Commentary and Analysis

Wheat

Platts European Wheat Daily Commentary

- Milling wheat prices fall on harvest delays
- CIF Marmara drops \$8/mt on new crop offers
- EU cuts wheat yield forecast amid heat wave

The milling wheat market was bearish on June 23, with Platts assessing the milling wheat marker at \$234.25/metric ton, down \$2/mt from the previous assessment.

According to traders, the delayed harvest in July is pushing the market lower.

The CIF Marmara price fell by \$8/mt day over day, a Turkey-based trader said. The new crop is a bit bearish in the market, with competitive offers at \$237/mt.

The offers were around \$240/mt on June 22, and they went down on June 23, the trader added.

The French wheat market eased slightly, with both FOB and CPT falling by around Eur1/mt on June 23 after the previous session's rally.

Market participants remain concerned about an intensifying heat wave across Europe and its potential effects on wheat. Meanwhile, the EU's June MARS bulletin has lowered winter crop yield estimates, with EU soft wheat forecast at 6.0 mt/ha, down from 6.01 mt/ha the previous month, reflecting the dry spring and heat wave conditions in May in parts of western, central, and eastern Europe.

Platts is part of S&P Global Energy.

Platts Asia Wheat Daily Commentary

- Australian wheat prices ease
- EC offers converge with WA
- CWRS bids drop amid lower futures, oil prices

Prices of Australian Premium White wheat and Australian Standard White with no protein guarantee both fell \$1/metric ton day over day to \$274/mt and \$269/mt, respectively, on June 23, partially tracking weakness in the Australian dollar and subdued regional demand.

The Australian dollar was trading at 69.45 US cents at 1630 Singapore time (0830 GMT) on June 23, down 0.81% from the previous session's close.

"East Coast [prices] appear to be gradually moving in line with Western Australia, as sellers have a bit more urgency to sell," a Perth-based trade source said. "I think they were all positioned for a drought, so with rainfall now coming, they need to start moving stocks."

A Singapore-based grains trader said indications were still rangebound at the start of the week and that values needed to drift lower to attract demand.

"The Australian carryout is growing at the moment due to the slow export program," the grains trader said.

Lower offshore futures and oil prices, along with positive weather and crop conditions in Canada, have driven more bearish price expectations among regional buyers for Canadian Western Red Spring wheat new-crop shipments, a Canadian wheat trader said.

However, offers remained quite far from buyer ideas due to expectations of delays in the new-crop harvest, driven by late planting, unseasonal cold weather in parts of Canada and limited old-crop grower selling. Exporters, therefore, were more cautious about being oversold, the wheat trader added.

A Southeast Asian flour miller said Black Sea new-crop wheat offers have held up despite positive crop production outlooks, with 11.5% wheat offers remaining stable in the high \$270s/mt CFR and 10.5% wheat offers in the low \$270s/mt CFR.

The flour miller added that a prolonged heat wave in Europe and its impact on European new-crop quality have supported Black Sea wheat prices, while several Southeast Asian trade sources had earlier flagged weather-related harvest delays in parts of Russia and Ukraine as another supportive factor.

Platts is part of S&P Global Energy.

Platts Canada Wheat Daily Commentary

- Canadian wheat price falls with steep futures decline
- August market thin as buyers already covered

Canadian Western Red Spring Wheat prices fell on June 23 alongside a decline in MIAH Hard Red Spring Wheat September (U) futures, while basis premiums firmed to support prices

Platts assessed Canadian Western Red Spring Wheat 13.5% FOB Vancouver 30-45 days forward at \$267.31/metric ton on June 23, down \$2.57/mt from June 22, as MIAH Hard Red Spring Wheat September (U) futures declined 21 cents/bushel on the day to 617.50 cents/bu.

Farmer engagement remained light following recent futures declines, with traders saying farmer selling had slowed considerably, which supported basis premiums at current levels.

CWRS basis premiums were heard 5-10 cents firmer since the week ended June 19, supported by low farmer sales, rainy weather and declines in futures prices. Some market levels were heard lower earlier in the day, but basis premiums firmed as futures continued to decline throughout the session.

"There has been almost no farmer selling in both Canada and US, so no surprise the basis are firming," a US-based trader said.

Meanwhile, a trader in Canada said the rain and lower flat prices meant farmers were not delivering or selling wheat, so it seemed like basis would continue to firm.

The market remained thin, with no firm August bids, offers or trades reported on the day, as majority of the market was well-covered for the month and focus shifted to September-forward periods.

"We haven't done anything this past few days," a Latin America-based buyer said. "We were already covered [for August]."

A Latin American trader echoed the sentiment, saying that they had not heard anything for August in a few weeks.

"We are not sellers until [September] at the earliest," a Canada-based trader said.

September was heard offered at 115 cents/bu over the December (Z) MIAH HRS wheat futures contract, with November offered at Z plus 105 cents/bu.

Spring wheat futures declines did not have a clear driver, although improved North American crop conditions and lower crude oil prices were potential movers, traders said.

"I don't see any specific thing other than good weather and crop conditions," a second US trader said. "The funds are liquidating their remaining length. The changeover in the spring wheat contract is helping get things rolling, also."

Corn

Platts Asia Corn Daily Commentary

- Asian corn prices rise amid lack of offers
- Buyers sidelined as prices climb above targets
- US exporters focus on soybeans over corn

Asian corn prices rose on June 23 amid a lack of offers from all major origins, while buyers were also sidelined due to rising prices.

Platts assessed feed quality corn CFR Northeast Asia up \$2/metric ton at \$261/mt for cargoes arriving over Sept. 21 to Oct. 21.

Market participants noted a lack of offers from the US, Brazil, and Argentina, with one Singapore trader stating “very boring... empty market...[no offers] mainly because Chicago Board of Trade futures is weak and farmer selling is very limited.”

In Vietnam, market activity was also muted and the Singapore trader who offered corn to Vietnam also said, “We didn’t see anything last night [in terms of deals and bids].”

South American origin corn was offered at \$258/mt CFR Vietnam for August-September shipment partial cargos while October-December shipment partial cargos were offered at \$261/mt CFR Vietnam.

In South Korea, buyers were also on the sidelines “as they have already covered enough demand,” according to a local trade agent.

However, a second trade agent expected Korean feed milling groups to seek deals at the same level as their previous transactions at \$257/mt CFR South Korea, but also noted that “maybe Korean buyers need more time” as tradable levels had risen significantly above expectations.

Downstream feed prices were said to be “acceptable,” although currency exchange rates were a “big risk” according to the first Korean trade agent.

Philippines corn importers were also on the sidelines, while feed wheat tradable levels were heard to be in the low \$300’s/mt CFR for Australian origin.

No US Pacific Northwest corn basis offer indications for September shipment were heard, while October shipment indications were reported at 138-140 cents/bu over December (Z) Chicago Board of Trade futures contract.

“September South American shipments [irregularly] offered,” while “October Pacific Northwest [corn offers] a lot of people might not have,” said a second Singapore-based trader.

US PNW grains exporters were “concentrating on soybeans to China for new crop...not much [corn] offers, even if have would be elevated [pricing],” said a Singapore-based supplier of US grains.

Platts Latin America Corn Daily Commentary

- Latin America corn prices fall with CBOT
- Brazil real weakens 0.79% against dollar
- Winter corn harvest reaches 11% completion

Platts, part of S&P Global Energy, assessed Latin America FOB corn prices lower on June 23 amid declines in Chicago Board of Trade futures.

Argentine FOB Up River premiums for August loading and the Brazilian FOB Santos premiums for August loading remained steady day over day.

The US dollar to Brazilian real exchange rate stood at Real 5.1999/\$1 as of 5:30 pm Brasilia time, up 0.79% day over day.

In Brazil's domestic market, prices remained steady in the Sorriso and Rio Verde regions but increased by Real 1.20 in the Maringá region.

The winter corn harvest reached 11.0% of the expected area, according to data published by the Brazilian agricultural agency Conab on June 22.

The summer corn harvest for the 2025-26 season reached 93.7% of the expected area as of June 19, down from 94.5% a year earlier.

In Mato Grosso, the harvest advanced in the first-planted areas, with high productivity. In Goiás, the rains reduced moisture loss from the grains.

The precipitation that fell provided little benefit to the crops because grain filling had already ended. In Paraná, humid weather interrupted the harvest in several regions.

Platts US Corn Daily Commentary

- Funds turn short as farmer selling remains nil
- Export basis firms on elevation cost pressures
- USDA confirms 100,000 mt Mexico corn sale

US corn market reported on June 15 a business session with still nil farmer selling, even though some truck traffic was reported, as growers start to be more active in emptying bins.

"The funds have now gotten short corn but maybe they won't get much shorter," said a trader source.

On June 15 the Chicago Board of Trade for July (N) future contracts reported a decrease of 1.75 cents in the business day, settling at \$4.0975/bu, while September(U) closed at \$4.1775/bu, losing 2 cents in the same period.

"The Sep-forward part of the curve has weakened the past week, and we have seen some commercial bull spreading take place," said a broker source.

In the export market, trader sources reported firm elevation costs for the new crop coming in August and September, which increased the basis in the FOB Gulf market.

"I still think it's more related to corn basis having to compete with beans for elevation," said a trader source.

Related to the increased demand for US crops, on June 15 the US Department of Agriculture confirmed private export sales of 100,000 metric tons of corn for delivery to Mexico. Of the total, 30,000 mt is for delivery during the marketing year 2025-26 (September-August), and 70,000 mt is for delivery during the MY 2026-27.

Platts, assessed on June 23 the outright price for June shipments to New Orleans in the incoterm CIF at \$193.60/mt and for July shipments at \$196.75/mt. And FOB Gulf for August was assessed at \$205.41/mt.

Platts European Corn Daily Commentary

- Black Sea corn prices fall on weak demand
- Ukrainian corn drops \$4/mt to \$225/mt June 23

The Black Sea corn market declined on June 23 amid slow demand and a transition to the new-crop season, putting pressure on FOB values.

Platts, part of S&P Global Energy, assessed Ukrainian corn at \$225/metric ton on June 23, down \$4/mt from the previous day's assessment, below an offer at \$226/mt for July loading and above a competitive bid for July loading heard at \$240/mt for CIF Marmara, normalized to \$224/mt FOB POC.

In the Ukrainian market, traders attributed the decline to weaker demand in key destination markets, particularly in Turkey, where the feed industry has significantly slowed corn purchases ahead of the July 31 import quota deadline.

The market continued to transition toward the new-crop season. For November-December loadings, Ukrainian corn was heard on offer around \$228-\$229/mt against bids at \$225/mt.

In the CVB market, Platts assessed the price unchanged at \$236/mt day over day, with old-crop offers for July and August still absent due to tight supplies.

Traders in Romania reiterated that the quiet old-crop market is typical for this time of year, as warehouses continue to clear remaining stocks in preparation for the incoming new-crop harvest.

Oilseeds

Platts Asia Soybean Daily Commentary

- Quiet Chinese demand overnight
- Buyers await further US-China deal signals

CFR China soybean month-one August shipment unchanged day over day at \$495.21/metric ton June 23, while basis was up 3 cents/bushel at 218 cents/bu over Aug (Q) Chicago Board of Trade (CBOT) futures.

Overnight, trading liquidity in CFR China remained largely thin. No trades were heard to have transpired.

One reason for the quiet Chinese demand is due to deteriorating crush margins, according to Chinese soybean traders.

As of June 23, the replacement crush margin for the September shipment was calculated at minus Yuan 26/mt, down Yuan 4/mt day over day, according to a Chinese soybean trader.

While crush margins have declined, they are not the main factor keeping buyers sidelined.

"The weaker crush margins are mainly due to last week's expectations of China buying soybeans, along with the sales reported by the US Department of Agriculture," the Chinese trader said.

However, the drop in Brazilian soybean basis has been relatively limited. The market is waiting for more China-US deals, which could lift US soybean prices and, in turn, pressure Brazilian prices further.

"As such, the recent trading activity has been concentrated in nearby shipments for Brazilian soybeans, which is the portion of demand that cannot be deferred. Buyers who can afford to wait are waiting for better opportunities," the trader added.

According to another Chinese soybean trader, if overnight trades were to be done, it would likely be for the August shipment.

Platts is part of S&P Global Energy.

Platts Brazil Soybean Daily Commentary

- Thin trading activity in Paranaguá
- CBOT futures rise

Platts assessed the SOYBEX FOB Santos soybean contract for August loading at \$449.76/metric ton on June 23, up 18 cents/mt from the previous assessment.

CBOT soybean futures were steady to marginally higher, reflecting modest technical gains after recent weakness, while the broader market remains cautious amid good US 2026-27 crop conditions, soft export demand and waiting for clearer buying signals from China, analysts said.

Above, the Brazilian Association of Vegetable Oil Industries, updated its outlook for the country's soybean complex in 2026, confirming another record crop and strong expansion in

processing. Brazil's soybean production is now estimated at about 180.25 million metric tons, reflecting a robust harvest that continues to underpin growth across the sector.

Supported by ample supply, Abiove projects domestic soybean crushing to reach roughly 63 million mt, marking a further increase in industrial activity. This expansion is expected to lift output of higher-value products, with soybean meal production forecast at 48.1 million mt and soybean oil at 12.55 million mt.

In external markets, Brazil is set to maintain its leading position, with soybean exports projected at 114.1 million mt, up about 2.4% from the previous year.

The FOB Paranaguá premiums market saw another session of sluggish activity, with no trades heard on the day.

According to market sources, deteriorating crush margins have subdued Chinese soybean demand while limited declines in Brazilian prices reflect market caution ahead of potential China-US trade deals.

The US dollar versus the Brazilian real settled at Real 5.1886/\$1 at 4:30 pm Brasilia time. Domestic soybean prices were lower in the main producing regions.

Platts is part of S&P Global Energy.

Platts US Soybeans Daily Commentary

- Steady outright prices seen as trading limited
- USDA reports new crop in good condition

The US soybeans market saw a quiet session in both the CIF New Orleans and export markets with a steady FOB Gulf price June 23, as the US Department of Agriculture reported the coming crop in good condition, which could pressure prices further, sources say.

Platts, part of S&P Global Energy, assessed SOYBEX FOB New Orleans for August shipment at \$449.38/metric ton, up about 56 cents from June 22. Platts assessed the basis for FOB Gulf for August shipment steady day over day at 99 cents/bushel over the August (Q) soybeans futures contract.

Platts assessed the outright price for CIF NOLA for July shipment at \$443.50/mt day over day. Platts assessed the basis for CIF NOLA for July shipment at 90 cents/bu over the July (N) soybeans futures contract.

Little trading activity was reported in both markets, with no sign of Chinese participation in US exports.

A trader said some October soybeans traded in the CIF NOLA market.

"But not much else is going on," the trader said.

The futures market showed relatively stable levels day over day, with CBOT July (N) futures increasing 1.25 cents day over day to 1,117 cents/bu, while August (Q) futures climbed 1.5 cents to 1,124 cents/bu.

Another source said some entities could continue selling in the soybean futures market in the coming days, which could pressure prices.

"Some have now gotten short corn," another trader in the CIF NOLA market said. "But maybe they won't get much shorter. They still have work to do in the bean complex, and they'll have to get out by Monday as the first notice day is Tuesday, so unless they're going to deliver, which they won't because they don't have physical, they will be out by then."

Sources said they believed that the good condition of the coming crop, reported weekly by the USDA, could pressure prices without demand.

"It's a big report for sure," the same trader added. "If we have a huge crop and no Chinese inquiry, we will dip, in my opinion."

Until June 21, 93% of the soybeans planted in the 18 largest producing states had emerged, 5% more than the previous week, and 4% more than the percentage reported June 21 last year, according to the USDA's Crop Progress weekly report published June 22.

Regarding the condition of the new crop, the department reported percentages similar to those of 2025 but fewer beans in very poor condition (1% compared with 2% in 2025). In good condition were 56% of soybeans, with 28% in fair condition, 10% in excellent condition and 5% in poor condition.

On June 21, 9% of the soybeans planted were blooming.

Animal Feed

Platts Latin America Soybean Meal Daily Commentary

- FOB prices increase amid higher CBOT references
- FOB Paranaguá basis firms up for August loading
- Brazil's April soy crush reaches 5.60 million mt: Abiove

South American soybean meal FOB prices increased on June 23, primarily driven by higher Chicago Board of Trade futures.

In Argentina, sellers of FOB Up River August-loading cargoes raised their offers to as high as a \$7/short ton premium over the CBOT references. A trade for August-September dates was reported during the day.

Argentine sources warned that oilseed workers' unions might go on strike by June 26, as no agreement has been reached to date under the government-imposed mandatory conciliation.

Brazil's FOB Paranaguá, in turn, was quieter, with no deals reported. Premium ideas for August shipments firmed, with price discussions for that period last seen at \$3-\$5/st over the CBOT benchmarks.

According to the Brazilian Association of Vegetable Oil Industries, Abiove, Brazil crushed 5.60 million metric tons of soybeans in April, in line with S&P Global Energy CERA analysts' expectations.

"Crush margins continue to show profitability, supported by resilient soybean meal and oil prices driven by firm demand from both domestic markets and exports," the analysts said.

For 2026, Abiove forecasts that Brazil will produce and export 48.60 million mt and 24.95 million mt of soybean meal, respectively.

The CBOT August (Q) contract settled at \$302/st, up \$2.10/st.

Platts European Animal Feed Daily Commentary

- Euro-dollar rates increase transport costs
- Spanish corn and soymeal markets hold steady

Northern Europe

The Dutch market experienced a bearish trend on June 23, with lower offers for August.

"July prices are now cheaper because of the inverse nature of the origin markets," a trader said. He also noted that August could be somewhat tight, as replacement costs are factored in.

A second trader commented on the corn market, saying that the euro-dollar exchange rate is increasing transportation costs and that low water levels have driven up the price of French corn.

Southern Europe

The Spanish corn market remained steady on June 22.

"The euro-dollar exchange rates are driving up freight costs," a broker said. "The market is quiet, amid rising prices."

The Spanish soybean meal stayed unchanged day over day.

Platts US Distiller Grains DDGS Daily Commentary

- Market remains quiet, values decline
- June shipments struggle amid weak demand

The US dried distillers grains with solubles market remained quiet June 23, with participants reporting limited activity and continued weakness as values extended their decline from last week.

Platts assessed CIF New Orleans DDGS barges for the June shipment period at \$181/short ton on June 23, the Chicago DDGS truck market for the July delivery period was assessed at \$162/st and the South California rail market for the June delivery period was assessed at \$209/st.

"Very quiet start to the week," a broker said, adding that market sentiment remained soft. "Things still feel heavy."

Another broker pointed to the difficulty of generating interest in nearby positions and that June business has been particularly challenging to place.

Lower export demand, softer feed ingredient markets and seasonal demand weakness continued to weigh on sentiment.

Platts is part of S&P Global Energy.

Vegetable Oils

Platts Asia Palm Oil Daily Commentary

- Asian palm oil futures decline
- Malaysia's CPO production rises 4.76% over June 1-20

The Asian palm oil market declined June 23, with palm oil futures on Bursa Malaysia declining, amid strength in other rival oil futures.

The Malaysian Palm Oil Association showed Malaysia's overall CPO production increased 4.76% for June 1-20.

Data from Malaysia's Ministry of Plantation and Commodities on June 23 further showed that Malaysia has a solid supply base, with the total palm oil supply estimated at 22.76 million tons, of which 15.27 million tons will be used to meet global export demand.

KPK also added that, given the current supply position of the country's palm oil, expanding biodiesel implementation to B30 would use approximately 7% of Malaysia's total palm oil supply, demonstrating that the country has sufficient capacity to meet export market demand and domestic consumption simultaneously.

The benchmark palm oil contract for September delivery on the Bursa Malaysia commodity exchange fell MR16/mt to MR4,656/mt on June 23.

The Indian market was active, with one trade heard, while demand in the domestic market remained slow.

"The stronger Indian Rupee and narrowing parity of palm oil made it a good time for buyers to purchase palm oil, however buyers continue to remain cautious given the sufficient supply in the domestic market," an India-based trader said.

About 20,000-25,000mt of CPO were traded across EC India and WC India on June 23. CPO was traded at \$1,217.50-\$1,220/mt for July shipment to EC India, while CPO was traded at \$1,230/mt for June-July shipment to WC India.

"Buyers remain cautious on buying and are waiting to see the developments after the implementation of the B50 mandate in Indonesia," a Malaysia-based trader said.

Platts assessed crude palm oil CFR WC India price at \$1,230/mt June 23 for July loading, unchanged from June 22, while August shipment was \$10/mt higher than July.

Platts assessed CPO FOB Indonesia at \$1,195/mt June 23 for July loading, down \$2.50/mt from June 22, while August shipment was \$10/mt higher than July.

Platts assessed RBDPS FOB Indonesia at \$1,057.50/mt June 23 for July loading, down \$7.50/mt from June 22, while August shipment was \$10/mt higher than July.

Platts assessed PFAD FOB Indonesia at \$1,000/mt June 23 for July loading, down \$5/mt from June 22, while August shipment was \$10/mt higher than July.

Platts is part of S&P Global Energy.

Platts Latin America Soybean Oil Daily Commentary

- Brazilian, Argentine soybean oil prices rise
- FOB basis levels strengthen 100 points higher
- Physical markets diverge from falling futures

Brazilian and Argentine soybean oil FOB markets strengthened on June 23, as export values and basis levels increased despite a modest decline in Chicago Board of Trade soybean oil futures.

CBOT August soybean oil futures fell 0.63% day over day to 69.12 cents/pound. Market participants said soybean oil futures remained under pressure from favorable US crop conditions and expectations for ample global oilseed supplies, although losses were relatively limited compared with the sharp declines seen earlier in June.

In Argentina, Platts assessed the soybean oil FOB Up River price for August loading at \$1,160.07/metric ton on June 23, up \$12.34/mt from June 22. The basis for August loading in the Up River paper market was assessed 100 points higher at minus 1,650 points to August (Q) futures at the Chicago Board of Trade.

In Brazil, Platts assessed the soybean oil FOB Paranaguá price for August loading at \$1,182.12/mt on June 23, up \$12.35/mt from June 22. The basis for August loading in the Paranaguá paper market was assessed 100 points higher at minus 1,550 points to the August (Q) futures at the Chicago Board of Trade.

Platts also assessed the soybean oil FOB Paranaguá price for September loading at \$1,170.66/mt on June 23, up \$14.11/mt from June 22. The basis for September loading in the Paranaguá paper market was assessed 100 points higher at minus 1,500 points to the September (U) futures at the Chicago Board of Trade.

Market participants said the continued strengthening in FOB basis levels reflects a further recovery from the historically weak discounts observed in late May and early June. Traders said South American soybean oil export values have remained comparatively resilient despite the recent correction in CBOT soybean oil futures.

Participants said the divergence between futures and physical markets remains one of the key themes in the soybean oil market. While CBOT soybean oil futures have declined significantly from the multiyear highs reached earlier this month, FOB soybean oil prices in both Brazil and Argentina have remained relatively stable as stronger basis levels offset much of the weakness in futures.

At the same time, traders continued to monitor developments in Argentina's oilseed sector following recent labor negotiations, although no significant disruptions to soybean oil export flows have been reported. Market participants also said that abundant soybean supplies across South America continued to provide a comfortable supply backdrop for export markets despite the recent recovery in basis levels.

Platts is part of S&P Global Energy.

Platts Europe Vegetable Oil Daily Commentary

- Weather concerns supports rapeseed price recovery
- Processors, exporters expected to compete aggressively
- Declining oilseed stocks underpin new-crop demand

European vegetable oil markets strengthened, led by gains in nearby rapeseed oil positions, while sunflower oil remained unchanged. RSO FOB Dutch Mills front-month rose Eur10/metric ton to Eur1,154/mt, while the second position gained Eur9/mt to Eur1,151/mt. Third and fourth positions were unchanged at Eur1,135/mt and Eur1,129/mt respectively. FOB Black Sea sunflower oil remained stable at \$1,379/mt, indicating that support remains concentrated within the rapeseed complex rather than the broader vegetable oil market.

The strength in rapeseed oil is being driven by increasingly cautious production expectations for the upcoming harvest. According to a trader based in Ukraine, "the cool spring has left rapeseed yield potential at an average level." The source added that "insufficient rainfall in the western regions of Ukraine during May-June" has become "an additional negative factor," further limiting harvest prospects. These weather concerns are reducing confidence in the availability of new-crop supplies and supporting nearby rapeseed values.

At the same time, strong competition for demand is expected once harvesting begins. The trader based in Ukraine stated that "high competition is expected between exporters and processors at the start of the new season." This reflects growing expectations that both export buyers and domestic crushers will compete aggressively for available seed volumes. Such competition is particularly significant given the increasing role of domestic processing in Ukraine's oilseed sector.

The same source noted that "processors will seek to supply their plants with raw materials for July-August amid declining sunflower and soybean stocks." As inventories of alternative oilseeds decline, processors are expected to become increasingly active in the rapeseed market, potentially providing additional support to domestic prices. In Europe, these developments reinforce the view that, despite generally favorable crop conditions earlier in the season, concerns over yield potential and strong competition for seed could continue to underpin rapeseed oil prices as the new crop campaign approaches.

Funds lead soybean oil liquidation as futures retreat from multiyear highs

- Funds cut soybean oil longs as prices fall 7%
- Managed Money reduces net position 33,519 lots
- Commercials net-short exposure relatively unchanged

Managed Money traders reduced bullish soybean oil exposure for a second consecutive week during the period ended June 16, extending a liquidation trend that coincided with a correction in

Chicago Board of Trade soybean oil futures from multiyear highs, according to the latest Commitments of Traders report from the US Commodity Futures Trading Commission.

CBOT July soybean oil futures fell from 78.41 cents/pound on June 2 to settle at 72.92 cents/lb on June 16, a decline of about 7%. Over the same period, Managed Money reduced its net-long soybean oil futures and options position by 33,519 contracts, from 156,433 contracts on June 2 to 122,914 contracts on June 16.

Managed money soybean oil positions

Source: CFTC

Market participants said the positioning data suggests speculative liquidation was a major contributor to the recent decline in soybean oil futures.

Managed Money drives the selloff

Managed Money, which primarily represents commodity trading advisors, hedge funds and other speculative investment managers, held 147,171 long positions and 24,257 short positions as of June 16, resulting in a net-long position of 122,914 contracts. One week earlier, funds held a net-long position of 131,436 contracts.

The weekly reduction reflected a decline of 12,209 long positions and 3,687 short positions. Net-long exposure therefore fell by 8,522 contracts during the reporting week.

The pattern follows the previous reporting period, when funds reduced net-long exposure by about 25,000 contracts from June 2-9 as soybean oil futures retreated from their highest levels since 2022.

Market participants said the positioning changes indicate investors were primarily taking profits following a powerful rally rather than aggressively establishing new bearish positions.

CBOT Soybean oil front month futures contract

Source: S&P Global Energy

Commercials remain steady

While Managed Money was actively reducing exposure, other major trader categories showed relatively limited changes.

Producer-Merchant-Processor-Users, generally considered the commercial hedging community and representing soybean crushers, processors, exporters and end users of soybean oil, maintained largely unchanged net-short exposure during the week. Market participants said this suggests the recent decline in soybean oil futures was not driven by increased producer hedging activity or a significant change in commercial market sentiment.

Swap Dealers, which typically represent banks and financial institutions managing over-the-counter commodity exposure on behalf of clients, slightly increased their net-long position during the reporting period. Traders noted that the category showed little evidence of bearish positioning.

Other Reportables, a category that includes large traders that do not fit within the commercial, swap dealer or managed money classifications, recorded only modest changes in positioning and remained broadly neutral during the week.

The largest shift outside of Managed Money occurred among Nonreportable traders, often viewed as smaller speculative participants. Their net-long position fell from about 11,500 contracts to fewer than 1,000 contracts. Traders said the sharp reduction suggests smaller investors also became significantly less bullish during the reporting period.

The divergence between commercial and speculative categories reinforces the view that investor repositioning, rather than a meaningful deterioration in commercial fundamentals, was the primary driver behind the decline in soybean oil futures.

Funds remain historically bullish

Despite two consecutive weeks of liquidation, Managed Money remains one of the most bullish participant groups in the soybean oil market.

The current net-long position of 122,914 contracts remains historically elevated and represents roughly 15% of total soybean oil futures and options open interest.

Traders noted that while speculative enthusiasm has moderated, funds continue to maintain substantial bullish exposure compared with historical norms.

Market participants continue to cite expanding renewable diesel production capacity, implementation of the 45Z clean fuel tax credit and proposed increases to biomass-based diesel blending requirements as supportive long-term demand drivers for soybean oil.

The pace of liquidation has also slowed. Managed Money reduced net-long exposure by roughly 25,000 contracts during the week ended June 9, compared with approximately 8,500 contracts during the week ended June 16.

Market participants said future COT reports will be closely monitored for signs that speculative selling is approaching exhaustion. While recent liquidation has contributed to lower soybean oil futures, the remaining net-long position suggests funds continue to maintain a constructive longer-term outlook for the market.

Subscriber Notes

Platts corrects Soybean meal FOB Netherlands assessment for June 9

Platts, part of S&P Global Energy, has corrected the assessment for the Soybean meal FOB Netherlands (EUPMQ00) for June 9.

The assessment should read as Eur357/mt. The correction has been updated in the Platts database under the code EUPMQ00.

The assessment appears in Platts Connect on fixed page PAA(0805) and in Platts Daily Grains.

Assessment Rationale

Grains

Platts Ags EMEA Wheat Daily Rationale

Platts assessed the Milling Wheat Marker at \$234.25/metric ton on June 23, down \$2/mt from the previous assessment.

Russian 12.5% handysize wheat, assessed at \$234.25/mt, was the most competitive wheat out of the three components of the Milling Wheat Marker, which also includes Ukraine 11.5%, normalized to the nearest 25 cents of \$237.5/mt when adding May's quality normalization of \$6.15/mt, to account for its lower protein content, and CVB 12.5% wheat assessed at \$239/mt on the day. This reflects the Platts assessment window from July 21-Aug. 4.

Platts assessed Black Sea wheat (Russian deepsea, 12.5% protein) down \$2/mt at \$234.25/mt on June 23, above a bid at \$234/mt and below offer at \$236/mt for July and above the bid at \$229/mt and below the offer at \$232/mt for August. The market is in a backwardation of \$4/mt was assessed between the second half of July and H1 August. Market participants said July prices were higher amid a delayed harvest. This reflects the Platts assessment window from July 21-Aug. 4.

Platts assessed Black Sea wheat (Ukraine deepsea, 11.5% protein) down by \$2.50/mt at \$231/mt on June 23, amid low demand, market participants said, below an offer at \$232/mt. This reflects the Platts assessment window from July 21-Aug. 4.

Exclusions: No market data was excluded from the June 23 Black Sea wheat assessments.

Platts Asia Wheat Daily Assessment Rationale

Platts assessed Australian Premium White wheat down \$1/metric ton day over day at \$274/mt FOB Kwinana on June 23 for cargoes loading between Aug. 22 and Sept. 21, tracking lower indicative values at \$274/mt.

Platts assessed Australian Standard White wheat with no protein guarantee down \$1/mt day over day at \$269/mt on June 23 for cargoes loading over the same period, partially tracking a weaker Australian dollar against the US dollar, lower indicative values at \$269/mt and maintaining a \$5/mt spread between APW wheat and ASW wheat with no protein guarantee.

Platts is part of S&P Global Energy.

Asia wheat assessments can be found on <PAA2440>.

Market commentary can be found on <PAA2699>.

This rationale applies to the symbol <WAUSA00>.

Platts Canada Wheat Daily Rationale

Platts assessed Canada Western Red Spring Wheat 13.5% FOB Vancouver 30-45 days forward at \$267.31/metric tons on June 23, \$2.57/mt lower than June 22.

CWRS Wheat 13.5% FOB Vancouver basis 30-45 days forward, spanning July 23 – Aug 7 was assessed 14 cents higher at MIAH Hard Red Spring Wheat September (U) futures plus 110 cents/bushel based on August value heard at U plus 110 cents/bu.

CWRS Wheat 13.5% FOB Vancouver basis 45-60 days forward, spanning Aug 7 – Aug 22 was assessed 14 cents higher at U plus 110 cents/bushel based on August value heard at U plus 110 cents/bu.

CWRS Wheat 13.5% FOB Vancouver basis 60-75 days forward, spanning Aug 22 – Sept 6 was assessed 9 cents higher at U plus 105 cents/bushel based on last-half August/first-half September value heard at U plus 105 cents/bu.

Exclusions: No data was excluded in the assessments.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <AWHCA00> <AWHCB00> <AWHCC00><AWHCD00><AWHCE00 ><AWHCF00>.

Platts Asia Corn Daily Rationale

Platts assessed corn CFR Northeast Asia up \$2/metric ton day over day at \$261/mt CFR June 23 for feed-quality corn arriving over Sept. 21 to Oct. 21 into Pyeongtaek, above an indicative bid at \$257/mt CFR and below a normalized offer at \$276.01/mt CFR.

Platts is part of S&P Global Energy.

Asia corn assessments can be found on <PAA2440>

This rationale applies to symbol(s) <WCINV00>

Platts Argentina Corn FOB Up River Daily Rationale

Platts assessed corn FOB Up River for loading in August at \$201.48/metric ton on June 23, 78 cents/mt lower from the previous assessment.

The assessment considered the FOB premium for Up River August-loading cargoes unchanged at plus 94 cents/bushel to Chicago Board of Trade September (U) corn futures, based on

steady offers heard at U plus 100 cents/bu and bids heard at U plus low 90s cents/bu at the market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <ARGCA00> <ARGCB00>

Platts Brazil Corn Daily Rationale

Platts assessed the Brazilian corn FOB Santos price for August loading at \$213.67/metric ton on June 23, 79 cents/mt lower from the previous assessment.

The assessment considered the FOB Santos basis for August loading cargoes unchanged at plus 125 cents/bushel to the Chicago Board of Trade September (U) contract, based on offers for first-half August loading at U plus 127 cents/bu, offers for H2 August loading at U plus 125 cents/bu and no bids heard at the market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <ABCSA00> <ABCSB00>

Platts US Corn Daily Assessment Rationale

Platts assessed the US Yellow Corn No. 2 CIF New Orleans barge basis for June shipment at 82 cents/bushel over the CBOT July (N) corn futures contract on June 23, up one cent from the previous business day. This was based on bids heard at 81 cents/bu and offers at 84 cents/bu.

Platts assessed the US Yellow Corn No. 2 CIF New Orleans barge basis for July shipment at 90 cents/bu over the Chicago Board of Trade July (N) corn futures contract on June 23, down one cent from the previous assessment. This was based on bids heard at 89 cents/bu, and offers at 91 cents/bu.

Platts assessed the US Yellow Corn No. 2 FOB Gulf basis for August shipments at 104 cents/bu over the CBOT September (U) corn futures contracts on June 23, up from the previous session. This was based on a value indication heard at 104 to 105 cents/bu. Sources reported higher basis levels due to firm elevation costs. Later on the day, offers were heard at 107 cents/bu for the first half of August, and 110 cents/bu for the second half of the month.

No information was excluded from the assessment.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <WCNOE00> <WCNOU00>

Platts FOB Black Sea Corn Daily Assessment Rationale

Platts assessed Ukrainian corn down \$4/metric ton at \$225/mt on June 23, below an offer at \$226/mt for July loading and above a competitive bid for July loading heard for CIF Marmara at \$240/mt, normalized to \$224/mt. The normalization reflects the freight rate of \$16/mt from Ukraine ports to Marmara port. The structure between the second half of July and the first half of August was assessed flat. This reflects the Platts assessment window from July 21 to Aug. 4.

Exclusions: No market data was excluded from the June 23 Black Sea corn assessment.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <CUBSU00>

Oilseeds.

Platts Asia Soybeans Daily Rationale

Platts assessed CFR China first-month soybeans unchanged day over day at \$495.21/metric ton, while basis was up 3 cents/bushel at 218 cents/bu over Aug (Q) CBOT June 23, tracking normalized indicative value at 218 cents/bu and below the sharpest normalized offer at 220 cents/bu over Aug (Q), for Brazil August shipment.

Platts assessed CFR China second-month soybeans up 92 cents/mt day over day at \$504.12/mt, while basis was unchanged at 223 cents/bu over Nov (X) CBOT, below the sharpest offer at 230 cents/bu over Nov (X), for Brazil September shipment.

Platts is part of S&P Global Energy.

Platts Brazil Soybean Daily Assessment Rationale & Exclusions

Platts assessed the SOYBEX FOB Santos soybean contract for August loading at \$449.76/metric ton on June 23, up 18 cents/mt from the previous assessment.

The FOB Santos basis for August loading was assessed 1 cent/bushel lower at plus 100 cents/bushel to the Chicago Board of Trade August (Q) contract, based on a spread to the Paranaguá paper market heard at parity. No bids or offers were heard for the full August loading of FOB Santos cargo on the day.

The FOB Paranaguá basis for August loading was assessed 1 cent/bu higher at plus 100 cents/bu to the CBOT (Q) contract, based on an indicative value heard at that level, higher offers at Q plus 105 cents/bu and lower bids at Q plus 95 cents/bu at the market close.

Platts assessed the SOYBEX FOB Santos soybean contract for March loading at \$426.34/mt on June 23, down \$1.01/mt from the previous assessment.

The FOB Santos basis for March loading was assessed 2 cents/bu lower at minus 2 cents/bu to the CBOT March (H) contract, based on a spread to the Paranaguá paper market last heard at parity. No bids or offers were heard for the full March loading of FOB Santos cargo on the day.

The new crop FOB Paranaguá basis for March loading was assessed 2 cents/bu lower at minus 2 cents/bu to the CBOT March (H) contract, based on an indicative value heard at that level, higher bids at H minus 10 cents/bu and lower offers at parity at the market close.

Exclusions: No data was excluded.
