Commentary and Analysis

Wheat

Platts European Wheat Daily Commentary

- Black Sea wheat moves sideways at \$238/mt
- Algeria seeks wheat purchases for August
- French wheat monitor heat outlook

The Black Sea wheat market moved sideways June 16, as traders looked ahead to the Algerian wheat tender.

Russian wheat was likely to trade at \$238/metric ton, traders said, amid several sellers at \$239/mt for the 12.5% protein. There was a rumored bid of \$239/mt for the second half of July, likely for a Panamax vessel to Iran, a trader of Russian wheat said.

Algeria is seeking to buy wheat on June 17 for August loadings, market participants said. Its most recent purchases were for July shipments: 600,000 mt of wheat at around \$270/mt C&F on May 6, and 200,000 mt of wheat at \$284-\$292/mt C&F for the Mostaganem and Tenes ports on May 19.

Ukraine has shipped most of its wheat to Algeria in June, according to traders' lineups. Exports for June 1-11 were mainly to Algeria (255,100 mt) and Egypt (240,000 mt). FOB offers were at \$236/mt for July, while demand remained muted.

"Bids are not available," one seller of Ukrainian wheat said.

Buyers in Bangladesh were looking to buy the 11.5% wheat at \$270/mt, but sellers were at a \$10/mt premium.

Elsewhere in Europe, the CVB traders also saw quiet demand on the day, with the market valued at \$239/mt for the 12.5% and \$237/mt for the 11.5%. The French wheat market was up Eur 3-4/mt. Market participants said physical wheat markets remain relatively tight, particularly for old crop supplies, supporting basis values.

Meanwhile, French wheat conditions have edged up slightly to 77%, a 1% improvement week over week, local agency Franceagrimer said. However, the outlook remains challenging, with little to no rain expected over the next two weeks and temperatures forecast to run above average, exceeding 30 C in many European countries.

Platts Asia Wheat Daily Commentary

- Australian wheat eases
- Regional appetite for Australian wheat dampened by cheaper origins, feed corn

Australian Premium White wheat eased \$4/mt day over day to \$275/mt June 16, while Australian Standard White with no protein guarantee eased \$2/mt day over day to \$270/mt, tracking softer value indications amid good ongoing rainfall and a retreating Australian dollar.

"WA prices are coming off a fraction, seems the bulk traders are still covering shorts so market is holding up for now, but I do not think it will last," said a Perth-based trade source.

The source, along with several Australian sources, said that Australian wheat remained too expensive compared with other origins, particularly the Black Sea and Canada, and was also being edged out by sharp feed corn offers.

"The high protein [wheat], the low protein [wheat] and even corn [is] taking Aussie demand," said a Singapore-based trade source, who added that in the Philippines, tariff-free Australian feed wheat was still more expensive compared to feed corn after applying a 15% out-of-quota tariff on corn imports.

Feed corn offers to Southeast Asia were heard between high \$250s/mt to low \$260s/mt CFR for Q3 shipment, compared to Australian feed wheat at over \$290/mt CFR.

Platts Canada Wheat Daily Commentary

- US winter wheat conditions worsen to 46% poor
- Japanese tender seeks two August CWRS cargoes

Platts assessed Canada Western Red Spring Wheat 13.5% FOB Vancouver 30-45 days forward at \$268.60/metric ton on June 16, \$1.74/mt lower on the day as futures continued to weaken and basis held steady.

Futures saw further declines on the day as US winter wheat crop conditions continued to deteriorate in the latest US Department of Agriculture report. The September (U) MIAH Hard Red Spring Wheat futures contract settled 4.50 cents/bushel lower on the day to 635.25 cents/bu.

For the week ended June 7, the USDA rated winter wheat in very poor condition 2 percentage points higher week over week at 20%. Winter wheat in excellent condition dropped 1 percentage point to 4%, while 46% of the crop across the 18 states in the report was in poor to very poor condition.

Despite the slight dip in futures, basis premiums for CWRS were generally unchanged, although an offer for August was heard 5 cents lower than last heard levels at U plus 105 cents/bu. Bids were also indicated 5 cents lower to match the offer's decline at U plus 90 cents/bu.

"Perhaps they are worried [about] not finding a buyer, so [they] need to off load their position before they run out of time," a trader said regarding the decreased offer level amid relatively stable market conditions.

Flat CFR-Bangladesh prices were heard as stable at \$318-\$319/mt.

Overall market sentiment remained quiet, with participants looking towards another Japanese Ministry of Agriculture, Forestry and Fisheries wheat tender on June 18. Two cargoes of No. 1 CWRS wheat 13.8% protein are expected in the tender for August shipment.

Platts is part of S&P Global Energy.

Corn

Platts Asia Corn Daily Commentary

- Asian corn prices rise, tracking CBOT futures
- Market watches US-Iran peace deal development
- Vietnamese millers target low \$250s/mt CFR

Asian corn prices edged up June 16, tracking gains in Chicago Board of Trade futures, though the spot market was quiet as market participants watched developments around the US-Iran peace deal.

Platts assessed feed-quality corn CFR Northeast Asia up \$1/metric ton day over day at \$257/mt for cargoes arriving over Sept. 14-Oct. 14 in Pyeongtaek.

Market participants remained on the sidelines ahead of the peace deal signing between the US and Iran on June 19, with many still uncertain about the outlook for agricultural and freight prices.

"Given the current stance ... I hear from freight owners that freight is more or less stable until the Friday signing," a Singapore-based trader said.

A Taiwanese feed milling group is expected to return to the corn market with an import tender on June 17, following an extended absence since its last tender on April 27, several grains traders said.

The most competitive US Pacific Northwest corn basis offer indications for September shipment were heard at

148 cents/bushel over the July (N) CBOT futures contract, while October shipment indications were at 133 cents/bu over the December (Z) CBOT contract.

In South Korea, a feed miller source said the feed milling industry was facing difficulties in managing raw material costs, as “feed companies cannot raise their prices, but [raw material] ingredients are increasing, so they are trying not to sell much feed.”

Vietnamese feed millers took a wait-and-see approach on June 16, expecting freight prices to fall after the US-Iran peace deal signing.

A feed miller said they have “set a new lower target [price of] low \$250s/mt CFR for August and September shipments, while traded prices in the previous week were in the mid- to high \$250s/mt.”

Meanwhile, the lowest offers for corn to Vietnam were heard at \$257/mt CFR for August and September shipments on June 16, the feed miller added.

The Brazilian FOB Santos premiums for August loading were unchanged day over day.

The US dollar to Brazilian real exchange rate stood at Real 5.1041/\$1 as of 5:30 pm Brasilia time, up 0.47% day over day.

In Brazil's domestic market, prices remained steady in the Sorriso and Maringá regions, while they fell in the Rio Verde region.

“Increased harvest progress in other states, combined with elevated stocks in the region, is pressuring spot prices,” a Rio Verde-based buyer said.

Brazilian grain exporters' association, ANEC, forecast Brazil's June corn shipments at 597,974 metric tons, lower than last week's estimate and up from 568,668 mt a year earlier.

ANEC projected corn exports for January-June at 6.36 million mt, up from 5.66 million mt in the same period of 2025.

The association also expected 88,405 mt of corn to be shipped from the port of Santarém in the week ending June 20.

Exports were progressing slowly, with expectations that they would pick up starting in July as the winter corn harvest advances, which has already begun in some states.

Platts US Corn Daily Commentary

- Corn emergence hits 94%, nears average
- Crop condition drops to 68% good-excellent

The US corn market tracked weather in the Corn Belt on June 16 amid the emerging season, while demand is starting to look toward the new crop.

“Demand rumors seem to be focused on new crop, and the old crop cash markets are starting to see some increased truck traffic in some of the active processor markets,” a broker said.

Late June 15, the US Department of Agriculture released the weekly Crop Progress report, which indicated that emerged corn was at 94% as of June 14, slightly ahead of the 93% five-year average.

Regardless of crop condition, 68% of the crop was reported in good or excellent condition by July 14, below the 72% for the same week the prior year.

According to Weather Comments from S&P Global Energy CERA, the US Corn Belt experienced rainfall over the weekend in Nebraska, western Iowa, parts of South Dakota, and portions of Kansas. For the beginning of the week, temperatures were forecast to remain normal.

USDA's corn condition rating implied a yield of 184.2 bushels/acre, which, if realized, would be 2.3 bu below last year's. S&P Global Energy CERA analysts said that the current yield forecast is 185.5 bu/ac.

Platts, part of S&P Global Energy, assessed on June 16 the outright price for June shipments to New Orleans in the incoterm CIF at \$194.00/metric ton and for July shipments at \$198.35/mt. And FOB Gulf for August was assessed at \$204.92/mt.

Platts European Corn Daily Commentary

- Black Sea corn bearish amid slow demand
- Ukraine farmer sales slow for old and new crop

The Black Sea corn market was bearish June 16, with sellers lowering their offers amid weak demand.

In the FOB market, the competitive offer was at \$230/mt for July loading. Sellers were also seen at higher levels during the day; however, the market lacked firm buyers on an FOB basis.

In the CIF market, several offers were heard for CIF Marmara for July loading; however, buying indications were limited. Market participants said that buyers in Turkey will have to make purchases for July loading now, as the quota ends by July.

A broker in Turkey said: “The latest customs clearance is July 31, and the latest bits of demand will likely be for H1 July shipments, or by July 20.”

In Ukraine, El Niño is expected to boost corn production, particularly for the next crop season. A trader from Ukraine said: “El Niño should boost the corn production, but it will be in place by the end of July. By that time, it won't matter a lot for the 2026 crop, but it may help the 2027 crop.”

Traders also said that farmers' sales of old and new crop are slow, and around 2 million metric tons of corn are expected to be sold for the old crop. A seller from Ukraine said, “On paper, it's like 2 million or more, but farmer deliveries are not confirming that at the moment.”

Oilseeds

Platts Asia Soybean Daily Commentary

- Quiet market overnight
- CFR China flat price increased day on day

CFR China soybean month-one August shipment was up \$8.63/metric ton day over day at \$493.28/mt June 16, as Platts rolled its assessments, while basis was unchanged at 210 cents/bushel over July (N) Chicago Board of Trade (CBOT) futures.

Overnight, Brazilian offer indications for CFR China have strengthened, and there was limited trading liquidity, according to Chinese soybean trade sources.

“Crude oil prices fell yesterday [June 15], and ocean freight rates have eased slightly as well,” said a Chinese soybean trader.

As of June 16, the freight rate for nearby shipments from Santos to China is about \$54/mt, and from the US Gulf to China is about \$70/mt, according to the same trade source.

For Brazil September shipment, Chinese soybean traders believe the tradable value would be about 237 cents/bu over November (X) CBOT, basis CFR China. The sharpest offer indication was 238 cents/bu over November (X) CBOT.

Brazil is estimated to export 1.6 million of soybeans globally, with up to 1.1 million-1.3 million mt destined for China, according to a Chinese grain broker.

Platts is part of S&P Global Energy.

Platts Brazil Soybean Daily Commentary

- Several shipments traded in Paranaguá
- CBOT futures rise on reports of Chinese interest in US supply

Platts assessed the SOYBEX FOB Santos soybean contract for August loading at \$455.46/metric ton on June 16, on the first day of assessment for August loadings.

Trading activity was strong earlier in the Paranaguá FOB premiums market, with several trades reported for both old and new crop 2027 loadings.

CBOT soybean futures settled higher across the board amid unconfirmed reports that Chinese buyers were actively seeking price offers for US soybeans, offsetting bearish pressure from the drop in soybean oil futures, analysts said.

Rumors suggest Chinese state companies are requesting offers in the US for shipments from October to March, sources said.

The Brazilian grain exporters' association, ANEC, updated its estimate for soybean exports in June to 15.31 million metric tons, on pace for the highest volume recorded for the month.

The latest estimate represents an increase of about 1 million mt from the projection released the prior week and is 11% higher than ANEC's June 2025 data, according to the association.

Brazil's soybean exports through the first six months of 2026 are projected at 73.82 million mt, up 8.5% over the same period in 2026, according to ANEC.

The US dollar versus the Brazilian real settled at Real 5.0872/\$1 at 4:30 pm Brasilia time. Domestic soybean prices were higher in the main producing regions.

Platts is part of S&P Global Energy.

Platts US Soybeans Daily Commentary

- China may buy US new crop soy cargoes
- Soybean prices climb on export demand
- 95% of US soybeans are planted by June 14

The US soybean market saw outright prices and export offers climb on June 16 amid unconfirmed reports that China may buy several cargoes of US new crop.

Platts, part of S&P Global Energy, assessed SOYBEX FOB New Orleans for August shipment at \$453.60/metric ton on June 16. Platts assessed the basis for FOB Gulf for August shipment at 100 cents/bushel over the August (Q) soybeans futures contract.

Platts assessed the outright price for CIF New Orleans for June shipment at \$3.95/mt, up from the previous business day at \$443.13/mt. Platts assessed basis for CIF NOLA for June shipment remained steady at 76 cents/bu over the July (N) soybeans futures contract.

The futures market rose day over day, with the July (N) contract increasing 10.75 cents to 1,130 cents/bu, while the August (Q) contract climbed 11 cents to 1,134.5 cents/bu.

Sources in the FOB Gulf market reported offers increasing by a couple of cents amid unconfirmed reports circulating among participants of a few cargoes traded with Chinese entities.

"Markets are reacting like it is true," a source in the FOB Gulf market said. "But I haven't been able to confirm."

"A few boats have traded for new crop," a trader in the CIF NOLA market said. "Probably October. It's a little earlier than I expected, but not super surprising. They'll buy the 25 million mt, but I would have guessed they would wait until we get further along in the crop."

In the CIF NOLA market, few trades were reported for September, October, December, and January.

"Nothing [is] trading nearby," a second trader in the CIF NOLA market said.

The US Department of Agriculture published its weekly Crop Progress report on June 15, showing that as of June 14, about 95% of soybeans had been planted across the 18 main producing states.

Louisiana reported 100%, while Arkansas, Mississippi, and Minnesota reported 99%. Iowa, Nebraska, North Dakota, and Wisconsin reported 98%.

Of the total soybeans planted, 88% had reportedly emerged by June 14, with 56% in good condition, 27% in fair condition, 10% in excellent condition, and 5% and 2% in poor and very poor conditions, respectively.

Animal Feed

Platts Latin America Soybean Meal Daily Commentary

- Brazil expects to export 2.24 million mt of soybean meal in June: ANEC
- CBOT August (Q) meal contract settles up \$2.30 at \$305.20/st

Argentine FOB Up River premiums for August loading saw a bid-offer gap of minus 2/short ton and plus 3/st, relative to the CBOT August (Q) contract.

Trading activity was muted for Brazilian FOB Paranaguá premiums for August loading.

ANEC, the Brazilian grain exporters association, estimated that Brazil will export 2.24 million mt of soybean meal in June, lower than last week's estimate but higher than 1.67 million mt by the same month last year, it said June 16.

If the current shipment schedule-based forecast is confirmed, Brazil will record exports of 12.65 million mt in the first half of the year, up from 11.27 million mt in the same period of 2025.

The Chicago Board of Trade August (Q) soybean meal contract settled at \$305.20/short ton, up \$2.30 cents/st.

Platts European Animal Feed Daily Commentary

- Dutch meal prices weaken on day
- EU soybean meal imports increase in April
- EU corn imports fall 3%

Northern Europe

The Dutch soybean meal market weakened on the day.

During the day, indications for locally crushed soybean meal in the August and September period were seen at Eur349/mt and Eur338/mt, respectively.

A Netherlands-based soybean meal trader said the market was bearish, with few inquiries on the day.

Meanwhile, the EU imported 1.58 million metric tons of soybean meal in April, up 23.3% from 1.28 million mt in March, according to EU Commission data. Poland, Spain and the Netherlands were among the leading importers during the month. South American soybean meal continued to dominate EU supplies, accounting for more than 80% of total imports.

Southern Europe

The Spanish feed market continued its bearish sentiment.

Spot indications for EXW Tarragona soybean meal were seen at Eur344/mt, while corn was seen at Eur220/mt. Another trader offered level prices of Eur219/mt and Eur346 for both corn and soybean meal, respectively.

Also, EU data shows that EU corn imports fell in April to 1,616,581 mt, down 3.3% from March. However, imports were still substantially higher than in April 2025, when they stood at 1,049,853 mt.

Spain was the largest EU corn importer during the month, although its intake fell to 553,461 mt in April from 672,411 mt in March.

The Netherlands, another major corn importer, increased purchases from the previous month, reaching 203,576 mt in April, though volumes were down 15.3% year over year.

Platts US Distiller Grains DDGS Daily Commentary

- Quiet trade limits activity
- Market continues to see lower values

The US dried distillers grains with solubles market remained quiet June 16, with participants reporting limited engagement and continued weakness across domestic and export channels.

Platts assessed CIF New Orleans dried distillers grains with solubles barges for the June shipment period at \$194/short ton on June 16, the Chicago DDGS truck market for the June delivery period was assessed at \$169/st, and the South California rail market for the June delivery period was assessed at \$220/st.

One broker described activity as extremely slow. “Very quiet start to the week,” the broker said, adding that seasonal factors continue to weigh on participation. “Summer and CWS are not a great mix for trade.”

The broker added that while activity remains limited, sellers continue to offer product into the market. “Not a lot of engagement, but lots of FOB truck offers out there right now,” the source said.

Another broker reported little change in the CIF NOLA market. “Similar,” the broker said regarding sentiment, adding that there was “nothing too crazy” occurring in export channels.

The broker also said that there’s continued weakness in domestic truck markets. “Chicago truck has really come down also,” the source said.

Platts is part of S&P Global Energy.

concerns related to the upcoming El Nino and partially supported by stronger exports from Malaysia.

The benchmark palm oil contract for September delivery on the Bursa Malaysia commodity exchange rose MR93/mt to MR4,578/mt on June 16.

Malaysia’s Southern Peninsular Palm Oil Millers Association reported an increase in palm oil production for June 1-15 compared to last month. Yield increased 12.9%, oil extraction rose 0.17%, and overall production surged 13.79%.

Malaysia’s palm oil export data by cargo surveyors showed increases for June 1-15 from a month earlier, with Amspec reporting exports of 621,704 mt, up 23.8%, and Intertek Testing Services reporting exports of 657,557 mt, up 9.6%.

The Indian market was quiet, with no trades on the day, as buyers were not chasing higher prices despite the market increase, sources said.

“India is expected to prefer buying palm oil over soybean oil on the spread between the two products. However, slow demand in the domestic market reduced buying interest,” an India-based source said.

Platts assessed the CPO CFR WC India price at \$1,235/mt June 16 for July loading, up \$17.5/mt from June 15, while the price for August shipment was \$7.5/mt higher than for July.

Platts assessed the CPO FOB Indonesia price at \$1,185/mt June 16 for July loading, up \$5/mt from June 15, while the price for August shipment was \$10/mt higher than for July.

Platts assessed the RBDPS FOB Indonesia price at \$1,060/mt June 16 for July loading, up \$5/mt from June 15, while the price for August shipment was \$10/mt higher than for July.

Platts assessed the PFAD FOB Indonesia price at \$990/mt June 16 for July loading, up \$12.5/mt from June 15, while the price for August shipment was \$10/mt higher than for July.

Platts Latin America Soybean Oil Daily Commentary

Brazilian and Argentine FOB soybean oil markets weakened June 16 as Chicago Board of Trade soybean oil futures fell sharply, with South American market activity subdued on thin liquidity and mounting uncertainty over a potential labor strike in Argentina.

CBOT July soybean oil futures fell 1.95% day over day to settle at 72.92 cents/lb. Market participants said soybean oil futures remained under pressure from favorable US crop conditions and expectations for ample global soybean supplies, while weakness across broader agricultural commodity markets also weighed on sentiment.

Trading activity in both Argentina and Brazil was notably quiet during the session. Market participants said liquidity remained limited following Argentina's June 15 holiday in observance of the Paso a la Inmortalidad del General Martín Miguel de Güemes, while domestic soybean oil activity in Brazil was also reported as slow.

Participants added that uncertainty surrounding a possible labor strike by oilseed workers in Argentina encouraged many market participants to remain cautious, contributing to reduced trading activity in both the FOB Up River and FOB Paranaguá markets.

In Argentina, Platts assessed the soybean oil FOB Up River price for July loading at \$1,166.69/mt June 16, down \$7.93/mt from the last assessed price. The basis for July loading in the Up River paper market was assessed 100 points higher at minus 2,000 points to the July (N) futures at the Chicago Board of Trade.

In Brazil, Platts assessed the soybean oil FOB Paranaguá price for July loading at \$1,188.73/mt June 16, down \$9.92/mt from June 15. The basis for July loading in the Paranaguá paper market was assessed 100 points higher at minus 1,900 points to the July (N) futures at the Chicago Board of Trade.

Platts also assessed the soybean oil FOB Paranaguá price for August loading at \$1,165.81/mt June 16, down \$7.49/mt from June 15. The basis for August loading in the Paranaguá paper market was assessed 110 points higher at minus 1,840 points to the August (Q) futures at the Chicago Board of Trade.

Market participants said FOB basis levels in South America continued to strengthen despite weaker CBOT soybean oil futures, reflecting a further recovery from the historically discounted levels seen in late May and early June. Traders noted

that the improvement in basis values has been driven primarily by weaker futures rather than a significant shift in underlying export demand fundamentals.

Participants continued monitoring developments in Argentina's labor negotiations, with some traders expressing concern that any disruption to crushing or export operations in the Rosario region could temporarily affect soybean oil export flows. However, most participants said it remained too early to assess the likelihood or duration of any potential strike action.

At the same time, abundant soybean supplies in Brazil and Argentina continued to provide a bearish backdrop to export markets. Brazil's National Supply Company, or Conab, currently estimates the country's 2025-26 soybean crop at a record 180.13 million mt, while the Brazilian Association of Vegetable Oil Industries projects soybean processing at a record 62.5 million mt in 2026.

Platts is part of S&P Global Energy.

Platts Europe Vegetable Oil Daily Commentary

- Limited offers continue supporting sunflower oil values
- Traders remain apart on Black Sea pricing
- Weak import demand constrains upside momentum

European vegetable oil markets remained largely stable, with both sunflower oil and rapeseed oil holding within recent ranges as participants continued to navigate a market characterized by limited liquidity and a lack of fresh physical offers. FOB Black Sea sunflower oil remained unchanged at \$1,381/mt, while RSO FOB Dutch Mills front-month and second position held at Eur 1,157/mt and Eur 1,154/mt respectively. Deferred rapeseed oil positions were also broadly unchanged, with only the fourth position easing slightly by Eur 2 to Eur 1,139/mt. The muted price action reflects a market lacking strong directional catalysts despite ongoing supply-side constraints.

Liquidity remains a key factor supporting sunflower oil values. A source based in Ukraine noted that "liquidity and offer side for sure" continue to be impacted by low crush coverage, highlighting the limited availability of export offers from the Black Sea. This is reinforced by comments from another source based in Ukraine, who reported "not many sellers" and indicated hearing "1380 v 1360 for FOB Black Sea July," before adding that sellers were closer to "\$1,400" while buyers remained around "\$1,380 FOB July." The wide gap between bids and offers reflects a market where sellers remain reluctant to increase participation despite subdued demand.

Demand conditions remain equally restrained. A trader based in India reported that "there are currently no fresh sunflower oil offers in the market, as trading activity remains lackluster." The same source added that "the market continues to trade at a disparity," and that until this imbalance disappears, "we do not expect major USD buying to emerge." This suggests that key importing regions remain adequately covered and are unwilling to chase prices higher, limiting the potential for stronger demand-driven rallies.

For Europe, the combination of low liquidity, limited seller participation and subdued import demand is creating a stable but illiquid market structure. The absence of significant offer volume is preventing prices from falling, while weak buying interest is limiting upside momentum. Comments from a source based in Ukraine that “August now can’t be lower than July” indicate expectations that nearby tightness may persist into the next loading period. As a result, the market remains rangebound, with price direction largely determined by availability rather than changes in consumption.

News

Egypt corn imports to slow amid oversupply and weak poultry feed demand

- Egypt corn imports slow on oversupply
- Weak poultry demand pressures feed sector
- Warehouses hold 1 mil mt, prices fall sharply

Egypt’s corn imports are expected to slow this month as heavy stocks of South American corn, weak demand from the poultry feed sector and falling domestic prices continue to pressure traders’ margins, importers said.

According to local shipping data from LATT Trading & Shipping, Egypt’s corn imports fell 56% in May to around 658,150 metric tons. Argentine corn was the only origin imported during the month.

Traders said Egyptian ports and warehouses remain well supplied with South American corn, creating an oversupply in the domestic market. They estimated that around 1 million mt of corn is already in storage, further pressuring local prices.

“The stocks at warehouses are still high. Local prices are still going down because of weak demand and a lot of offers everywhere,” a Cairo-based importer said. The importer added that international replacement costs remain above local market prices, leaving traders with negative margins.

Another Egyptian trader said the oversupply has built up over the past two months, alongside persistently poor demand.

“Private buyers bought three times their capacity, so the country became oversupplied while demand remained weak. Prices are not picking up,” the trader said.

Weak demand for corn is largely being driven by pressure in Egypt’s poultry sector. Traders said a high supply of eggs and poultry products has slowed poultry feed production, reducing demand for corn, which is a key raw material in feed manufacturing.

“The situation is also being affected by the temporary shutdown of many poultry farms, reducing consumption and overall demand,” a third Egyptian trader said.

The decline in poultry prices, combined with a sharp drop in egg prices, is putting significant pressure on producers. The

trader said eggs currently cost around Egyptian Pounds 125 to produce but are being sold in the market at an average of only EGP 70.

Egg production is currently exceeding market demand by about 40%, further weighing on prices and profitability across the poultry sector, corn traders said.

As a result, many small and medium-sized poultry growers have paused breeding and production, reducing their need for poultry feed and further weakening corn demand.

Ukraine and South America are typically the major corn origins for the Egyptian market. Platts assessed Ukraine corn FOB POC at \$230/mt for July 13-27 loading, Argentine corn FOB Up River Argentina at \$201.38/mt for July loading, and Brazilian corn FOB Santos at \$213.67/mt for August loading on June 15.

ANEC lifts Brazil’s June soybean export forecast to an all-time high

- June soybean exports expected at 15.31 million mt
- June soybean meal export expectations at 2.24 mmmt
- Corn exports increase despite slow progress

Brazilian grain exporters’ association ANEC updated its estimate for soybean exports in June to 15.31 million metric tons, on pace for the highest volume recorded for the month, it said June 16.

The latest estimate represents an increase of about 1 million metric tons from the projection released the prior week and is 11% higher than ANEC’s June 2025 data, according to the association.

Brazil’s soybean exports through the first six months of 2026 are projected at 73.82 million mt, up 8.5% over the same period in 2026, according to ANEC.

The recent decline in CBOT prices has reduced the competitiveness of Brazilian soybeans in the global market, however, they still remain cheaper than US supplies, according to S&P Global Energy CERA. This also aligns with seasonal trends that typically see Brazilian prices firming in the second half of the year.

Platts, part of S&P Global Energy, assessed the SOYBEX FOB Santos soybean contract for July loading at \$446.92/metric ton on June 15, \$4.32/mt higher than the previous assessment.

Soybean meal

The association estimated that Brazil will export 2.24 million mt of soybean meal in June, lower than last week’s estimate but higher than 1.67 million mt by the same month last year.

If the current shipment-schedule-based forecast is confirmed, Brazil will record exports of 12.65 million mt in the first half of the year, up from 11.27 million mt in the same period of 2025.

Platts assessed the FOB Paranaguá soybean meal price for delivery in July at \$334.00/mt on June 15, up 77 cents/mt day over day.

Corn

ANEC forecast Brazil's June corn shipments at 597,974 mt, lower than last week's estimate and up from 568,668 mt a year earlier.

The association projects January-June corn exports at 6.36 million mt, up from 5.66 million mt in the same period of 2025.

ANEC also expects 88,405 mt of corn to be shipped from the port of Santarém in the week ended June 20.

Exports are progressing slowly, with expectations that they will pick up starting in July as the winter corn harvest advances, which has already begun in some states.

Platts assessed FOB Santos corn for August shipment at \$213.67/mt June 15, up 79 cents/mt day over day.

ANEC said June projections remain subject to revision as the shipping schedule evolves.

NCGA urges to uphold USMCA, warns of corn export losses if it is not renewed

- NCGA urges USMCA renewal to protect corn trade
- Corn exports to Mexico, Canada surge 102% since 2020
- Pact supports 1.8 billion bushels of corn demand yearly

The National Corn Growers Association advocates for upholding the United States-Mexico-Canada Agreement (USMCA) and protecting 1.8 billion bushels of corn demand each year in the form of bulk corn, corn for ethanol, and the corn equivalent of meat.

"The USMCA is important to my operation and the US farmer, now let me tell you why, annually it not only accounts for 60 billion dollars in US ag exports, and 1.5 billion dollars in ethanol to Canada, it has also created 13 million US jobs and has been credited for a 10.7 billion dollar increase in ag exports to Mexico," Jon Miller, NCGA Corn Board member and farmer from central Ohio, said.

On June 10 US President Donald Trump said he "is not looking to renew" the USMCA and that the US "does not need anything that Canada has and anything that Mexico has, but they need everything that we have". Alternatively, if the three countries do not reach a deal by July 1, the USMCA could shift to ongoing annual reviews until 2036, unless otherwise decided.

The NCGA said in a statement on June 11 that since USMCA took effect in 2020, it "has allowed for strong growth in US exports. Mexico and Canada now represent \$60 billion — more than a third — of all US food and agricultural exports," adding that specifically for corn, exports to those countries have increased by 102%, reaching over \$6.2 billion.

"If USMCA is not renewed, American corn farmers risk losing this growth and seeing these numbers drop to pre-agreement levels," said the statement.

Nancy Martinez, NCGA director of public policy, trade, and biotechnology, said that USCMA provides stable, reliable market access to our biggest customers at a time when US needs it most.

Platts, assessed on June 11 the outright price for US corn June shipments to New Orleans in the incoterm CIF at \$193.20/mt and for July shipments at \$196.75/mt. And FOB Gulf for August was assessed at \$203.54/mt.

Subscriber Notes

June 15 publishing schedule for Argentine biodiesel and oilseeds price assessments

Please note that Platts, part of S&P Global Energy, will not publish Argentine biodiesel, and oilseeds price assessments June 15 in observance of the Paso a la Inmortalidad del Gral. de Guemes holiday.

No Argentine biodiesel or soybean oil assessments will be published on that day. The Daily Grains report will be published June 15 without Argentine biodiesel or soybean oil assessments and rationales. Argentina's normal publishing schedule will resume June 16.

For full details of the Platts publishing schedule and services affected, refer here.

For queries, please contact support@spglobal.com.

Platts corrects Soybean meal FOB Netherlands assessment for June 9

Platts, part of S&P Global Energy, has corrected the assessment for the Soybean meal FOB Netherlands (EUPMQ00) for June 9.

The assessment should read as Eur357/mt. The correction has been updated in the Platts database under the code EUPMQ00.

The assessment appears in Platts Connect on fixed page PAA(0805) and in Platts Daily Grains.

Please send any questions to platts_agricultureandFood@spglobal.com with a cc to pricegroup@spglobal.com.

Assessment Rationale

Grains

Platts Ags EMEA Wheat Daily Rationale

Platts assessed the Milling Wheat Marker at \$238/metric ton on June 16, unchanged from the previous assessment. Russian 12.5% handysize wheat, assessed at \$238/mt, was the most competitive of the three components of the Milling Wheat Marker, which also includes Ukraine 11.5%, normalized to the nearest 25 cents at \$240.25/mt after adding May's quality normalization of \$6.15/mt to account for its lower protein content, and CVB 12.5% wheat, assessed at \$239/mt on the day. This reflects the Platts assessment window from July 14 - 28.

Platts assessed Black Sea wheat (Russian deepsea, 12.5% protein) unchanged at \$238/mt on June 16, in line with an indicative value at \$238/mt, and below an offer at \$239/mt. The structure between the first and second halves of July was assessed flat. This reflects the Platts assessment window from July 14-28.

Platts assessed Black Sea wheat (Ukraine deepsea, 11.5% protein) unchanged at \$234/mt on June 16, below an offer at \$236/mt. The structure between the first and second halves of July was assessed flat. This reflects the Platts assessment window from July 14-28.

Platts is part of S&P Global Energy.

Exclusions: No market data was excluded from the June 16 Black Sea wheat assessments.

Platts is part of S&P Global Energy. This rationale applies to symbol (s) <BSMWM00>, <WRBSD00>, <WUBSA00>.

Platts Asia Wheat Daily Assessment Rationale

Platts assessed Australian Premium White wheat down \$4/mt at \$275/mt FOB Kwinana June 16 for cargoes loading between Aug. 15 and Sept. 14, tracking lower indicative values and under a lower indicative offer of \$278/mt.

Platts assessed Australian Standard White wheat with no protein guarantee down \$2/mt at \$270/mt for cargoes loading over the same period, tracking a \$5/mt spread between Australian Premium White and Australian Standard White with no protein guarantee, and under an indicative offer at \$274/mt. This narrows the spread between Australian Premium White and Australian Standard White with no protein guarantee to \$5/mt.

Platts is part of S&P Global Energy.

Platts Canada Wheat Daily Rationale

Platts assessed Canada Western Red Spring Wheat 13.5% FOB Vancouver 30-45 days forward at \$268.60/metric ton on June 16, \$1.74/mt lower than June 15.

CWRS Wheat 13.5% FOB Vancouver basis 30-45 days forward, spanning July 16-31 was assessed unchanged at MIAH Hard Red Spring Wheat September (U) futures plus 96 cents/bushel.

CWRS Wheat 13.5% FOB Vancouver basis 45-60 days forward, spanning July 31-Aug. 15 was assessed unchanged at U plus 96 cents/bushel.

CWRS Wheat 13.5% FOB Vancouver basis 60-75 days forward, spanning Aug. 15-30 was assessed unchanged at U plus 96 cents/bu.

The assessments were based on an August bid indicated at U plus 90 cents/bu and an August offer heard at U plus 105 cents/bu.

Exclusions: No data was excluded in the assessments.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <AWHCA00> <AWHCB00> <AWHCC00> <AWHCD00> <AWHCE00> <AWHCF00>.

Platts Asia Corn Daily Rationale

Platts assessed corn CFR Northeast Asia up \$1/mt day over day at \$257/mt CFR June 16 for feed-quality corn arriving over Sept. 14 to Oct. 14 into Pyeongtaek, below a normalized offer at \$259/mt CFR and tracking higher futures.

Platts is part of S&P Global Energy.

Asia corn assessments can be found on <PAA2440>

Market commentary can be found on <PAA2688>
This rationale applies to symbol(s) <WCINV00>

Platts Argentina Corn FOB Up River Daily Rationale

Platts assessed corn FOB Up River for loading in August at \$199.80/metric ton on June 16, on the first day of assessment for August-loading cargoes.

The assessment considered the FOB premium for Up River August-loading cargoes at plus 85 cents/bushel to Chicago Board of Trade September (U) corn futures, based on an indicative value heard at that level, offers heard at U plus 90 cents/bu, and bids heard at U plus 80 cents/bu at the market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <ARGCA00> <ARGCB00>.

Platts Brazil Corn Daily Rationale

Platts assessed the Brazilian corn FOB Santos price for August loading at \$213.57/metric ton on June 16, 10 cents/mt lower than the previous assessment.

The assessment considered the FOB Santos basis for August loading cargoes unchanged at plus 120 cents/bushel to the Chicago Board of Trade September (U) contract, based on an indicative value heard at that level, steady bids heard at U plus 115 cents/bu, and lower offers heard at U plus 123 cents/bu at the market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <ABCSA00> <ABCSB00>.

Platts US Corn Daily Assessment Rationale

Platts assessed the US Yellow Corn No. 2 CIF New Orleans barge basis for June shipment at 79 cents/bushel over the CBOT July (N) corn futures contract on June 16, unchanged from the previous business day. Based on a bid heard in the session at 77 cents/bu, no offers were heard that disproved the assessment.

Platts assessed the US Yellow Corn No. 2 CIF New Orleans barge basis for July shipment at 90 cents/bu over the Chicago Board of Trade July (N) corn futures contract on June 16, unchanged from the previous assessment. This was based on a bid heard at 89 cents/bu, no offers were heard that disproved the assessment.

Platts assessed the US Yellow Corn No. 2 FOB Gulf basis for August shipments at 98 cents/bu over the CBOT September (U) corn futures contracts on June 16. Offers were heard at 100 cents/bu for the first half of August, and 101 cents/bu for the second half of the month.

No information was excluded.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <WCNOE00> and <WCNOU00>.

Platts FOB Black Sea Corn Daily Assessment Rationale

Platts assessed Ukrainian corn down \$1/mt at \$229/metric ton on June 16, below an offer at \$230/mt for July loading. The structure between the first and second halves of July was assessed flat. This reflects the Platts assessment window from July 14-28

Platts is part of S&P Global Energy.

Exclusions: No market data was excluded from the June 16 Black Sea corn assessment.

This rationale applies to symbol(s) <CUBSU00>

Oilseeds.

Platts Asia Soybeans Daily Rationale

Platts assessed CFR China first-month soybeans up \$8.63/metric ton day over day at \$493.28/mt, as Platts rolled its M1 assessment from July to August, while basis was up 18 cents/bushel at 228 cents/bu over Aug (Q) CBOT June 16. This is tracking a normalized indicative value at 228 cents/bu, below the sharpest normalized offer at 231 cents/bu and above the normalized indicative bid at 227 cents/bu over Aug (Q), for Brazil August shipment.

Platts assessed CFR China second-month soybeans up \$8.82/mt day over day at \$500.82/mt, as Platts rolled its M2 assessment from August to September, while basis was up 7 cents/bu at 237 cents/bu over Nov (X) CBOT, tracking indicative value at 237 cents/bu and below the sharpest offer at 238 cents/bu over Nov (X) for Brazil September shipment.

Platts is part of S&P Global Energy.

Platts Brazil Soybean Daily Assessment Rationale & Exclusions

Platts assessed the SOYBEX FOB Santos soybean contract for August loading at \$455.46/metric ton on June 16, on the first day of assessments for August loadings.

The FOB Santos basis for August loading was assessed at plus 105 cents/bushel to the Chicago Board of Trade August (Q) contract, based on a spread to the Paranaguá paper market heard at plus 5 cents/bu. No bids or offers were heard for the full August loading of FOB Santos cargo on the day.

A bid for FOB Santos H1 August 2026 loading was heard at Q plus 95 cents/bu earlier in the day.

The FOB Paranaguá basis for August loading was assessed at plus 100 cents/bu to the CBOT (Q) contract, based on a trade heard at that level, bids at Q plus 98 cents/bu, and offers at Q plus 105 cents/bu at the market close.

Platts assessed the SOYBEX FOB Santos soybean contract for March loading at \$430.56/mt June 16, on the first day of assessment for March loadings.

The FOB Santos basis for March loading was assessed at plus 5 cents/bu to the CBOT March (H) contract, based on a spread to the Paranaguá paper market heard at plus 5 cents/bu. No bids or offers were heard for the full March loading of FOB Santos cargo on the day.

Offers for FOB Santos H1 and H2 March 2027 loadings were heard at H plus 7 cents/bu, with bids for H1 and H2 March 2027 loadings heard at H plus 3 cents/bu earlier in the day.

The new crop FOB Paranaguá basis for March loading was assessed at parity to the CBOT March (H) contract, based on an indicative value heard at that level, bids at H minus 10 cents/bu, and offers at H plus 5 cents/bu at the market close.

Exclusions: No data was excluded.

Vegetable Oils.

Platts Asia Palm Oil Daily Rationale

Platts assessed the CPO CFR WC India price at \$1,235/mt June 16 for July loading, up \$17.5/mt from June 15, below an offer and above a bid.

A CPO offer was heard at \$1,242.5/mt and a bid at \$1,225/mt on a CFR WC India basis, for shipping in July.

August shipment of CPO CFR WC India was at \$1,242.5/mt June 16, up \$20/mt from June 15, considering a \$7.5/mt carry between July and August.

Platts assessed the CPO FOB Indonesia price at \$1,185/mt June 16 for July loading, up \$5/mt from June 15, below an offer and above a bid.

A CPO offer was heard at \$1,195/mt and an indicative bid at \$1,175/mt on a FOB Dumai basis, for shipping in July.

August shipment of CPO FOB Dumai was at \$1,195/mt June 16, up \$10/mt from June 15, considering a \$10/mt carry between July and August.

Platts assessed the RBDPS FOB Indonesia price at \$1,060/mt June 16 for July loading, up \$5/mt from June 15, below an offer and above a bid.

An RBDPS offer was heard at \$1,075/mt and an indicative bid at \$1,045/mt on a FOB Dumai basis, for shipping in July.

August shipment of RBDPS FOB Dumai was at \$1,070/mt June 16, up \$15/mt from June 15, considering a \$10/mt carry between July and August.

Platts assessed the PFAD FOB Indonesia price at \$990/mt June 16 for July loading, up \$12.5/mt from June 15, below an offer and above a bid.

A PFAD offer was heard at \$1,005/mt and an indicative bid at \$975/mt on a FOB Dumai basis, for shipping in July.

August shipment of PFAD FOB Dumai was at \$1,000/mt June 16, up \$22.5/mt from June 15, considering a \$10/mt carry between July and August.

Platts is part of S&P Global Energy.

Platts Brazil Soybean Oil Daily Rationale

Platts assessed the Brazilian soybean oil FOB Paranaguá price for July loading at \$1,188.73/mt June 16, down \$9.92/mt from June 15. The basis for July loading in the Paranaguá paper market was assessed 100 points higher at minus 1,900 points to the July (N) futures at the Chicago Board of Trade. The assessment considered an indicative value last heard at that level and bids at minus 2,100 points to the CBOT N contract at the market close.

No offers or trades were confirmed before the market close for July loading in the FOB Paranaguá paper market June 16.

Platts assessed the Brazilian soybean oil FOB Paranaguá price for August loading at \$1,165.81/mt June 16, down \$7.49/mt from June 15. The basis for August loading in the Paranaguá paper market was assessed 110 points higher at minus 1,840 points to the August (Q) futures at the Chicago Board of Trade. The assessment considered an indicative value last heard at that level. No bids, offers or trades were confirmed before the market close for August loading in the FOB Paranaguá paper market June 16.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYOBB00> and <SYOBA00>.

Platts Europe Sunflower Oil Daily Rationale

Platts assessed sunflower oil FOB Black Sea Ukraine for July at \$1,381/metric ton June 16, unchanged day over day, above a bid heard at \$1,380/mt.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SFWBL00>
