26 exports as of June 25 rise 25.3% on year

US corn export inspections rose 21.7% week over week to 1.79 million metric tons over June 19-25, data from the US Department of Agriculture showed June 29.

Japan was the top destination for US corn inspected for export, with 358,881 mt, followed by Mexico with 310,258 mt and Taiwan with 151,202 mt, the data showed.

Corn export inspections through June 25 in marketing year 2025-26 (September-August) rose 25.3% year over year to 68.88 million mt, according to the USDA.

The USDA forecast corn exports at 84.46 million mt in MY 2025-26, up 16.3% year over year, in its World Agricultural Supply and Demand Estimates report released June 11.

The US is expected to harvest 432.34 million mt of corn in MY 2025-26, up 14.3% year over year, the USDA said.

Platts, part of S&P Global Energy, last assessed US corn CIF New Orleans at \$198.35/mt on June 26, up 40 cents/mt day over day.

US corn export inspections

Commodity	Week ended	Week ended	Week ended	Current	Previous
(mt)	June 25, 2026	June 18, 2026	June 26, 2025	MY to date	MY to date

Source: US Department of Agriculture

UKRAINE DATA: Grain exports fall in MY 2025-26 as of June 26

- Corn exports down 5% YOY over July 1-June 26
- MY 2025-26 wheat export forecast at 13.8 mil mt
- MY 2025-26 corn exports seen at 22.2 mill mt

Ukraine’s wheat exports during the marketing year 2025-26 (July-June) totaled 13.88 million metric tons as of June 26, down 12% year over year, according to data from the Ministry of Agrarian and Food Policy.

Over June 1-26, the country exported 1.3 million mt of wheat, up from 826,000 mt shipped during the same period the previous year.

In MY 2024-25, Ukrainian wheat exports were at 15.7 million mt.

S&P Global Energy CERA forecast Ukraine’s wheat production for MY 2025-26 at 24.1 million mt. Wheat exports for the season are projected at 13.8 million mt.

Platts, part of S&P Global Energy, assessed Ukrainian 11.5% wheat FOB Black Sea at \$229/mt on June 26, unchanged day over day.

Corn exports decline

Ukrainian corn shipments stood at 20.9 million mt in MY 2025-26 as of June 26, down by 5% year over year, ministry data showed.

Over June 1-26, about 1.6 million mt of corn was exported, up from 1.38 million mt in the same period the previous year.

In MY 2024-25, Ukraine’s corn exports were at 21.2 million mt.

CERA’s Ukraine corn production forecast for the current season is at 30.9 million mt while exports are seen at 22.2 million mt.

Platts assessed Ukraine corn FOB Black Sea at \$224/mt on June 26, unchanged day over day.

Strong start for French wheat harvest as record high temperatures stoke prices

- French wheat harvest reaches 7% complete
- Record temperatures push prices to highs
- Crop conditions slip but remain favorable

France’s soft wheat harvest reached 7 percent complete as of June 22, moving well ahead of both last year and the recent average, France Agrimer/Cere Obs data showed June 26.

The pace was 6 percentage points higher than the 1% harvested at the same stage in 2025 and also 6 percentage points above the five-year average of 1% for the period, according to the data.

The data shows soft wheat crop conditions remained largely favorable, with 74% of the area rated Good or Very Good in the week ending June 22, data showed.

The rating was 2 percentage points lower than the previous week’s 76% but 6 percentage points above the 68% recorded at the same point in 2025, while durum wheat ratings slipped more sharply to 58%, from 64% a week earlier and down from 71% a year ago, according to the data.

A French broker said the accelerated harvest could bring exportable soft wheat to market earlier than usual. “The week-on-week downgrade in conditions, however, introduces uncertainty over final yields and quality,” he said.

The broker said a steeper deterioration in durum wheat conditions could tighten availability if trends persist, given its narrower production base and specialized end uses.

Last week, France set a new national temperature record, raising concerns about crop stress and potential yield losses, France Agrimer/Cere Obs data showed.

Platts, part of S&P Global Energy, assessed wheat 11% FOB and CPT Rouen prices at Eur211/metric ton and Eur209/mt, respectively, on June 25, the highest levels since March 16, as high temperatures provide support for prices.

Although some winter crops already harvested have some protection, late-season winter crops and all spring crops remain vulnerable. French wheat is once again drawing support from weather concerns, recovering part of the losses recorded during the sharp correction seen at the end of May, a European wheat trader said.

“Winter grain harvest has already begun, offering some buffer for wheat and barley, but spring barley and corn remain highly vulnerable,” the trader said. The trader said there are also concerns about a second heat wave in the EU in around 10 days.

Meanwhile, winter barley harvest progress was also well advanced, with 42% of the crop harvested by June 22, compared with 19% at the same point in 2025 and a five-year average of 14%. Winter barley crop ratings stood at 71% Good or Very Good, down from 73% the previous week but above the 64% recorded a year earlier, France Agrimer/Cere Obs data showed.

Assessment Rationale

Grains

Platts Ags EMEA Wheat Daily Rationale

Platts assessed the Milling Wheat Marker at \$229/metric ton June 29, down \$2.75/mt from the previous assessment. Russian 12.5% handysize wheat, assessed at \$229/mt, was the most competitive wheat out of the three components of the Milling Wheat Marker, which also includes Ukraine 11.5% at \$233.15/mt when adding May's quality normalization of \$6.15/mt, to account for its lower protein content, and CVB 12.5% wheat assessed at \$235/mt on the day. The structure between the second half of July and the first half of Aug was assessed flat. This reflects the Platts assessment window July 27-Aug. 10.

Platts assessed Black Sea wheat (Russian deepsea, 12.5% protein) down \$2.75/mt at \$229/mt on June 29, below an offer at \$230/mt and above a bid at \$225/mt. The structure between the second half of July and the first half of Aug was assessed flat. This reflects the Platts assessment window July 27-Aug. 10.

Platts assessed Black Sea wheat (Ukraine deepsea, 11.5% protein) down \$2/mt at \$227/mt on June 29, amid low demand,

market participants said, and below an offer at \$230/mt. The structure between the second half of July and the first half of Aug was assessed flat. This reflects the Platts assessment window July 27-Aug. 10.

Exclusions: No market data was excluded from the June 29 Black Sea wheat assessments.

Platts is part of S&P Global Energy.

Platts Asia Wheat Daily Assessment Rationale

Platts assessed Australian Premium White wheat unchanged at \$272/metric ton FOB Kwinana June 29 for cargoes loading between Aug. 28-Sept. 27, under normalized offers at \$278/mt, accounting for a \$20/mt freight cost between Western Australia and Vietnam, and with no disproving information.

Platts assessed Australian Standard White wheat with no protein guarantee down \$1/mt at \$266/mt for cargoes loading over the same period, tracking a lower indicative value at \$266/mt.

This widens the spread between Australian Premium White and Australian Standard White with no protein guarantee to \$6/mt.

Platts is part of S&P Global Energy.

Platts Canada Wheat Daily Rationale

Platts assessed Canada Western Red Spring Wheat 13.5% FOB Vancouver 30-45 days forward at \$280.91/metric tons on June 29, \$17.73/mt higher than June 26.

CWRS Wheat 13.5% FOB Vancouver basis 30-45 days forward, spanning July 29 – Aug. 13 was assessed 28 cents/bushel higher at MIAH Hard Red Spring Wheat December (Z) futures plus 139 cents/bushel based on an August/September spread heard at 20 cents/bu.

CWRS Wheat 13.5% FOB Vancouver basis 45-60 days forward, spanning Aug. 13 – Aug. 28 was assessed 8 cents/bu higher at Z plus 119 cents/bushel below last-half August/first-half September offers heard at Z plus 120 cents/bu.

CWRS Wheat 13.5% FOB Vancouver basis 60-75 days forward, spanning Aug. 28 – Sept. 12 was assessed 8 cents/bu higher at Z plus 119 cents/bushel below last-half August/first-half September offers heard at Z plus 120 cents/bu.

The contract month was rolled from September (U) to December (Z) based on market feedback.

Exclusions: No data was excluded in the assessments.

Platts Argentina Corn FOB Up River Daily Rationale

Platts assessed corn FOB Up River for loading in August at \$201.28/metric ton on June 29, \$2.56/mt lower than the previous assessment.

The assessment considered the FOB premium for Up River August-loading 5 cents/bushel higher at plus 101 cents/bu to Chicago Board of Trade September (U) corn futures, based on an indicative value heard at U plus low 100's cents/bu, lower bids heard at U plus low 90's cents/bu and no offers heard at the market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <ARGCA00> <ARGCB00>

Platts Brazil Corn Daily Rationale

Platts assessed the Brazilian corn FOB Santos price for August loading at \$209.93/metric ton on June 29, \$4.53/mt lower from the previous assessment.

The assessment considered the FOB Santos basis for August loading cargoes unchanged at plus 123 cents/bu to the Chicago Board of Trade September (U) contract, based on offers for August H2 loading at U plus 130 cents/bu and no bids heard at the market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <ABCSA00> <ABCSB00>

Platts US Corn Daily Assessment Rationale

Platts assessed the US Yellow Corn No. 2 CIF New Orleans barge basis for July shipment at 92 cents/bushel over the Chicago Board of Trade July (N) corn futures contract on June 29, up 1 cent from June 26. This was based on a bid heard at 91 cents/bu, and no offers were heard.

Platts assessed the US Yellow Corn No. 2 CIF New Orleans barge basis for August shipment at 94 cents/bu over the CBOT September (U) corn futures contract on June 29, unchanged from June 26. This was based on a bid heard at 93 cents/bu, and no offers were heard.

Platts assessed the US Yellow Corn No. 2 FOB Gulf basis for September shipments at 108 cents/bu over the CBOT September (U) corn futures contracts on June 29. This was based on competitive offers heard at 112 cents/bu for the first half of September, and 117 cents/bu for the second half of the month.

No information was excluded.

Platts Brazil Soybean Daily Assessment Rationale & Exclusions

Platts assessed the SOYBEX FOB Santos soybean contract for August loading at \$453.53/metric ton on June 29, down \$2.66/mt from the previous assessment.

The FOB Santos basis for August loading was assessed 10 cents/bu higher at plus 115 cents/bushel to the Chicago Board of Trade August (Q) contract, based on a spread to the Paranaguá paper market heard at parity. No bids or offers were heard for the full August loading of FOB Santos cargo on the day.

The FOB Paranaguá basis for August loading was assessed 10 cents/bu higher at plus 115 cents/bu to the CBOT (Q) contract, based on an indicative value heard at that level, steady bids at Q plus 100 cents/bu and no offers at market close.

Platts assessed the SOYBEX FOB Santos soybean contract for March loading at \$428.54/mt on June 29, down \$1.56/mt from the previous assessment.

The FOB Santos basis for March loading was assessed 11 cents/bu higher at plus 6 cents/bu to the CBOT March (H) contract, based on a spread to the Paranaguá paper market heard at plus 6 cents/bu. No bids or offers were heard for the full March loading of FOB Santos cargo on the day.

The new crop FOB Paranaguá basis for March loading was assessed 5 cents/bu higher at parity to the CBOT March (H) contract, based on an indicative value heard at that level, higher offers at H plus 5 cents/bu and lower bids at H minus 15 cents/bu at market close.

Exclusions: No data was excluded.

Platts US Soybeans Daily Rationale

Platts SOYBEX FOB New Orleans for August shipment was assessed at \$448.73/metric ton June 29, \$6.34 down from June 26. The FOB Gulf basis for the August shipment was assessed at 102 cents/bushel over the Chicago Board of Trade August (Q) soybeans contract on the day, unchanged from the previous business day, based on a value indication heard at 102 cents/bu for that shipment month.

The CIF New Orleans basis for July shipment was assessed at 90 cents/bu over the July (N) soybeans futures contract on the day. This was based on an indicative bid heard at 85 cents/bu, and an offer heard at 93 cents/bu.

No information was excluded.

Platts is part of S&P Global Energy.

This rationale applies to the symbols SYBBI00, SYBBL00, SYBBK00, and SYBBJ00.

Animal Feed and Protein

Platts Argentina Soybean Meal Daily Rationale

Platts assessed the Argentine soybean meal FOB Up River price for August loading on June 29 at \$332.67/metric ton, \$1.55/mt lower than the previous assessment.

The basis for August loading in the Up River cargo market was assessed \$1/short ton lower at minus \$2/st to the August (Q) futures at the Chicago Board of Trade. The assessment considered an indicative value heard at minus \$3/st earlier on the day, followed by bids at minus \$3/st and offers at minus \$1/st to the CBOT Q contract at market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYMAA00> <SYMAB00>

Platts Brazil Soybean Meal Daily Rationale

Platts assessed the Brazilian soybean meal FOB Paranaguá price for August loading on June 29 at \$338.19/metric ton, 44 cents/mt lower than the previous assessment.

The basis for August loading in the Paranaguá paper market was unchanged at plus \$3/st to the August (Q) futures at the Chicago Board of Trade. The assessment considered higher offers at plus \$5/st and lower bids at plus \$1/st to the CBOT Q contract at market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYMBA00> and <SYMBB00>.

Platts US Dried Distiller Grains DDGS Daily Assessment Rationale

Platts assessed CIF New Orleans dried distillers grains with solubles barges for the July shipment period at \$181/short ton June 29 amid no disproving information.

The Chicago DDGS truck market for the July delivery period

was assessed at \$162/st, unchanged from the previous session, based on an offer heard at \$165/st.

The South California rail market for the July delivery period was assessed at \$210/st, based on a trade heard at that value.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <ACDDG00> <AADDG00>.

Vegetable Oils.

Platts Asia Palm Oil Daily Rationale

Platts assessed CPO CFR WC India at \$1,230/metric ton June 29 for July loading, unchanged from June 26, below an offer and above a bid.

A CPO offer was heard at \$1,235/mt and a bid at \$1,225/mt on a CFR WC India basis, shipping in July.

An August shipment of CPO CFR WC India was at \$1,240/mt June 29, up \$2.50/mt from June 26, considering a \$10/mt carry between July and August.

Platts assessed CPO FOB Indonesia at \$1,191.25/mt June 29 for July loading, down \$3.75/mt from June 26, below an offer and above a bid.

A CPO offer was heard at \$1,197.50/mt and an indicative bid at \$1,185/mt on a FOB Dumai basis, shipping in July.

An August shipment of CPO FOB Dumai was at \$1,201.25/mt June 29, down \$1.25/mt from June 26, considering a \$10/mt carry between July and August.

Platts assessed RBDPS FOB Indonesia at \$1,061.25/mt June 29 for July loading, up \$1.25/mt from June 26, below an offer and above a bid.

An RBDPS offer was heard at \$1,087.50/mt and an indicative bid at \$1,045/mt on a FOB Dumai basis, shipping in July.

An August shipment of RBDPS FOB Dumai was at \$1,071.25/mt June 29, up \$3.75/mt from June 26, considering a \$10/mt carry between July and August.

Platts assessed PFAD FOB Indonesia at \$1000/mt June 29 for July loading, up \$2.50/mt from June 26, below an offer and above a bid.

A PFAD offer was heard at \$1,030/mt and an indicative bid at \$970/mt on a FOB Dumai basis, shipping in July.

An August shipment of PFAD FOB Dumai was at \$1,010/mt June 29, up \$5/mt from June 26, considering a \$10/mt carry between July and August.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <ACPOA00> <ACPOB00> <APFAD00> <ARBSA00>

Platts Argentina Soybean Oil Daily Rationale

Platts assessed the Argentine soybean oil FOB Up River price for August loading at \$1,152.14/metric ton June 29, down \$10.14 from June 26. The basis for August loading in the Up River paper market was assessed 50 points higher at minus 1,660 points to August (Q) futures at the Chicago Board of Trade. The assessment considered an indicative value last heard at that level, offers at minus 1,630 points, and bids at minus 1,800 points to the CBOT Q contract at the market close. No trades were confirmed before the market close for August loading in the FOB Up River paper market June 29.

Platts is part of S&P Global Energy.

This rationale applies to the symbols SYOAA00 and SYOAB00.

Platts Brazil Soybean Oil Daily Rationale

Platts assessed the Brazilian soybean oil FOB Paranaguá price for August loading at \$1,163.16/metric ton June 29, down \$10.14 from June 26. The basis for August loading in the Paranaguá paper market was assessed 50 points higher at minus 1,610 points to the August (Q) futures at the Chicago Board of Trade. The assessment considered an indicative value last heard at that level, offers at minus 1,600 points, and bids at minus 1,750 points to the CBOT Q contract at the market close. No trades were confirmed before the market close for August loading in the FOB Paranaguá paper market June 29.

Platts assessed the Brazilian soybean oil FOB Paranaguá price for September loading at \$1,153.90/mt June 29, down \$8.82 from June 26. The basis for September loading in the Paranaguá paper market was assessed 30 points lower at minus 1,570 points to the September (U) futures at the Chicago Board of Trade. The assessment considered an indicative value last heard at that level, offers at minus 1,550 points, and bids at minus 1,700 points to the CBOT U contract at the market close. No trades were confirmed before the market close for September loading in the FOB Paranaguá paper market June 29.

Platts is part of S&P Global Energy.

This rationale applies to the symbols SYOBB00 and SYOBA00.

Platts Europe Sunflower Oil Daily Rationale

Platts assessed sunflower oil FOB Black Sea Ukraine for August-loading unchanged at \$1,379/metric ton on June 29, below an offer heard at \$1,380/mt.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SFWBL00>
