Commentary and Analysis

Wheat

Platts European Wheat Daily Commentary

- Russian wheat prices hold at \$232-\$233/mt
- Egyptian market stays quiet amid oversupply
- French wheat weakens Euro1.50/mt on heat concerns

The milling wheat market remained steady on June 25.

Russia-based traders and brokers reported that competitive prices for July and August are \$233/metric ton and \$232/mt, respectively.

A Russia-based trader said the Egyptian wheat market remained quiet, as importers receive leftover old-crop shipments, keeping trade slow. He also noted that Egypt is oversupplied with wheat and expects a bountiful local harvest, which will push prices lower in Egypt.

The French wheat market weakened on June 25 after last session's rally, with both FOB and CPT down by Euro1.50/mt. CPT Rouen bids were heard at Eur3 over MU for July/August/September and at Eur3 over MZ for October/November/December.

A France-based broker said heat and dryness have become the dominant themes, particularly for EU grains, but noted that the impact is less pronounced on French wheat, with harvest starting in some regions.

Platts Asia Wheat Daily Commentary

- Australian wheat strengthens
- Tighter Sep capacity supports prices
- Philippines buyer to seek feed wheat

Australian Premium White and Australian Standard White with no protein guarantee wheat rose \$2/metric ton day over day to \$275/mt and \$270/mt, respectively, on June 25, tracking stronger value indications and thinning availability for September shipments due to seasonal port maintenance, though a soft Australian dollar remained bearish for prices.

Several Australian trade participants said tighter capacity for September shipments remained a supportive factor for Australian FOB prices, driven by scheduled port shutdowns approaching the end of the marketing year in September.

"There isn't much capacity left in Western Australia," a trade participant said.

"In South Australia, a lot [of ports] are down as well. They tend to rotate but capacity is at 75% basically. However, the exports of other grains have slowed down, so wheat capacity probably is not so much impacted," said another grains trader. However, the trader said wheat prices still needed to come off to compete in the export market, adding that "in April, [APW] it was in the \$260s/mt."

Sentiment around new crop production remains positive, said several trade participants, as widespread rain continues to improve prospects despite strong El Niño forecasts by multiple weather models, including Australia's Bureau of Meteorology.

A feed buyer from the Philippines will be inviting offers of feed wheat for Sept. 25 arrival in an international buy tender June 26, according to a Singapore-based trader and an Australia-based trader.

Platts is part of S&P Global Energy.

Platts Canada Wheat Daily Commentary

- August basis premiums firm on supply tightness
- Flat prices continue downward with weak futures

Platts, part of S&P Global Energy, assessed Canada Western Red Spring Wheat at 13.5% FOB Vancouver, 30-45 days forward at \$266.76/metric ton on June 25, 28 cents/mt lower than on June 24, as futures continued their weeklong decline.

September (U) MIAX Hard Red Spring Wheat futures contract closed 1.75 cent/bushel lower day over day at 616.50 cents/bu, while the December (Z) contract fell 1.25 cent/bu to 640.50 cents/bu.

Overall market activity remained subdued day over day, as low prices kept producers from making sales.

August basis premiums firmed day over day, with bids heard higher as buyers moved to secure grain from farmers ahead of the month's arrival.

"I think [August is firmer] only because as the calendar flips to July — time is running out to buy further [August supply] from the farmer, to have in position for [August delivery] dates," a Canada-based trader said.

Crop unavailability was reflected in market sentiment, with many participants noting limited activity during the period.

"Have not heard anything on the August," a second Canada-based trader said, while a Bangladesh-based buyer said, "August [is] difficult to come about."

Some interest was still heard, however, with an August bid at U plus 110 cents/bu and offers unchanged at U plus 115-120 cents/bu. Market interest shifted to new-crop months, October-December, with offers ranging from Z plus 110-115 cents/bu.

Japan's Ministry of Agriculture, Forestry and Fisheries is expected to issue a tender on July 1 for September positions.

Corn

Platts Asia Corn Daily Commentary

- Asian corn prices fall on lower freight
- South Korea buys South American November arrival corn
- Upcoming Philippines tender favors feed wheat over corn

Asian corn prices fell June 25, tracking lower freight rates and following a deal for South American corn to South Korea, while Chicago Board of Trade futures also softened slightly.

Platts assessed feed-quality corn CFR Northeast Asia down \$1/metric ton day over day at \$260/mt for cargoes arriving over Sept. 23-Oct. 23.

A private trade for November delivery, September shipment South American corn was heard to have concluded at \$260.45/mt CFR South Korea on June 24, market sources with knowledge of the matter said.

"The South Korean buyer group checked the price and preferred South American origin ... their focus was on swine feed," a South Korea-based local trade agent said.

Freight rates from the US Pacific Northwest to Pyeongtaek were reported in the range of \$34-\$36/mt for October-November shipments, while Argentina-Pyeongtaek freight was reported at \$54-\$55/mt, and Brazil-Pyeongtaek freight for August-September shipments was estimated at \$48/mt, in a survey of several grain traders.

In the Philippines, a soybean meal import tender concluded June 24, while a Philippines buying group announced a re-tender for feed corn or feed wheat imports to be concluded June 26, two Singapore-based traders said.

The Philippines feed corn/wheat tender was for Sept. 25 arrival, with three port discharge at Davao, Cebu and Cagayan De Oro city. One of the Singapore-based traders estimated tradable

levels at \$300/mt for Australian feed wheat, adding that feed corn was not competitive due to a 15% import tax.

South America-origin corn was offered at \$255/mt CFR Vietnam for August-September shipment partial cargoes, down \$2/mt day over day, while October-December shipment partial cargoes were offered at \$259.50/mt CFR Vietnam, down \$1.50/mt day over day.

US Pacific Northwest corn basis offer indications for September shipment were heard at 160 cents/bu over the September (U) CBOT futures contract.

"September shipment PNW is close to 160 cents/bu (U) CBOT, so maybe [the destination market] can be a South America-origin game. But [prices] are still higher than what was traded two weeks ago ... [there are] lots [of long positions for SAM corn]," said a third Singapore-based trader.

Platts is part of S&P Global Energy.

Platts Latin America Corn Daily Commentary

- Steady premiums in Latin America
- Winter corn harvest reaches 3% in Paraná

Latin America FOB corn prices rose June 25, tracking Chicago Board of Trade futures prices.

Argentine FOB Up River premiums for August loading and the Brazilian FOB Santos premiums for August loading were unchanged.

CBOT corn (Sep)	¢/bu	CBAAF02	424.25	+8.50

The US dollar to Brazilian real exchange rate stood at Real 5.1940/\$1 as of 5:30 pm Brasilia time, down 0.36% day over day.

In Brazil's domestic market, prices remained steady in the Sorriso, Rio Verde, and Maringá regions.

A buyer in the Rio Verde region reported that producers are limiting spot corn availability, expecting that reduced yields in Goiás may support prices as the harvest advances.

Meanwhile, the source said buyers have sufficient inventory coverage and are not looking to increase bids.

The Paraná State Agribusiness Department reported June 23 that the winter corn harvest reached 3% of the state area as of June 22. Regarding crop conditions, 79% was rated as good.

DERAL reported that the crops are showing positive development, with most areas in the fruiting, grain-filling, and early-ripening stages. In some regions, excess moisture and low sunlight have caused a delay in the cycle and spotty stagnation in development. Harvest is progressing gradually and remains limited due to high grain moisture content, with expectations of intensification in the coming weeks if weather conditions remain favorable. There is concern about the possibility of frost in areas that are still in a sensitive stage, the report said.

Platts US Corn Daily Commentary

- USDA reports 743,100 mt of corn exports in week to June 18
- Export commitments reach 99% of CERA's projections

The US corn market tracked energy prices June 25 after an apparent maritime attack in the Strait of Hormuz, pushing weather concerns over the emerging crop to the background.

“People seem to be mostly ignoring the weather still for the time being,” a trader source said.

S&P Global Energy CERA projects some heavier rain from eastern Kansas to southwestern Illinois, where 2 to 5 inches are possible, and temperatures should turn higher than usual next week after being a little lower than usual.

July (N) Chicago Board of Trade futures contracts increased 7.75 cents to \$4.1475 June 25, while the August (Q) contract settled at \$4.2425/bushel, rising 8.50 cents.

The US Department of Agriculture released its export sales report June 25. It showed 743,100 mt of corn exported during the week ended June 18, down 36% from the prior week, and 0.2% above the same week of 2025.

Export commitments totaled 3,332 million bu, the USDA said, which represent 99% of CERA's current projection for marketing year 2025-26 (September-August), above the five-year average.

Platts assessed the outright price for July shipments to New Orleans in the incoterm CIF at \$197.95/mt June 25 and for August shipments at \$203.25/mt. FOB Gulf for September was assessed at \$208.75/mt.

Platts is part of S&P Global Energy.

Platts European Corn Daily Commentary

- Ukrainian corn stays at \$224/mt FOB POC
- Romanian, Bulgarian corn down \$5 amid limit activity
- South American supplies dominate buyer interest

Platts assessed Ukrainian corn unchanged at \$224/metric ton FOB POC on June 25, while Romanian and Bulgarian corn was assessed down \$5/mt at \$231/mt FOB CVB.

Market activity in the POC market remained slow as Ukrainian exporters were unable to compete in Egypt. Ukrainian corn remains overpriced compared to South American origins, leaving exporters unable to secure new business in the Egyptian market.

Ongoing loadings of alternative crops at Ukrainian ports are limiting available loading berths for corn, further restricting immediate spot trading activity.

Egyptian buyers are well covered through July and August with the arrival of previously booked Argentine cargoes. Importers' attention has shifted to September shipments of Brazilian new-crop corn, though buyers remain cautious amid firming freight rates.

In the CVB market, prices fell as there is effectively no active CVB market for the July and August loading windows amid a complete lack of trading.

Traders indicated that CVB corn would trade at a premium of about \$5-7/mt above Ukrainian FOB POC values. Romanian sellers are prioritizing the clearing of remaining old-crop warehouse stocks to prepare storage facilities for the incoming winter barley and rapeseed harvests.

Oilseeds

Platts Asia Soybean Daily Commentary

- Traders transact four-five cargos for Aug-Sep
- June Brazil shipments reach 8.71 mil mt

CFR China soybean month-one August shipment was down \$0.19/mt on the day at \$493.01/mt June 25, while basis was up 4 cents/bu at 221 cents/bu over Aug (Q) Chicago Board of Trade futures.

Market activity for CFR China soybeans picked up overnight, with traders estimating about 4 to 5 Panamax cargos transacted for August, August-September straddle month, and September shipments.

Deal levels were heard at 200 cents/bu over November (X) CBOT for August shipment cargos, although tradable levels were heard to have firmed up by about 5 cents/bu since CBOT trading hours closed in the US.

Meanwhile, August-September straddle shipment was heard traded at 215 cents/bu over November (X) CBOT, while September cargos were estimated to be tradable at 220-223 cents/bu over November (X) CBOT.

A Chinese broker estimated that Brazilian soybeans shipments to China in the month of June to be at 8.71 million mt.

Platts Brazil Soybean Daily Commentary

- Santos soybean prices rise \$7.08 to \$456.38/mt
- Brazil enforces soybean fallow period until Sept
- Chinese demand boosts CBOT soybean futures higher

Platts, part of S&P Global Energy, assessed the SOYBEX FOB Santos soybean contract for August loading at \$456.38/metric ton on June 25, up \$7.08/mt from the previous assessment.

CBOT soybean futures settled higher across the board, as data from the US Department of Agriculture confirmed a strong Chinese presence in the US market following purchases made the prior week, analysts said.

The soybean sanitary fallow period, established by Brazil's Ministry of Agriculture and Livestock, is now in effect in Mato Grosso do Sul and will run until Sept. 15, 2026.

During this window, farmers are strictly prohibited from keeping live soybean plants on their properties, including volunteer plants, locally known as "guaxa," that sprout naturally after harvest.

This measure is one of the main strategies used to control Asian soybean rust, a disease considered among the most severe affecting the soybean crop.

Trading activity was seen as slow in the Brazilian FOB market, with no trades heard day over day.

The US dollar versus the Brazilian real settled at Real 5.1781/\$1 at 4:30 pm Brasilia time. Domestic soybean prices were higher in the main producing regions.

Platts US Soybeans Daily Commentary

- US soybean prices rise on geopolitical concerns
- USDA reports 455,405 mt in weekly export sales
- China buying rumors circulate but remain unconfirmed

US soybeans Platts outright prices increased on June 25, tracking the Chicago Board of Trade future contracts of July (N), which closed at \$11.2750, jumping 18.75 cents during the session, and August (Q), which went up 20.25 cents to \$11.3700/bu.

Sources said that futures were impacted in the business day by geopolitical tensions. "Iran attacked an oil tanker in the Strait of Hormuz this morning," said the source.

Another source also said there were rumors of China buying, but none confirmed the purchase.

The latest China purchase was 132,000 mt, confirmed by the US Department of Agriculture in its daily sales last week. On May 17, the White House released a fact sheet on the US-China talks, stating in part that "China will purchase at least \$17 billion per year of US agricultural products in 2026 (prorated), 2027, and 2028, in addition to the soybean purchase commitments that it made in October 2025."

On June 25, the USDA export sales release reported 455,405 mt of marketing year 2025-26 (September-August) soybean sales

Animal Feed

Platts Latin America Soybean Meal Daily Commentary

- Higher CBOT futures support FOB prices
- Argentina’s strike threat remains on the radar

Rising Chicago Board of Trade futures pushed South American soybean meal FOB prices higher on June 25.

The CBOT August (Q) contract settled at \$306/short ton, up \$4/st, tracking gains across the soybean complex amid improving optimism about US export demand and heatwave-related concerns, market participants said.

Nearby premiums weakened in both Brazil’s FOB Paranaguá and Argentina’s FOB Up River markets as traders lowered basis levels to offset CBOT’s rise. Buyers lowered bid ideas to a discount to the CBOT benchmarks.

The Brazilian paper market saw parcels negotiated for August and September, while attention in Argentina remained on wage negotiations in the soybean-crushing industry. The mandatory conciliation was expected to expire by the end of June 25.

In the meantime, Argentine farmers negotiated 1.05 million metric tons of soybeans for the 2025-26 marketing year (April-March) in the week through June 17, up from 612,800 mt the previous week, according to the Ministry of Economy. The volume includes sales for export and crushing.

With that, cumulative sales for MY 2025-26 reached 19.72 million mt, compared with 22.34 million mt at this time last year for MY 2024-25.

Platts European Animal Feed Daily Commentary

- Dutch feed prices firm on tight supply
- Spanish grain climbs on heat wave, EUR rates
- Soybean meal rises on supply, CBOT gains

Northern Europe

The Dutch market was active on June 25, with prices remaining firm due to limited supply from origin markets, according to market participants.

A Netherlands-based trader said the price difference between July and August has essentially disappeared, now only about Eur2-3/metric ton. He also noted that although demand exists, tight supply from the origin is driving prices higher.

Southern Europe

The Spanish corn market stayed steady day over day.

A second trader based in Spain said that the country’s grain prices are climbing because of a heat wave and favorable EUR-Dollar exchange rates, both of which are pushing prices higher.

He noted that for wheat in particular, the heat wave puts yields at risk across the EU, and with Matif prices firming, feed wheat prices are also increasing.”

A third trader said soybean meal prices were firming due to tighter supply from the origin. The CBOT is also rising, which is pushing prices higher.

Platts US Distiller Grains DDGS Daily Commentary

- Buyers shift preference to corn and soymeal
- Quality concerns and 45Z uncertainty hurt sales
- New crop offers firm slightly

The US dried distillers grains with solubles market remained quiet June 25, with participants citing weak summer demand and

growing preference for alternative feed ingredients.

Platts assessed CIF New Orleans dried distillers grains with solubles barges for the July shipment period at \$181/short ton on June 25, the Chicago DDGS truck market for the July delivery period was assessed at \$162/st and the South California rail market for the July delivery period was assessed at \$209/st.

One broker said DDGS has lost favor among some buyers as corn and soybean meal become more competitive. "Demand has moved away from DDGS," the broker said, pointing to Midwest hog producers as a key example. "Soymeal and corn are king again."

The broker added that inconsistent DDGS quality, pricing and execution have hurt buyer confidence. According to the source, uncertainty surrounding production decisions tied to the 45Z tax credit has also made it difficult for end users to secure longer-term supplies, as plants have become less willing to commit to forward volumes.

The broker questioned whether industry efforts to improve DDGS consistency will gain traction, suggesting producers may be reluctant to standardize products because many continue to focus on differentiation rather than uniform specifications. "They better hope they can retain it if so," the broker said regarding standardization implementation in all plants.

Another broker described the market as "very quiet today really."

While nearby demand remained soft, a third broker added that deferred values received modest support from stronger futures. "New crop offers firmed a touch with the board firmer," the broker said, though adding that "summertime [is] still weak."

Vegetable Oils

Platts Asia Palm Oil Daily Commentary

- Palm oil falls on crude drop, rival oils
- India buying interest up as prices drop

The Asian palm oil market fell June 25, with palm oil futures on Bursa Malaysia dropping for the third trading day, following declines in rival vegetable oils and crude oil prices to prewar levels.

Malaysia's palm oil export data by cargo surveyor for June 1-25, compared with the same period last month, showed increases — Intertek Testing Services reported 1.13 million metric tons, up 10.6%, while AmSpec reported 1.05 million mt, up 11.1%.

Despite a stronger export performance, market sentiment in the palm oil market remained pressured by the sharp decline in crude oil prices amid increased crude flows following the reopening of the Strait of Hormuz.

The benchmark palm oil contract for September delivery on the Bursa Malaysia commodity exchange fell MR74/mt to MR4558/mt June 25.

The Indian market picked up amid more buying quotes, with

Platts Latin America Soybean Oil Daily Commentary

- CBOT soy oil futures rise 1.89% on short cover
- Argentine, Brazilian FOB basis levels soften
- Wage talks continue amid export flow concerns

Brazilian and Argentine soybean oil FOB markets weakened June 25 as Chicago Board of Trade soybean oil futures rebounded from recent lows, while FOB basis levels in both countries softened following their sharp recovery earlier this month.

CBOT August soybean oil futures rose 1.89% day over day to settle at 69.54 cents/pound. Market participants said soybean oil futures recovered on short covering following recent losses, although favorable US crop conditions and expectations for ample global soybean supplies continued to weigh on the broader market outlook.

In Argentina, Platts assessed the soybean oil FOB Up River price for August loading at \$1,158.31/metric ton on June 25, down \$4.63/mt from June 24. The basis for August loading in the Up River paper market was assessed 150 points lower at minus 1,700 points to August (Q) futures at the Chicago Board of Trade.

In Brazil, Platts assessed the soybean oil FOB Paranaguá price for August loading at \$1,167.13/mt June 25, down \$6.83/mt. The basis for August loading in the Paranaguá paper market was assessed 160 points lower at minus 1,660 points to the August (Q) futures at the Chicago Board of Trade.

Platts also assessed the soybean oil FOB Paranaguá price for September loading at \$1,159.19/mt, up \$2.42/mt. The basis for September loading in the Paranaguá paper market was assessed 120 points lower at minus 1,600 points to the September (U) futures at the Chicago Board of Trade.

Market participants said the decline in basis values reflected the recovery in CBOT soybean oil futures rather than a significant deterioration in underlying physical demand. Despite the pullback, basis levels remained substantially stronger than the record discounts observed in early June, while FOB soybean oil values continued to show resilience amid recent volatility in futures.

Participants also continued to monitor wage negotiations between Argentine oilseed workers and exporters following another round of talks June 25. While no agreement has been reached, both parties agreed to continue negotiations ahead of the expiration of the mandatory conciliation period. Traders said no disruptions to soybean oil export flows had been reported, although developments in the Rosario export corridor remain a key focus for the market.

Platts is part of S&P Global Energy.

Platts Europe Vegetable Oil Daily Commentary

- Rapeseed oil curve differentiates, sunflower holds
- Ukraine exhausts old-crop sunflower oil supplies
- Russia maintains prices until new-crop visibility

European vegetable oil markets showed mixed performance on June 25, with rapeseed oil exhibiting a more differentiated curve while sunflower oil remained stable.

FOB Black Sea sunflower oil held at \$1,379/metric ton, supported by limited nearby availability. RSO FOB Dutch Mills front-month edged up Eur 1 to Eur 1,157/mt, while the second position declined Eur 3 to Eur 1,152/mt.

Third and fourth positions strengthened by Eur 2 and Eur 4, respectively, to Eur 1,138/mt and Eur 1,135/mt, suggesting that market participants remain more confident in deferred values than in nearby demand.

The sunflower oil market remained shaped by the contrasting supply positions of Ukraine and Russia. According to an India-based trader, crop conditions are estimated at about 80% good in Ukraine and 70% good in Russia.

While overall crop prospects remained favorable, Ukraine has largely exhausted its old-crop sunflower oil supplies, shifting greater responsibility for export availability to Russia for the rest of the marketing season.

This shift is expected to reshape global trade flows over the coming months. "Ukraine has largely exhausted its old-crop sunflower oil stocks," the trader said, adding that "Russia will be the primary supplier to India in the coming months."

"Russian sellers are expected to maintain old-crop prices until they have greater visibility into new-crop seed availability," the trader said. As a result, old-crop values are likely to remain relatively well supported despite comfortable crop conditions, as sellers remain reluctant to discount before production prospects become clearer.

For Europe, the implications were twofold. Limited Ukrainian old-crop availability continued to underpin sunflower oil values into the European market, while Russia increasingly served demand in Asia.

However, the trader also cautioned that "once new-crop supplies become certain, prices could decline sharply." This suggests that current price support largely reflects old-crop scarcity rather than tightening long-term fundamentals. As harvest visibility improves across the Black Sea region, the market may increasingly shift its focus toward anticipated supply growth and the potential for lower prices later in the season.

US 2026 corn crop off to good start as farmers weigh fertilizer costs, diesel prices

- Farmers face high fertilizer, fuel costs
- July-August weather to determine yields
- 68% of US corn rated good-to-excellent

US corn farmers say the 2026 crop is off to a generally good start despite a planting season disrupted by cold snaps, rain delays and wind, along with machinery problems and elevated input costs, including fertilizers, nitrogen and fuel.

Fertilizer decisions are one of the key questions for this year's crop. With prices high, many farmers are adjusting application

rates—especially cutting back on nutrients where the risk is seen as more manageable in the short term.

Nick Petterson, secretary of the Minnesota Corn Growers Association Board of Directors, and a farmer in Clear Lake, Minnesota, said some farmers made acreage changes before planting, mostly shifting some corn ground to soybeans because of fertilizer and other input costs.

"Farmers changed their minds and put some more soybean acres in," Petterson said to Platts.

He estimated acreage shifts in his area may have reached around 10%. On his own farm, he said only one field, around 5% of the acres, moved from corn to soybeans.

"I hear something similar talking to various people in the market," said a trader source from Kentucky.

Platts assessed Ammonia CFR USGC at \$725/mt on June 24, an increase of 74% compared to the same day prior year, \$417/mt.

In central Illinois, Mark Bunselmeyer, president of the Illinois Corn Growers Association and a farmer in Maroa, said the planting window was fairly typical, though bouts of helpful and unhelpful rain caused delays and led some acres to be replanted, with wind adding another challenge.

"Excessive wind caused sprayers to be parked," he said.

Bunselmeyer said machinery breakdowns also added stress, but planting was completed successfully. Unlike some farmers who shifted acres in response to high fertilizer costs, he said his farm kept its original crop plan.

"Our fertilizer was purchased and applied last fall," he said.

Bunselmeyer said his farm used variable-rate applications to focus fertilizer where it was most needed and reduce some costs.

Fuel prices have also weighed on this planting season. According to farmers and the National Corn Growers Association, fuel prices rose sharply in the middle of the planting season, when the average farm diesel price reached a record high \$5.41 per gallon in May.

"Current diesel prices are nearly double a year ago, while corn prices are slightly lower, worsening the diesel-to-corn exchange rate," NCGA said in a statement.

Corn quality

The latest USDA Crop Progress report showed 68% of the US corn crop rated in good-to-excellent condition for the week ended June 21, unchanged from the previous week. However, the rating remains below the 70% good-to-excellent rating reported during the same week last year. The gap has narrowed from the prior week, when the comparison stood at 68% this year versus 72% a year earlier.

Mindy McMurtry, senior analyst at S&P Global Energy CERA, said current condition ratings should be treated cautiously because it is still early in the season, but the overall signal is positive.

CERA's fertilizer survey also points to limited yield damage from fertilizer adjustments. McMurtry said the firm lowered its corn yield projection by only 0.5 bushel per acre to account for the risk, to 185.5 bu/ac for marketing year 2026-27

(September-August).

According to McMurtry, weather and not fertilizer application "should be the major factor" this season.

She said some parts of the Eastern Corn Belt are too wet, while areas of the Western Corn Belt are beginning to dry out, adding that the broader condition rating points to a good start.

That is also how farmers are viewing the season. Bunselmeyer said his crop looks good after a dry stretch following planting and recent rains, though cooler temperatures may slow growth. He also noted that some areas were hit by wind and hail.

Farmers and S&P Global Energy CERA analysts say the biggest test is still ahead, with July and August weather likely to determine whether early optimism turns into strong yields.

"The key weeks for the crop are still ahead," McMurtry said, referring to July and August.

Petterson said some farmers may have reduced nitrogen modestly, but he does not believe widespread cuts were large enough to meaningfully damage corn quality at this stage. The farmer also said that the cold spell came while much of the crop was already planted, delaying emergence.

"There were some freezes while a lot of the crop was in the ground," he said. "That just kind of delayed the crop."

Even so, he said the crop now appears to be in decent shape.

Platts, assessed on June 24 the outright price for July shipments of yellow corn to New Orleans CIF at \$196.05/mt and for August shipments at \$199.90/mt, while FOB Gulf for September was assessed at \$205.41/mt.

European corn prices firm as heat wave and euro-dollar rates drive market

- European corn prices firm on euro-dollar rates
- Heat wave affects new corn harvest in Italy
- Dutch buyers wait on harvest data before buying

European corn prices are firming amid euro-dollar exchange rates and a heat wave affecting crops, market participants in Spain, Italy and the Netherlands said.

Platts, part of S&P Global Energy, assessed Spain ex-works corn at Eur223/metric ton (\$253/mt) on June 24, up Eur2/mt from the beginning of the week and Eur7/mt higher week over week.

"Corn offers have remained almost unchanged for a few weeks at Eur222/mt, but bidding levels have increased from Eur218-Eur221/mt as of June 24," a Spanish broker said.

A trader confirmed the price movement, saying: "Prices have been affected by euro-dollar exchange rates." He added that higher corn prices were not limited to Spain, affecting markets across Europe.

An Italian trader said corn prices were rising in Italy as well, citing the heat wave as another reason. "The new corn harvest is being affected by the heat wave," they added.

At the same time in the Netherlands, a broker said corn offers and bids were increasing, following higher offers in the market amid euro-dollar exchange rates and the heat wave. He noted

that lower water levels in France were affecting freight rates.

The broker also said that Dutch buyers were not yet in panic-buying mode. Despite rising prices, they had covered their immediate needs and were now waiting for clearer indications on the wheat, barley and corn harvest results before committing to further purchases.

Assessment Rationale

Grains

Platts Ags EMEA Wheat Daily Rationale

Platts assessed the Milling Wheat Marker at \$232.50/metric ton on June 25, unchanged from the previous assessment. Russian 12.5% handysize wheat, assessed at \$232.50/mt, was the most competitive wheat out of the three components of the Milling Wheat Marker, which also includes Ukraine 11.5%, normalized to the nearest 25 cents of \$235.5/mt when adding May's quality normalization of \$6.15/mt, to account for its lower protein content, and CVB 12.5% wheat assessed at \$239/mt on the day. This reflects the Platts assessment window from July 23 - Aug. 6.

Platts assessed Black Sea wheat (Russian deepsea, 12.5% protein) unchanged at \$232.50/mt on June 25, in parallel with a tradable level for July at \$232.5/mt and August at \$231.5/mt, below offer at \$233/mt for July and above the bid at \$231/mt and below the offer at \$232/mt for August. The market is in a backwardation of \$1/mt was assessed between the H2 July and H1 August. This reflects the Platts assessment window from July 23 - Aug. 6.

Platts assessed Black Sea wheat (Ukraine deepsea, 11.5% protein) down by \$2/mt at \$229/mt on June 25, amid low demand, market participants said, above the bid at \$238/mt and below an offer at \$232/mt. This reflects the Platts assessment window from July 23 - Aug. 6.

Exclusions: No market data was excluded from the June 25 Black Sea wheat assessments.

Platts is part of S&P Global Energy. This rationale applies to symbol (s) <BSMWM00>, <WRBSD00>, <WUBSA00>

Platts Asia Wheat Daily Assessment Rationale

Platts assessed Australian Premium White wheat up \$2/metric ton day over day at \$275/mt FOB Kwinana June 25 for cargoes loading between Aug. 24 and Sept. 22, tracking a higher indicative value of \$275/mt and under the sharpest indicative offer of \$278/mt.

Platts assessed Australian Standard White wheat with no protein guarantee up \$2/mt at \$270/mt for cargoes loading over the same period, tracking a higher indicative value of \$270/mt and under the sharpest indicative offer of \$272/mt.

This maintains a \$5/mt spread between Australian Premium White and Australian Standard White with no protein guarantee.

Platts is part of S&P Global Energy.

Platts Canada Wheat Daily Rationale

Platts assessed Canada Western Red Spring Wheat 13.5% FOB Vancouver 30-45 days forward at \$266.76/metric ton on June 25, down 28 cents/mt from June 24.

CWRS Wheat 13.5% FOB Vancouver basis 30-45 days forward, spanning July 25-Aug. 9 was assessed 1 cent higher at MIAH Hard Red Spring Wheat September (U) futures plus 111 cents/bushel based on August bids heard at U plus 110 cents/bu and August offers heard at U plus 115-120 cents/bu.

CWRS Wheat 13.5% FOB Vancouver basis 45-60 days forward, spanning Aug. 9-24 was assessed 1 cent higher at U plus 111 cents/bu based on August bids heard at U plus 110 cents/bu and August offers heard at U plus 115-120 cents/bu.

CWRS Wheat 13.5% FOB Vancouver basis 60-75 days forward, spanning Aug. 24-Sept. 8 was assessed unchanged at U plus 105 cents/bu based on September value indicated at U plus 105 cents/bu and September offers indicated at U plus 110-115 cents/bu.

Platts is part of S&P Global Energy.

Exclusions: No data was excluded in the assessments.

Platts Asia Corn Daily Rationale

Platts assessed corn CFR Northeast Asia down \$1/metric ton day over day at \$260/mt CFR June 25 for feed-quality corn arriving over Sept. 23 to Oct. 23 into Pyeongtaek, below a normalized indicative offer at \$261.66/mt CFR and tracking lower futures and freight rates.

Platts is part of S&P Global Energy.

Asia corn assessments can be found on <PAA2440>

Market commentary can be found on <PAA2688>

This rationale applies to symbol(s) <WCINV00>

Platts Argentina Corn FOB Up River Daily Rationale

Platts assessed corn FOB Up River for loading in August at \$204.82/metric ton on June 25, \$3.34/mt higher from the previous assessment.

The assessment considered the FOB premium for Up River August-loading unchanged at plus 96 cents/bushel to Chicago Board of Trade September (U) corn futures, based on an indicative value heard at that level, lower offers heard at U plus 98 cents/bu, and lower bids heard at U plus 93 cents/bu at the market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <ARGCA00> and <ARGCB00>.

Platts Brazil Corn Daily Rationale

Platts assessed the Brazilian corn FOB Santos price for August loading at \$215.44/metric ton on June 25, \$3.35/mt higher from the previous assessment.

The assessment considered the FOB Santos basis for August loading cargoes unchanged at plus 123 cents/bu to the Chicago

Board of Trade September (U) contract, based on steady offers for August H1 loading at U plus 130 cents/bu and bids for August H1 loading at U plus 122 cents/bu at the market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <ABCSA00> <ABCSB00>

Platts US Corn Daily Assessment Rationale

Platts assessed the US Yellow Corn No. 2 CIF New Orleans barge basis for July shipment at 88 cents/bushel over the Chicago Board of Trade July (N) corn futures contract on June 25, down 3 cents from the previous assessment. This was based on a bid heard at 86 cents/bu, and an offer at 89 cents/bu.

Platts assessed the US Yellow Corn No. 2 CIF New Orleans barge basis for August shipment at 92 cents/bu over the CBOT September (U) corn futures contract on June 25, unchanged with the previous business day. This was based on an offer heard at 94 cents/bu, and a bid heard at 81 cents/bu.

Platts assessed the US Yellow Corn No. 2 FOB Gulf basis for September shipments at 106 cents/bu over the CBOT September (U) corn futures contracts on June 25. This was based on offers heard at 110 cents/bu for the first half of September, and 112 cents/bu for the second half of the month.

No information was excluded.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <WCNOE00> <WCNOU00>.

Platts FOB Black Sea Corn Daily Assessment Rationale

Platts assessed Ukrainian corn unchanged at \$224/metric ton FOB POC on June 25, below an offer for July loading heard at \$242/mt CIF Marmara, normalized to \$226/mt. The normalization reflects the freight rate of \$16/mt from Ukraine ports to Marmara port. There were no bids heard in the market within the assessment window. The structure between the second half of July and the first half of August was assessed flat. This reflects the Platts assessment window from July 23-Aug. 6.

Exclusions: No market data was excluded from the June 25 Black Sea corn assessment.

Platts is part of S&P Global Energy.

This rationale applies to the symbol <CUBSU00>.

Oilseeds.

Platts Asia Soybeans Daily Rationale

Platts assessed CFR China first-month soybeans up 19 cents/metric ton day over day at \$493.01/mt, while basis was up 4 cents/bushel at 221 cents/bu over Aug (Q) CBOT June 25, below the sharpest normalized offer at 222 cents/bu over Aug (Q), for Brazil August shipment.

Platts assessed CFR China second-month soybeans down \$1.19/mt day over day at \$500.45/mt, while basis was unchanged at 223 cents/bu over Nov (X) CBOT, below the sharpest offer at 228 cents/bu over Nov (X), and tracking indicative value at 223 cents/bu over Nov (X), for Brazil September shipment.

Platts is part of S&P Global Energy.

Platts Brazil Soybean Daily Assessment Rationale & Exclusions

Platts assessed the SOYBEX FOB Santos soybean contract for August loading at \$456.38/metric ton on June 25, up \$7.08/mt from the previous assessment.

The FOB Santos basis for August loading was assessed 1 cent/bushel lower at plus 105 cents/bushel to the Chicago Board of Trade August (Q) contract, based on a spread to the Paranaguá paper market last heard at parity. No bids or offers were heard for the full August loading of FOB Santos cargo on the day.

The FOB Paranaguá basis for August loading was assessed 1 cent/bu lower at plus 105 cents/bu to the CBOT (Q) contract, based on an indicative value heard at that level, lower offers at Q plus 110 cents/bu and lower bids at Q plus 100 cents/bu at the market close.

Platts assessed the SOYBEX FOB Santos soybean contract for March loading at \$430.10/mt on June 25, up \$5.60/mt from the previous assessment.

The FOB Santos basis for March loading was assessed 5 cents/bu lower at minus 5 cents/bu to the CBOT March (H) contract, based on a spread to the Paranaguá paper market last heard at parity. No bids or offers were heard for the full March loading of FOB Santos cargo on the day.

The new crop FOB Paranaguá basis for March loading was assessed 5 cents/bu lower at minus 5 cents/bu to the CBOT March (H) contract, based on an indicative value heard at that level, lower offers at parity and lower bids at H minus 10 cents/bu at market close.

Exclusions: No data was excluded.

Animal Feed and Protein

Platts Argentina Soybean Meal Daily Rationale

Platts assessed the Argentine soybean meal FOB Up River price for August loading on June 25 at \$336.20/metric ton, \$1.10/mt higher than the previous assessment.

The basis for August loading in the Up River cargo market was assessed \$3/short ton lower at minus \$1/st to the August (Q) futures at the Chicago Board of Trade. The assessment considered lower offers at par and lower bids at minus \$2/st to the CBOT Q contract at market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYMAA00> <SYMAB00>

Platts Brazil Soybean Meal Daily Rationale

Platts assessed the Brazilian soybean meal FOB Paranaguá price for August loading on June 25 at \$339.51/metric ton, \$3.31/mt higher than the previous assessment.

The basis for August loading in the Paranaguá paper market was assessed \$1/short ton lower at plus \$2/st to the August (Q) futures at the Chicago Board of Trade. The assessment considered a trade heard at plus \$3/st earlier on the day, followed by offers at plus \$3/st and lower bids at par to the CBOT Q contract at market close.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYMBA00> and <SYMBB00>.

Platts US Dried Distiller Grains DDGS Daily Assessment Rationale

Platts assessed CIF New Orleans dried distillers grains with solubles barges for the first July shipment period at \$181/short ton on June 25, based on a bid heard at \$180/st and an offer heard at \$185/st.

The Chicago DDGS truck market for the July delivery period was assessed at \$162/st, unchanged from June 24, based on a bid heard at \$155/st and an offer heard at \$163/st.

The South California rail market for the first July delivery period was assessed at \$209/st, based on a bid heard at \$206/st and an offer heard at \$212/st.

Platts is part of S&P Global Energy.

This rationale applies to symbols <ACDDG00> <AADDG00>.

Vegetable Oils.

Platts Asia Palm Oil Daily Rationale

Platts assessed CPO CFR WC India at \$1,220/metric ton June 25 for July loading, down \$7/mt from June 24, below an offer and above a bid.

A CPO offer was heard at \$1,225/mt and a bid at \$1,235/mt on a CFR WC India basis, shipping in July.

An August shipment of CPO CFR WC India was at \$1,230/mt June 25, down \$7/mt from June 24, considering a \$10/mt carry between July and August.

Platts assessed CPO FOB Indonesia at \$1,187.50/mt June 25 for July loading, down \$5/mt from June 24, below an offer and above a bid.

A CPO offer was heard at \$1,197.50/mt and a bid at \$1,177.50/mt on a FOB Dumai basis, shipping in July.

An August shipment of CPO FOB Dumai was at \$1,197.50/mt June 25, down \$5/mt from June 24, considering a \$10/mt carry between July and August.

Platts assessed RBDPS FOB Indonesia at \$1,050/mt June 25 for July loading, down \$7.50/mt from June 24, below an offer and above a bid.

An RBDPS offer was heard at \$1,065/mt and a bid at \$1,035/mt on a FOB Dumai basis, shipping in July.

An August shipment of RBDPS FOB Dumai was at \$1,060/mt June 25, down \$7.50/mt from June 24, considering a \$10/mt carry between July and August.

Platts assessed PFAD FOB Indonesia at \$995/mt June 25 for July loading, down \$5/mt from June 24, below an offer and above a bid.

A PFAD offer was heard at \$1,010/mt and a bid at \$980/mt on a FOB Dumai basis, shipping in July.

An August shipment of PFAD FOB Dumai was at \$1,005/mt June 25, down \$5/mt from June 24, considering a \$10/mt carry between July and August.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <ACPOA00> <ACPOB00> <APFAD00> <ARBSA00>

Platts Argentina Soybean Oil Daily Rationale

Platts assessed the Argentine soybean oil FOB Up River price for August loading at \$1,158.31/metric ton June 25, down \$4.63 from June 24. The basis for August loading in the Up River paper market was assessed 150 points lower at minus 1,700 points to August (Q) futures at the Chicago Board of Trade. The assessment considered an indicative value last heard at that level, bids at minus 1,730 points, and offers at minus 1,650 points to the CBOT Q contract at the market close. No trades were confirmed before

the market close for August loading in the FOB Up River paper market June 25.

Platts is part of S&P Global Energy.

This rationale applies to symbol(s) <SYOAA00> <SYOAB00>.

Platts Brazil Soybean Oil Daily Rationale

Platts assessed the Brazilian soybean oil FOB Paranaguá price for August loading at \$1,167.13/metric ton June 25, down \$6.83 from June 24. The basis for August loading in the Paranaguá paper market was assessed 160 points lower at minus 1,660 points to the August (Q) futures at the Chicago Board of Trade. The assessment considered an indicative value last heard at that level, offers at minus 1,600 points, and bids at minus 1,740 points to the CBOT Q contract at the market close. No trades were confirmed before the market close for August loading in the FOB Paranaguá paper market June 25.

Platts assessed the Brazilian soybean oil FOB Paranaguá price for September loading at \$1,159.19/mt June 25, up \$2.42 from June 24. The basis for September loading in the Paranaguá paper market was assessed 120 points lower at minus 1,600 points to the September (U) futures at the Chicago Board of Trade. The assessment considered an indicative value last heard at that level and offers at minus 1,500 points to the CBOT U contract at the market close. No bids or trades were confirmed before the market close for September loading in the FOB Paranaguá paper market June 25.

Platts is part of S&P Global Energy.
