Commentary and Analysis

Wheat

Platts European Wheat Daily Commentary

- Black Sea wheat bids fall to \$221-\$222/mt
- Ukrainian POC port activity remains subdued
- French wheat prices rise €2.75/mt Aug. 7

The Black Sea wheat market continued to decline on Aug. 7, with weaker FOB bids and high execution risk.

Some Russian FOB bids were at \$222/metric ton, compared with \$224/mt offers.

“For today, I see \$221-222 bids,” a Russia-based seller said, while most sellers reported limited bids. The export tax rose to 326.60 rubles/mt for Aug. 12-18 amid low export prices, up from zero rubles in the previous weeks.

Activations in the POC market remained subdued. “It is not working,” a seller of Ukrainian wheat said of the POC ports amid additional port attacks. The coasters market via the Danube was at \$261-\$262/mt for 11.5% protein. The CVB market fell slightly, with 11.5% offers flat to Matif Sept.

The French wheat market rose by €2.75/mt day over day, supported by ongoing disruption in the Black Sea. Meanwhile, French corn conditions worsened for an eighth straight week through early August, with the crop rated just 31% good-to-excellent at the start of the week, following a historically hot and dry summer, according to the country’s farm ministry.

Platts Asia Wheat Daily Commentary

- Australian wheat closes mixed
- High wheat prices drive South Korean feed buyers to corn

Australian Premium White eased \$1/metric ton day over day Aug. 7 to \$287/mt, while Australian Standard White with no protein guarantee rose \$2/mt to \$281/mt, tracking narrower quality spreads between the two grades.

Two North Asian traders said they observed inquiries for new-crop Australian wheat, and that Australian Premium White had traded at \$286/mt FOB Western Australia for December shipment this week.

“I think spot levels [for APW] might trade around \$286/mt but not hearing much activity at all,” said a Singapore-based grains trader.

A group of South Korean feed buyers were in the market late Aug. 6 seeking private offers of feed wheat, according to a Seoul-based trade source. The buyers did not close a deal and instead released a tender for corn over December arrivals, said the same source and another South Korean grains trader.

“Feed wheat is too expensive, about high \$290s/mt CFR now,” said the same trader.

Platts Canada Wheat Daily Commentary

- Sentiment weaker after MAFF tender
- Wheat market seeks direction

Platts assessed Canada Western Red Spring Wheat 13.5% FOB Vancouver 30-45 days forward at \$300.29/metric ton on Aug. 7, up \$2.94/mt from Aug. 6, with limited fresh price discovery as participants assessed the latest Japanese MAFF tender results and looked for clearer direction from futures.

The December Minneapolis Hard Red Spring wheat futures contract rose 8.00 cents/bushel to settle at 702.25 cents/bu, after the previous fall on Aug. 6.

One trader described activity as “pretty quiet other than seeing results of [the] MAFF tender,” adding that values for No. 1 CWRS 13.8% protein were surprisingly low. The trader reported seeing little additional activity in the physical market for August.

S&P Global Energy CERA principal crop analyst Greg Evans said futures had shown limited net movement over the week despite day-to-day volatility.

Market participants appeared to be searching for direction as opposing fundamental factors limited momentum. “Traders are probably looking for direction, but strength from the Black Sea is being offset by bearishness from weak US sales,” Evans said, adding that the latest futures move could partly reflect a reaction to the weakness seen in the previous session.

Platts is part of S&P Global Energy.

Corn

Platts Asia Corn Daily Commentary

- Asian corn prices hold steady at \$272/mt
- South Korea opens tenders for December delivery
- Hot weather may reduce livestock feed demand in South Korea for near term

Asian corn prices were unchanged in the morning session on Aug. 7 as market participants prepared for South Korean and Philippine tenders later in the day.

Platts assessed feed quality corn CFR Northeast Asia unchanged at \$272/mt for cargoes arriving over Nov. 5 to Dec. 5.

A South Korean feed milling group opened an import tender for two 55,000-70,000mt cargoes of corn for Dec. 10 and Dec. 20 arrival on Aug. 7 to be concluded in the same day.

Further buying interest was strong in South Korea, with a Japan-based trader noting that two other Korean feed milling groups were preparing to open import corn tenders the following week, ending Aug. 14, as they were “coming back from summer vacations,” according to a South Korean trade agent.

A separate South Korean trade agent noted that buyers' target prices for imported corn were below \$275/mt CFR.

US Pacific Northwest corn basis offer indications were unchanged for October shipment offers at 145 cents/bu over December (Z) CBOT.

In Vietnam, South American origin corn offers on Aug. 5 were reported unchanged at \$265/mt CFR Vietnam for September shipment partial cargos, and also unchanged day on day at \$268/mt CFR for Oct. shipments.

A Philippines feed miller group will conclude an import tender for South American corn tender on Aug. 7 for three cargoes of October, November, and December shipments on Aug. 7, although no buyer's target prices were reported.

Two traders noted that Chicago Board of Trade futures were lower due to improved weather across the US which would support higher corn production and lower prices.

Meanwhile, South Korea saw extremely high temperatures across the week of Aug. 7. “Livestock usually eat less during the summer because the heat reduces their appetite. Since it's been exceptionally hot this year, I think the impact could be a little greater than usual,” said a South Korean researcher.

However, the researcher also stated that “we'll need to see the actual feed production figures for July and August to know for sure, but I don't think the overall impact will be very significant [on prices and annual feed demand].”

Platts Latin America Corn Daily Commentary

- Latin American corn prices show mixed trends
- Argentina FOB Up River premiums drop to 86-93 cents
- Brazil cuts August corn export forecast 44% on year

Latin American FOB corn prices were mixed on Aug. 7, with FOB Santos prices in Brazil stable and FOB Up River prices in Argentina lower.

The FOB Up River premiums for September loading dropped, showing a bid-offer gap of plus 86-93 cents/bushel, relative to the CBOT September (U) contract.

The Brazilian FOB Santos premiums for September loading were unchanged amid a lack of buyer interest throughout the day.

The US dollar/Brazilian real exchange rate stood at 5.0980 reais/\$1 as of 5:30 pm Brasilia time, down 0.50% day over day.

In Brazil's domestic market, prices were steady in the Sorriso and Rio Verde regions, while they rose in the Maringá region due to higher bids.

According to a cooperative, corn ethanol companies were interested in negotiating in Goiás state for loading in October and November.

On the spot market, trades were reported in the Rio Verde and Montividiu regions in Goiás state.

The Brazilian Grain Exporters Association, Anec, estimated Brazil's August corn shipments at 4.08 million mt, down from 7.33 million mt a year earlier.

The association projected corn exports for January-August at 13.16 million mt, lower than 16.97 million mt in the same period of 2025.

Anec also expected 1.35 million mt of corn to be shipped from the ports of Santos, Paranaguá, Itacoatiara, Santarém, Barcarena, and Santana in the week ending Aug. 8.

Platts US Corn Daily Commentary

- US corn prices decrease on oversupply
- CBOT futures unchanged at \$4.39/bu Sep

US corn Platts outright prices decreased on Aug. 7, tracking a bearish sentiment in the basis of CIF New Orleans market.

During the day, sources reported a decrease in bid and offer values due to oversupply in the old-crop market.

"Despite the reduced hauling amounts, we still see most corn hedging is old crop rather than new crop," one trader said.

The Chicago Board of Trade September (U) future contracts closed at \$4.3900/bushel on Aug. 7, unchanged from the prior day, the same as December (Z), which closed at \$4.6200/bu.

For the export market, sources reported firm value basis for October shipments, due to higher elevation cost in the Gulf, amid more soybean exports.

Platts assessed the CIF New Orleans outright price for August shipments at \$212.60/metric ton Aug. 7, while September shipments were assessed at \$217.30/mt. The FOB US Gulf outright price for October shipment was assessed at \$228.35/mt.

Platts European Corn Daily Commentary

- Ukraine rail corn exports rise to 10%
- Romania projects 2M mt exportable surplus

The Black Sea corn market moved sideways Aug. 7 amid limited trading activity in Ukraine's FOB market. Meanwhile, new-crop offers declined amid weakening buying interest as logistical uncertainty continued. The new-crop offer fell from \$237/metric ton on Aug. 3 to around \$234/mt on Aug. 7.

In Ukraine, corn exports by rail increased to 10% of total exports in July, up from 7% in June, according to data from the Ukrainian Grain Association. The increase reflected logistical constraints amid the conflict.

Elsewhere, Tunisia issued a tender on Aug. 7 to import corn from origins including the Black Sea region. According to a source at Tunisia's ODC, the bids included Brazilian corn offered by Cargill at \$278.50/mt CIF, as well as offers from ADM, COFCO, VA Intertrade and Al Ghurair.

Meanwhile, September offers in the CVB market stood at a higher level because of the freight advantage from Constanta port. However, buying interest appeared limited. In Romania, the market showed an inverse relationship between old- and new-crop offers: old-crop offers were around €234/mt, compared with around €224/mt for new-crop offers.

A seller from Romania said, "Corn new crop exportable surplus from Romania will be a minimum of 2 million mt."

Further, according to the port-line up shared by a trader, around 87,200 mt of corn was under loading or sailed from the Constanta port during July, to destinations including Greece, Malta, UAE and Turkey.

Oilseeds

Platts Asia Soybean Daily Commentary

- China buys US and Brazil soybeans
- China's soybean meal supply ample

CFR China soybean month-one September shipment was up \$3.40/metric ton day over day at \$533.43/mt Aug. 7, while basis was unchanged at 268 cents/bu over Nov (X) Chicago Board of Trade (CBOT) futures.

Overnight, China continues to see some demand for US and Brazil soybeans for nearby shipments.

Approximately 3 cargoes of US soybeans were heard sold on a CFR China basis, split between US Gulf and US Pacific Northwest, according to multiple Chinese soybean traders, adding that the traded price was similar to previous levels traded during Aug. 6 US trading session.

October shipment of US Gulf was traded at a price of around 310 cents/bu over Nov (X) CBOT, while November shipment of US PNW was traded at around 303 cents/bu over Nov (X) CBOT, basis CFR China.

"I was previously concerned that China might scale back its purchases of US soybeans, but it seems like buying activity has remained relatively steady and demand appears to be holding up well," a Chinese soybean trader said.

Meanwhile, one cargo of Brazilian soybeans for September-October straddle shipment was heard traded at 273 cents/bu over Nov (X) CBOT, basis CFR China.

In China's downstream market, soybean meal supply remains ample amid slightly higher crushing rates this week, according to the same trader.

Platts is part of S&P Global Energy.

Platts Brazil Soybean Daily Commentary

- Thin trading activity in Paranaguá
- Weather-driven selling pressures soybean futures

Platts assessed the SOYBEX FOB Santos soybean contract for September loading at \$487.24/metric ton on Aug. 7, down 37 cents/mt from the previous assessment.

CBOT soybean futures were lower, pressured by favorable weather forecasts across the US Midwest that reinforced expectations for a large crop.

Market analysts were closely watching yield prospects ahead of next week's US Department of Agriculture's World Agricultural Supply and Demand Estimates report.

While export demand and recent Chinese purchases of US soybeans provided some underlying support, the market remained focused on improving yield prospects ahead of next week's USDA WASDE report.

Brazil is expected to export a record 9.74 million mt of soybeans in August, 20.1% higher than the 8.11 million mt in the year-ago month, according to the latest data from Anec, the Brazilian Grain Exporters Association.

July soybean exports also hit a record high of 12.18 million mt, 2% above July 2025 levels, according to the data published Aug. 6.

Brazil's soybean exports through the first eight months of 2026 are projected at 94.51 million mt, up 7.3% over the same period in 2026, according to Anec.

Trading activity remained slow in the FOB Paranaguá premiums market, with no trades heard on the day.

Market sources reported only a few Brazilian old crop cargoes sold to China during the week, with a greater share of business shifting to US-origin supplies.

The US dollar versus the Brazilian real settled at 5.0844 reais/dollar at 4:30 pm Brasilia time. Domestic soybean prices were mixed in the main producing regions.

Platts is part of S&P Global Energy.

Platts US Soybeans Daily Commentary

- FOB Gulf basis falls ahead of weekend
- Outright export price decreases on day

The US soybeans market saw a relatively steady CIF New Orleans outright price and a falling FOB Gulf one on Aug. 7, despite some export sales to China confirmed by the US Department of Agriculture in the morning.

Platts, part of S&P Global Energy, assessed SOYBEX FOB New Orleans for September shipment at \$1.65/metric ton, down from \$477.03/mt on Aug. 6. Platts assessed the basis for FOB Gulf for September shipment down 3 cents day over day to 122 cents/bushel over the November (X) soybeans futures contract.

Platts assessed the outright price for CIF NOLA for August shipment down 55 cents from the previous business day to \$471.15/mt. Platts assessed the basis for CIF NOLA for August shipment remained unchanged day over day at 106 cents/bu over the November (X) soybeans futures contract.

Market sources in the export market noted that the drop in the FOB Gulf basis was unrelated to China's purchases of US soybeans.

"Just Friday movement for no reason," a trader in the FOB Gulf market said.

The USDA reported the sale of 238,000 mt of soybeans for delivery to China during the marketing year 2026-27 on Aug. 7. According to S&P Global Energy CERA, the US Department of Agriculture has confirmed that 4.091 million mt of soybeans have been sold to China this year.

"I don't really see a reason for a [purchase] slowdown," Aaron Gerdst, principal crop analyst at S&P Global Energy CERA, said. "The only thing I can think of in the near term is if the September meeting between [Donald] Trump and Xi [Jinping] goes poorly. I believe it's scheduled for Sep. 24."

"I would say it has less than 5% of chance of going badly though," Gerst said. "Seems US-China relations remain good or at least status quo since the May meeting."

The Chicago Board of Trade November (X) soybeans futures contract fell slightly day over day to 1,176.25 cents/bu, about 1.50 cent lower than its previous level.

Animal Feed

Platts Latin America Soybean Meal Daily Commentary

- FOB prices decline amid lower CBOT futures
- Brazil's Aug meal exports to rise 22.5% on year

South American soybean meal FOB prices fell on Aug. 7, tracking lower Chicago Board of Trade futures amid subdued market activity.

In Argentina, premium discussions for FOB Up River September-loading cargoes narrowed to \$9-\$11/short ton over the CBOT benchmarks. Despite this, no trades were heard.

The Brazilian FOB Paranaguá paper market was also quieter than in previous sessions, with no deals confirmed. Sources indicated that near-term pricing was under pressure, citing profit-taking after port differentials hit their highest spot level since October 2024 earlier in the week.

In the meantime, the Brazilian grain exporters association, known as Anec, projected soybean meal shipments of 2.48 million mt in August, up 22.5% year over year. The volume, if realized, would bring the January-August total to 17.74 million mt, an increase of 14.9% from the same period in 2025.

The CBOT September (U) contract settled at \$308.90/st, down \$2.70/st on the day.

Platts European Animal Feed Daily Commentary

- Dutch soybean meal holds at €356/mt
- Spanish feed prices stay flat amid demand drop
- Summer heat and disease curb livestock buying

Northern Europe

The Dutch soybean meal market saw a quiet end to the week on Aug. 7, with spot prices unchanged at €356/metric ton.

Trading activity was notably subdued as participants wound down for the weekend without pushing for new positions. Market sentiment was largely unchanged from earlier in the week; the peak summer holiday period continued to keep consumer buying appetite to a bare minimum.

While players remained cautious about inland logistical risks on the waterways, the lack of immediate demand offset any potential supply-side premium. With nearby requirements comfortably covered, the forward structure stayed flat.

Southern Europe

In Spain, animal feed prices were unchanged on Aug. 7, as a quiet Friday market reflected the bearish sentiment that had dominated the week.

Corn EXW Spain was assessed steady at €230/mt, while Spanish soybean meal was assessed unchanged at €363/mt. Market participants agreed that the overarching narrative remained intact: extreme summer heat and ongoing livestock

health issues, notably African swine fever and Newcastle disease, continued to severely suppress domestic feed consumption.

With buyers already well covered for their immediate needs and feed demand structurally lower, sellers lacked leverage to move the market. Consequently, trading activity was minimal ahead of the weekend, leaving the forward structure flat for both commodities.

Platts US Distiller Grains DDGS Daily Commentary

- High freight limits competitiveness
- Buyers await lower values

The US dried distillers grains with solubles market remained subdued Aug. 7, with participants reporting little movement as DDGS values remained elevated despite the recent retreat in corn prices.

Platts assessed CIF New Orleans dried distillers grains with solubles barges for the August shipment period at \$204/short ton on Aug. 7, the Chicago DDGS truck market for the August delivery period was assessed at \$183/st, and the South California rail market for the August delivery period was assessed at \$227/st.

One buyer said DDGS values had followed corn higher during the previous rally but had yet to respond similarly as corn moved lower. “DDGS ran up as corn ran up, but now that it has come off,

[we have] yet to see DDGS come off," the buyer said.

Elevated transportation costs were also limiting DDGS competitiveness. The buyer pointed to high gasoline and diesel prices, which have kept freight costs elevated and encouraged customers to seek nearby alternatives to reduce delivered feed costs.

A trader in Mexico described another slow session. "It has been a very slow week. Nothing has moved," the trader said. The trader added that participants were waiting for activity to improve and for the DDGS market to provide clearer direction.

Platts is part of S&P Global Energy.

Vegetable Oils

Platts Asia Palm Oil Daily Commentary

- Asian palm oil prices decline
- India buys 80% of Aug palm oil demand
- Malaysia output rise weighs on sentiment

The Asian palm oil market dipped on Aug. 7, with palm oil futures on Bursa Malaysia closing higher week over week despite weakening during the session, as rising palm oil production and expectations of higher inventory in Malaysia in July weighed on sentiment. The market remains cautious and is waiting for clarity from the MPOB report due next week.

The benchmark palm oil contract for October delivery on the Bursa Malaysia commodity exchange declined 8 ringgit/metric ton to 4,678 ringgit/mt on Aug. 7.

The benchmark RBD Palm Olein for September delivery on the Dalian Commodity Exchange fell 28 yuan/mt to 9,356 yuan/mt on Aug. 7.

The benchmark Soybean Oil for September delivery on the Dalian Commodity Exchange climbed 18 yuan/mt to 8,429 yuan/mt on Aug. 7.

The Indian market remained active, with almost daily trades since last week. India has purchased about 80% of its August demand so far, an India-based trader said.

A trade was heard at \$1,232.50/mt in West Coast India for August shipments with about 7,000-8,000mt.

Soybean oil offers were heard at \$1,290-\$1,293/mt on a CFR West Coast India basis for September to December shipment.

The spread was around \$40-50/mt between palm oil and soybean oil. India buying preference remained on palm oil compared to soybean oil.

Platts assessed CPO CFR WC India at \$1,232.50/mt Aug. 7 for August loading, down \$2.50/mt from Aug. 6, while September shipment was \$7.50/mt higher than August.

Platts assessed CPO FOB Indonesia at \$1,195/mt Aug. 7 for August loading, down \$5/mt from Aug. 6, while September shipment was \$10/mt higher than August.

Platts assessed RBDPS FOB Indonesia at \$1,067.50/mt Aug. 7 for July loading, down \$7.50/mt from Aug. 6, while September shipment was \$12.50/mt higher than August.

Platts Latin America Soybean Oil Daily Commentary

- South American soy oil firm amid CBOT swings
- Argentine pilotage dispute disrupts trade briefly
- Brazil's September premium rises over October loads

South American soybean oil FOB markets remained comparatively firm during the week ended Aug. 7 despite continued volatility in Chicago Board of Trade soybean oil futures. CBOT September soybean oil settled at 68.24 cents/lb Aug. 7, up 0.98 cent/lb, or about 1.46%, from 67.26 cents/lb July 31. Futures initially rebounded Aug. 3 on bargain buying and short covering, then softened again as favorable US crop conditions and expectations for ample new-crop supplies continued to cap upside. Against that backdrop, physical markets in Brazil and Argentina were driven increasingly by regional basis adjustments rather than changes in the underlying futures contract.

Platts, part of S&P Global Energy, assessed Argentine soybean oil FOB Up River for September loading at \$1,193.58/mt Aug. 7, up

\$14.99/mt from July 31. The comparable Brazilian FOB Paranaguá assessment rose \$14.99/mt over the same period to \$1,197.99/mt. Brazil, therefore, maintained a \$4.41/mt premium to Argentina at the end of the week. The September basis also remained slightly firmer in Brazil at minus 1,390 points to CBOT September futures, compared with minus 1,410 points in Argentina.

Pilotage dispute temporarily restricts liquidity

Regional trading conditions were disrupted early in the week after Argentine maritime pilots stopped accepting new assignments in protest against Decree 690/2026. The action restricted vessel movements along the Paraná River and Rosario Up River corridor, reducing commercial activity and limiting price discovery in both the Argentine and Brazilian soybean oil markets.

The effect was most visible Aug. 4, when traders reported that the Argentine FOB market was close to a standstill and Brazilian activity also slowed as participants waited for clearer regional price signals. Despite the lack of liquidity, basis values strengthened in both origins, reflecting reduced selling interest rather than a surge in transaction activity.

The dispute was resolved during the week after the government suspended the regulatory measure and navigation services resumed. Market participants said the brief interruption complicated vessel scheduling and regional price discovery but ended before materially affecting soybean crushing or export availability.

Once navigation restarted, attention shifted quickly back

toward export demand, replacement costs and relative value between nearby and deferred loading periods. Argentina's September Up River basis strengthened from minus 1,380 points July 31 to minus 1,360 points Aug. 5 before easing to minus 1,410 points by Aug. 7.

Brazil showed a similar pattern. The September Paranaguá basis moved from minus 1,360 points July 31 to minus 1,330 points Aug. 5, before weakening to minus 1,390 points at the end of the week. The midweek firming helped cushion outright FOB values while CBOT futures remained under pressure.

Nearby Brazilian values outperform deferred market

Brazil's October market also strengthened early in the period but softened more noticeably toward the end of the week. Platts assessed October FOB Paranaguá at \$1,184.77/mt July 31, rising to \$1,199.76/mt Aug. 5 before declining to \$1,189.39/mt Aug. 7.

By the end of the week, September-loading Brazilian soybean oil stood \$8.60/mt above October, compared with October holding a modest premium to September on July 31. The reversal pointed to comparatively stronger nearby demand and softer deferred positioning after several sessions of basis appreciation.

Market participants said physical sellers became more willing to adjust differentials once logistical uncertainty surrounding Argentina faded. Even so, outright South American soybean oil values remained within a relatively narrow range despite swings in CBOT futures.

ENERGY
IS EVERYTHING

The week's price action reinforced the divergence that has characterized the market in recent months. Futures continued to respond primarily to US crop prospects, speculative positioning and broader macroeconomic factors, while South American FOB markets remained anchored by commercial demand, replacement economics and regional logistics.

By Aug. 7, Argentina's pilotage disruption had largely faded as a market driver, leaving traders focused again on export demand and the relative competitiveness of Brazil and Argentina. Brazil's persistent premium over Argentina and the stronger September structure suggested nearby physical demand remained supportive, even as deferred Brazilian values weakened and regional basis levels eased from their midweek highs.

Platts Europe Vegetable Oil Daily Commentary

- Rapeseed oil extends recovery across forward curve
- Black Sea sunflower oil remains unchanged
- Ukraine support could reduce farmer selling pressure

European vegetable oil markets strengthened on Aug. 7, with rapeseed oil extending its recovery across the forward curve while Black Sea sunflower oil remained unchanged. RSO FOB Dutch Mills front-month rose €15/mt to €1,175/mt, while the second and third positions each gained €8/mt to €1,149/mt and €1,143/mt respectively. The fourth position increased €7/mt to €1,093/mt. FOB Black Sea sunflower oil remained assessed at \$1,379/mt.

The continued recovery in rapeseed oil follows the sharp correction seen earlier in the week, with nearby values rebounding more strongly than deferred positions. Despite expectations for improved new-crop oilseed availability, the recovery suggests some stabilization following the rapid removal of supply risk premium from the market. The front of the curve remains particularly firm relative to later positions, indicating that nearby availability continues to command a premium.

Black Sea sunflower oil remained unchanged amid exceptionally limited physical market activity and persistent uncertainty surrounding Ukrainian export logistics. A Ukraine-based source said the Ukrainian government had approved changes to its Affordable Loans 5-7-9% program as part of an emergency support package for farmers affected by disruption to Black Sea export routes following Russian attacks.

The measures are intended to provide liquidity for harvesting, autumn planting and other working capital requirements, while allowing producers to avoid selling agricultural commodities at distressed prices.

The additional financial support could reduce immediate selling pressure from Ukrainian farmers, potentially providing some underlying support to domestic oilseed values. At the same time, the market remains caught between expectations for improved new-crop availability and significant logistical constraints.

Damage to export infrastructure and continued disruption

to Black Sea routes could limit the speed at which additional new-crop supplies reach international markets, helping explain the continued resilience of sunflower oil despite broader volatility across the vegetable oil complex.

Platts is part of S&P Global Energy.

CHINA DATA: July soybean imports drop 15% MOM to 11.48 mil mt

- China July soybean imports down 1.6% YOY
- Jan-July soybean imports up 0.7% on year
- July vegetable oil imports rise 17% MOM

China imported 11.48 million mt of soybeans in July, down 15.3% from a record June total of 13.55 million mt and 1.6% lower year over year, according to preliminary data released by the General Administration of Customs Aug. 7.

China's cumulative soybean imports over January-July totaled 61.51 million mt, up 0.7% from 61.05 million mt a year earlier, the customs data showed.

The decline from June reflected a slowdown in Brazilian soybean arrivals after a surge in shipments earlier in the quarter, China-based trade sources said.

Brazil exported 9.42 million mt of soybeans to China in July, accounting for 70.3% of its total soybean exports during the month, according to data released by the Secretariat of Foreign Trade Aug. 6.

"Price remains the key driver of China's soybean purchases," a China-based trade source said, adding that Brazil remains the preferred origin for most buyers.

US soybeans remain less competitive than Brazilian supplies for Chinese private crushers, while an additional 10% tariff further widens the cost gap, CERA said in a July 31 report.

About 18.8 million mt of soybeans were en route to China as of Aug. 7, including 16.9 million mt from Brazil, 897,828 mt from Argentina, and 642,011 mt from the US, according to data from S&P Global Commodities at Sea.

As of July 24, China's soybean port stock fell to 6.64 million mt, down 1% month over month, according to trader estimates.

China is the world's largest soybean importer and accounts for about 60% of global soybean imports, according to data from the US Department of Agriculture.

China's soybean imports are expected to increase 0.5% year over year to 108.5 million mt in the marketing year 2025-26 (October-September), according to S&P Global Energy CERA estimates.

Platts, part of S&P Global Energy, assessed the CFR China first-month soybeans at \$533.43/mt Aug. 7, up \$3.4/mt day over day.

Vegetable oil imports

China's imports of edible vegetable oils in July were recorded at 589,000 mt, up 17.1% from 503,000 mt in June, customs data showed.

Total vegetable oil imports by the world's second-largest importer over January-July stood at 4.02 million mt, compared with 3.72 million mt a year earlier, according to Chinese customs data.

Combined Chinese stocks of palm oil, soybean oil, and rapeseed oil at ports were recorded at 2.36 million mt as of July 24, up 3.7% from 2.16 million mt on July 17, data from traders showed.

BRAZIL DATA: July corn exports more than quadruple to 1.94 mil mt

- July corn exports down 20.2% on year
- Egypt, Israel, Spain lead July purchases
- Brazil's Jan-July corn exports up 10.6% YOY

Brazil's corn exports more than quadrupled to 1.94 million metric tons in July, from 435,498 mt in June, but were still 20.2% lower year over year, according to data from the Secretariat of Foreign Trade released on Aug. 6.

Egypt was Brazil's top corn buyer in July, at 600,446 mt, followed by Israel at 214,669 mt and Spain at 130,050 mt, according to the data.

Brazilian corn exports typically accelerate from July with the safrinha harvest and higher exportable supplies, said Geraldo Isoldi, agricultural markets analyst at Terra Investimentos.

Harvest progress has put downward pressure on corn prices in Brazil, increasing competitiveness in the export market, S&P Global Energy CERA said in a July 31 report.

Sales are expected to pick up in the coming weeks as harvest supplies continue to flow into the market, following the typical seasonal pattern, the report said.

Brazil's corn exports totaled 9.85 million mt in the January-July period, up 10.6% year over year, according to the data.

Egypt remained the leading destination during the first seven months of the year, importing 2.61 million mt of Brazilian corn, followed by Vietnam at 1.62 million mt and Iran at 1.54 million mt.

Brazil is expected to produce 140 million mt of corn in the marketing year 2025-26 (March-February), down 0.7% year over year. Exports are forecast at 39 million mt, down 7.4% from the previous year, according to CERA estimates.

Platts, part of S&P Global Energy, assessed Brazilian corn FOB Santos at \$221.64/mt on Aug. 6, up 89 cents day over day.

China's Sinograin to auction 516,000 mt of imported soybeans Aug. 12

- Fourth major reserve soybean sale in 2026
- Offers soybeans produced between 2022 and 2025
- Previous auction clears 66.6% of offered volume

China's state-owned Sinograin will auction 516,000 metric tons of imported soybeans from state reserves Aug. 12, according to a notice published by the National Grain Trade Center Aug. 7.

The auction, scheduled for 1:30 pm Beijing time, will offer soybeans harvested between 2022 and 2025, according to the notice.

The soybeans offered in the auction are distributed across Tianjin, Shandong, Henan, Zhejiang, Chongqing, Sichuan, Hunan and Guangxi, according to the notice.

The previous auction held Aug. 5 cleared 66.6% of the 501,158 mt offered, according to China-based grain traders.

US-based traders said the auction could help free storage space for additional US soybean purchases. Following the purchase of 14-16 US soybean cargoes Aug. 5, China-based soybean traders said three additional cargoes were traded from the Pacific Northwest and Gulf Coast Aug. 6 at similar values.

Chinese state traders COFCO and Sinograin have been purchasing US soybeans to meet policy commitments following the Beijing summit in May.

Under the Busan trade agreement reached in October 2025, China committed to purchase at least 25 million mt of US soybeans annually from 2026 to 2028, according to a White House fact sheet issued Nov. 1, 2025.

As of Aug. 6, China's known US soybean commitments for marketing year 2026-27 (September-August) totaled 3.853 million mt, according to US Department of Agriculture data.

Platts, part of S&P Global Energy, assessed SOYBEX CFR China first month at \$533.43/mt on Aug. 7, up \$3.40/mt day over day.

Record soybean line-up expected for August: Anec

- Brazil July soybean exports hit record 12.18 mil mt
- August meal exports to increase 22.5% on year
- Corn exports expected to be 4.08 mil mt in August

Brazil is expected to export a record 9.74 million metric tons of soybeans in August, 20.1% higher than the 8.11 million mt in the year-ago month, according to the latest data from Anec, the Brazilian Grain Exporters Association.

July soybean exports also hit a record high of 12.18 million mt, 2% above July 2025 levels, according to the data published Aug. 6.

Brazil's soybean exports through the first eight months of 2026 are projected at 94.51 million mt, up 7.3% over the same period in 2026, according to Anec.

Brazil's price advantage over US soybeans has fallen considerably in the CFR China market, reducing the competitiveness of Brazilian export offers for November shipments.

According to market analysts, the shift has encouraged Chinese buyers to favor US-origin cargoes, while elevated replacement costs in Brazil relative to CFR values have curbed demand for Brazilian soybeans.

Platts, part of S&P Global Energy, assessed the SOYBEX FOB Santos soybean contract for September loading at \$487.61/mt on Aug. 6, up \$2.39/mt from the previous assessment.

Soybean meal

Regarding soybean meal, Anec projected shipments of 2.48 million mt in August, up 22.5% year over year.

The volume, if realized, would bring the January-August total to 17.74 million mt, an increase of 14.9% from the same period in 2025.

The local market remains attentive to compressed crush margins, which have raised concerns about processing activity for the upcoming months. Apart from that, a maritime pilot's strike in the competing origin Argentina earlier in the week contributed to moving some spot demand toward Brazil, according to sources.

Platts assessed the FOB Paranaguá price for September dates at \$360.01/mt on Aug. 6, down 66 cents/mt from the day before.

Corn

Anec estimated Brazil's August corn shipments at 4.08 million mt, lower than 7.33 million mt a year earlier.

The association projects corn exports for January-August at 13.16 million mt, lower than 16.97 million mt in the same period of 2025.

Anec also expects 1.35 million mt of corn to be shipped from the port of Santos, Paranaguá, Itacoatiara, Santarém, Barcarena and Santana in the week ending Aug. 8.

Corn exports have increased since the start of the winter corn harvest, but the current volume is still below that of the previous year. It is expected that this volume will continue to rise over the coming months.

Platts assessed FOB Santos corn for September shipment at \$221.64/mt Aug. 6, up 89 cents/mt day over day.

Anec said August projections remain subject to revision as the shipping schedule evolves.

Brazil rice exports fall sharply while corn shipments trail last year's pace: Secex

- Brazil rice exports drop 45% in July
- Rice imports surge 96% amid tight supply
- Brazil corn exports reach 1.94 mil mt in July

Brazil's foreign trade agency, Secex, released July grain trade data on Aug. 6.

Rice

Secex showed a sharp contraction in rice exports, while imports continued to rise as domestic availability tightened, increasing the country's reliance on foreign supplies.

Market participants said limited selling interest has reduced liquidity in the domestic market, with producers and exporters holding back inventories in anticipation of higher prices.

"There is an expectation that prices will move higher and as a result, both producers and exporters are limiting sales," a Brazil-based exporter said.

According to Secex data, Brazil exported 36,438 metric tons of milled rice in July, down 45% year over year. Paddy rice exports totaled 79,092 mt, a decrease of 7% from July 2025.

Export revenue declined even more sharply, reflecting weaker international prices and reduced competitiveness. Revenue from milled rice exports fell 50% year over year, while the average export value dropped to \$365.50/mt from \$397.90/mt in the corresponding month of 2025.

On the import side, Brazil purchased 119,710 mt of milled rice during July, up 11.6% from a year earlier. Paddy rice imports surged 96% year over year to 6,827 mt, highlighting growing demand for foreign-origin supplies amid tightening domestic availability.

The widening gap between imports and exports underscores changing market dynamics in Brazil, where expectations of further price gains have curtailed spot market activity and increased dependence on imported rice to meet domestic demand.

Platts, part of S&P Global Energy, assessed Brazilian long-grain white rice, 5% broken, FOB Rio Grande, at \$550/mt, unchanged on day.

Corn

Brazil exported 1.94 million mt of corn in the five weeks of July, equivalent to 84,488 mt/day, lower than the 105,824 mt/day recorded in July 2025, according to Brazilian Foreign Trade Secretariat data released on Aug. 6.

The winter corn harvest began in June, and export volumes have increased; however, they remain below the level recorded in the same period last year. Expectations are that they will rise further over the coming months.

Platts assessed the corn FOB Santos price for September shipment at \$221.64/mt Aug. 6, up 89 cents/mt day over day.

China secures 238,000 mt of US soybeans for MY 2026-27: USDA

- New crop US soybean sales to China continue
- China books 4.09 mil mt of US soybeans for MY 2026-27
- Tariffs weigh on US soybean competitiveness in China

US private exporters reported sales of 238,000 metric tons of soybeans to China for delivery in marketing year 2026-27 (September-August), the US Department of Agriculture's Foreign Agricultural Service said Aug. 7.

The latest purchase brings total known Chinese commitments of US soybeans for MY 2026-27 to 4.09 million mt, according to calculations by Platts, part of S&P Global Energy, based on USDA data.

Outstanding sales of US soybeans to China for MY 2026-27 stood at 3.11 million mt as of July 30, USDA data released Aug. 6 showed. Additional flash sales to China reported by the USDA after July 30 totaled 980,000 mt.

Following the purchase of 14-16 US soybean cargoes on Aug. 5, China-based soybean traders said three additional cargoes were traded from the Pacific Northwest and Gulf Coast on Aug. 6 at similar values.

The purchases come amid improving US-China trade ties following the Beijing summit in May.

Under the Busan agreement reached in October 2025, China committed to purchase at least 25 million mt of US soybeans annually from 2026 to 2028.

S&P Global Energy CERA expects US soybean exports to China to reach 25 million mt in MY 2026-27.

USDA forecasts total US soybean exports at 1.66 billion bushels for MY 2026-27, up 9.2% year over year. CERA projects exports slightly higher at 1.7 billion bushels, up 11.5% year over year.

"Price matters when it comes to China's purchases of US soybeans," a China-based trade source said, adding that Brazil remains the preferred origin for most buyers.

US soybeans remain less competitive than Brazilian supplies for Chinese private crushers and an additional 10% tariff further increases their cost disadvantage, CERA said in a July 31 report.

Platts assessed SOYBEX CFR China first month at \$533.43/mt Aug. 7, up \$3.40/mt day over day.

Platts assessed SOYBEX FOB New Orleans at \$478.68/mt on Aug. 6, up \$1.10/mt day over day.

GLOBAL SOYBEAN WEEKLY: Chinese demand for US soybeans increases

- Rain forecast for US corn belt
- Sinograin sells 333,711 mt of imported soybeans
- China turns to US cargoes as Brazil loses pricing edge

The US soybean market strengthened in the week ended Aug. 7 following fresh purchases from China, while demand for Brazilian product declined amid negative crush margins.

US market bullish on Chinese purchases

Outright export prices in the US soybeans market declined at the close of the week, in contrast with the bullish sentiment seen during the rest of the week, as purchases from China supported FOB Gulf basis prices.

The US Department of Agriculture confirmed private exporters' sales of 238,000 metric tons of soybeans for delivery to China during the marketing year 2026-2027 on Aug. 7, while 122,000 mt were confirmed a day prior. More private export sales were confirmed on Aug. 3 for 488,000 mt and on Aug. 4 for 132,000 mt.

"I don't really see a reason for a [purchase] slowdown," Aaron Gerdst, principal crop analyst at S&P Global Energy CERA, said. "The only thing I can think of in the near term is if the September meeting between [Donald] Trump and Xi [Jinping] goes poorly."

The USDA has confirmed China has purchased 4.091 million mt of US soybeans so far in 2026, according to CERA data.

Meanwhile, US net sales of soybeans reached 32,200 mt for MY 2025-26 in the week ended July 30, down 89% on the week and 79% lower than the four-week average, according to the USDA.

The National Oceanic and Atmospheric Administration forecast rain across the Corn Belt in the week ended Aug. 7, which would help alleviate dry weather in the weeks prior.

Sources in the CIF market said that the CIF New Orleans market has also been facing firm basis, due to higher barge freight costs.

Platts, part of S&P Global Energy, assessed SOYBEX FOB New Orleans for September shipment at \$477.03/mt on Aug. 7, while the outright price for CIF NOLA for August shipment was assessed at \$471.15/mt.

Platts Soybean Prices

Source: S&P Global Energy

Brazilian trade liquidity for CFR China limited

Demand for Brazilian soybeans remained moderate in the CFR China soybean market during the week, China-based traders said.

At least 30 cargoes were heard sold to China during the period, with the majority of demand concentrated on US-origin cargoes. About 17 were sold on a CFR China basis, of which eight came from the US Gulf Coast and nine came from the Pacific Northwest for October and November shipments, respectively.

"I was previously concerned that China might scale back its purchases of US soybeans, but it seems like buying activity has remained relatively steady and demand appears to be holding up well," a China-based soybean trader said.

Meanwhile, China's Sinograin sold 333,711 mt of imported soybeans on Aug. 5, with 66.6% of the 501,158 mt offered finding buyers, according to four China-based traders.

The soybeans, harvested between 2022 and 2025, fetched an average price of 4,013.5 yuan/mt (\$602.03/mt).

A sixth China-based soybean trader said that 92% all of the total open demand — 7.5 million mt of the September shipment — had been covered as of Aug. 4.

Meanwhile, 68% of the total open demand for October shipment — 9.5 million mt — had been covered. For the November shipment, open demand decreased to approximately 7.1 million mt.

Platts assessed the soybean CFR China M1 basis at 268 cents/bushel over the Chicago Board of Trade November (X) contract on Aug. 7. The soybean CFR China M1 flat price was assessed at \$533.43/mt on Aug. 7, up \$2.12/mt week on week.

Brazil market subdued on limited Chinese buying

Trading activity in the Brazilian FOB soybean premiums market remained subdued during the week, although some trades were heard for both old- and new-crop parcels in Paranaguá.

Chinese buying interest was limited for much of the week, as negative crush margins and elevated replacement costs reduced demand for Brazilian soybeans.

Market players said CFR China indications for November shipment showed Brazil's price advantage over US soybeans had narrowed significantly in recent weeks, reducing the competitiveness of Brazilian export offers. This shift has encouraged China-based buyers to favor US-origin cargoes.

Brazil is expected to export 9.74 million mt of soybeans in August, 20.1% higher than the 8.11 million mt in August 2025, according to the latest data from Brazilian Grain Exporters Association Anec.

July soybean exports hit a record high of 12.18 million mt, 2% above July 2025 levels, according to the data published Aug. 6.

Brazil's soybean exports through the first eight months of 2026 are projected at 94.51 million mt, up 7.3% over the same period in 2026.

Platts assessed the SOYBEX FOB Santos price for September delivery at \$487.24/mt on Aug. 7, up 0.5% week over week.

GLOBAL ANIMAL FEED WEEKLY: South American meal drops as Argentine strike disrupts flows

- Brazil August exports projected 22.5% higher on year
- European meal softens on quiet demand, livestock disease
- US DDGS market subdued, export bids increase

Soybean meal prices in South America and Europe softened in the week ended Aug. 7, while the US dried distillers grains with solubles remained mostly stable on thin trading.

South American soybean meal slides

South American soybean meal FOB prices fell during the week amid volatile trading conditions, as a maritime pilots' strike in Argentina that halted exports earlier in the week.

Argentine FOB Up River soybean meal for September loading fell 0.9% between July 31-Aug. 7 to \$351.52/metric ton, according to Platts assessments from S&P Global Energy. Meanwhile, Brazilian FOB Paranaguá for the same delivery window fell 2.4% to \$353.73/mt.

Argentine maritime pilots announced a lockout on Aug. 1 to protest Decree 690/2026, which aimed to deregulate pilotage. The strike impacted ship traffic in the Paraná River corridor, disrupting exports from the Rosario hub and prompting reports of cargoes being redirected to Brazil and Uruguay.

The Argentine government reached an agreement late on Aug. 4 with maritime pilotage representatives to end the port stoppage.

However, the disruptions continued to weigh on the FOB Up River cargo market, with no trades reported throughout the week as offer-bid spreads remained wide.

In Brazil, the FOB Paranaguá paper market saw trades registered for nearby shipments, particularly September and October loadings. Local port differentials began to weaken after the strike was resolved.

Meanwhile, Brazil's National Association of Cereal Exporters projected soybean meal shipments at 2.48 million metric tons in August, up 22.5% year over year. If realized, the volume would bring January-August shipments to 17.74 million mt, up 14.9% from the same period in 2025.

European soybean meal softens

European soybean meal prices continued to ease over the week on low summer demand and sluggish spot trading, which offset any underlying global supply concerns.

Platts assessed FOB Netherlands soybean meal at €356/metric ton on Aug. 7, down €3/mt on the week, and assessed Spanish prices at €363/mt, down €2/mt.

The Dutch market remained quiet due to the peak summer holiday period, which kept consumer buying appetite to a bare minimum. While inland logistics remained a concern amid ongoing low water levels on the Rhine River and restricted waterways, the lack of immediate demand offset any potential supply-side premium.

Additionally, improved US weather forecasts and a sell-off in Chicago Board of Trade futures countered potential bullish sentiment from weaker Brazilian crush margins.

In Spain, weak domestic demand stifled upward price action. Extreme summer heat and ongoing livestock health issues — notably African Swine Fever in key production hubs such as Catalonia and Aragon, and Newcastle disease in poultry — continued to stifle domestic feed consumption.

Market participants said buyers were already comfortably covered for their immediate needs in August and September. With feed demand structurally lower, sellers found no leverage to move the market, keeping trading action minimal throughout the week and forward structures entirely flat.

US DDGS hold steady

The US DDGS market remained largely subdued during the week, with participants reporting thin liquidity, limited domestic demand and little movement in values, although export inquiries showed signs of strengthening.

Platts assessed CIF New Orleans DDGS barges for the August shipment period at \$204/short ton on Aug. 7, assessed the Chicago DDGS truck market for the August delivery period at \$183/st, and assessed the South California rail market for the August delivery period at \$227/st.

Trading began quietly, with values largely unchanged and the Union Pacific California market inactive, according to sources.

One trader said liquidity in the UP California market was very quiet despite maintaining a premium over local truck values. With CIF activity low, "there's room for rail to soften" amid lackluster summer truck demand, the trader said.

Meanwhile, strong production and favorable ethanol margins continued to keep supplies available ahead of pre-harvest maintenance.

Sentiment strengthened slightly toward the end of the week as export interest emerged in Asia.

A second trader reported container sales during the week, saying Vietnam had been actively purchasing October cargoes and some September volumes, while adding that international markets had been more active than the domestic market.

Most recent business had been centered on CFR and FOB markets rather than CIF New Orleans, the second trader said, adding that demand typically increases only when traders need barges to cover export sales or when barge movements are delayed.

“DDGS are staying steady to maybe even a touch firmer,” a broker said. “I’ve been hearing more inquiries. Not more sales yet, but more folks in the market.”

Assessment Rationale

Grains

Platts Ags EMEA Wheat Daily Rationale

Platts assessed the Milling Wheat Marker at \$223/metric ton on Aug 7, down \$2/mt from the previous assessment. Russian 12.5% handysize wheat, assessed at \$223/mt, was the most competitive wheat out of the three components of the Milling Wheat Marker, which also includes Ukraine 11.5% at \$228.63/mt when adding July's quality normalisation of \$8.63/mt, to account for its lower protein content, and CVB 12.5% wheat assessed at \$260/mt day over day.

The structure between the first half of Sep. and the second half of Sep. was assessed as flat. This reflects the Platts assessment window from Sep 4-18.

Platts assessed Black Sea wheat (Russian deepsea, 12.5% protein) down \$2/mt at \$223/mt on Aug. 7, below an offer at \$224/mt and above a bid at \$222/mt. The structure between the first half of Sep. and the second half of Sep. was assessed as flat. This reflects the Platts assessment window from Sep 4-18.

Platts assessed Black Sea wheat (Ukraine deepsea, 11.5% protein) down \$2/mt to \$220/mt on Aug. 7, in line with drops in other wheat markets amid weak demand and below an offer for Sep. 15-25 at \$227/mt. Trading activity in Ukraine remains limited due to strikes on port and export infrastructure. The structure between the first half of Sep. and the second half of Sep. was assessed as flat. This reflects the Platts assessment window from Sep 4-18.

Platts is part of S&P Global Energy.

Exclusions: No market data was excluded from the Aug. 7 Black Sea wheat assessments.

This rationale applies to symbol(s) <BSMWM00> <WRBSD00> and <WUBSA00>.

Platts Asia Wheat Daily Assessment Rationale

Platts assessed Australian Premium White wheat down \$1/metric ton at \$287/mt FOB Kwinana Aug. 7 for cargoes loading between Oct. 6 and Nov. 5, tracking lower indicative values at \$287/mt and under the lowest indicative offer of \$289/mt.

Platts assessed Australian Standard White wheat with no protein guarantee up \$2/mt at \$281/mt for cargoes loading over the same period, tracking a narrower spread between Australian Premium White and Australian Standard White with no protein guarantee at \$6/mt, and accounting for a flat spread between Australian Standard White with 9% protein guarantee and Australian Standard White with no protein guarantee.

Platts is part of S&P Global Energy.

Market commentary can be found on <PAA2699>

This rationale applies to symbol(s) <WAUSA00>

Platts Canada Wheat Daily Rationale

Platts assessed Canada Western Red Spring Wheat 13.5% FOB Vancouver 30-45 days forward at \$300.29/metric ton on Aug. 7, \$2.94/mt higher than Aug. 6.

CWRS Wheat 13.5% FOB Vancouver basis 30-45 days forward, spanning Sept. 6-21, was assessed unchanged at M1AX Hard Red Spring Wheat December (Z) futures plus 115 cents/bushel, amid no disproving information.

CWRS Wheat 13.5% FOB Vancouver basis 45-60 days forward, spanning Sept. 21-Oct. 6, was assessed unchanged at Z plus 115 cents/bu, amid no disproving information.

CWRS Wheat 13.5% FOB Vancouver basis 60-75 days forward, spanning Oct. 6-21, was assessed unchanged at Z plus 105 cents/bu, amid no disproving information.

No exclusions were made during the assessment.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <AWHCA00> <AWHCB00> <AWHCC00> <AWHCD00> <AWHCE00> <AWHCF00>.

Platts Asia Corn Daily Rationale

Platts assessed corn CFR Northeast Asia unchanged day over day at \$272/metric ton CFR Aug. 7 for feed-quality corn arriving over Nov. 5 to Dec. 5 into Pyeongtaek, below a normalized offer at \$272.34/mt CFR, and tracking tradable value below \$275/mt CFR.

Platts is part of S&P Global Energy.

Asia corn assessments can be found on <PAA2440>

Market commentary can be found on <PAA2688>

This rationale applies to symbol(s) <WCINV00>

Platts Argentina Corn FOB Up River Daily Rationale

Platts assessed corn FOB Up River for loading in September at \$208.27/metric ton on Aug. 7, 78 cents/mt lower from the previous assessment.

The assessment considered the FOB premium for Up River September-loading cargoes 2 cents/bushel lower at plus 90 cents/bu to Chicago Board of Trade September (U) corn futures, based on an indicative value heard at that level, lower offers heard at U plus 93 cents/bu and lower bids heard at U plus 86 cents/bu heard at the market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <ARGCA00> <ARGCB00>

Platts Brazil Corn Daily Rationale

Platts assessed the Brazilian corn FOB Santos price for September loading at \$221.64/metric ton on Aug. 7, unchanged from the previous assessment.

The assessment considered the FOB Santos basis for September loading cargoes unchanged at plus 124 cents/bu to the Chicago Board of Trade September (U) contract, based on steady offers for September H2 at U plus 130 cents/bu, offers for September H1 at U plus 127 cents/bu and no bids heard at the market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <ABCSA00> <ABCSB00>

Platts US Corn Daily Assessment Rationale

Platts assessed the US Yellow Corn No. 2 CIF New Orleans barge basis for August shipment at 101 cents/bushel over the Chicago Board of Trade September (U) corn futures contract on Aug. 7, down 2 cents from the previous assessment.

This was based on an offer heard at 102 cents/bu, and a bid heard later in the day at 94 cents/bu. Bids heard at 102 cents/bu for the first and second half of the month were discounted due to being heard early in the day and bearish market sentiment.

Platts assessed the US Yellow Corn No. 2 CIF New Orleans barge basis for September shipment at 113 cents/bushel over the CBOT September (U) corn futures contract on Aug. 7, down one cent from the previous business day. This was based on a competitive bid heard at 108 cents/bu, and an offer at 114 cents/bu.

Platts assessed the US Yellow Corn No. 2 FOB Gulf basis for October shipments at 118 cents/bu over the CBOT December (Z) corn futures contracts on Aug. 7. This was based on an offer heard at 122 cents/bu. Sources reported an increase in elevation costs due to firm barge freight rates and demand for elevators.

No information was excluded.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <WCNOE00> <WCNOU00>

Platts FOB Black Sea Corn Daily Assessment Rationale

Platts assessed Ukrainian corn unchanged at \$222/metric ton on Aug. 7, below an offer heard for August- September loading at \$225/mt. The demand for Ukrainian corn remains limited. The structure between the first and the second halves of September was assessed flat. This reflects the Platts assessment window from Sept. 4-18.

Platts is part of S&P Global Energy.

Exclusions: No market data was excluded from the Aug. 7 Black Sea corn assessment.

This rationale applies to symbol(s) <CUBSU00>

Oilseeds.

Platts Asia Soybeans Daily Rationale

Platts assessed CFR China first-month soybeans up \$3.40/metric ton day over day at \$533.43/mt while basis was unchanged at 268 cents/bu over November (X) CBOT on Aug. 7, under the offer at 272 cents/bu, over November (X) CBOT for September shipment.

Platts assessed CFR China second-month soybeans up \$3.40/mt day over day at \$536.37/mt, while basis was unchanged at 276 cents/bu over November (X) CBOT, considering a carry spread of 8 cents/bu between September and October and under the sharpest offer at 284 cents/bu, over November (X) for Brazil October shipment.

Platts is part of S&P Global Energy.

Platts Brazil Soybean Daily Assessment Rationale & Exclusions

Platts assessed the SOYBEX FOB Santos soybean contract for September loading at \$487.24/metric ton on Aug. 7, down 37 cents/mt from the previous assessment.

The FOB Santos basis for September loading was unchanged at plus 167 cents/bushel to the Chicago Board of Trade September (U) contract, based on a spread to the Paranaguá paper market last heard at parity. No bids or offers were heard for the full September loading of FOB Santos cargo on the day.

The FOB Paranaguá basis for September loading was unchanged at plus 167 cents/bu to the CBOT (U) contract, based on steady offers at U plus 170 cents/bu and higher bids at U plus 165 cents/bu at market close.

Platts assessed the SOYBEX FOB Santos soybean contract for March loading at \$442.14/mt on Aug. 7, unchanged from the previous assessment.

The FOB Santos basis for March loading was assessed 1 cent/bu higher at plus 5 cents/bu to the CBOT March (H) contract, based on a spread to the Paranaguá paper market last heard at plus 5 cents/bu. No bids or offers were heard for the full March loading of FOB Santos cargo on the day.

The new crop FOB Paranaguá basis for March loading was assessed 1 cent/bu higher at parity to the CBOT March (H) contract, based on an indicative value heard at that level, lower offers at H plus 2 cents/bu and lower bids heard at H minus 3 cents/bu at market close.

Exclusions: No data was excluded.

Platts is part of S&P Global Energy.

Platts US Soybeans Daily Rationale

Platts SOYBEX FOB New Orleans for September shipment was assessed at \$477.03/metric ton on Aug. 7, \$1.65/mt down from Aug. 6.

The FOB Gulf basis for September shipment was assessed at 122 cents/bushel over the Chicago Board of Trade November (X)

soybeans contract on the day, 3 cents down from the previous business day. This was based on a value indication heard at 122 cents/bu, and an offer heard at 127 cents/bu for that shipment month.

The CIF New Orleans basis for August shipment was assessed at 106 cents/bu over the November (X) soybeans futures contract on the day, unchanged from the previous assessment on no disproving information.

No information was excluded.

Platts is part of S&P Global Energy.

Animal Feed and Protein

Platts Argentina Soybean Meal Daily Rationale

Platts assessed the Argentine soybean meal FOB Up River price for September loading on Aug. 7 at \$351.52/metric ton, \$2.98/mt lower than the previous assessment.

The basis for September loading in the Up River cargo market was unchanged at plus \$10/short ton to the September (U) futures at the Chicago Board of Trade. The assessment considered lower offers at plus \$11/st and bids at plus \$9/st to the CBOT U contract at market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYMAA00> and <SYMAB00>.

Platts Brazil Soybean Meal Daily Rationale

Platts assessed the Brazilian soybean meal FOB Paranaguá price for September loading on Aug. 7 at \$353.73/metric ton, \$6.28/mt lower than the previous assessment.

The basis for September loading in the Paranaguá paper market was assessed \$3/short ton lower at plus \$12/st to the September (U) futures at the Chicago Board of Trade. The assessment considered an indicative value heard at that level, lower offers at plus \$15/st and lower bids at plus \$10/st to the CBOT U contract at market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYMBA00> and <SYMBB00>.

Platts US Dried Distiller Grains DDGS Daily Assessment Rationale

Platts assessed CIF New Orleans dried distillers grains with solubles barges for the August shipment period at \$204/short ton on Aug 7, unchanged from the previous session based on a bid heard at \$202/st and an offer heard at \$206/st.

The Chicago DDGS truck market for the August delivery period was assessed at \$183/st, holding steady from the previous session, based on a bid heard at \$181/st and an offer heard at \$186/st, both for the August-September delivery period.

The South California rail market for the August delivery period was assessed at \$227/st, increasing \$3/st from the previous

session, based on a bid heard at \$226/st and an offer heard at \$230/st.

Platts is part of S&P Global Energy.

This rationale applies to symbols <ACDDG00> <AADDG00>.

Vegetable Oils.

Platts Asia Palm Oil Daily Rationale

Platts assessed CPO CFR WC India at \$1,232.50/metric ton Aug. 7 for August loading, down \$2.50/mt from Aug. 6, in line with a trade done at the same level and below an offer.

A CPO offer was heard at \$1,235.50/mt on a CFR WC India basis, shipping in August.

A September shipment of CPO CFR WC India was at \$1,240/mt Aug. 7, down \$5/mt from Aug. 6, considering a \$7.50/mt carry between August and September.

Platts assessed CPO FOB Indonesia at \$1,195/mt Aug. 7 for August loading, down \$5/mt from Aug. 6, below an offer and above a bid.

A CPO offer was heard at \$1,202.50/mt and an indicative bid at \$1,187.50/mt on an FOB Dumai basis, shipping in August.

A September shipment of CPO FOB Dumai was at \$1,205/mt Aug. 7, down \$5/mt from Aug. 6, considering a \$10/mt carry between August and September.

Platts assessed RBDPS FOB Indonesia at \$1,067.50/mt Aug. 7 for July loading, down \$7.50/mt from Aug. 6, below an offer and above a bid.

An RBDPS offer was heard at \$1,075/mt and an indicative bid at \$1,055/mt on an FOB Dumai basis, shipping in August.

A September shipment of RBDPS FOB Dumai was at \$1,080/mt Aug. 7, down \$10/mt from Aug. 6, considering a \$12.50/mt carry between August and September.

Platts assessed PFAD FOB Indonesia at \$1,002.50/mt Aug. 7 for July loading, down \$7.50/mt from Aug. 6, below an offer and above a bid.

A PFAD offer was heard at \$1,012.50/mt and an indicative bid at \$982.50/mt on an FOB Dumai basis, shipping in August.

A September shipment of PFAD FOB Dumai was at \$1,012.50/mt Aug. 7, down \$12.50/mt from Aug. 6, considering a \$10/mt carry between August and September.

Platts Argentina Soybean Oil Daily Rationale

Platts assessed the Argentine soybean oil FOB Up River price for September loading at \$1,193.58/metric ton Aug. 7, down \$2.21/mt from Aug. 6. The basis for September loading in the Up River paper market was assessed 60 points lower at minus 1,410 points to the September (U) futures at the Chicago Board of Trade. The assessment considered an indicative value last heard at that level, offers at minus 1,360 points, and bids at minus 1,430 points to the CBOT U contract at the market close. No trades were confirmed before the market close for September loading in the FOB Up River paper market Aug. 7.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYOAA00> <SYOAB00>.

Platts Brazil Soybean Oil Daily Rationale

Platts assessed the Brazilian soybean oil FOB Paranaguá price for September loading at \$1,197.99/metric ton Aug. 7, down \$2.21/mt from Aug. 6. The basis for September loading in the Paranaguá paper market was assessed 60 points lower at minus 1,390 points to the September (U) futures at the Chicago Board of Trade. The assessment considered an indicative value last heard at that level, offers at minus 1,350 points and bids at minus 1,430 points to the CBOT U contract at the market close. No trades were confirmed before the market close for September loading in the FOB Paranaguá paper market Aug. 7.

Platts assessed the Brazilian soybean oil FOB Paranaguá price for October loading at \$1,189.39/mt Aug. 7, down \$6.40/mt from Aug. 6. The basis for October loading in the Paranaguá paper market was assessed 80 points lower at minus 1,410 points to the October (V) futures at the Chicago Board of Trade. The assessment considered an indicative value last heard at that level, offers at minus 1,350 points and bids at minus 1,470 points to the CBOT V contract at the market close. No trades were confirmed before the market close for October loading in the FOB Paranaguá paper market Aug. 7.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYOBB00> and <SYOBA00>.

Platts Europe Sunflower Oil Daily Rationale

Platts assessed sunflower oil FOB Black Sea Ukraine for September-loading unchanged on Aug. 7 at \$1,379/metric ton, amid no disproving data.
